CORK WILL WALK FLAT RULE le Device is Not a Trick, but its fect is Rather Comical—How It is Arranged,

This is a simple device which is not a trick, but its effect is rather comical. Frequent an ordinary cork and stick two pins into one end, says the stick two pins into one end, says knives of equal weight must be stuck into opposite sides of the cork as shown in the illustration.

A flat rule is arranged as a sloping platform with a fairly high support

end and a slightly lower sup-the other. Two piles of books rve for these supports quite

at our port at the other will serve for these supports will serve for these supports. The cork is set up on its pins on the rule and then started on its journey with a slight recking movement. It will now proceed to walk the whole leacht of the rule, first on one pin—4 then en the other.

WHY THE TIGER HAS STRIPES ind Shade of Forest Well Match-

the nota mere matter of chance the theory of hose and of the chance the theory of hose and yet be sould a strape of hose and yet of bue, anys the American Boy. The former lives the grassy and the present the pressy inches to press, as many feet long as they inches in this country, and the rably matched by the skin of the man in question. Hence, it is also approach the prey unsprecived. The present the present the present the experience of the most part cillers in the witherness and ream food. Their cools in these
