Can't Get Away From It

Every man who thinks uses up part of the brain each day. Why don't it all disappear and leave an empty skull in say a month of brain work? Because the man rebuilds each

Considerable more than one-half of Phosphate of Potash.
Analysis of Grape-Nuts shows: Potassium and Phosphorus (which Join and make Phosphate of Potash) is considerable more than one-half of all the mineral salts in the food. smokal of all the mineral sails in the food. Dr. Gos. W. Carey, an exhebrity on the gray makes of the bright, controlled entirely provided the property of the sail of the sai

cure."

The natural conclusion is that if Phosphate of Potash is the needed mineral element in brain and you use food which does not contain it, you have brain fag because its daily loss is not supplied.

On the contrary, if you eat food known to be rich in this element, you place before the life forces that which nature demands for brain-building. Mind does not work well on a brain that is broken down by lack of nourishment.
 A peaceful and evenly poised mind is necessary to good digestion. Werry, anxiety, fear, hate, etc., etc., directly interfere with or stop the flow of Ptyalin, the digestive juice of the mouth, and also inter-fere with the flow of the digestive juices of stomach and pancreas.

Brain is made of Phosphate of Potash as the principal Mineral Salt, added to albumen and water.

Grape-Nuts contain that element as more than one-half of all its mineral salts.

A healthy brain is important, if one would "do things" in this world.

Mind asks for a healthy brain upon which o set, and Nature has defined a way to make healthy brain and renew it day by day as it s used up from work of the previous day. Nature's way to rebuild is by the use of food which supplies the things required. Brain rebuilding material is certainly found in
