Washington—The state department Friday decided that Italy is entitled to the extradition of Porter Charlton, who was demanded on a charge of murder and who confessed to the murder of his wife near Lake Como, Italy.

It is held by the department that the treaty under which Italy made the demand must be interpreted literally until it shall have been abrogated.

The department holds that treaties are not reciprocal, which means that a treaty may be binding, even though one nation has the advantage over the other in some of its details. Such a treaty is undoubtedly the one now in force between Italy and the United States, but the department frankly says that it will abide by the convention as a principle of national faith.
