New York telegram: Gen. William T. Sherman has breathed his last. The time of his demise was 1:50 o'clock Saturday, New York time.

GENERAL WILLIAM T. SHERMAN.

So extraord nary have been the variations of Gen. Sherman's conditions that Drs. Alexander and Janaway announce that they can state only facts; and no predictions or calculations can be made with any degree whatever of certainty. Dr. Alexander says that there were moments during the last few days when he could have said with absolute certainty, so far as any human judgment can be certain. that Gen. Sherman would not live five minutes. From midnight Friday on he began to fail again as he had failed several times lefore. He grew weaker every hour. His glands swelled. His throat filled with mucus. The erysipelas left him, but it did not depart 'without impressing an indelible imprint in a complete prostration of its victim. He passed quietly away.

He will be buried in St. Louis. Mo.

ANOTHER SENSATIONAL MUR-DER IN LONDON.

A Man Arrested on Suspicion of Be-

ing Jack the Ripper, the Author

of the Fiendish Murders.

London cablegram. The police have arrested a man on suspicion that he is "Jack the Ripper," the author of the horrible Whitechapel crimes, the latest of which has just been committed. A policeman who saw the unfortunate woman a short time before the murder said that she was talking to a man who looked liked a sailor. The police searched all the cattle ships but found no reason for arresting any one. Late in the evening & man was arrested on the docks and locked up on suspicion. The police refuse to tell what they know about him.

Jack the Ripper's latest effort differs from the preceding ones in that on this occasion the human butcher did not have time to complete his work, and from his selecting a place almost as public as the Strand.

BANKER COWLES ARRESTED ON A CHARGE OF MURDER.

DID HE KILL HIS WIFE? CARRIED THE DEAD KING HOME

The Burglar Story Said to Be False -Alleged Motive for the Terrible Crime-The Evidence.

S. B. Cowles, president of the Pacific

Bank of Clarks, Nebraska, and one of the most prominent and oldest citizens of Nebraska, has been arrested charged with having deliberately murdered his wife early on the morning of Feb. 4. Mrs. Cowles was choked to death in her bed chamber. Her screams attracted attention, and when neighbors rushed in the husband was lying apparently unconscious on the floor, with blood streaming, from a wound in the head, while the dead body of Mrs. Cowles was stretched on the bed with the deep imprints of the murderer's fingers on her throat. The house was ransacked as if by burglars in search of tooty, and some money and jewelry were missing. When resuscitated the husband described how a masked burglar had rushed into the bedchamber, felled him to the foor, and killed his wife. He immediately offered \$5,000 for clews to the murderer.

At the inquest suspicion was directed toward the banker as the murderer. Following out this theory the numerous detectives evolved much to confirm the report. Fifty dollars, supposed to have been stolen by the burglar, was found laid away securely in a closet. The door, which was thought to have been forced by the murderer, was found to have been broken by a hatchet, which was also found in the stab'e.

The alleged motive for the murder is a \$5,000 life insurance which the husband took out on his wife in the American Legion of Honor. Notwithstanding the suspicion directed toward Banker Cowles. so much was he esteemed and so influential was he that the jury, after two weeks' investigation, referred the matter to the county authorities When Cowles discovered that he was suspected he was terribly affected and requested the closest scrutiny and apparently tried to assist the authorities. At noon the banker left the city, ostensibly for Omaha. The detectives were alert, and Cowles was intercepted and arrested on the train at Columbue.

SUCCESS OF A COTTON PICK-ING MACHINE COMPANY.

Waco, Texas, Secures a One Hundred Thousand Dollar Machinery Plant -Her Citizens Jubilant.

The citizens of Waco, Texas, are jubilant over securing the location of the plant of the Lone Star Cotton Picking Machine Co. The machine was in almost constant use on the farms adjoining Waco during the last cotton picking season. The bankers and business men saw it at work and have taken about \$100,000 worth of stock in the Company. This money will be used to build and furnish a factory to begin manufacturing. The sale of stock will be continued unti! the proceeds will suffice to enlarge until a capacity to manufacture 20,000 new machines a year is reached, as that number will be required to pick the cotton crop of Texas alone. Although the promise of returns to investors which the Company makes seem like the vision of an Eldorado, it is not too much to expect that a company which will reduce the cost of picking our cotton crop from \$100.000,000 annually to less than \$15,000,000 will earn enormous profits for its stockholders.

About 2 a. m. as Constable Thompson was patrolling Chamber street, a narrow thoroughfare that ends in Leman street, where the police station is situated he passed under the railway arch of the Blackwell line leading into Royal Mint street and contiguous to the mint and the tower. He had got about half way through when he stumbled over the body of a woman lying in the center of the roadway in a pool of blood which was still oozing from the gash in the throat. He could hear a gurgling sound and on looking down made out in the darkness that the unfortunate creature was still alive, as her limbs moved slightly and her lips seemed to be endeavoring to articulate. Hardly had the officer noticed this when he was startled by hearing receeding footsteps Running as quickly as possible to the other end of the archway he could see nothing, as before he had reached it the sound was lost, showing that the murderer had made his escape.

As may be imagined the excitement in Whitechapel is intense, and the adjoining streets are crowded. The police attach great importance to the fact that when her clothing was examined a second hat was found. It has for a long time been a favorite theory of the police that Jack the Ripper, despite his masculine pseudonym, would eventually be found to be a woman. The fact that the second hat was not of the same size as that found on the dead woman's body strengthens the theory.

A Few Recipes.

CITRON CAKE -Beat the yolks of four eggs, half a pound of sugar and one-fourth of a pound of butter to a cream, then add a generous pinch of salt, one teaspoonful of extract of vanilla and one-half teacupful of icewater. To one pint of sifted flour add a heaping teaspoonful of baking powder, mix thoroughly, slice one pound of dried citron, dust with flour, mix all ingredients together, adding citron and beaten whites of the eggs last. Bake in the loaf and ice.

BEEF TONGUE: Tomato Sauce .-Soak a corned beef tongue in cold water for six hours, wash, put into a kettle filled with cold water, and let it come slowly to the boiling point, and cook until easily pierced with a fork. Remove the skin and any fat, cut into thin slices and serve very hot with tomato sauce, which should be prepared before the tongue is taken up, as follows:

Put one pint of canned tomatoes, one even teaspoonful of finely chopped white onion, one tablespoonful of granulated sugar and a palatable seasoning of salt and pepper, into an agate stew-pan. Rub one tablespoonful each of butter and flour to a paste and when the tomatoes are hot, stir it in. let simmer for five minutes, strain and serve in a gray boat or pour over the sliced tongue, as preferred.

APPLE CUSTARD.—Peel half a dozen large tart apples, cut into quarters, remove the cores and put into a wellbuttered earthen baking dish with one-half teacupful of hot water and two-thirds of a teacupful of powdered sugar. Bake until the apples are tender, but not soft, and in the meantime prepare a custard as follows: One ant in order to be true! Are there no quart of new milk, six beaten eggs, one teaspoonful of corn starch dissolved in the milk, one-half teaspoon- cannot people diligently tell these, ful of sait and one-half teacupful of sugar. Flavor with extract of lemon, and pour over the apples and bake until the custard is firm. Serve with whipped cream.-Mrs. A. H. Knapp, in Our Country Home.

Co-Operative Housekeeping. "There is a man up town," said another man yesterday, "who has a unique idea about co-operative housekeeping. He has been going through some pretty deep waters lately with his servant experiences, and this has probably induced him to give the matter some thought. He proposes that some capitalist shall build a block of residences in the form of a hollow square, in the interior court of which is to be located the common kitchen. Small tracks connect this kitchen with the dining-room of each residence, and hampers properly fitted to hold entire meals, are run upon them. The cooking for the entire block is to be done in the general kitchen by a corps of competent cooks, under a commissariat or steward. At the hour desired by the householder the meal is packed in its hamper and instantly conveyed to his dining-room, whence it is served as if from his private kitchen. One servant, either man or woman, would thus suffice for every family, as only the routine duties of keeping the house in order and waiting at table would be necessary .---N. Y. Sun.

Beautiful Women of Peru.

As all the world knows, the women of Lima are proverbial for their beauty. Such large, liquid, "soulful" eyes; such rosebud lips, and pearly teeth; such dainty hands and feet and rounded arms and graceful figures it would be hard to find so commonly anywhere else on the earth. A comparatively few of the most ultra-fashionables wear modern hats and bonnets for state occasions, but the vast majority still cover their glossy black tresses with the lace mantilla or black manta of silk or woolen. The latter is the only correct thing for church wear among young and old, rich and poor; and a bonnet would no more be allowed during service than a gentleman at the North would be expected to come to the communion alter with his hat on his head. But the mantas are no longer put on as formerly, so that only one eye is visible, but are deposed with more or less coquettish effect, and are vastly more becoming to the Castilian type of beauty than the most elaborate triumphs of French millinery .-Lima Letter.

Saying Unpleasant Things.

There is a certain class of people who take great satisfaction in saying unpleasant things. They call this peculiarity "speaking their minds, or "plain-speaking." Sometimes they dignify it by the name of "telling the truth." As if truths must be unpleaslovely, charming, gracious truths, in the world? And if there are, why making others happier for the telling rather than hasten to proclaim all the disagreeable ones they can discover? The sum of human misery is always so much greater than the sum of human happiness that it would appear the plainest duty to add to the latter all we can, and do what lies in our power to diminish the former. Trifles make up this amount, and in trifles lie the best and most frequent opportunities. It may seem a little thing dering on actual profanity. A maiden to tell another what is out of place in with brown eyes and a rosy mouth her appearance or possessions; but if the information is unnecessary and makes her unhappy, it is clearly an

ATTEMPT OF A TENDERFOOT TO LOAD A PACK ANIMAL.

Staying Power of The Diamond Hitch. Device of a Spanish Muleteer Which No One Has Improved Upon.

"Whoa! Whoa, there, Balaam! Whoa, you infernal son of a wild ass!"

The Santa Inez canyon echoed with the loud cries of a very angry man, who was running down a rocky trail in pursuit of a nimble and sure-footed mule. His cries were unheeded by the animal, and very likely were unheard, because at every jump a tin-pan or kettle or some other piece of camp-furniture fell out of the pack, rattled down about the mule's heels, and rolled clattering down the steep side of the canyon to the rocky bed of the streamlet at the bottom. At every successive clatter of hardware the mule increased his speed, and the pursuing man increased the volume and im piety of his remarks.

READY FOR THE PACK.

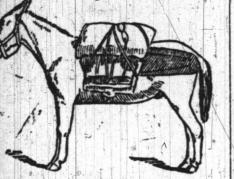

"Hi, there! (There's that blanked flour sack busted., Carajo!) Whoa, you broncho son of a zebra! (D-n a man that can't pack better than that. There goes the Dutch oven hellitywhoop!) Whoa, Balaam! Hijo de una. (Oh, you're a jim-dandy packer; you couldn' lash a blanket on a rail fence. There's the last of the potatoes gone to sheol. Beans, b'gosh, all along the trail.) Whoa, you long-eared child of the devil. (I'll be good goldanged, hanged, banged, keel-hauled, and blooming well mauled if I'll chase that d- mule another foot.') Run, you mud-colored sepulcher of seven devils! Hi yi! Go it, old limber heels."

The man stopped in an opening in the brush and swung his hat and popped with his six-shooter at the galloping mule.

"Run! (Bang!) That frying-pan will eatch you and eat you up if you don't hurry. (Pop!) That's the style! Run. durn you, run! (Bang!) Keep a-running! Run down a steep place into the (Pop! Pop! Pop!) Go to the seal devil.

of which was attached a cinch fitted with ring and hook. The hook end of the cinch was passed to the off-side trooper, and a rope thrown to him across the mule's back. He made a loop in the slack, caught it in the cinch-hook, and threw a loop back to the near side. This loop was passed under the stanching rope of the lash, jammed down close to the cinch ring and under the corners of the aperojo. The off side man had done the same with his loop. Ine nearside man pulled the loop tight, and guided the rope to bind diagonally

ross the rear end of the pack, when the off-side man took up the slack and made his rear loop, drawing through the standing rope on top. Loops were thrown over the front ends in the same way, and the front loop passed under the corners of the aperojo. The loose end was passed around the pack, follow. ing the loops under the saddle, and when the two troopers had taken up all the slack and cinched the mule tightly the end was made fast to the standing rope. It took them about two minutes to do the whole thing, and it looked as easy as lying, as the stranger remarked; but when it was finished it was that despair of the tenderfoot and pride of the woolly west-the diamond hitch.

Centuries ago, says the San Francisco Examiner, when the mule and the ass were the freight cars of old Spain, a muleteer with some genius of invention devised the diamond hitch for fastening the cargo upon an animal's back, and no modern packer has been able to improve that hitch. The Spaniards, who conquered Mexico and looted the treasure houses of the Montezumas, piled their sacked plunder upon the backs of horses and mules, and made it fast with the diamond hitch, and it is not recorded' in history that any of it ever worked loose and fell off by the wayside. The

hitch was as secure and tenacious as the gr of the conquistador's good right hand upon his swordhilt, or the closing of his loyal left fist upon the beaten gold of a broken crown. It never

EXCITEMENT IN ROCHESTER.

The Commotion Caused by the Statement of a Physician.

An unusual article from the Rochester, N. Y., Democrat and Chronicle, was recently republished in this paper and was a subject of much comment. That the article caused even more commotion in Rochester, the following from the same paper shows:

Dr. J. B. Henion, who is well-known not only in Rochester but in nearly every part of America, sent an extended article to this paper, a few days since, which was duly published, detailing his remarkable experience and rescue from what seemed to be certain death. It would be impossible to enumerate the personal enquiries which have been made at our office as to the validity of the article, but they have been so numerous that further investigation of the subject was deemed necessary. With this end in view a representative of this paper called on Dr. Henion, at his residence, when the following interview occurred: "That article of yours, Doctor," has created quite a whirlwind. Are the statements about the terrible condition you were in, and the way you were rescued such as you can sustain?"

"Every one of them and many additional ones. I was brought so low by neglecting the first and most simple symptoms. I did not think I was sick. It is true I had frequent headaches; felt tired most of the time; could eat nothing one day and was ravenous the next; felt dull pains and my stomach was out of order, but I did not think it meant anything serious.

"The medical profession has been treating symptoms instead of diseases for years, and it is high time it ceased. The symptoms I have just mentioned or any unusual action or irritation of the water channels indicate the approach of kidney disease more than a cough announces the coming of consumption. We do not treat the cough, but try to help the lungs. We should not waste our time trying to relieve the headache, pains about the body or other symptoms, but go directly to the ments."

"This, then, is what you meant when you said that more than one-half the deaths which occur arise from Bright's disease, is it, Doctor?"

"Precisely. Thousands of diseases are torturing people to-day, which in reality are Bright's disease in some of its many forms. It is a Hydra-headed monster, and the slightest symptoms should strike terror to every one who has them. I can look back and recall hundreds of deaths which physicians declared at the time were caused by paralysis, apoplexy, heart disease, pneumonia, malarial fever and other common complaints which I see now were caused by Bright's disease."

"And did all these cases have simple symptoms at first !!'

"Every one of them, and might have been cured as I was by the timely use of the same remedy. I am getting my eyes thoroughly opened in this matter and think I am helping others to see the facts and their possible danger also."

Mr. Warner, who was visited at his establishment on N. St. Paul street, spoke very earnestly:

"It is true that Bright's disease had increased wonderfully, and we find, by re-Patrick O'Donnell, a laborer, went liable statistics, that from '70 to '80 its

Naughty Girls Who Swear.

A complaint commonly made against our fashionable girls, says The Banner of Light, is that they use slang borcrept close to a bashful young man at a reception and said:

"If you'll never let on I'll tell something."

The young man blushed and promised never to break the confidence reposed in him.

"Well, it's just this," said the girl. "When anything goes very wrong with me I swear.

The young man attempted to observe that swearing in a pretty young | cently asked to marry a couple. He lady was naughty, but he made a failure of it, and his companion went on talking.

She couldn't miss a car, stub her toe, or burst a button of her glove but she expressed herself most frightfully right before everybody. Now, it isn't nice, is it, for a girl to use swear words? And it really will get to be a regular thing with us if we don't stop. I am already addicted to the habit. Why, I broke the point of my thumb nail today, and when I did it I just let out good."

"What did you say?" the bashful young man asked.

I said "O devil."

The young man blushed a livelier red and asked the poor, forsaken girl if he might get a cup of chocolate for her.

Marriage a Hun ired Years Hence.

At the present time, a popular presumption exists that all girls wish to marry, and fail to do so only because they lack an eligible opportunity, writes Edward Bellamy in The Ladies' Home Journal. This presumption exists on account of the obvious fact that women, being able with difficulty to support themselves, have in general a greater material interest in marriage than men have. Surely there can be few incidents of an unmarried woman's condition more exasperating than her knowledge that because this is the undeniable fact it is vain for her to expect to be popularly credited with the voluntary choice of her condition. She must endure with a smile, however she may rage within, the coarse jest or inuendo to which it would be worse than vain to reply. Nationalism, by establishing the economic independence of women, without reference to their single or married state. will destroy the presumption referred

Dainty Ways for Serving Eggs.

Eggs will take the place of meat many times for a meal and are less expensive and more whelesome. Boiled eggs are very nice for breakfast. Have the water boiling hot before putting them in and boil them three minutes after they begin to boil hard; if you wish soft boiled. For hard boiled they must boil not less than five minutes and sometimes longer. The safest plan is to have a little hour glass that is used to time eggs with or a watch so the time is exact.-Farmer's Voice.

Two of the soldiers caught the mule, and examining the knots one of them said: "Lieutenant, I know what's the matter. "What is it?"

"Well, gather up your cargo, and some of my men will see if they can't lash it for you," said the officer,

'Oh, that settles it," and in a few moments the debris of the pack had been gathered up, put into barley sacks, and handed over to two troopers, who had dismounted. Upon the mule's back was a rectangular saddle of leather attached to a wide leather breeching. It was in the shape of a bag, and it was distended by springy willow sticks, and stuffed with hay. It was held in place by wide cinch and ladigo straps, and under it was a blanket several times folded to protect the animal's back and sides. The name of the contrivance is

She has an imposing figure, which was, on the occasion of the presentation, draped to advantage in a wellmade black gown. The palace of the Khedive is a peculiar structure, painted entirely white, surrounded by a court prettily decorated with green creepers, and paved with a peculiar mosaic made of stones in two colors all turned on their sides. The maids in attendance in the inner hall were all simply dressed alike in plain black and white dresses. Not a man was seen about the palace, whose furnishing is extremely plain and simple, the only pretty room being the central one, in which were lovely mirrors and candelabra and beautifully inlaid and polished floors.

The royal lady graciously welcomed the plainly dressed woman who came before her in a costume unlike anything ever seen in the presence chamber before, for Miss Marsden, to quote her own words, was limited to choice between "three severely plain uniforms, one of which was crushed, the second very creased, and the third on my back, its freshness all gone, likewise some of its. buttons. Besides they were all so warm, being intended for rough travelling in Russia, and by no means suitable for royal receptions or for the hot climate. My bonnet had already done good service in London for six months, and its original color being black, it was then a rusty brown. Gloves, fortunately. I had, but my only pair of boots were thick travelling ones, made for Siberia. Fancy my clumping into the presence of her Highness with such boots.

But the meeting was pleasant. Tea was served in exquisite little cups with po bandles, and the plain woman in the travel-worn gown and heavy boots was made to forget, by the courtesy, of her royal hostess, that she was not in full court dress.

growth was over 250 per cent. Look at the prominent men it has carried off, and is taking off every year, for while many are dying apparently of paralysis and apoplexy, they are really victims of kidney disorder, which causes heart disease, paralysis, apoplexy, etc. Nearly every week. the papers record the death of some prominent man from this scourge. Recently, however, the increase has been checked and I attribute this to the general use of

my remedy." "Do you think many people are afflicted with it to-day who do not realize it, Mr., Warner?"

"A prominent professor in a New Orleans medical college was lecturing before his class on the subject of Bright's disease. He had various fluids under microscopic analysis and was showing the students what the indications of this terrible malady were. 'And now. gentlemen,' he said, 'as we have seen the unhealthy indications, I will show you how it appears in a state of perfect health,' and he submitted his own luid to the usual test. As he watched the results his countenance suddenly changed -his color and command both left him and in a trembling voice he said: 'Gentlemen, 1 have made a painful discovery; I have Bright's disease of the kidneys;' and in less than a year he was dead. The slightest indications of any kidney difficulty should be enough to strike terror to any one."

"You know of Dr. Henion's case !" "Yes, I have both read and heard of it." "It is very wonderful, is it not !"

"No more so than a great many others that have come to my notice as having been cured by the same means."

"You believe then that Bright's disease an be cured."

"I know it can. I know it from my own and the experience of thousands of prominent persons who were given up to ie by both their physicians and friends." "You speak of your own experience, what was it?"

"A fearful one." I had felt languid and unfitted for business for years. But I did not know what ailed me. When, however, I found that it was kidney difficulty thought there was little hope and so did the doctors., I have since learned that one of the physicians of this city pointed me out to a gentleman on the street one day, saying: 'there goes a man who will be dead within a year.' I believe his words would have proved true if I had not fortunately used the remedy now known as Warner's Safe Cure."

2Did you make a chemical analysis of the case of Mr. H. H. Warner some three years ago, Doctor! was asked Dr. S. A. attimore, one of the analysts of the State Board of Health." "Yes, sir."

"What did this analysis show you?" "A serious disease of the kidneys." "Did you think Mr. Warner could reover!"

"No, sir, I did not think it possible." "Do you know anything about the medy which cured him !"

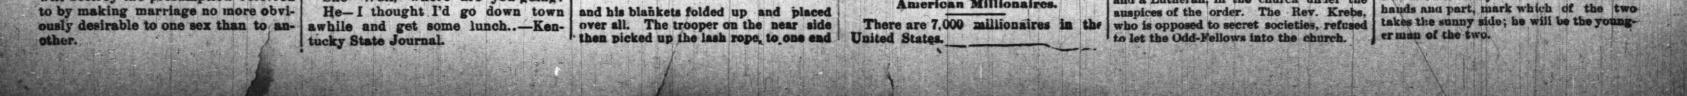

"I have chemically ana yzed it and find pure and harmless."

The standing of Dr. Henion, Mr. Warer and Dr. Littimore in the community is beyond question, and the statement they make cannot for a moment be doubted. Dr. Henion s experience shows that Bright's disease of the kidneys is one of the most deceptive and dangerous of all diseases, that it is exceedingly common, but that it can be cured if taken, in time.

The pleasantest things in the world are pleasant thoughts, and the great art in life is to have as many of them as possible.

SATURDAY, FEBRUARY 21, 1891.

WE regret exceedingly to say that notwithstanding the strenuous efforts of our efficient alderman, Matt Conway, to secure a stay af proceedings in the Belmont avenue sewer matter, the case was brought to trial in the County Court, before Judge Scales, this week and as we go to press no decision has been arrived at. Alderman Conway entirely deserves great credit for the stand he took in the interests of his constituents, to say the least, and we trust that when election day comes, Tuesday, April 7th, those people who are most interested in this particular special assessment will bear in mind that he did what he could to help them out of the dilemma in which they now are. Conway has made a good councilman for the 27th Ward, about all the ward has abtain Ward, about all the ward has abtain Ward; about all the ward has obtained has been through him, and he should be re-elected, to show that his hard work is appreciated, if for no other reason, of which, however, there are many.

In view of the horrible fate of those children in Lake View who were bitter by a rabid dog a few days ago, it would be a wise thing to administer some cold leased, not in homeopathic doses either, to the dogs in our neighboorhood who are running at large and endangering the lives of our little ones. Do not let us run the risk of having the terrible experience of those Lake View victims repeated in our neighborhood.

A considerable amount of activity was indulged in last Sunday noon, near Irving avenue and Bloomingdale road. A switch engine on the C. M. & St. P. Ry., Pacific Division, while making a switch, let some sparks fly among the dry grass, which abounds plentifully, in a moment a part of the large field was in a blaze. At on . tim. it looked as though some of the new hoase would be in danger of being destroyed. By the untiring efforts of a large number of people, the fire was quelched; a high wind was blowing at the time.

At a council of the Highland Association of Illinois, held at the Grand Pacific Hotel, last week, Mr. Thomas Edgar, of Armitage avenue, received the destinguished bonor of being appointed Local Director of the "World's Fair Scottish Games.'' The Chicago Mutual Benefit Association is a body corporate under the laws of the State of Illinois. that every person should join. It combines all the good qualities of the building societies as well as those of a beneficial society and savings banks. All persons over 15 years of age may be come members thereof by paying an initiation fee of \$3.00, and monthly dues of \$2 50, and at the end of / three years they will receive \$250.00. In this you do not have to die to receive your money as you do in the older societies.

Can we do it?

I say, positively, Yes; let us see; the Order of Foresters pays out \$1.000, when a man pays in his whole expectation of many members receive \$1,000 that have even not paid more than \$25.00 before their death; how can they do it? The answer is simple, it is ble steady increase of the Order and lapses. The Iron Hall of Prof. Schootsling is at present serving Indiana pays a benefit of \$1.000 in some the members of the Choral Club and his seven years, yet, no individual member seven years, yet, no individual member pays in over \$400, yet, they have been paying off certificates for the last three years and will continue in doing so. The time has passed, when a person will have to pay dues all his life time for the benefit of others after his death.

The Chicago Mutual Benefit Association pays out of the General Fund, all certificates as fast as they mature and adds to the Reserve Fund every month in such amount that the last certificates will be as secure as the first; where can you find a better way of investing your money.

Remember, you pay to the Association in three years, \$100 and they return to you at the end of that time \$250. Sixty-

I notice by the late issue of the DAILY NEWS that Mayor Hugh Grant, of New York, has, in an intelligent attempt at a solution of the vexations street cleaning problem, appointed a committee of five prominent citizens, each of whom is an expert, fitted by special training and experience in municipal work to reach reliable conclusions-whose duty it will be to investigate the work of the street cleaning department, and to report upon what, in their opinion, is the cause of the present inadequate service, and suggest what plan or plans are best suited to conditions existing in New York and what amount of money is needed to carry them out.

In no city, perhaps in the world, do the streets need cleaning more than in Chicago. This is a notorious fact which cannot be disputed, and what has Dewitt C. Cregier, Mayor of the second city in the United States done to remedy this great and crying evil? At the most he has but suggested increased taxation, which suggestion the News very truthfully says even Aldermen regard with suspicion, fearing, and with good reason that the snm thus raised would be used by an unscrupulous administration to perpetuate its own shameless inefficiency. So often has he changed front that it and corruption. And, surely, though an honest investigation into the methods and practical results of the street cleaning department might not suit certain politicians, it would emphatically suit the citizens who must pay the piper anyway.

A QUEER RACE. A STORY OF A STRANGE PEOPLE, railway; never heard of the United States, BY WILLIAM WESTALL.

CHAPTER XXI.-CONTINUED. My next concern was as to how I should attire myself for the queen's ball. The evening-dress of Europe was not the evening-dress of Fair Island. The latter was a modification of the costume in vogue in the time of George II. and Sir Robert Walpole; and as the islanders had a weakness for bright colors, I did not take kindly to the idea of appearing at a festive entertainment in a suit of black, a color which they reserved exclusively for mourning. In this dilemma I consulted Field.

"A black coat, and of that peculiar shape, too, would certainly make you sadly conspicuous-I might almost say ridiculous," he said, when I showed him my swallowtail, "and the queen might think you had mistaken her dance for a funeral. Have you nothing a little less somber-a uniform, for instance?"

"I have my uniform as captain in a volunteer rifle corps." (My poor mother made me bring it, rather against my own wish. Officers in foreign countries always wear their uniforms, she said, and I might find mine useful; so I brought it.)

"Where is it?" "In one of the boxes which came up from the 'Diana' an hour ago."

"Wear it, by all means," advised my host, when he had seen the uniform. "Nothing could be better; and the queen," who has never seen an English uniform, will take it as a compliment. She takes great interest in everything that concerns the old country, and that red coat will match well with your-chestnut hair." The point being settled, we went to the cock-fight, which took place in a public pit not far from Mr. Field's house. A number of mains were fought, and many birds killed. At the outset I was rather disgusted, but after awhile I became as excited as the rest. I had never seen a main fought before, and I understood for the first time why the sport had been so attractive for our ancestors, and its suppression so difficult to enforce. Nobody showed more excitement or followed the fortunes of the various fights with keener enjoyment than Queen Mab.

"A fine old English sport!" she observed to me, when the tournament came to an end. "I hope you have enjoyed it."

"It was an English sport once, but now, like bull and bear-baiting, it is obsolete and illegal-forbidden by law."

"Forbidden by law? But why? What can there be wrong in it? Not having bulls and bears, we can bait neither the one nor the other. But cock-fighting! You surprise me, Mr. Erle. What is England coming to?"

"That is what a good many people used to ask when the sport was abolished. It was considered that we had no right to make the lower animals destroy each other for our amusement-"

"Excuse me, sir, but that is surely a very driveling argument. You kill the lower animals to satisfy your appetites, yet you will not let them fight to make you diversion. Besides, the birds like it; would not you, if you were a game-cock, rather die

and the American Civil War, Bismarck and the G. O. M .; who have never seen a daily newspaper, a monthly review, or a Australia, New Zealand, or the Suez Canal: lighting by gas or printing by steam, and whose knowledge of fiction is limited to "Robinson Crusoe" and "Pamela."

In these circumstances it was perhaps fortunate that I had little to do except answer questions, the ladies whose acquaintance I made being insatiably curious. But I soon found that if I wanted to be believed I must keep back a portion of the truth. When, in answer to a question about the size of London, I said that its population was nearly four millions, and that a hundred thousand strangers left and entered it every day, the significant smile which went round told me that the statement was regarded as monstrons and incredible. My account of the electric telegraph and some other modern scientific and mechanical achievements was received with even greater incredulity, especially by the men, who, though too polite openly to doubt my word, obviously thought me an unconscionable romancer.

Only the queen affected to believe me, either because she was naturally more intelligent than the others, or that she was fresh from the perusal of the books and periodicals which we had brought from the 'Diana"-or for some other and less obvious reason.

The first dance was a Sir Roger de Coverly, in which I had Mab for a partner; then followed a minuet, which, at her pressing instance, I attempted-with poor success, however. There was an immense deal of bowing on the part of the men, and courtesying on the part of the women, the latter bending so low that more than once disaster seemed imminent; but they always recovered their perpendicular with remarkable agility and grace. Next came a fandango, doubtless a bequest from Denzil Fane's Spanish wife. After this the queen asked me to show her how to waltz. She proved an apt pupil-acquired the step in a few minutes; I whistled to the musicians a few bars of a waltz, which they picked up in no time, and the next moment we were whirling round the room-to the astonishment of all beholders. They had never seen anything like it before. We had a long spin-Mab being in excellent wind-and when I escorted her to her seat, I could see by the manner of some of the younger men that they envied me my good fortune, and that the favor shown me by the queen was beginning to excite jealousy and might make me enemies. Be that as it may, waltzing became the fashion. All wanted to learn the step at once, and I had very nearly as many invitations to dance as there were young women in the room. They voted me dancing-master by acclamation, and for the remainder of the night we

did nothing in the world but waltz. "We are infinitely obliged to you," said the queen, as I took my leave early in the

morning. "You have given us a new pleasure." "He has, indeed!" chorused twenty

"We are all infinitely obliged to voices. him."

"Waltzing is simply divine!" she continued. "We will have another ball-yes, the night after to-morrow. All who are here consider yourselves invited, and per-haps Mr. Erle will kindly teach us something else."

"No, I don't think we have: still, there is no telling what may happen. But we are well prepared. Our young men are regularly drilled. You shall see a parade of our archer-guard one of these days." "Archer-guard! Are your soldiers armed only with bows and arrows, then?"

"Necessarily. Our store of gunpowder. being very limited, is reserved for the artillery, which consists of half a dozen brass pieces, part of the 'Santa Anna's' armament. That is why I inquired whether you had any gunpowder on board the 'Diana.' But our archers would make no despicable foes, even when opposed to men armed with muskets."

Mr. Field spoke of the flint-lock muskets of the previous century, and when I saw the archer-guard and examined their weapons, I was quite of his opinion. None of their bows, when unstrung, was less than six feet in length; and their arrows were even longer than the cloth-yard shafts which won for England the battles of Agincourt and Crecy, and did such dire execution among the Scots at Flodden Field. The Fair Islanders, moreover, were splendid marksmen; a good shot could easily hit a bull's-eye at three hundred and fifty yards, and as easily kill a deer (or a man) at four hundred. Compared with theirs, the native bow was a very inferior weapon; and I felt sure, as I told Field, that the five hundred Archers of the Guard would be more than a match for three times their number of Calibans or Cariberoes.

After some further conversation, I ventured to suggest that the danger he apprehended might be avoided by abolishing slavery altogether. If I had proposed to abolish the island and declare the memory of Denzil Fane accursed, he could scarcely have looked more horrified.

"Abolish slavery! What on earth put so preposterous an idea into your head? Slavery is a beneficient institution. Scripture nowhere condemns it; the Jews practiced it; the Apostles approved of it; and so far as we are concerned, my dear sir, the remedy would be worse than the disease. If we liberated these people, they would of a surety conspire against our commonwealth, and endeavor to overthrow it, for they are fierce and truculent. Moreover. we should all have to become hewers of wood and drawers of water, because once they were free they would work only for themselves."

This was conclusive, and as I could not have answered Mr. Field without the risk of giving serious offense, I allowed the subject to drop.

In the meantime, the "Diana's" cargo was being unloaded and brought up to Fairhaven, but rather fitfully and slowly: for the ship contained an immense quantity of merchandise of one sort and another, and the warehouse accomodation at the queen's disposal was decidedly limited. The bales and cases had to be stowed anywhere and everywhere, and there being no draught animals in the island, the labor of shifting and carrying the packages about was very great. In these circumstances I suggested to Mab and the Council of Nine that it would be better to let the remainder of the cargo stay where it

PRACTICAL RELIGION. THAT IS WHAT IS NEEDED TODAY.

SAYS DR. TALMAGE.

Frauds of All Kinds Would Succumb to a Proper Observance of Christian Tenets Among Christians .- Faith Without Works of Little Account. BROOKLYN, N. Y., Feb. 15. - Great

audiences again assembled at the service by Dr. Talmage in the Brooklyn Academy of Music this morning and also in the New York Academy of Music in the evening. The remarkable interest in the latter continues without evidence of abatement. At the service in New York last Sunday evening there were many emotional episodes among the vast audience, and tonight these were repeated, hundreds pledging themselves anew to Christian lives henceforth. Dr. Talmage took for his text, "Faith without works is dead."-James 2. 20.

The Roman Catholic church has been charged with putting too much stress upon good works and not enough upon faith. I charge Protestantism with putting not enough stress upon good works as connected with salvation. Good works will never save a man, but if a man have not good works he has no real faith and no genuine religion. There are those who depend upon the fact that they are all right inside, while their conduct is wrong outside. Their religion, for the most part, is made up of talk-vigorous talk, fluent talk, boastful talk, perpetual talk. They will entertain you by the hour in telling you how good they are. They come up to such a higher life that they have no patience with ordinary Christians in the plain discharge of their duty. As near as I can tell this ocean craft is mostly sail and very little tonnage. Foretopmast staysail, foretopmast studding sail, maintopsail, mizzen-topsail-everything from flying jib to mizzen spanker, but making no useful voyage. Now the world has got tired of this, and it wants a religion that will work into all the circumstances of life. We do not want a new religion, but the old religion applied in all possible directions.

Yonder is a river with steep and rocky banks, and it roars like a young Niagara as it rolls on over its rough bed. It does nothing but talk about itself all the way from its source in the mountain to the place where it empties into the sea. The banks are so steep the cattle cannot come down to drink. It does not run one fertilizing rill into the adjoining field. It has not one grist mill or factory on either side. It sulks in wet weather with chilling fogs. No one cares when that river is born among the rocks, and no one cares when it dies into the sea. But yonder is another river, and it mosses its banks with the warm tides, and it rocks with floral lullaby the water lilies asleep on its bosom. It has three grist mills on one side and six cotton factories on the other. It is the wealth of two hundred miles of luxuriant farms. The birds of heaven chanted when it was born in the mountains, and the ocean shipping will press in from the sea to hail it as it comes down to the Atlantic

this. It will go to those hypocritical professors of religion who got a "corner" in corn and wheat in Chicago and New York. sending prices up and up until they were beyond the reach of the poor, keeping these breadstuffs in their own hands or controlling them until the prices going up and up and up, they were, after awhile, ready to sell, they sold out, making them-

selves millionaires in one or two yearstrying to fix the matter up with the Lord by building a church or a university or a hospital - deluding themselves with the idea that the Lord would be so pleased with the gift He would forget the swindle. Now, as such a man may not have any liturgy in which to say his prayers, I will compose for him one which he practically is making: "O Lord, we, by getting a 'corner' in breadstuffs. swindled the people of the United States out of ten million dollars, and made suffering all up and down the land, and we would like to compromise this matter with thee. Thou knowest it was a scaly job, but then it was smart. Now, here we compromise it. Take one per cent of the profits, and with that one per cent of the profits you can build an asylum for these poor miserable ragamuffins of the street, and I will take a yacht and go to Europe, forever and ever. Amen!"

Yes, this practical religion will also go into agriculture, which is proverbially honest, but needs to be rectified, and it will keep the farmer from sending to the New York market yeal that is too young to kill, and when the farmer farms on shares. it will keep the man who does the work from making his half three-fourths, and it will keep the farmer from building his post and rail fence on his neighbor's premises, and it will make him shelter his cattle in the winter storm, and it will keep the old elder from working on Sunday afternoon in the new ground where nobody sees him. And this practical religion will hover over the house, and over the barn, and over the field, and over the orchard.

Yes, this practical religion of which 1 speak will come into the learned professions. The lawyer will feel his responsibility in defending innocence and arraigning evil, and expounding the law, and it will keep him from charging for briefs he never wrote, and for pleas he never made, and for percentages he never earned, and from robbing widow and orphan because they are defenceless. Yes, this practical religion will come into the physician's life, and he will feel his responsibility as the conservator of the public health, a profession honored by the fact that Christ himself was a physician. And it will make him honest, and when he does not understand a case he will say so, not trying to cover up lack of diagnosis with ponderous technicalities, or send the patient to a reckless drug store because the apothecary happens to pay a percentage on the prescriptions sent. And this practical religing in company. ion will come to the school teacher, mak ing her feel her responsibility in preparing our youth for usefulness and for happiness and for honor, and will keep her from giving a sly box to a dull head, chastising him for what he cannot help, and sending discouragement all through the after years of a lifetime. This practical religion will also come to the newspaper men, and it will help them in the gathering of the news, and it will help them in setting forth the best interests of society, and it will keep them from putting the sins of the world in larger type than its and its mistakes than its achievements. Yes, this practical religion will come and put its hand on what is called good society, elevated society, successful society, so that people will have their expenditures within their income, and they will exchange the hypocritical "not at home" for the honest explanation "too tired," or "too busy to see you," and will keep innocent reception from becoming intoxicated conviviality. There has got to be a new departure in religion. I do not say a new religion. Oh, no; but the old religion brought to new appliances. In our time we have had the daguerreotype and the ambrotype and the photograph; but it is the same old sun, and these arts are only new appliances of the old sunlight. So this glorious gospel is just what we want to photograph the image of God on one soul, and daguerrotype it on another soul. Not a new gospel, but the old gospel put to new work. In our time we have had the telegraphic invention and the telephonic invention and the electric light invention; but they are all the children of old electricity, an element that the philosophers have a long time known much about. So this electric gospel needs to flash its light on the eyes and ears and souls of men, and become a telephonic medium to make the deaf hear; a telegraphic medium to dart invitation and warning to all nations; an electric light to illumine the eastern and western hemispheres. Not a new gospel, but the old gospel doing a new work. Give your heart to God and then fill your ife with good works. Consecrate to him your store, your shop, your banking house, your factory and your home. They say no one will hear it. God will hear it. That is enough. You hardly knew of anyone else than Wellington as connected with the victory at Waterloo; but he did not do the hard fighting. The hard fighting was done by the Somerset cavalry and the Ryland regiments, and Kempt's infantry, and the Scots Grays and the Life Guards. Who cares, if only the day was won. In the latter part of the last century a girl in England became a kitchen maid in a farm house. She had many styles of work and much hard work. Time rolled on, and she married the son of a weaver of Halifax. They were industrious; they saved money enough after awhile to build them a home. On the morning of the day when they were to enter that home, the young wife arose at four o'clock, entered the front door-yard, knelt down, consecrated the place to God, and there made this solemn vow: "O Lord, if though wilt bless me in this place, the poor shall have a share of it." Time rolled on and a fortune rolled in. Children grew up around them, and they all became affluent; one, a member of parliament, in a public place declared that his success came from that prayer of his mother in the dooryard. All of them were affluent, Four thousand hands in their factories. They built dwelling houses for laborers at cheap rents, and when they were invalid and could not pay they had the houses for nothing. One of these sons came to this country, admired our parks, went back, bought land, opened a great public park, and made it a present to the city of Halifax, England. They endowed an orphanage, they endowed two almshouses All England has heard of the generosity and the good works of the Crossleys. Moral: Consecrate to God your small means and your humble surroundings, and you will have larger means and grander surroundings. "Godliness is profitable unto all things, having promise of the life that now is and of that which is to come." "Have faith in God by all means, but remember that faith without works is dead." ighting than have your neck wrung and be put in a pot?"

"Certainly. But there were other objections. It was considered that public cock-fighting, besides being cruel, did harm to those who took part in it-blunted their feelings-demoralized them, in fact."

"In that case I must be very much demoralized," said Mab, with flashing eyes and an angry gesture: "for I have taken part, as you call it, in a hundred cock-fights, and shall probably take part in hundreds more. So, according to your showing, I must be both demoralized and incorrigible."

"Not at all; anything but that," I returned, eager to repair the fault I had so stupidly committed. "You asked me why cock-fighting was abolished in England, and I was trying to explain why. I was not giving these arguments as my own. Moreover, cock-fighting in Fair Island is one thing; cock-fighting in England was quite another thing. It was made a medium for gambling, fell into bad hands, and became a public nuisance, As for you, I am sure that no one who has ever seen Queen Mab could doubt that she was other than-"

Here I hesitated. "What, sir?"-peremptorily.

"A right noble woman."

She smiled; and I liked her none the less for being sensible to a little flattery. "You are coming to my ball, of course?"

"Of course." "I am afraid you will find our dances rather old-fashioned; but you shall teach us some of the new ones. I saw a mention in one of those illustrated papers of a waltz. I think I should like to waltz. Will you show me how?"

I bowed, and said I should be delighted to teach her anything in my power.

The ball was a great success. The orchestra consisted of a flute, a clarionet, a key-bugle, a Carib guitar, and a set of Pan's-pipes. The flute seemed to be new. but the clarionet and bugle looked old enough to have belonged to the bandsmen. of the "Hecate" or the "Santa Anna." Yet they produced very fair music, and though the men played without notes, they had a great variety of airs, some of which struck me as being singularly wild and beautiful.

My uniform made quite a sensation, and, judging by the compliments I received, it was much admired. Before I had been many minutes in the room I booked several engagements; for as Fair Island ladies deem it not unmaidenly to ask men (on occasion) to be their partners for life, they naturally see no impropriety in asking them to take part in a dance. They were all tall, fine women; not a few were very well-favored, barring the queerness of their complexion, and two or three were as fair as Queen Mab herself. They were lively. too, and wonderfully graceful in their movements, dancing with a zest and energy unknown to the languid beauties of European ball-rooms. Being, moreover, the descendants of the "Hecate's" officers (the descendants of able-bodied and ordinary seamen and warrant-officers not being admitted into society), they were intelligent, and, considering their opportunities, well educated. Most of them had read Shakspeare, Milton, Pope, "Plutarch's Lives," "Robinson Crusoe," and "Pamela," and were acquainted with the leading' facts of European history up to about 1740. From that time forward, so far as regards the outer world, their minds, like the minds of Fair Islanders generally, were a blank: and it is hardly possible for those who have not tried it to realize the difficulty of ing up a conversation with people who

With this request I was, of course, only too glad to comply. I taught them the polka and schottische, and we had a try at the lancers, with all of which the queen and her guests were greatly delighted; and Field told me that if I went on as I had begun. I should soon be the most popular

person in Fair Island. I was, moreover, often consulted by the queen about the books she was reading. She found in them so many things that were strange to her, so many allusions which she did not understand, that she required almost continual instruction, and I became actually, if not officially, the director of her studies and the superintendent of her new education-for that she called it, and that in fact it was.

All this augured well for the success of my scheme. I could hardly think that after I had done so much for her she would refuse me the favor I intended to ask. Nevertheless, I hesitated and procrastinated, missing more than one seemingly good opportunity of preferring my request. Why, I can hardly say; partly, perhaps, because something told me that it wasstill too soon-that the propitious moment had not yet arrived; partly because the Fair Islanders improved on acquaintance, and that the more I saw of them and their country the less I liked the idea of leaving them.

As for the anonymous letter, I had come to the conclusion that it was either a poor joke or a piece of stupid spite, and though I kept the missive in my pocket, it very soon passed out of my mind.

CHAPTER XXII.-- A FLASH OF LIGHTNING. And so things wenton. For two or three weeks there occurred nothing to disturb the even tenor of my life. In the company of Field and Amyas Fane and some others, and once with a party organized by the queen, I visited several estates and saw something of the interior of the island. All the piebald whites and most of the de-

scendants of the former Carib chiefs owned plantations which they cultivated, with the helpof slaves; for land was so plentiful and the soil so fertile that very few of the aborigines would labor for hire. 'So far as I could see, the slaves,' though not ill-treated, were very hard wrought, for in the absence of horses they had to do horses' work. They were, however, comfortably lodged and well fed, and as, according to a law laid down by Denzil Fane, no bondsman could be sold without his own consent, there were presumably none of those cruel separations of families which are usually among the worst features of the system. Insubordination was, however, severely punished, rebellious slaves being hanged without ceremony, and, as Field one day confided to me, the two races were really at bitter enmity. There had been several partial risings repressed, and, as I gathered, not without difficulty.

"The Calibans are our greatest trouble," he said. "They are increasing at such a rate that they will soon be more numerous than ourselves, and if a rising should happen to coincide with an invasion of the Cariberoes, it would be a serious matter." 'The Cariberoes?"

"The people whom Denzil Fane and his men helped to repulse when they first came to the island. The Calibans are their descendants, and they are very strong and brave, and would make desperate fighters."

"What makes you think so?"

"Because they are very courageous. We have had experience of their prowess, though not very recently. It was they who taught us how to fight sharks, and they often fight fiercely among themselves. Yes, the Cariberoes would make splendid

where it is."

"A happy thought, Mr. Erle," exclaimed Mab. "Let it be so. To-morrow we will go down to the 'Diana,' and see for our selves what there is left; we may perchance find some more books, and you will perhaps be so obliging as to take out the remaining mirrors. Morris shall go with us."

BEAUTY AS A BECGAR.

A Handsome Girl Raises Quite a Sum o Money in the Role of a Mendicant.

A handsomely attired and exceed. ingly pretty young woman came into the Russell House lobby yesterday afternoon and walked up to the counter with easy self-possession. The clerks were instantly all attention. Withdrawing a card and pencil from a silver-mounted purse, she wrote a few lines in a pretty, feminine hand, placed her fingers to her lips in a way which almost startled the aforesaid clerks out of their wits and held out the card. It was taken with fear and trembling, but only stated that she was dumb and requested permission to circulate a paper, which she held in her hand, among the guests who were seated about the lobby and reading room.

"Certainly," wrote back the elerk with alacrity, his eyes at the same time carefully scrutinizing the pretty face and handsome attire of the pretty suppliant.

The paper stated that the young woman's name was Jennie Hustin, and that she had lost the power of speech through a severe attack of illness, and would be thankful for anything which might be contributed to aid her in reaching her friends, who were located at Davenport, Iowa. She realized quite a large sum through the generosity of the occupants of the hotel lobby.

"Well, that beats me!" ejaculated one of the guests, as her slim form vanished through the ponderous office doorway. "A girl rigged out like that and begging. Why, that dress she's got on never cost less than a ten-dollar bill for the making alone. I wish I could afford to buy my wife as good a one. Yet I believe I gave her \$1. Well, the sight of a pretty beggar, looking for all the world like a plate in a fashion magazine, lifted me clean off my feet. I guess I'd have given her my watch and chain if she had asked me for them. Well, well! wonders will never cease."-Detroit Free Press.

Always Business.

A good-natured coachman once saw a tired looking Jew peddler going along a country road and generously offered him a lift. The peddler was not slow to take it up and rode with great pleasure to the market town. There he alighted, and in return for his courtesy offered the coachman the pick of his wares as a gift. He, however, declined the offer.

"Well, then," insisted the enterprising son of Israel, "if you won't take a present don't you want to buy some thing?"-Fliegende Blatter.

of deputies have the free run of a buffet some of what has been called pure s

coast. The one river is a man who lives for himself. The other river is a man

who lives for others. I have often spoken to you about, faith, but now I speak to you about works, for "faith without works is dead." I think you will agree with me in the statement that the great want of this world is more practical religion. We want practical religion to go into all merchandise. It will supervise the labelling of goods. It will not allow the merchant to say that a thing was made in one factory when it was made in another. It will not allow the merchant to say that watch was manufactured in Geneva, Switzerland, when it was manufactured in Massachusetts. It will not allow the merchant to say that wine came from Maderia when it came from California. Practical religion will walk along by the store shelves and tear off all tags that make misrepresentation. It will not allow the merchant to say that is pure coffee, when dandelion root and chicory and other ingredients go into it. It will not allow him to say that is pure sugar, when there are in it sand and ground glass,

When practical religion gets its full swing in the world, it will go down the streets, and it will come to that shoe store and rip off the fictitious soles of many a fine looking pair of shoes, and show that it is pasteboard sandwiched between the sound leather. And this practical religion will go right into a grocery store, and it will pull out the plug of all the adulterated syrups, and it will dump into the ash barrel, in front of the store, the cassia bark that is sold for cinnamon and the brickdust that is sold for cayenne pepper; and it will shake out the Prussian blues from the tea leaves, and it will sift from the flour plaster of Paris and bonedust and soapstone, and it will by chemical analysis separate the one quart of Ridgewood water from the few honest drops of cow's milk, and it will throw out the live animalcules from the brown sugar.

There has been so much adulteration of articles of food that it is an amazement to me that there is a healthy man or woman in America. Heaven only knows what they put into the spices and into the sugars and into the butter and into the apothecary drug. But chemical analysis and the microscope have made wonderful revelations. The board of health in Massachusetts analyzed a great amount of what was called pure coffee, and found in it not one particle of coffee. In England, there is a law that forbids the putting of alum in bread. The public authorities examined fifty-one packages of bread, and found all guilty. The honest physician, writing a prescription, does not know but that it may bring death instead of life to his patient, because there may be one of the drugs weakened by a cheaper article, and another drug may be in full force, and so the prescription may have just the opposite effect intended. Oil of wormwood warranted pure from Boston was found to have forty-one per cent of resin and alcohol and chloroform. Scammony is one of the most valuable medical drugs. It is very rare, very precious. It is the sap or gum of a tree or bush in Syria. The root of the tree is exposed, an incision is made into the root and then shells are placed at this incision to catch the sap or gum as it exudes. It is very precious, this scammony. But the peasant mixes it with cheaper material; then it is taken to Aleppo, and the merchant there mixes it with cheaper material; then it comes on to the wholesale druggist in London or New York, and he mixes it with a cheaper material; then it comes to the retail druggist and he A Free Lunch. The members of the French chamber mixes it with a cheaper material, and by the time the poor sick man gets it into his bottle, it is ashes and chalk and sand, and

A monster egg is exhibited in the museum at Buda-Pesth, Hungary. It is an egg of the prehistoric bird a piornis, and but few museums possess such a specimen; 148 hen's eggs would find room in it and it would hold nearly nine quarts. It was found in 1850 in Madagascar.

Deafness Can't Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When the tube gets inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

THE TRICK LIONS. An Interview With Mr. Darling, the Lion

Tamer.

The lion tamer is a highly intelligent young man, who, born in the United States, went to Germany in his youth. In Hamburg he associated with a leading firm, the Jamrach, of Germany, and so, having animals in his charge, became familiar with handling them. Travelling for the busisold, he became thoroughly acquainted with their ways and instincts. Certainly it was the only school where such quiet mastery over savage ani- in the United States. To feed these cows

mals could be acquired. "It is a very long business," said Mr. Darling; "all my animals have plements used in the industry aggregate a been two years in training. Why, it value of \$200,000,000. The men employtakes all of two months to make a lion sit in a chair, and stay there. I cannot vaunt general intelligence in lions; it is rather individual. I have had some fine young lions, superb in body, that had no brains. Not wicked or cross, but simply stupid. It was a tendency to forget to-morrow all that had been acquired for months before. But I can't always tell. Leo is my best pupil. He never was ugly, but once I gave him up and sent him off. he was so dull; then took him to school again; and I know no lion second to him now in intelligence and docility. This is the point. A lion doesn't want to do things. He just doesn't want to. Now you must make him. Punish him, and you make him your enemy; afraid of you, and he gets worse, not better. I coax him and talk to him in English, for English is the best language for command. The seesaw and the velocipede are difficult tricks. Not one lion in a thousand can be taught to keep his balance. They mostly tumbled off. Perhaps in that performance their highest intelligence is called into play. The velocipede requires a careful lion, and I have just the right one. It is nice work to get the exact pose and to keep it; but what gave me the most trouble is the chariot performance. A lion must have had an original contempt for that kind of business. You see I am busy harnessing up one lion while the others are perfectly free. The art has been to make the rest of them come up of their own accord. For months I had one lion tearing round alone, and the rest scattered about. Now they all come up to time. They don't want to, but they must. It is patience, kindness, making them not afraid of me-for I am not afraid of them-that has done the business. I have rehearsals all the time, for the animals must be constantly at work so as not to forget. The whelps are coming on fast; one. I think, shows great intelligence. I feed them eight pounds of beef a day for the big ones and six for the smaller ones, and they take "You cannot reward your lions for

But he does not fancy a stick, the point of which, like a spear, is held in his direction; so if one threatened me, I could keep him off. An act I had to give up was where a lion rose and put his forepaws on my shoulders. The claws are very sharp, and any display of endearment would cut through my coat, and wound my shoulders, and a new coat every night was too expensive. All the lions are fond of me, and we re-

A Little Boy's Reply.

For precocity, irrepressibility and too often depravity. "Young America" in these present days scarcely can be surpassed. Here is an illustration: A little chap, not yet 8 years old, whose parents live on one of the fashionable avenues, went, last week, to pay a visit to his grandmother in Yonkers. While there, in drummaging through his grandmother's secretary, he came across a silver 50-cent piece, and very shortly afterward he was on his way down town to invest his "tind." He expended the whole amount for peanuts and, upon his return, was enjoying them in the privacy of his chamber, when his grandmother put in an appearance. "Why, Robbie." she exclaimed, tak-

ing in the situation, "where on earth did you get all those peauuts?"

"Bought 'em," was the reply. "But where did you get the money?"

"A gentleman I met over on War-

burton avenue gave it to me." Robbie, I don't believe von are telling me the truth." slowly said the old lady, looking her grandson in the eyes. "In fact I am sure you are telling me a falsehood. A little bird tells me that you are."

The boy looked at her with a somewhat incredulous expression.

"Now come. Robbie, tell me where you got that money?"

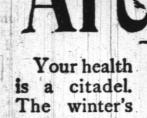

"Well, why dou't you ask your dickey bird?" was the reply of the bad boy.

Throat Injury from Tobacco Smoke.

Sir Morell Mackenzie is authority for the statement that most of the leading actors suffer from a relaxed condition of the upper throat, brought on, he believes, entirely by smoking; but act-resses are rarely affected that way. He has noticed the same thing in publie speakers and clergymen. He says that for a delicate throat the usual smoke-laden atmosphere of a common railway car is even worse than the actual use of tobacco.

Which we Offer with a Year's Subscription to this Paper for a Trifle More than • Our Regular Subscription Price.

• Our Regular Subscription Price. Wishing to largely increase the circulation of this paper during the next six months, we have made arrangements with a New York publishing house whereby we are enabled to offer as a premium to our subscribers a Set of the Works of Charles Diek-ens, in Twelve Large and Handsome Volumes, with a year's subscription to this paper, for a trifle more than our regular sub-scription price. Our great offer to subscribers eclipses any ever heretofore made. Charles Dickens was the greatest novelist who ever ived. No author before or since his time has we the fame that he achieved, and his works are even more popular to-day than during his lifetime. They abound in wit, humor, pathos, masterly delineation of character, vivid descriptions of places and insidents, thrilling and skillfully wrought plots. Each book is intensely interesting. No homeshould be without a set of these great and remark-able works. Not to have read them is to be far behind the age in which we live. The set of Dickens' works which we offer as a omely printed from entirely new plates, with new type.

premium to our subscribers is handsomely printed from entirely new plates, with new type. The twelve volumes contain the following world-famous works, each one of which is pub-lished complete, unchanged, and absolutely unabridged :

DAVID COPPERFIELD. MARTIN CHUZZL'EWIT. NICHOLAS NICKELBY. DOMBEY AND SON, BLEAK HOUSE, LITTLE DORRIT, OUR MUTUAL FRIEND. PICKWICK PAPERS.

CHARLES DICKENS.

BARNABY RUDCE AND CHRISTMAS STORIES, OLIVER TWIST AND GREAT EXPEC-TATIONS, THE OLD CURIOSITY SHOP AND THE UNCOMMERCIAL TRAVELER, A TALE OF TWO CITIES, HARD TIMES AND THE MYSTERY OF EDWIN DROOD.

The above are without question the most famous novels that were ever written. For a quarter of a century they have been celebrated in every nook and corner of the civilized world. Yet there are thousands of bomes in America not yet supplied with a set of Dickens, the usual high cost of the books preventing people in moderate circumstances from enjoying machinery, the extremely low price of white paper, and the great competition in the book trade, we are enabled to offer to our subscribers and readers a set of Dickens' works at a price which all can afford to pay. Every home in the land may now be supplied with a set of the great author's works.

Our Great Offer to Subscribers.

We will send the ENTIRE SET OF DICKENS WORKS in TWELVE VOLUMES, as above described, all postage prepaid by ourselves, also THIS PAPER for one year, upon receipt of the regular subscription price of this paper and 75 cents additional. This is the grandest premium ever offered. Up to this time a set of Dickens' works has usually been \$10.00 or more. Tell all your friends that they can get a set of Dickens' works, in twelve volumes, with a year's subscription to this paper, for only 75 cents in addition to the regular subscription price. Subscribe now and get this great premium. If your subscription has not yet expired, it will make no difference, for it will be extended one year from date of expiration sending
