BARRINGTON

United States Geologists Figure on Nature's Resources and Deplore Wastes—Plenty of Gold.

Washington—While there will be no coal for fuel in the United States 131 years from to-day the people who live in this land then will have ample gold and silver with which to buy something else to keep them warm. This information is given in a report of the United States geological survex the city man and make

must behave or Uncle Sam to spank it again. near time for Venezuelan and American war scares to break

"Waste in mining," says the report,
"loses for ever about one-half as much
coal as is marketed. This half is
either left in the ground in thin beds
or in the shape of pillars to support
the roof.

or in the shape of pillers to support. The roof.

Let roof.

Let roof.

Let roof be root be root given more than half a century, but the consumption is increasing so corrowally that characteristic coal would be exhausted by the real root and all coal by the middle of the twent-field coal would be than the root of the twent-field coal would be root to Would there be the possibility of so diluting that sleeping sickness as to make it a cure for insomnia? A Brooklyn clergyman declares that the rum power is to be banished from New York. "Good-by, gay old Broad-

undoubtedly largely take its place."
In petroleum and natural gas the
annual waste is even more extravagant, while the end of lead and iron
ores is not far off. Phosphate inlines
will last but 25 years longer. Of gold,
sine, copper and silver the geologists
have no fear that they will disappear.
The report in part was
