A Wretched Mistake

to endure the itching, painful distress of Piles. There's no need to. Listen! "I suffered much from Piles, writes Will A. Marsh, of Siler City, N. C. "till I got a box of Bucklen's Arnica Salve, and was soon cured." Burns, boils, ulcers, fever sores, eczema, cuts, chapped hands, chilblains, cannot long resist it. 25c at Barrington Pharmacy.

ORCHARD NOTES.

Stop cultivation now to allow the wood to harden for winter.

Trim the apple trees just enough to let the air and sunlight in to ripen the fruit.

On a tree that is properly pruned most of the fruit will be found on the inside branches.

A tree that is infested with insects will not thrive any better than a pupil covered with lice.

In breaking up the orchard sod if you cannot use a disk use a plow with a narrow shear and use a short single tree.

Barnyard manure is the best fertilizer for an orchard, but on old neglected soils the ground should first be plowed before the manure is applied.

A dust mulch would prevent the evaporation of the moisture in the orchard just the same as in the open field. Then why not use it? Some men do not put a knife or saw into their orchard for four or five years, then in a fit of enthusiasm they cut and slash, doing more harm than good.

Holy Cross Day.

Holy Cross day, September 14, is a name sometimes applied to the festival of the exaltation of the cross which commemorates the restoration of the cross to Jerusalem in 628.

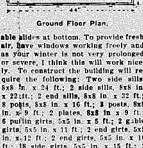
STABLE FOR STALL FEEDING

Detailed Plan and Illustration of Building Suitable for Caring for Twenty Head.

A description and plan of a stable suitable for the care of 20 head of cattle, with a feed passage running down the center, is given here.

In order to gain room overhead, the side wall should be 16 feet high and have a nine gambrel roof over all. Such a building will hold fodder for the head during winter. Make the stable ceiling eight feet high and put in every window as shown W on plan; doors, D.

Put in two air shafts, 20 in. square, leading up to peak of roof and discharging into cupolas with louvre boards to cause draft. Fit with adjust-



able slides at bottom. To provide fresh air, have windows working freely and as your winter is not very prolonged or severe, I think this will work nicely. To construct the building will require the following: Two side sills, 8x8 in. x 24 ft.; 2 side sills, 8x8 in. x 22 ft.; 2 end sills, 8x8 in. x 22 ft.; 9 posts, 8x8 in. x 16 ft.; 8 posts, 8x8 in. x 9 ft.; 2 plates, 8x8 in. x 9 ft.; 6 purlin girts, 5x5 in. x 5 ft.; 2 gable girts, 5x5 in. x 11 ft.; 2 end girts, 5x5 in. x 12 ft.; 2 end girts, 5x5 in. x 16 ft.; 18 side girts, 5x5 in. x 15 ft.; 2 plates 8x8 in. x 22 ft.; 8 purlin posts, 7x7 in. x 18 ft.; 2 purlin plates, 7x7 in. x 22 ft.; 2 purlin plates, 7x7 in. x 22 ft.; 4 main beams, 8x8 in. x 22 ft.; 4 purlin beams, 7x7 in. x 20 ft.; 42 joists, 2x8 in. x 12 ft.; 21 joists, 2x8 ft. x 10 ft.; 32 lower rafters, 2x8 in. x 13 ft.; 32 upper rafters, 2x3 in. x 13 ft.; 18 pieces, 2x4 in. x 10 ft. for braces; 2,272 sq. ft. matched siding; 2,292 sq. ft. roofing 1in. boards; 1,700 sq. ft. loft flooring, 7/8 matched; 19 M. cedar shingles; concrete floor, 20 bbls. cement, 23 yards gravel, mixed 8 to 4; 10 rolls tar paper to put on twenty thick; 100 lbs. 3½-in. nails; double boarding, 9 ft. high; 50 lbs. 5-in. nails; 200 lbs. 3-in. nails; 95 lbs. shingle nails; rafters, joists, etc.

The stable may be built of rough siding and the row ties may be one of the numerous V-bar stanchions now on the market.

Build concrete floor with 8-10 inch elevated feed passage and make manure trench seven inches deep on row stand side and drop walk behind cows, two inches lower than row stand, thus giving a depth to trench at this side of five inches.

Saved at Death's Door.

"The door of death seemed ready to open for Mrs. Murray M. Ayers, of Transit Bridge, N. Y., when his life was wonderfully saved. "I was in a dreadful condition," he writes, "My skin was almost yellow, eyes sunken, tongue coated, emaciated from losing 40 pounds and growing weak; finally a patient fever took hold, pulling me down to death in spite of doctors. Then that matchless medicine, Electric Bitters, cured me. I regained 40 pounds lost and now am well and strong." For all stomach, liver and kidney troubles they're supreme. 50c at the Barrington Pharmacy.

Old-Time Hospitality.

An old-fashioned woman doesn't think she has observed all the rules of hospitality unless she asks her guests to have chicken ten times, potatoes six times and bread twice.—Atchison Globe.

Some of the most effective uplift movements in history began with raising the devil, and when, after all, needs raising most.—Puck.

Nervous Prostration For Three Years

"Dr. Miles' Restorative Nervine cured me of a period of nervous prostration over three years duration, and the Anti Pain Pills are invaluable to us as the food of our house. They have been household remedies with us for many years.
WM. J. LOUGHRAN,
1214 Catherine St.,
Philadelphia, Penna.

Much sickness is due to nervous troubles. Headache, dizziness, epilepsy and insomnia are nervous troubles. Then there is a large class of disorders which arise from a weakness of the nerves of an organ or part, as weak lungs, heart, stomach, kidney, bladder, eyes, etc. Dyspepsia and indigestion are usually the result of nervous disorders.

Restorative Nervine

soothes the irritated nerves, and assists the nerve cells to generate nerve force.

Dr. Miles' Nervine is sold by all druggists. If the first bottle fails to benefit, druggists will return your money.
