Cement, Stave Silos

ARE AS CHEAP AS WOOD SILOS, AND ARE VERY MUCH BETTER, because they are permanent silos, actually growing stronger with age—they cannot be destroyed by fire and are strong enough to resist any wind—they are absolutely air and water proof and will preserve the silage perfectly under all weather conditions—they are acid proof they require no attention to keep in perfect condition. THE CEMENT STAVE SILO is a beautiful structure and adds to the appearance of the farm home. In its moisture proof walls the silage freeze: less than in other silos, whether hollow wall, brick, wooden or cement. It is the BEST silo because the first cost is the fotal cost. No expense for repairs, painting, attention and loss from spoiled silage caused by air leaks.

If you are going to build a silo call on, write or telephone me.

BE BEAUTIFUL! If you want luxuriant hair, a beautiful complexion, pearly teeth, a sweet breath, soft hands, delicate finger nails and a smooth, clear skin, come, get our beautifiers. There are no harmful ingredients in our toilet preparations. We can help you to be beautiful. It is easier to keep your hair than to restore it when it fa'ls; it is easier to keep your plumpness and complexion than to overcome and wrinkles.

MONEY IN YOUR POCKETS

We repair, clean, press and dye your old garments thoroughly and earefully, thus adding a long period to their days of usefulness and sa ing you many dollars. Keeping your suit clean and neatly pressed does not call for an expenditure of money but is instead an economy, for the added life of the suit will more than pay the cost of this attention, to say nothing of the better appearance you will present, and consequent respect and confidence you will inspire. Our service is prompt and our charges redsonable. If out of town send in your clothes by parcels post and have them renovated and returned.

All work called for and delivered. Phone 100-R

H. B. BANKS & CO.

MERCHANT TAILORING MEN'S FURNISHINGS

You should know that the motor and rear axle are, the ost important parts of any car.

The OVERLAND motor has given so much satisfaction that it has been only slightly changed in five years.

The rear axles are so designed that they simply turn the wheels, and the axle housing carries all the load, while bearly every other car in the \$1.000 class use semi-floating axles. In this case the axles are required to carry half the load, besides driving the car. If you are buying a car look particularly at the power plant and rear axle.
