Many practices which ten years ago, five years ago, one year ago, and even alk months ago were in favor, public opinion having no condemnation for them, are now held to be odious and even criminal. This is perhaps the most notable development of the day, namely, the creation of a higher standard for the conduct of American business. The revelations of graft in the insurance and railroad compaties are a shock to national pride and yet there is hardly an American who does not know that in one form or, another graft has entered largely into the corporate life as into the political life of the country. The sawing clause of the porate life as into the political life of the country. The saving clause of the situation is that it seems a passing phase in our national progress. The optimist has reason to rejoice that the national conscience has been touched and that public opinion is establishing higher ideals.

touched and that public opinion is establishing higher ideals.

In some ways the recent conference on international arbitration at Lake Mohook, N. Y., was an unusually democratic gainering. Here is a circumstance illustrating this statement: Ode morning a sunner visitor was pacing the versands of the big hotel when a tail, heavy man approached. "Can you give me a lighty" asid the visitor. The big man handed over a match, whereupon the other said: "How tail are you? "Bits feet four inches," was the repit," "Bay, but that's a good cigar you're smoking," was the next remark. "Yes, it is," said the big man. "Let me offer you one out of the same bog." The visitor accepted gladly and had one more query. "By the way, who are yout" -! an Dr. McVickar, bishop of Rhode Island," replied the heavy weight, who apparently hugely enjoyed the incident.
