"We're on a vacation in our own Home"

. . . no more shoveling coal or hauling ashes. Gas heat is such a relief!"

Mr. and Mrs. Seehausen with their children, Charles, Marian, and Donald.

Charles, Donald, and Marian Seehausen now have this game room in the basement—thanks to gas heat.

The Seehausen home at 21 Linden Avenue, Crete, Illinois—just one of the many thousands of homes in the Chicago area that have switched to gas heat.

An interview with Mr. Charles Seehausen and family, 21 Linden Avenue, Crete, Illinois

"I OOK at a family free from the coal shovel—free from soot, dust, dirt and furnace worries! No wonder they say it's like a vacation since they installed gas heat.

"Gas heat is such a relief," says Mr. Seehausen. "No more hauling ashes and poking fires. And the house stays clean from one month to the next, because there's no soot or dirt when you heat with gas."

"Gas heat is healthier, too. With our old heating unit the house was always too hot or too cool, and sharp fluctuations in temperature often gave the children colds. But gas gives uniform, even heat day and night."

Low rates . . . you invest nothing to try

Think of it—rates for heating with gas are now one half of what they were during the 1930-31 heating season. And—you can try gas heat on your own one cent! We will install a burner in your present furnace or boiler at our own expense. You pay only the rental on the equipment, which amounts to $5 a month in the average home. This charge is included with the bill for the gas you use. You try it for a month, two months, a year. And if within the year you find that you are not completely satisfied with gas, we will take it out at our expense and replace your former heating equipment in good workmanlike order. But—if you decide to keep gas heat—as we think you will—the rental you have paid applies on the purchase price of the equipment.

Act now!

Don't delay! You will never regret accepting this liberal offer on gas heat. Telephone for full details.

ESSENTIAL!

Dreary days and uncomfortable nights might be a cessation of your gas service.

You could, of course, live without this service but modern life would certainly be lacking in many comforts which have almost become necessities.

This important service is constantly at your command, 24 hours each day, for cooking and heating and other purposes. This service must be maintained. It has become so essentially a part of living.

And from the standpoint of economic common sense, the price you pay for this service must cover the production and distribution of it, plus a reasonable return on the money invested to make it possible.

STARTLING TRIAL OFFER!

To prove that every home can afford to heat with gas, we'll install it at our expense . . . and remove it at our expense, if you don't like it.

YOU INVEST NOTHING!

Without ONE CENT of investment by you, we install the most modern burner in your furnace or boiler. If you are satisfied, it stays. If not—and you are the sole judge—out it comes and your former heating system is re-installed—AT OUR EXPENSE. We make this offer because of our confidence in the perfection of gas heat.

Gas heat can be installed in your home without allowing the house to cool off
