

Why Clothcraft Insured clothes cost no more than "take a chance" clothes. *Clothcraft* clothes would be high priced if the makers had to use ordinary methods in their factory. *Clothcraft's* improved science of clothes making, makes it possible to use all wool cloth and produce better clothes for less money. *Clothcraft* ready-for-service clothes at \$15 have no equal.

Youth's, Little Gents' and Boys' black and tan button shoes in new up-to-date shapes at \$1.50, \$1.75 and \$2.00. Douglas shoes for men at \$3.00 and \$3.50 and Kneeland shoes at \$4.00.

Cement Stave Silos
Are as cheap as Wood Silos

In its moisture proof walls the silage freezes less than in other silos, whether hollow wall, brick, wooden or cement. It is the **BEST** silo because the first cost is the total cost. No expense for repairs, painting, attention and loss from spoiled silage caused by air leaks.

If you are going to build a silo call on, write or telephone me.

Edward Wolff

AND ARE VERY MUCH BETTER, because they are permanent silos, actually growing stronger with age—they cannot be destroyed by fire and are strong enough to resist any wind—they are absolutely air and water proof and will preserve the silage perfectly under all weather conditions—they are acidproof—they require no attention to keep in perfect condition. **THE CEMENT STAVE SILO** is a beautiful structure and adds to the appearance of the farm home.
