

Look out for the little

tools make the work easie ntle mother makes

Watch out for lice on the late

Give the young calf an e There isn't a thing wrong with horses except their owners.

Churning when cream is too w has the effect of whitening butter

Nature intends that the calf shou have the first milk from the mother

There isn g, but no ard work.

Sheep do have one real menace owerer, in the summer. That is in rnal parasites.

Let us use more of our own dairy roducts at home. They are the best hat can be produced.

A mule authority says: "There is nothing that walks that will beat an old Jennet as a money maker."

Marking chicks or young turkeys with a poultry pounch does no harm, and the fowls will always show the mark.

Ground oats, green clover hay, and sweet skim-milk make a good rather for lambs after they are twenty-one days old.

Be careful not to overwork the brood are when she is nursing a promising olt, for overheating of her has a bad fact on the milk.

Pasturing grass too soon or too ard is an expensive way of saving ed. It costs several times the mount of feed saved.

he hog house if left open will sup-a cool place for the pigs to lie in, also protect the young from heavy ms and from the hot sun.

r too many chicks in one rhether with a hen or in a is a common fault. Chicks broods always do better.

he time of year when lice at damage in the poultry young chickens should be

rated off is good ther inflammation

Make very liberal estimates as to the number of chickens you are to

This is the time to begin knocking at another possible feed shortage next

For the young calf just learning to eat there is nothing better than ground oats.

Milking with wet hands is one of the most undestrable habits that a man can form,

Turkeys often get puny and die when several weeks old, from no oth-er cause than lice.

The longer a call is allowed to suck the cow the harder it will be to make it drink from a bucket.

It never pays to keep more cattle than one can be sure to furnish with ample feed the year round.

By using a little patience a calf can be jaught to drink quickly by letting it suck the finger held in the milk.

There are many reliable breeders of Holstein cattle whose entire herds av-erage 10,000 pounds of milk per year.

If a thin sow has more pigs than she can suckle to advantage, take part of them away and ruise them on a bottle.

Anybody can raise an ordinary horse and sell it for an ordinary price. It takes blood and feed and care to beat the average.

The main points to make sure about n buying a separator are durability, lean skimming, easy washing, and asy running.

Almost any feed that is high in pro-tein, such as milk or middlings, and the like, is good for sows; pigs and growing hogs. Don't let the young turks out ungit dew is off the grass in the morning if you want turkeys to sell next Thanksgiving.

Why not a concrete vat in the milk house this spring? They are reason-ably cheap, eternally durable, and highly sanitary.

Geese, after they get their feathers are rarely, if ever, attacked by in sects, but this will not hold good in regard to goslings.

Put a bell on some of the cows if they run in the woods or a brush pasture. It will save time and steps in looking for them.

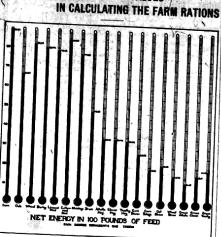

A helfer that has a long milking period with her first call is very apt to establish the habit of long periods if she is well shadled.

See that the harness, and especially the inside of the collars where they come in contact with living fissh and blood, are smooth and clean.

In the push of farm work the truck patches should have be neglected, for in these little things lie the farmer? Wing and his success as a farmer. On every dairy farm there should be two pasture fields, by feeding off first one and then the other, the own have a succession of rich tender grass and clover.

Good quality of wheat at a neither moldy nor dusty, fair roughage for horses, at in moderate amounts rove injurious in any way

PRACTICAL USE OF ENERGY VALUES

By SLETTE BULL.

Assistant in Animal Nutrition, University of illinois.

The sun is the source of all energy of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed of body fat, is the "net energy" of the feed on a dispart to the feed of the

URGENT DEMAND FOR TEACHERS OF FARMING

TEACHERS OF FARMING

By A. W. NOLAN.

Assistant Professor of Agricultural Extension, University of Illinois.

The demand for teachers of agricultural schools throughout the country leads of the schools and persistent. This call for teachers of agricultural schools throughout the country leads of the schools and persistent. This call for teachers of the schools and partly through a growing pad arisen partly through a growing pad arisen partly through a growing pad conditions, financial and social conditions will be improved by the Introduction at gracular into the comparticulal federa who know that the partle of the schools; and partly through the slarm of the comparticulal federa who know that the partle of the schools and partly through the slarm of the comparticular selfers who know that the apartle of the schools and partle of the schools and partle of the schools and the schools and the schools of the sc

The young man breezed into the old The Wretchedness

The young man breezed into the old man's library.

I met your daughter," he announced, "at a Fifth avenue reception. I met your daughter," he are the second at 1.00. Ehe's willing."

The old man turned to his card index. "Which daughter," he saked.

"Ut's Miss Ethel."

"All right," said the old man. "Make it 4.30 and plus dated the wedding. I have an ongagement at the other hour,"

It was so ordered. This is a snappy age.—Pittaburg Fost.

ALMOST FRANTIC WITH ITCHING ECZEMA

Tight years ago I got ecsema all over my hands. My fingers fairly bled and it itsels durill it kinned drove me frantia. The eruption began with itching under the skin. It spread fast from between the fingers around the late of the skin of the ski

A man thinks a girl is perfectly proper who refuses to kiss him—be-ause he can't think of any other rea-on why she should refuse.

When a man's conscience trouble him he thinks he has indigestion.

The goesip of today may be the su erstition of tomorrow.
