The Essence of Success is the Proper Use of Time.

Every prosperous business man is habitually
enterprising and alert. He estimates the
minimum time required for every transaction,
then tries to finish the work within the
allotted period.

To the mind of such a man, the question
frequently recurs throughout the day, "Can-
not this be done by Long Distance," and
upon consideration, he often decides that
the telephone method is not only practical
but preferable.
