

WORLD'S NEWS —TOLD IN— PARAGRAPHS

The thirty-first year of Eureka's college, Eureka, Ill., opened with a large attendance. Judge Jesse Black of Pekin delivered the convocation address.

Bob Rogan, the Tennessee negro giant, is dead at his home in Gallatin. Rogan was eight feet nine inches tall. His hands were twelve inches in length and feet sixteen and a half inches.

Charles Outlaw and his wife were burned to death at Braman, Okla., following an explosion in the kitchen stove. Mrs. Outlaw kindled the fire with coal oil.

Wesley R. Wales, president of the defunct First National Bank of Cape May, was placed on trial in the United States court at Trenton, charged with embezzling \$15,000 of the funds of the institution.

Three Chinese sailors suffering from beriberi arrived at New York in a British ship from Sumatra.

Morris K. Jesup of New York has been decorated by Emperor Nicholas for his services to starving Russian peasants.

President Roosevelt will visit New Orleans in October, as planned, despite the yellow fever.

Defense of the army by counsel for Captain Targant was a feature of the argument in the Worcester divorce case.

Rev. Jasper Howells, a Baptist minister of Birmingham, N. Y., has been called by the Baptist church at Bloomington, Ill.

Telegraphic communication has been established between Caracas and Bogota, the capital of Colombia.

Ex-Governor Liliuokalani celebrated her seventieth birthday on Sept. 2. A reception attended by natives was held at her home in Honolulu.

Vice President Fairbanks will speak at the opening of the Republican campaign in Cincinnati on Sept. 23. The other speakers are to be Governor Herrick and United States Senator Foraker.

Speaker Joseph Cannon, who has been spending a week in Nebraska, left Omaha for his home in Springfield, Ill. He has been confined to his hotel with an attack of a gripe, but says he has recovered.

Booth Tarkington, the novelist, and his wife were passengers on the steamer Konigin Luise, which sailed from New York for Genoa.

Ambassador Meyer started from St. Petersburg for Berlin and Paris, whence he will return home on leave of absence at the end of September.

A number of Panama canal officials on leave of absence arrived at New York on the steamer Mexico. Among them were W. K. Dauchy, former acting chief engineer of the Panama canal.

Prince Ferdinand of Saxe, eldest son of the Duke of Gotha, a member of the royal family of Italy, arrived in San Francisco on the Italian cruiser Calabria on his way around the world.

Governor Vandam, having been advised that the battleship Mississippi will be ready for launching at Cramps' shipyards, Philadelphia, Sept. 20, has appointed United States Senator H. D. Money to talk with the representatives of the state, and miss Mabel Money, granddaughter of Senator Money, as sponsor.

The coroner at Covington, Ind., finds that George A. Hutsa was killed by Mayor Oliver S. Jones, who acted in self defense.

Jacob Schneider, a prosperous farmer at Sterling, Ill., accidentally swallowed a dose of carbolic acid and died in great agony.

The sixth international congress of applied electricity will be held in Rome in April, 1906. The patronage of the king of Italy.

Mexican officials at Guadalajara announced that the government had ordered the suppression of all lotteries.

George F. Hartz of Decatur was elected president and W. A. Huxel of Chicago secretary of the state organization of Glensons at the convention in Peoria.

Because he was killed by Nellie Eichelberger, 16 years old, Lee Wedge, 17 years old, of Thurmont, Md., shot and painfully wounded the girl and then killed him.

Independent coal dealers at Springfield, Ill., are engaged in a war with the Springfield Coal Association, and the price of fuel has declined from \$2.25 to \$1.75 a ton.

Captain Thomas Wexford of the steamer W. C. Richardson reported at Duluth that his vessel ran down the Canadian tug Shamrock near the Soo Sept. 5, drowning the captain and engineer.

The American Mathematical societies' twelfth annual summer meeting began at Williams College Friday, with many of the leading college professors of the country in attendance.

The Iowa Methodist conference at Albia voted to hold the next meeting at Grinnell.

F. Solon and A. Killing of the Peary supply ship Erie arrived at St. John, N. B., on their way to Washington, where they will report on the progress of the polar expedition up to the time when left Commander Peary on Aug. 16 at Etah, Greenland.

SEARCH FOR WOODS FUR MURDERER

Jackson County Farmers to Hunt for Slayer of Two Little Boys.

MOTHER SAYS SHE HEARD SHOT

Though Both Lads Had Knife Wounds Over Heart, Parent of One Declares She Heard Report Just Before Son Was Wounded.

Panama, Ill., dispatch: Acting on the advice of the coroner and the sheriff, Jackson county farmers of Sand Ridge and Hickory Ridge have organized a posse to search the country for the murderer or murderers of Heber Wortham, 7 years old, and Virgil Eldron Clutta, 3 years old, both of whom have been killed under circumstances so uncanny and horrifying as suggest some gruesome tale by Conan Doyle or Edgar Allan Poe.

That an escaped maniac is roaming the woods and committing these murders is one theory, and many farmers assert they have seen such a man in the neighborhood.

In neither case was there any evidence of human agency or clue to the secret of the child's death. Heber Wortham was killed in broad daylight, while slight of his mother and sister as he died at his mother's feet.

Mystery in Deaths.
Mrs. Wortham declares that just before her son fell she heard the sound of a shot, but the boy's wound unmistakably is that caused by a knife, not a bullet.

Virgil Clutta, playing in a pasture near home, ran suddenly to his mother, his hand over his heart, and blood staining his shirt. In two minutes he was dead. No one was near him the moment before, when his mother noticed him at play.

The only agency which might be supposed to cause death was a barbed knife, held in the hand. The parents are inclined to the belief that the child may have fallen on this blade, stabbing himself to the heart, and the father of the boy says, whereas he saw no blood on the blade at first, a closer and later scrutiny disclosed slight traces of blood.

Re-enact the Tragedy.
In the pasture adjoining the home, the summit of Hickory Ridge, Mrs. Wortham re-enacted as far as she could the tragedy. The motherly, grief-stricken woman knelt on the ground to show the position in which she saw the boy alive. Heber's two little sisters took the positions which they occupied when their brother was so mysteriously stricken.

Mrs. Wortham's voice trembled as she told what happened that fateful night, and indicating a point a few feet to the left.

"Heber was standing there. I was at the pasture gate and the two little girls were near me. Hunters had been in the woods and fields all afternoon, and had been going about a deal of shooting, but some time before the children entered the pasture this had ceased.

Insists She Heard Shot.
"While I was watching Heber I heard a shot. I cannot tell whether it came from the woods on the north or the cornfield on the west. Almost at the same instant I saw Heber turn halfway round and stumble toward the north. I heard him cry, 'O mamma! Then he sank to his knees, in the same position I am in now. I saw blood coming from a wound in his chest."

"I was about to pick him up when his father came and carried him to the house. My husband was attracted by my screams. Heber was never able to speak after we took him home."

In each case the stab wound was clean cut and exactly over the heart. In neither case does the family know any enemy that might seek this method of revenge for a real or fancied wrong.

Lays Crime to Pervert.
The bodies of the boys will be disinterred and an autopsy performed to ascertain what kind of an instrument made the wounds.

"If the boy was not shot by an enemy," says the coroner, "but rather by perversion led to it. Here is where the perversion comes in. Perhaps the man has an irresistible impulse to kill children. Perhaps in his cunning he has invented something new in the shape of a combination bullet and blade, and his zeal as an inventor prompted him to try this method on living targets."

Ap Money for Charities.
Concord, N. H., dispatch: At a meeting of the governor and council Gov. McLane formally announced to the council the gift to the state by the Japanese plenipotentiaries of \$10,000 to be divided among the charities of New Hampshire.

Seeks to Enjoin a Singer.
San Francisco, Cal., dispatch: The Metropolitan Opera company, who the York has asked an injunction restraining Signora Tetrazzini from singing at a theater here. Plaintiff alleges her appearance to be a breach of contract.

Chinese Magistrate in Prison.
Shanghai cablegram: The Chinese magistrate of Quinsan, near Shanghai, has been arrested and imprisoned. He is reported to have tortured a British subject of Chinese descent, employed on the Shanghai-Nankin railway.

HIDDEN PUZZLE PICTURE.

Find Her Father.

CROP ESTIMATE ABOVE AVERAGE

Condition of Corn Is Given at 89.5 on the First Day of September.

POTATOES SHOW HEAVY LOSS

Summary of Correspondents' Reports Indicate That the Staple Is but Trifle Over the Average for the Ten-Year Period.

Washington dispatch: The crop estimating board of the bureau of statistics of the department of agriculture, from the reports of the correspondents and the agents of the bureau, that the condition of corn on Sept. 1 was 89.5, as compared with 89.0 last month, 84.6 on Sept. 1, 1904, 80.1 at the corresponding date in 1903 and a ten-year average of 81.7.

State of Spring Wheat.
The average condition of spring wheat when harvested was 87.3. This is the second year that spring wheat has been separately reported upon on Sept. 1; comparison can, therefore, only be made with the condition one month ago, which was 89.2, and with that reported Sept. 1, 1904, which was 66.2.

The average condition of the oat crop when harvested was 80.8 against 80.8 last month, 85.6 reported Sept. 1, 1904, 75.7 at the corresponding date in 1903, and a ten-year average of 84.

The average condition of barley when harvested was 77.8, against 89.5 on Aug. 1, 1905, 84.7 reported Sept. 1, 1904, 82.1 at the corresponding date in 1903 and a ten-year average of 82.4.

The average condition of rye when harvested was 90.8, against 85.9 reported Sept. 1, 1904, 84.1 reported Sept. 1, 1905, and a ten-year average of 80.2.

Clover Seed Crop.
Of the thirteen principal crops used for procuring staple, one, namely, Illinois, reports an increased acreage; four, namely, Ohio, Utah, California and Colorado, report no change in acreage, and all the other principal states report decreases. In Ohio and Utah conditions are reported the same as their ten-year averages, while in all other principal states conditions are above such averages.

The number of stock hogs now being fattened is 6 per cent less than the number one year ago. Reports as to size and weight of stock hogs indicate a condition of 96.3, as compared with 94.2 one year ago and a seven-year average of 94.7.

LITTLE IS LEFT OF HALF MILLION
Aged Broker Goes to End His Days in the Poorhouse.

New Rochelle, N. Y., dispatch: With only seven cents in his pocket, the remains of a fortune of a half million dollars, an old man with flowing white hair, whiskers appeared before the commissioner of charities, Henry Sharp, and asked to be committed to the Westchester county almshouse.

"Once I was worth \$500,000," said the man.

BURNS IN ANSWER TO PRAYER
Pavilion Is Destroyed by Flames to Delight of Churchmen.

Fremont, Ohio, dispatch: Fire destroyed the pavilion at the Belleville summer resort, two miles south of this city, together with a grocery, a barber shop and several small buildings. For some time, it is said, the congregation of the United Brethren church has been holding meetings praying that the pavilion might be destroyed. It is believed at Belleville that the fire was of incendiary origin.

BIG WAR VESSEL IS DESTROYED

Admiral Togo's Flagship, the Mikasa, Blows Up in Harbor at Sasebo.

FIVE DEAD, WITH 251 MISSING

Japanese Drive Over Loss of Battleship That Had Become Endangered to Them Through Success in Battle Under Togo.

London, Sept. 13.—The loss of Togo's flagship, the battleship Mikasa, sunk Monday morning in the harbor of Sasebo, comes as a tragic anticlimax to the horrors of the war.

According to the official report given out by the Japanese navy department at Tokyo Tuesday morning, 599 lives were lost when the Mikasa was destroyed.

Later reports seem to mitigate the horrors of the disaster. A dispatch to the Times says that the casualties include five men killed, 342 wounded, and 251 missing.

These figures which total 599, indicate that at least 500 men were rescued from the battleship, wounded, but still alive; that five of the dead have been recovered and that 251 are missing. The presumption is that the 251 missing men either were killed by the explosion or drowned when the ship went down.

Another dispatch from Tokyo says that of the officers aboard one was killed and eleven wounded, while five are missing.

There is also some indication that the battleship was so seriously damaged as first reports indicated. Dispatches from Tokyo say the ship sank in shallow water and that it probably can be refloated and repaired.

Story From Tokyo.
Tokyo, Sept. 13.—Admiral Togo's flagship the battleship Mikasa, was destroyed by the explosion of its magazine at 1 o'clock Monday morning, in the harbor at Sasebo.

The official announcement of the disaster stated that 599 lives were lost.

The explosion of the magazines was caused by a fire, which was discovered in the hold, at the base of the mainmast, shortly after midnight.

The origin of the fire is unknown. The flames spread in the interior of the battleship with great rapidity. Other warships lying at anchor in the harbor at once sent detachments of officers and men to assist in the work of fighting the fire.

Rescuers Lose Life.
The presence of the men from the other warships on board added to the casualties, as many of them were killed or drowned. Thus many of the warships in the Japanese navy are represented on the death list.

The crew of the several ships fought the flames heroically despite the constant danger of the explosion of the magazines.

The efforts of the officers and men were directed to preventing the flames from reaching the big forward magazine, it being believed that the magazine aft was in danger of being reached by the flames.

An hour after the discovery of the fire the aft magazine exploded, blowing a great hole in the port side of the battleship. The huge craft sank almost in an instant.

Men Caught in Trap.
Nearly all of the men on board at the moment of the explosion were below decks, fighting the flames. When the explosion came the magazine was surrounded by swarms of men. Some of them were killed instantly. Others were either so badly wounded or so completely stunned by the concussion that they were unable to reach the deck or even a porthole.

Many of those who were on deck and well forward sprang overboard and were thrown into the water and were picked up by boats from the other ships.

The disaster to the battleship Mikasa has cast a gloom everywhere. The Mikasa was Togo's flagship and was endeared to the hearts of the people. Great relief was felt throughout Japan when it was learned that Admiral Togo was not on board the ship at the time of the fire.

An investigation is now being held to determine the cause of the fire.

OPEN SWITCH WRECKS A TRAIN
Crew on Chicago and Pittsburg Express Escape Injury by Jumping.

St. Paul, Minn., dispatch: Train No. 16, the Chicago and Pittsburg express on the Pennsylvania railroad, was wrecked a mile east of here by running into an open switch. The train dashed into a cut eight cars on an adjoining track. Engineer Samuel Hodges of Pittsburg and his fireman escaped injury by jumping. Three or four of the passengers were killed.

No passengers were hurt.

LIFE STORY ON A \$1,000 BILL
Ten on the Note.

Washington dispatch: One of the tellers at the United States treasury, in counting a pile of currency that had come in from a subtreasury, discovered on a \$1,000 note some writing that indicated either a tragedy or an attempt at a joke. The inscription was: "The last of an ill-fated fortune," and it was signed with the initials, "C. L. B." and the date "St. Paul, N. D., 1892."

Calumet Baking Powder

A wonderful powder of rare merit and unrivaled strength.

HOUSE OF COMMONS ATTACKED.

English Journal Declares It Does Not Do Its Duty.

It is commonplace to-day that the House of Commons is degraded. It has lost its authority and its prestige. It has suffered itself year after year to be bamboozled, deceived, hoodwinked. It has voted away enormous sums without adequate inquiry or guarantee for their return. It has allowed huge pecuniations to be made under its very nose and it has collaborated with the official efforts to screen the criminals. It plays into the hands of ministers who for years are carrying on a game of equivocation, evasion or, to speak plainly, of falsehood. The House of Commons does not do its duty, and does not want to do its duty and does not care how long ministers may wriggle and manoeuvre so long as they can save their skins.

The majority have got to that state of hardened selfishness it is not easy to find a remedy for that which it carries in its bosom. Whether a new house and a new speaker can cure it remains to be seen.—The Postivist.

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, because it never sticks to the iron, but because each package contains 16 oz.—one full pound—while all other Cold Water Starches are put up in 8-pound packages. The price is the same 10 cents. Then again, because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you a 12-oz. package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package the name and figure "16 oz." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.

Missed Her Fish Dinners.
It was in the parlor of a little German inn that an American overboard two of her countrywomen discuss their literary with great vivacity. "There are three places, all on the coast of Italy," said one. "They are highly recommended in the guide-books for beauty of scenery and so on, but they must be a good deal alike. What do you say to skipping one of them?" "Well, let's wait and see how we like the first one," said her friend, who was registered as coming from a Massachusetts town. "Being right on the sea, I should think we'd stand some chance of getting a good fish dinner, and something we have not had since we left home!"

British Columbia Timber.
The British Columbia government has received revenue to the amount exceeding \$400,000 from timber for the year ended June 30, 1905. The collections exceed the estimates made at the beginning of the year by more than \$155,000. Practically three-fifths of the revenue has accrued from licenses to cut timber upon government lands.

Man of the lumberman found that the requirement that all logs cut upon government lands should be manufactured in the province would result in a loss of revenue. The reverse has been the result, as the revenue for the past year is far greater than that for any previous year in the history of the province.

NOISES IN HER HEAD
Mrs. Rogan was a Nervous Wreck, But Dr. Williams' Pink Pills Brought Sound Health.

"Before I began to take Dr. Williams' Pink Pills," said Mrs. Mary Rogan, Pink Pills, No. 85 Kilburn street, Fall River, Mass., "recently, 'I was in and out of bed all the time, but now I stay up all day and do all my own work."

"I was badly run down from overwork. One day noises began in my head and almost made me crazy. My head felt as if a tight band had been put around it, and the pressure and the sounds made me so uneasy that I often had to walk the floor all night."

"I had a nervous headache, and I had another sensation. At such times my body seemed bloodless, my hands were like chalk and my eyes turned yellow. The doctor said I had dyspepsia in the worst form. Then my nerves gave way and I was completely prostrated. I was continually suffering from smothering sensations."

"The first box of Dr. Williams' Pink Pills I had quieted my nerves so that I could get a good night's sleep, which was a new experience for me. Before I began to take them I was a nervous wreck and trembled at the slightest sound. I was so weak that I had to sit down and rest every few steps when I went up stairs. Now I can run up a whole flight at once. The smothering sensations have gone and the noises in my head have stopped entirely. My appearance has greatly improved, for friends who have known me for years are looking at me and saying, 'How well you are looking!' My husband spent over a hundred dollars for a treatment for me but Dr. Williams' Pink Pills brought me sound health."

"Sold by all druggists, or sent, postpaid, on receipt of price, 60 cents per box, six boxes for \$2.50 by Dr. Wm. D. Knapp, Medicine Co., Schenectady, N. Y."

FLED FROM TEMPTATION.

A Brother Was Getting Close to This Honest Man's Prize.

Several secret services were being furnished in a downtown cafe the other day when the talk turned to the general subject of graft and bribery.

"I am required to tell you," said one of the story of an individual who was well known in the west about a decade ago as a man of unimpeachable honesty and sterling integrity. And it wasn't just a belief or a general impression, but a matter of cold, hard fact, as the circumstances had proved more than once.

"It happened that about the time I mention a big eastern corporation which handled millions of dollars' worth of goods annually wanted a man for a position of the highest trust and after searching the country over lighted on the gentleman in question. He accepted the position, delighted with the honor done him, and only held it for a month, when he landed in his resignation. As he had given splendid satisfaction in the short time, he was pressed by his employers for an explanation. This he finally gave, as follows:

"I had held this place only three days when a well known individual came to see me and, after pledging my honor to secrecy, offered me a bribe of \$10,000 to do a certain thing that would have been faithful to my trust. I had him shown out of the office. The next day a representative of his raised the tendered bribe to \$20,000. I refused indignantly. Several days later the offer was raised to \$50,000, and some time after it was increased to \$75,000. Still I refused with scorn.

"Last week the well known individual himself again came to see me and offered to make the bribe \$100,000 in cash and \$100,000 in stock, and I refused the offer and resigned."

"And why did you resign?" asked his former employers, gazing at him in admiration.

"Gentlemen," said the man of unimpeachable honesty and sterling integrity, "my reputation is all I have. There has never been a spot on my name, and bribery and graft and I have been strangers all my life. Such will continue to be the case. Gentlemen, I resigned because that last offer was simply near my price."—Washington Star.

WITS AND WOMEN.

Would you hurt a woman most, aim at her affections.—Lafayette.

A woman's hopes are woven as sunbeams; a shadow annihilates them.—George Eliot.

Women cannot see so far as men can, but what they do see they see quicker.—Thackeray.

If woman did turn man out of paradise she has done her best ever since to make it up to him.—Sheldon.

Lovers have in their language an infinite number of words in which each syllable is a caress.—Rochefort.

A beautiful woman pleases the eye, a good woman pleases the heart; one is a jewel, the other a treasure.—Napoleon I.

How wisely it is constituted that tender and gentle women shall be our earliest guides, instilling their own spirits.—Channing.

Chimneys.

Chimneys constructed on modern principles were almost unknown to the ancients, being used only in the large baths, where great quantities of hot water were needed. Chafing dishes, braziers of glowing coals and bottles of hot water were employed by the ladies of the middle ages to keep their rooms warm, and a curious picture is extant of three Norman ladies chatting together, each with a bottle of hot water placed between her feet. Chimneys are believed to have been unknown in England until the twelfth century, but by the end of the fourteenth were generally employed in domestic architecture. For a long time there was a chimney tax all over England.—London News.

Winners in Life.

The people who win their way into the inner recesses of others' hearts are not usually the most brilliant and gifted, but those who have sympathy, patience, self-forgetfulness and that indefinable quality of eliciting the better nature of others. We have many friends who are more beautiful and gifted, but there is not one of them whose companionship we enjoy better than that of the plain faced man or woman who never makes a witty or profound remark, but whose simple quality of human goodness makes up for every other deficiency.

Submarine Divers.

It is not safe, as a rule, for submarine divers to descend below 25 fathoms, 100 feet, at which depth a pressure of 100 pounds would meet with. The greatest depth to which any diver has ever descended is 34 fathoms, or 204 feet. This was to the ship Cape Horn, sunk off the coast of South America. At this depth the diver, Hooper, must have sustained the enormous pressure of 884 pounds per square inch.—London Engineer.

Just a Hint.

Antonie-Hoover smart you look this afternoon. (Dear) Doctor (who has been forbidden to ask if she may stay to tea)—Well, you see, I put on this costume so that if anybody did ask me to go I could stop. (Compliments)

strictly—Lafayette's Island, Hans J. Pouch.

Quintessence.

Tommy—Oh, my, my says you're a blundering idiot, doctor. Doctor—What? Tommy—Well, that's what he says I am when I ask questions, and that's what you're always doing.—Philadelphia Press.

WILD BABOONS.

An Incident Which Illustrates the Cautious of the Animals.

One of the farm boys drew our attention to what seemed like a mere heap of dark specks on the slope of the hills to the right, but we could soon see that they were moving, and waiting for the right moment to make us as a herd of baboons.

The boy said that he was quite sure they were on their way to the water; but, to our surprise, they did not make any advance. A quarter of an hour elapsed, half an hour; still no sign of their approach. All at once, as they had started from the earth by magic, at the open end of the pond, not sixty yards from our place of ambush, two large male baboons, with their tails erect, came out of the bushes. When or how they got there no one could tell. Probably they had come by a circuitous way through the valley, or it might be that they had crept straight toward the water, and then, being anxious to watch the movements of the animals, and to ascertain whether they belonged to the herd or playing under the bananas, I refrained from firing and determined to see what would follow next. Both baboons sprang toward the water, and, leaning down, drank till they were satisfied. Then, having gravely stretched themselves, they solemnly stalked away on all fours in the direction of the herd. There was little doubt, therefore, that they belonged to the herd and had been sent forward to reconnoiter for a moment, and then, when the entire herd put itself in motion toward the pond.

There were mothers taking care of their little ones; there were half grown animals, the boys and girls of the company. At first only one baboon at a time came to the water's edge and, taking its drink, moved back to the rest, but when about half had thus ventured separately they began to come in small groups, leaving the others resting and jumping on the sand.—Youth's Companion.

ODD FACTS ABOUT DEER.

Wonderful Jumpers. With a Maximal Leap of 30 Feet.

"Deer are wonderful jumpers, as may be imagined," says a writer. "I have seen a hind clear fifteen feet or so and buck as high as a tall man merely to avoid a small drain, and also, at a drive, I have seen a stag jump clear over one of the beaters, taking a fence at the same time. There is still extant the record of a famous leap made by a stag during the borders of Etch during a hunt by one of the old Scottish kings. The place is known as the 'Hart's Leap,' and is commemorated by two stones, which the monarch had erected to mark the spot. They measure twenty-eight feet apart.

"Deer have a marvellous sense of smell. With a strong wind blowing they will scent a man a mile off. Yet, though their powers of scent are marvellous, I confess to having had one illusion quickly dispelled. From reading various old books on the subject I had come to regard their sight as something quite abnormal and fondly imagined that, as a spring deer, say, a mile or so away, a cautious advance was necessitated, after the manner of our ancient enemy, the serpent.

Perpetual Snow.

One of the oddities of our system of reckoning time is exemplified in the question as to what time the north

pole keeps. In theory all places on one pole keep the same time. Therefore the north pole, being the central point of all meridians, must necessarily have all times. Should the pole ever be reached, the resident would be able to have day or night at any hour (in theory) by electing to take his time from a meridian to correspond. Should such an unexpected event ever occur there would have to be made some readjustment of our present system of reckoning time to suit the arctic regions.

Photographing Lightning.

An English writer tells how lightning "sits" for his photograph. "Lightning can only be photographed at night. It is also impossible to use any cap or shutter for this work, because the eyes do not observe a flash of lightning till at least a tenth of a second after it has passed. So that, having focused your camera beforehand, draw the shutter and hold the camera in the direction you think the flash will take and you must trust to the courtesy of the lightning to be there on time."

Deepoken.

"I can attend to that divorce case for you, if you like," suggested his friend, the lawyer.

"You sorry, old man," replied the western Benedict, "but the fact is I promised the case to a friend of mine before I was married."—New York Press.

Special Reduced Excursion Rates

Very low rates to Chattanooga, Tenn., via North Western Line. Excursion tickets will be sold Sept 14 to 16, inclusive, with favorable return limits, on account of anniversary of battle of Chickamauga. Apply to agents, Chicago & North Western R.R.

The Lewis and Clark Exposition, with the very low excursion rates and personally conducted tours in connection therewith over the North-Western Line from Chicago and the east, have created an interest in this subject never before equalled. For full particulars address W. B. Kniskern, P. O. Box 215, Jackson Boulevard, Chicago.

Very low excursion rates to San Francisco, Los Angeles, Portland, Tacoma, Seattle, etc., via the North Western Line. Excursion tickets will be sold from all stations to Portland, Tacoma and Seattle daily, and to California points Sept 12, 13, 14, 20, 27, and 28, with favorable return limits, on account of various meetings. Two fast trains to the Pacific coast daily. "The Overland Limited" (electric lighted throughout), less than three days en route. Another fast train is the "California Express," with drawing room and tourist sleeping cars. The best of everything. For rates, tickets, etc., apply to agents Chicago & North Western R.R. sep28

We are asked whether the sowing of the clover seed with a nurse crop of small grain benefits such crop in any appreciable degree. We think not, for the clover cannot do much more than keep alive until such nurse crop is removed. Then the fertilizing machinery of the clover plant does not get into operation to any extent until the second year of its life period, so that the benefits to be secured by the crop with which it was sown.

Some so called scientist is out with the statement that pound for pound bananas are just as nutritious as beefsteak. We should like to see this gentleman try a banana ration and have to work hard on a farm. His stomach would do in a second in the effort to hold enough bananas to keep the breath of life in him. All the banana eating nations are not belied.

This is one of the many cases where chemical analysis and facts don't help.

There is probably no child who does not, at some time or other, very much desire a pony, and there is probably no animal which makes so useful and endearing a pet for children as one of the miniature breed. The Shetland pony is much used for this purpose today. The pure blood Shetland runs from 275 to 400 pounds in weight and from 40 to 46 inches in height. Their small size was originally produced by the adverse conditions which the best of the breed were subjected to in the islands from which they came, where food was scarce and climate unkind.

TO CATCH A RATTLER

SIMPLY STOOD AND PICK HIM UP WITH YOUR HANDS.

It is the Snake to Catch, Lay One Hand Over It and the Other Under It, and It Will Not Move to Get Away. Here's Proof About the Reptile.

There are some facts about snakes given by a young man who has studied them since he was ten years old:

The best way to catch a snake is to simply stoop down and pick it up, as you would a toad or a turtle. Sometimes with a rattler it is as well to put a stick on his head until you get your hand on him. If the snake is coiled, simply lay one hand over it and the other under it, and the snake will not move to get away.

There is a sure cure for snake bite than any brand of whiskey. It is strychnine sulphate, nitroglycerine and potassium permanganate, which may be carried in tablet form and must be dissolved in water and injected hypodermically.

This young naturalist was without his antidote the first time he was bitten by a rattler. It was on the Mojave desert, and he was prowling around among some old prospect holes. Stooping down to pick up a piece of copper ore lying at the mouth of a hole, he disturbed a big rattler, and it struck him. He placed his fingers on his head and arm and started for camp. At the first camp he got a razor and bled his finger as well as he could, but it was nine hours before he could get to his medicine. The next day his whole side was numb and stiff, and it was three weeks before he entirely recovered from the effects of the poison. He had not neglected, however, to catch the snake, and this became his special pet.

The lesson he learned was that a quick movement in front of a rattler's eyes is a most dangerous proceeding and it will make a snake strike quicker than anything else. In handling strange rattlesnakes he is always a little careful and usually draws them into his hand over his coat sleeve. A rattlesnake little pat on the head seems to have the same effect on snakes as on other animals.

After putting a rattler on the floor of his room and teasing it, to make it coil and strike, this snake trainer picked it up in his hand, pulled its head and then pried open the big mouth with a nail to show its fangs, seven on each side. In different stages of development, from one to a cat, it may be the size of a bird's claw. The large fang is likely to drop out at least once a year, but if injured it may be replaced three or four times a year.

There is about the same danger from the bite of a nonvenomous snake as from the bite of a dog or a cat. It may be very serious, but it depends upon whether a poisonous germ is transmitted and upon the condition of the blood of the person bitten.

Baby rattlers are fitted from the beginning with fangs and sacs of poison and are ready for business, but they have only a little button on their tails where the rattles are to come later.

In the matter of food snakes vary. They cannot be treated to cold scraps of all kinds. In fact, most of them are rather particular about having their food served alive. If they are very hungry they may take something freshly killed, but they vastly prefer to do their own killing.

Gopher snakes live principally on rodents, with birds and occasionally birds' eggs as delicacies. Rattlers also prefer rodents. Water snakes have a weakness for frogs. The coral snake, which is very common in the southwest, is quite a general eater. It takes birds, lizards, horned toads, gophers, rats and frogs. He is a cannibal too. A coral snake was once seen to devour a racer eighteen inches longer than himself. He did not eat again for some time.

Constricting snakes squeeze their victims until they can no longer resist. Viperlike snakes strike and poison their prey. Water snakes start right in on a frog while it is alive.

A snake's teeth are fine and sharp and numerous. They look like fine fish bones, all curved backward. The under jawbone is divided in the middle, and the food is worked in with an alternating movement of the lower jaw, aided by a forward and back movement of the upper jaw with its row of hooked teeth. With such teeth it would seem quite impossible for a snake to digest, yet this young man made one give up a bird which had been partly swallowed and stuck fast by its beak having gone through the snake's body.

A snake's digestive organs may be slow, but they are very sure. Teeth, skin, hair and every part of the prey is digested. The hard, flinty teeth of a rat will be found, if the snake is dissected within a week, to be soft enough to crush in the eater.

Snakes only care to eat once in three or four months, though they drink much water. Through the winter they hibernate in captivity as when free. Occasionally they may be roused and will possibly eat something, but they are very sluggish.

Constricting snakes have a powerful grip, but it can be loosened instantly by unwinding from the head or tail—New York Herald.

Gospy. Gospy is a hummingbird with eagle wings and a voice like a fog horn. It can be heard from Dan to Beersheba and has caused more trouble than all the ticks, fleas, mosquitoes, coyotes, grasshoppers, chinch bugs, rattlesnakes, sharks, sea toons, cyclones, earthquakes, blizzards, hailstorms, yellow fever, great indignation that this great United States has known or will know when the universe shod up shop and began the first invoice—Gospy (WPA) Gospy.

"Cut it Out"

says many a doctor to his lady patients, because he doesn't know of any medicine that will cure female troubles except the surgeon's knife.

That such a medicine exists, however, is proved by thousands of cures made by

WINE OF CARDUI

It has saved the lives of many weak, sick women and rescued others from a lifetime of chronic sickness. It will cure you if you will only give it a chance. Try it. Sold by all druggists and dealers in \$1.00 bottles.

GAVE UP SUPPORTER.

"I was a supporter for four years, I keep up my word," writes Mrs. S. J. Chrisman, of Manassas, N. Y. "My doctor said no medicine would help me. After taking Cardui I gave up my supporter and am now well."

THE ASTERIA.

Interesting Data About the Magic Star Gem of Cydonia.

Familiar to the eyes of the ancient writers and credited with supernatural powers, the asteria, or star gem, was highly valued for the benefits supposed to be conferred on the wearer. Its bright, six-rayed star, ever changing and shifting with every play of light and especially showing out its flames in the direct sunlight, would seem to be something more than an ordinary crystal, and to the superstitious mind it could readily be believed to embody some stellar spirit. The particular virtue attributed to this gem was the conferring upon the wearer of health and good fortune" when worn as an amulet, and to those fortunate to be born in the month of April, with which the stone was associated or represented, the wearer was insured from all evil. The star stone is found principally in Cydonia, invariably in soil peculiar to rubber supplies. Indeed it is composed of the same constituent "corundum," its chatoyant, or star rays, being caused by the presence of what the natives call "silk." It is found in many different colors, from pale blue, pink and white to deep dark blue, ruby and purple. The blue are termed sapphire stars, the red are rubies, and the white are called corundum, the star dividing into six rays at the apex. It is next in hardness to the diamond.

The "Moormen" of Colombo, with tools as rude and simple as his forefathers used 1,000 years before, with no training or instruction except the written histories of the craft handed down from father to son, will produce the most wonderful results in cutting and polishing gems and in many instances rival the more educated lapidaries of Europe for judgment in cutting gems to the greatest advantage.—London Graphic.

MAKING SILK HATS.

A Workman Explains Why His Forefathers Hated to Tailor.

The nail of his right forefinger was long, yellow, horny, and the finger tip had so thickened and hardened that it seemed to be covered with pale leather. He was a silk hat maker, and it was from curling hat brims that his finger had changed so strangely. Describing the processes of a silk hat's manufacture, he said:

"The belief that cardboard forms a silk hat's foundation is an error. The hat is first built up of various thicknesses of linen—layers of linen, soaked in shellac, that by means of wooden moulds and hot brass weighing twenty pounds apiece are worked one on the other till a perfect shape, brim and all complete, is attained.

"The silk is sent put on. This silk costs from \$10 to \$15 a yard. It looks like plush in the piece. The hatmaker cuts it off on the bias and makes it round the stiff linen foundation. The strips must be very accurately cut, and great care is used in their ironing and pressing up so as to form a perfect dome on joint. Look at your silk hat's seam the next time you wear it. The joint's perfection will, perhaps, amaze you.

"The brim, up to this point, is flat. Now its curling commences. That is where my queer forefinger comes in. The shaping of a hat brim is purely a matter of hand and eye and taste. The brim while being shaped is lightly heated so as to give it pliability.

"And of course working on this hot material, setting and precluding it, the forefinger thickens and the nail gets horny.

"Nevertheless hat curling is pleasant, artistic work. Hat curlers have reputations the same as artists. Their work is distinctive. An expert can tell it at a glance."—New York Press.

THE UPPER LIP.

A Theory About the Furrow Which Runs Below the Nose.

Below the nose runs a furrow, part-

ing the upper lip. In the faces of babies and children this furrow is very noticeable. From the evolutionary point of view it is one of the most remarkable characters of the face. It tends to become obsolete in old age, and it is not seen among the catarrhine monkeys. Among the platyrrhines it is but feebly developed, but in lemurs it is in a more pronounced state. There is a depressed septum, to which the two side pieces are joined. The upper lip, in fact, is nearly split to two, but held together in a depressed piece of flesh. In the macropithecids and rodents the lip is precisely in two pieces, and each piece is capable of being moved separately. This is the "hare-lip," and its method of use may well be ascribed in a hare or a rabbit when eating.

The furrow, therefore, in the child's lip points to this that our ancestors possessed not a single upper lip, as we do now, but two upper lips, one beneath each nostril, both capable of independent movement. In the course of time these two lips have, owing to the non-independence of the lower movement, grown together to form the single lip we now possess, but the line of junction is not perfect, and as the furrow recedes, and sometimes there is a distinct scar down the middle of the furrow.

The possession of the furrowed upper lip by children is one of the strongest pieces of evidence against the descent of man from any catarrhine and in favor of his descent from platyrrhine or from lemur. Through the intervention of platyrrhine-like ancestors, of which there are no exact living representatives—Nineteenth Century.

Long Lines.

Dumas pere, who was proud of the price he received for his work, was once boasting of the fact.

"Beyond a doubt," he remarked, "I am the best paid of living men of letters. I receive 100,000 francs."

"Indeed, monsieur?" said a bystander. "I have never worked for less than 15,000 a line. What do you think of that?"

"You are joking," responded Dumas in irritation.

"Not at all."

"For what do you receive such rates per line?"

"For constructing railways," was the answer.—Harper's Weekly.

What Peace Means.

"Can you tell me the meaning of the word 'peace'?" asked Miss Gray of a boy who had just recited a patriotic poem in which the word occurred.

"Peace means when you don't get no children," answered the child.

"How is that?" asked Miss Gray.

"When my mother has washed and dressed us six children for school in the morning she says, 'Now, I'll have peace.'"

Torturing Him.

"You say you love your girl is going back on you? What leads you to such a supposition? Did she snub you?"

"No, but she called her little sister into the parlor last night and had her recite to me."—Hudson Post.

PATRIOTIC OLE BULL.

The Greatest Political Influence in Modern Norway.

What was it that made Ole Bull undeniably the greatest political influence in the history of modern Norway? The riddle is easy to read. Although he voiced the peasant's own voice was that of no peasant, but one of the most severely learned of European utterances. His instrumental mastery was complete and the technical difficulties of his compositions have left them for the most part unperformable. But Mozart was his chosen theme, and with such an ardor of consecration that the whole range of his works had for him no secret. His fame, therefore, was that of order that opens all doors. Statesmen and chief men of letters like Bismarck and Von Moltke were his intimates, and he was their confidant. To tower artists like Liszt, Chopin and Mendelssohn he was own brother. Indeed, a curious physical resemblance between Liszt and himself led to many amusing contretemps on this score. And sovereigns, diplomats and great nobles were all proud to name him among their friends. In him, then, Norway had found one who could stand for her in the highest ranks of the nations, learn for her the secrets of statecraft and recover in her behalf the trick of thinking like a king. For this is one of the losses called for by foreigners from a foreign seat—that they forget to think of their country as a whole, the habit that is the secret of rulers.

Yet it was only as a man and not by any means as a politician that an autocrat could claim the friendship of the distinguished artist. His own sovereign felt that he had cause for grave offense when the news reached Stockholm, in 1848, of his heading a procession in Paris to present the Norwegian colors to Lassalle. But even royal anger could not resist the good stories told on the next visit, and the king stood biting his lip at the careless manner of Ole Bull as he turned suddenly and said, "By the way, sir, you should have been with us the other day in Paris when we went to acclaim Lamartine."—Margaret K. Noble in Century.

WOMEN'S WEAR IN WARTIME

Homemade Cloth of Many Kinds.

Scooped Neck For Hats.

We had one cotton mill to spin the warp. The people stood in line to get a bundle of cotton for every thread was yarn, cotton, fax and tow. We got our dyestuff from the forest. It was almost as bad on timber as the (ash) trade is now. There was great

rivalry among the weavers to see who could have the prettiest dress, I have a quilt made of cotton and linen called a "Concordance" quilt.

The clothing for every member of the family was made from the raw material, carded, spun, woven, dyed and made up with longpin threads.

The town linen cloth had one peculiarity. It was a great stretcher. It was often exchanged for other things. A linen cloth was used to sew with the cloth sufficient to get some articles. On the way he remembered he needed a gilet also. He told his wife. They decided to let the ends of the cloth for two sayings, he to stretch a gilet out of it.

I took great interest in the silk industry. We felt the worms on mulberry leaves, and such beautiful silk we did have. A bright stripe in cotton dress made it very fine. A family made gloves, beautiful silk mitts, with bees embroidered on the back. Nothing went to waste. The thorn trees furnished us pins and hairpins. Our millinery was our crowning effort. Hats were made of cotton thread crocheted, put on a block, stretched very stiff and ironed, then wired. We had homemade flowers and all kinds of material for trimming. A cloth frame made stiff and covered with scraped cow's horn was much admired. If it did look like a coconut cake.—Charlotte (N. C.) Observer.

This Stream Runs Up Hill.

One of the few instances of a stream running up hill can be found in White county, Ga. Near the top of a mountain is a spring, evidently a siphon, and the water rushes from it with sufficient force to carry it up the side of a very steep hill for nearly half a mile. Reaching the crest, the water flows on to the east, and eventually finds its way to the Atlantic ocean. Of course it is of the same nature as a geyser, but the spectacle of a stream of water flowing up a steep incline can probably be found nowhere else in the country and appears even more remarkable than the geysers of the Yellowstone.

Overconfidence.

It is a dangerous point in any man's career when he feels sure of his position or his fame. Overconfidence is the first sign of a decline, the first symptoms of deterioration. We do our best work when we are struggling for our position, when we are trying with all our might to gain our ambition, to that point which the heart longs for.—Success Magazine.

The Real Test.

"Is he a thoroughly honest man?" "I don't know," answered the man from Missouri. "I have trusted him with hundreds of thousands of dollars, but I never tried him with a book or an umbrella."—Washington Star.

Messed Her Cheese.

May—I believe that Miss Peasey had a proposal when she was sixteen. Blanche—Indeed? And the poor thing was so young and thoughtless that she did not accept?

The officer a man loses his temper the more he has of it.—Galveston News.

ver in company with Regan and Golden, traveling toward the West. Upon arriving at St. Paul, which was near-

The party threw all restraint when once the vessel began to ply the Arkhangel. There was no one on board now but the emigrants to the Convict Country. Our German girls had by this time, if they had not before, learned their fate, which was to be sent to the penal colony. They turned to the several farmers who supplied the city with edibles. This to them was no great misfortune. They

Louis Lang seemed to be out of place in this group. He is unlike any other individual in the gang. A passenger paying his way into the city. There had been just as foolish men as the appears brought into the city before, who were not of the gang. With their own will, and awake to find that their past was but a dream, and a future of toll and slavery still ahead of them. As we know Lang, we know every one was waiting for the inevitable.

All was darkness for a moment, and then the charge came! Now all seemed confusion; the women screamed as the mules brayed; the Indians yelled as the actual defenders alone were silent. With grim determination painted on every face, the emigrants awaited the attack and were not caught asleep. At last there came the discharge

name, even if he had to enter the very jaws of death to accomplish his purpose. To look at him so one would suppose him an extraordinary young man. He was a little taller than the average man, but he would be conceived, yet he is a little different. He sings and dances, and plays upon the mouth organ and tells funny stories, and he is a very good fellow. He was to laugh at his wit, and each of his German cousins is in love with him.

armed with deflative weapons, as they were traveling over a dangerous portion of the continent where might made right and where it was worse than folly to be caught napping with anything but a loaded gun. They were either by *derwoods* or Indians, and it was just four weeks after the time of leaving Chicago that the party set out boldly across the plains. None but *country* wagons have ever passed

Lang and the Indian fought hand to hand. Lang held the Indian's right hand with his left; the Indian held Lang's in the same manner, and they swayed back and forward, each striving his utmost to get the best of his antagonist.

During the time of this struggle a second charge was made upon the train, and the moon uncovering itself, a second, and third onlooker was dead.

Bankers to Produce Opera.

the heart of his enemy. When the reprisal had been successfully accomplished the border men turned back to the struggle between Lang and Long Rope. Lang had succeeded in freeing himself from the grasp of his antagonist, and by a herculean sweep of his arm had thrown the warrior blade in the breast of the chief, ending the fight, becoming conqueror to a most desperate encounter. The Indians, commencing Sept. 15, daily tours of car service will be inaugurated at twelve Chicago, Los Angeles and other cities. Chicago, Milwaukee & St. Paul R.R. way. There will be through service over the U. P. and the new San Pedro and Los Angeles Harbor R.R. to Los Angeles, Chicago, 5:15 p. m., every day. Route via Omaha, Ogden, Salt Lake City and San Bernardino to Los Angeles. Write F. A. Miller, G. P. O. Chicago.

"You're a handy man with a killing tool," said Bowtie Bill, as he patted our hero upon the shoulder. "I kinder thought you was a tenderfoot, but I see you know how to handle yourself!"

hood will or these desperate men by his bravery, and then admire it, anything but hail men welcome to men.

French Fannie came over and embraced Louis. "You are a duck of a fighter," she said. And as Limpy Jim approached, she continued, "And if I was not 'Petie's' flame' I'd stick tighter 'em glue to you. See?"

"Thanks," replied Louis. "You do me proud!"

or buttons. Wide collars are not fashionable as the narrower width, but the cuffs are deeper than last season's, and sleeves are larger.

Berthelot a Busy Man.

One of the busiest men in France is Chemist Berthelot. He has not only made countless prescriptions, but he has written about them in about 600 articles and brochures, besides a num-

(To be continued.)

THE LINE HE DREW.

Professor Hall Answered Ready for Inquiring Sophomore.

Prof. "Bill" Bailey's recent visit to New York recalls a story that is told at his expense by a prominent sophomore at Yale.

About a month ago, when everybody

France, twice minister of public instruction and fine arts, and once minister of the interior. He may be credited the head of French science. With all his diverse activities he has time to devote to his home duties as patriarch.

STRONGER THAN MEAT.

A Judge's Opinion of Grape-Nuts.

The next week, however, fate ironically decreed that the professor himself should be indisposed, and thereby prevented from attending his classes. The student in question called on his professor one afternoon, and after a "little general conversation, for the professor is a "prince of good fellows," and very popular with the entire university, the young man looked at him

Bill—I see they've named a whisky after Admiral Togo.

Jim—Well, it's a good name for whisky.

"How so?"

"It gets the best of so many people."

The power of resisting fatigue, which its use involves none of the disagreeable consequences that sometimes follow a meat breakfast." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

oak, irregular. Backed with pale

about the house. The urinary passages were all quite irregular. Monthly periods were so distressing I dread my doctor's approach. This was my condition for four years. Doan's Kidney Pills helped me right away when I began with them, and three boxes

Mr. Tew himself will sing the principal role. He is quite a notable singer, having been heard all over the world in oratorio and concert work.

New Line to Los Angeles.
Commencing Sept. 15, daily tourist service will be inaugurated between Chicago, Los Angeles and other points in Southern California, via the Chicago, Milwaukee & St. Paul R.

discover that the Golden Gate is the front door to the orient. When the nations officially are contending for political settlement in Asia, the road of travel has started through San Francisco bay in pursuit of commercial opportunity in every region beyond the Pacific slope. Time was long ago, when the point to which steam was on the other side of the continent. But that is changed now. The

ackets were seen to some extent, but sport ones are still more popular. These must be sufficiently large, and there should be a slight blouse effect at back as well as front. Those open down the front are usually preferred. Either laced or fastened with hood buttons. Wide collars are not fashionable as the narrower width. The cuffs are deeper than last season and sleeves are larger.

ed books from several languages including Latin, Greek and Arabic. He has studied the old alchemists thoroughly as he has. In politics he is a radical of radicals. He was one of Renan's most intimate friends for twenty years he was a senator and twice minister of public instruction and fine arts, and once minister of the interior. He may be called the father of all French colonies.

He writes a carefully considered opinion as to the value of Grape-Nuts food. He says:

"For the past 5 years Grape-Nuts has been a prominent feature in our diet of fare.

"The crisp food with the delicious nutty flavor has become an indispensable necessity in my family's everyday diet.

"It has proved to be most healthful and has enabled me to maintain my weight."

As to its nutritive qualities, my experience is that one small dish of Grape-Nuts is superior to a pound of cereal for breakfast, which is an important consideration for anyone. Grape-Nuts satisfies the appetite and strengthens the power of resisting fatigue, while use involves none of the disagreeable consequences that sometimes follow a meat breakfast." Name given by a physician.

KAISER MERRY ON HIS YACHT.
German Emperor Plays Pranks on His Distinguished Guests.

Emperor William when he goes voyaging in his yacht is frequently in a merry mood. He usually has on board as guests a number of prominent men, with a few of whom early rising is a fad. His majesty, however, rises every morning at 5 o'clock and

yacht contains an electric horse which jumps, kicks and plunges wildly, so that only a good rider can escape a bad fall. The emperor is extremely fond of riding this electric plunger and thus making fun for his guests.

FRANK W. PALMER IS RETIRED

Has For Many Years Held the CM

Medal for Humane Teamster.
Miss Ida Sheehan of Brooklyn will present a unique medal to Martin Corcoran, a teamster. Across the bar will be the word "Humanity" and on the pennant the inscription: "Presented to Martin Corcoran on Sept. 5, 1905, for Being the Most Humane Driver in Greater New York." The medal was Miss Sheehan's own idea and she paid for it herself through the Society.

seven steam turbines with electric generators, all of which were made or are being made in Schenectady. The machines represent 35,000 horsepower. The first shipment did not reach Japan till July 29, 1904—just a year ago. Already eleven of the thirty-seven are in successful operation for street railways, lighting and power purposes. Some of the turbines will be used for operating electrically the

INDUSTRY WINDS

FRUITFUL FURNACES

that Prof. Moissan, the eminent chemist and inventor, has actually succeeded in making genuine diamonds and rubies. He employs for this purpose the electric furnace, which has been so improved that a degree of heat can be produced, approaching the extreme temperatures, which were undoubtedly a factor in the formation of minerals and gems in the interior of the earth.

The electric furnace has enriched chemistry with a whole series of new compounds. Probably the one of most value to mankind at large is Calcium Carbide. The simple application of water to Calcium Carbide generates the gas Acetylene, which is now being commonly used for lighting.

It is a common sight in Stockholm to see King Oscar walking about the streets alone and unguarded, like the humblest of his subjects. Invariably he wears an old silk hat which has become as familiar to the populace as himself. This hat and his cloak he insists on hanging near the door that leads from his breakfast room to the castle grounds so that he can stroll out informally whenever he wishes.

The Festive Lodge Goat.

BY FRANK E. WELCH.
McGinty, of William goat,
Of odor very strong,
And everywhere McGinty went
His Billy went along.
Bill followed Mac to lodge one night,
And surreptitiously
Got in amongst the members and
Caused much hilarity.

The guardian of the gate ran Bill
Into the anti-hall,
Where all the members' hats and coats
Were hanging on the wall;
Left to himself the playful pet
Upon the garments brooded,
Till something of a kicklet there
His sense of smell aroused.

He drew the object forth, and lo!
A flask of "forty rods",
Of which the odor was enough
To make a "copper" nod.
His whiskers soon removed the cork,
And held the flask aloft,
Whiledown his throat the contents ran
With gurgle low and soft.

The bottle drained Bill turned about,
And sought the lodge room door,
And butted it until it lay
In fragments on the floor;
Then with a wild and headlong charge
He swiftly bounded in,
And filled the brethren seated there
With goat-horns and chagrin.

The members hastily adjourned
Without the proper form,
Because the goat was making things
Decidedly too warm;
McGinty tried to capture him,
But failed of his intent,
And Billy sported with his frame
Unto his heart's content.

The sequel to this woeeful tale
Is very sad indeed,
For vengeance on McGinty's goat
Was speedily decreed;
They captured him and bound him fast
And now, so rumor states,
They've broken him to agitate
The lodge's candidates.

Hunter's License.

All hunter's licenses, whether resident or non-resident, expire on the 1st day of June of each year.

You must not use, or attempt to use, the license of another person, or in any manner make any changes in any license for the purpose of transferring the same, under penalty of prosecution for forgery.

Owners of farm lands, their children or tenants, can hunt and kill game on their farms during the open season when it is lawful to kill game, without procuring such resident license, but they must not hunt beyond the lines of their own farm lands without a hunter's license.

Until last year many hunters saved

the fee by stating, when they were stopped from shooting that they were out for rabbits. It had been decided that anybody could shoot rabbits at any time without a license. Consequently every hunter not having authority to hunt saved his fine by simply stating that he was out after rabbits. Last year the law was amended so that now one must procure a license before hunting rabbits, but they may be killed and sold in any number and in all seasons of the year.

A Chance for You

To have your eyes examined free, and buy the best glasses at reasonable prices.

Miss Emmert, the expert optician, will be at office of Dr. Richardson, Thursday September 21. No one urged to buy.

DO YOU REMEMBER

That the Following Were Local News Items Ten Years Ago?

J. E. Heise returned from a trip to Canada.

Frank Gleske was then a resident of Libertyville.

A surprise party was tendered Master Willie Sott.

J. W. Kinsley returned from a visit to Massachusetts.

Mr. and Mrs. C. O. Winters visited the New England States.

Palatine football team defeated Barrington by a score of 14 to 0.

Herman Clute and Miss Susie M. Bryant were united in marriage.

Charles Sean erected his commodious home on South Hawley street.

Miss Mabel, daughter of Mr. and Mrs. Ezra Cannon, died Sept. 15th.

Roy Meyers was attending the Metropolitan Business College, Chicago.

Mr. and Mrs. Fred Kirschner prepared to move into their new home.

Wauconda base ball team defeated Barrington team by a score of 11 to 4.

Thirty-two little friends of Master Rennie Schroeder gave him a surprise party.

Mr. and Mrs. Silas Robertson left Barrington to spend the winter in Colorado.

A number of local railway employees were given an excursion to Canton, O., to meet William McKinley.

John Lueck, of Chicago, committed suicide by hanging himself to a rafter in a deserted house four miles west of Barrington.

The following were teachers in the public school: F. E. Smith, Mrs. Sherman, Miss Adams, Miss Frey, Miss Mand Ott, Miss Meier, Miss Fairchild.

A McKinley and Hobart club was organized, L. D. Castle president, J. C. Plagge vice president, Leroy Powers secretary, Dr. C. H. Kendall treasurer. Ed. Blocks was chosen captain of the marching club.

Needed at Home.
Missionaries by the hundreds are being sent yearly to foreign lands to "convert the heathen." It is a great undertaking and most worthy object. Just consider how many hundreds of thousands of dollars are sent yearly to keep the missionary stations going.

The missionaries are, many of them, well-meaning, self-sacrificing, persons, but after all, true charity begins at home, and even in darkest Africa they can find no blacker ignorance of Christ and his teachings than right in the city of Chicago.

The last legislature passed a law making the compensation of highway commissioners two dollars per day for time actually spent in the service of the township. The law went into effect the 1st of July, but it does not apply to commissioners already elected.

Some one has invented a machine to do the thinking for lazy people. Willie J. Smith, of the Waukegan Sun, should purchase one of these inventions, and not depend upon the Barrington Review to furnish columns of original matter for his daily.

A lightning stroke will kill stock at a distance of a quarter of a mile from the point of its discharge if there is a handy barbed wire fence to conduct the fluid, and the stock are near the fence. A few ground wires placed on such fences prevents this trouble.

Like Finding Money.
Finding health is like finding money—so think those who are sick. When you have a cough, cold, sore throat or chest irritation, better act promptly like W. C. Barber of Sandy Level, Va. He says: "I had a terrible chest trouble, caused by smoke and dust on my lungs; but after finding no relief on other remedies, I was cured by Dr. King's New Discovery for Consumption, Coughs and Colds." Greatest sale of any cough or lung medicine in the world. At the Barrington Pharmacy, 50c and \$1.00; guaranteed. Trial bottle free.

LAKE ZURICH NEWS.

Mrs. Henry Fisher is visiting with her daughter Mrs. P. Young.

W. H. Ahlgren departed Monday for a trip to Minnesota.

E. Branding is building a barn 30 x 50 for Henry Pepper. The boys are waiting anxiously for the raising.

Louis Gams is now employed at W. C. Klockner's saw mill.

H. Koffen left Monday for Minnesota points where he will visit with relatives and friends.

Remember you will find a full line of rubbers for fall and winter at W. H. Ahlgren & Co's.

An exchange says that one man has had a very narrow escape from death. They were going to operate on him for appendicitis, but they discovered a time that he hadn't any money to pay for it.

Attacked by a Mob

and beaten, in a labor riot, until covered with sores, a Chicago street car conductor applied Bucklen's Arnica Salve, and was soon sound and well.

"I use it in my family," writes G. J. Welch, of Tecumseh, Mich., "and find it perfect." Simply great for cuts and burns. Only 25c, at Barrington Pharmacy.

A Paving Trip.

Pleasant to drive. Nothing to pay if you come by train. First pick of new goods just in. Money saved on every item you buy. Dinner tickets and horse tickets given. Railroad fares refunded if you show round trip tickets. Free tickets for goods in our 5 and 10 cent department. Choice of three offers if you trade \$5.00; four offers if you trade \$10.00.

Heavy 12-4 blankets 95c; medium sizes 30, 50c. Child's fleeced union suits 10c; Child's school shoes 2 pair for 15c; knit or jean undershirts 10c; 150c yds. tennis flannel to 14c; mop caps 5c. Ladies' skirt bargains 75c, \$1.25; latest style dress skirts, sample sale, \$2.20, 3.75, 2.69, 4.98. Ladies' dressing gowns 10c. Men's 50c summer or fleeced underwear 30c. Lining remnants 24c yd. New wool dress goods 31, 37, 48c yd.

Men's box calf shoes, specials, \$1.19. Ladies' street hats 79, 98c, \$1.10; great

Rally Week.
The Social committee of the Barrington Baptist church will give an "at home" to the members of the church and congregation and friends, on Wednesday evening September 20, between the hours of 7:45 and 10:30 p.m., at the church parlors. Light refreshments will be served and there will be several musical numbers during the evening.

While this affair has the semblance of formality it will be quite informal, as it is planned to be in the nature of a "rally" social. Next week will be observed as Rally week by the church, the Sunday school, the Dorcas society and the Baptist Young People's society.

An afternoon "rally party" is planned by the Junior committee, Mabel Banks and Laura Hawk, for the primary department for some day next week.

A "reunion" prayer service will be held Friday evening September 22d at the church. Notice for the services for "Rally" Sunday, September 24th, will be given later.

A cordial invitation is extended to all, and especially to strangers in the community, to attend the "at home," and the rally services.

Good for the Sick Room.
Dr. Ira D. Costello, of New York, is the first physician, so far as known, who regularly prescribes the telephone in certain cases just as he might pills or tonics.

"Some time ago," Dr. Costello explains, "I was considerably worried over the case of patient named Brown. He was suffering from a chronic trouble which confined him to the house. Previous to his sickness he had been an energetic business man, and was fond of social life and the companionship of his friends."

"Naturally he chafed over confinement and his mental condition grew harmful to his physical well-being. He became fretful and despondent."

"One day, while thinking over his case, and recalling his former habits of activity, the idea occurred that if he could not get around so much as formerly he could at least use the telephone. I ordered an instrument installed in his room, and from that day he improved."
