ART FOR-LOVES' SAKE

By M. E. BAKER

Allon.

His opposition to Philip Dumbar's suit had hitherto been of a passive rather than active hind. He did not want sayloody to carry off his niece; we have a supposition of the niece. It was evident now, by the concentrated disgust with which he was surveying the young man, that henceforth he would associate him in his modellent, and that his attitude would associate him in his modellent, and that his attitude would associate when the modellent had that his attitude would associate when the modellent had that his attitude would associate in the modellent had been the modellent and that his attitude would associate in the modellent had that his attitude would associate in the modellent had that his attitude would associate in the modellent had that his attitude which had the modellent had t At each end of the dune sat a young person. At the precise points where person and the precise points where years of the person and the precise point of the part of this particular dune, they bean the construction of other dunes. Their backs were toward each ofter, though they were manifestly very er and might eastly have seen each other by turning their heads a little. They had quarried, and were not had quarried about does not matter; it was some inconsiderable trifle was some inconsiderable trifle was some inconsiderable trifle.

bellow. "If you don't go—lie's allowal keys and you want you want

black object. Upon this the girls yes rested uncomprehendingly for an instant; then they lighted with accusation. "You've taken him!" she gasped. The young man nodded, and their eyes met. They clasped hands, and scram-bled down the dune to the stout gen-tleman's assistance. He was brushing the sand from his

leman's assistance.

He was brushing the sand from his ace, and struggling with his tie, which ad made almost as many revolutions found his neck, as he himself had n descending the face of the dune.

He spluttered undstinguishable sounds, but he was plainly very wrath-ul.

At length he gave his feelings ver

Say Mr. Farmer

How much of your corn rotted in the shock or stack last winter? How much time did you spend digging it out of the ice and snow? A silo would have saved all the crop with half the later and would have fed more than one-thied more cow. It is estimated that in a cre-of average corn will feed thirty-three cows for six months. In every large dairy district the farmers are seeing the advantages, of the silo. The round store, all cash one there are seeing the advantages of the sil-be round store silo can be erected at a mode e cost. The Bushnell Hinge-Door Silo accountry, by the latest improved machiner the mechanical construction is correct, and
