TROLLEY LINE PROJECTED

oters Intend to Connect Bar rington, Lake Zurich, Wau-

ida and Chicago.

A new trolley line is projected from Chicago through Chook, Lake and Mc-Heary cointies, the object being to connect Lake Genera with Chicago by a trolley line that will take care of both freight and passengers. It is said that ample capital is back of the parties proposing to boild the line which they have named the Chicago. Useplaines and Fox River Electric railway, and which is expected to touch Wauconda, Lake Zurich and Isarrington. Incorporation papers were issued Tuesday by the secretary of state at Springfield to the promoters—Geo. W. Bryson, William S. Reed, Ernest T. Ross, Walter C. Gunn and William K. Kenly, all of Chicago.

Guni and William of Chicago.

So many railroads have been projected over the proposed route during the past few years, that our citizens have come to look at every new railroad venture as a myth, and they will have to see actual construction begun before they place any stock in these

before they place any area in reports.

There is no question but what an electric railway through the proposed territory would be a financial success, and incidentally be of great benefit to the territory through which it would

pass.
We hope the gentlemen will carry
their project through to success, but
until actual work is begun on the construction there is little use in placing
any hope in the project.

For Rent-Rooms in Lamey build-ing suitable for house keeping, or will ing suitable for house keeping, or will rent whole building for hotel purposes. Apply at this office.
