VALUE AND METHODS OF TESTING CORN PLANTERS IN LABORATORY AND FIELD

Testing Stand to Determine Drop.

By C. O. REED,
University of Illinois.

The farm mechanics division of the college of agriculture is conducting a series of tests to determine, if permany course of the corn, the standard course of the corn, the standard course of the corn, the system of drop and the proper selection of plates. The following factors are being considered in the experiment: The shape of the kernels as influenced by the kind of corn, the grates of the corn, the system of drop and the proper selection of plates. The consideration to the present well satisfied with the latest methods of corn planting, but the shrwed, acientific business farmer is giving sarchi condicavation to the present day problems confronting him in the proper selection of the standard corn, and system and the agriculture of the shrwed, acientific business farmer is giving sarchi condicavation to the present day problems confronting him in the fact of the corn, and the agriculture of the shrwed, acientific business farmer is giving sarchi condicavation to the present day problems confronting him in the fact of the corn, and system to drop or selection of plates has its roadilities. Due to the kind or corn. And the agriculture of the shrwed, acientific business farmer is giving and the latest methods of drop problems confronting him in the second that the second the second that the second the machinery falls naturally into two general classes. The first class includes that work which furnishes data functions of primary value to the fall of the machine by the user. It is a typical product of state apprimental stations, of primary value to the fall of the machine by the user. It is a typical product of state appriments assistant, of primary value to the fall of the fall of the machine of the machine will do under fail conditions of the machine of the machine will be come and the second on the efficiency of the machine of the machine will be on the machine of the machine of the machine will be dearly what it is to the family when th
