ANCHOR FISHING!
 FISHING FOR LOST ANCHORS HAS BECOME A REGULAR HARBOUR INDUSTRY.

UNSUSPECTED CHARGES
 ELECTRICITY IS MADE WHENEVER A DRY WOOD PEN-KNIFE IS CUT. THE ATTRACTING OPPOSITE CHARGES CAUSE THE CHIPS TO CLING TO THE BLADE.

...All you have to do is to read the paper, Sam.

...You don't need to know anything more about Sam than that in order to place him in his class.

...Then another child raised his hand.

...That's the city where the soldiers died in the Black Hole, isn't it? You always wondered why the English were in India. Why didn't they go home and stay away from a country that treated them like that? They got into so much trouble because the people didn't want them there. Why do they stay there when they are not wanted in other people's country?

...That from 10-year-old Richard ... Give the children a chance to ask the questions. You do it for a while. Help them to find the answers in their reference books.

...If you continue to ask the questions the children will continue to be interested to answer the one question that is a proper way.

...It is possible for a child to get into a subject and know very much about it because his mind is very quick and the subject is simple. Another child is possible for a child to know a great deal about a subject and get into it only because the teacher did not happen to ask the question that would lead to the vein of knowledge he had.

...If a child does the question the teacher is informed about the question and the child is better informed on his subject.

ORDERING THIS TO THAT . . .

...number of motor accidents shows a definite increase, and individual care on the part of motorists is necessary to insure a greater degree of safety on the streets and highways.

...Early twilight and the tendency of motorists to keep windows closed and large hand signals are conditions which easily can be met with individual care in driving. Allowing more time for reaching the home and the careful application of the brake and use of mechanical or hand signals when the cause of the cut is changed is important to safe motoring in the fall.

2,000,000 Game Fish Distributed in State

...Distribution of more than 2,000,000 game fish from three to eight inch in size, has been completed by the department of conservation, it has announced by Director C. F. Tamm. This delivery covered 14 counties in the state. Shipments were made from the state's hatcheries at Rockford, Geneseo, Wyand, McComb, and Yorkville.

Patents

...The foreign patent pending application for patent has been granted at the United States patent office but the patent has not yet been granted. When the word "patent" is used it means that a patent actually been granted.

Bird Lore

...An interesting paper on the birds and trees of Southern Texas was given by Mrs. Hattie Porter, at the regular monthly meeting of the Barrington Bird club, held at the home of Mr. and Mrs. Eldon Porter, Tuesday evening. A report of Mrs. Porter's trip to several parts of Southern Texas, where she observed bird and plant life. Her paper was full of information concerning many different and curious birds of the region, along with an account of particularly surroundings in which they might be found. In the absence of the author, the paper was read by the president.

...Two entertaining readings were given, the first, "The United States," by Miss Betty Schaefer, the second, an amusing story of the big sisters, by Verard Jones.
