

# BARRINGTON REVIEW.

VOL. 23. NO. 19.

BARRINGTON, ILLINOIS, FRIDAY, JULY 19, 1907

\$1.50 A YEAR IN ADVANCE.

## PASSED TO THE BEYOND

Frank Robertson, Son of Mr. and

Mrs. John Robertson, Died

Sunday.

The first death in the family of Mr. and Mrs. John Robertson of Main street occurred Sunday afternoon at thirty o'clock when their second and youngest son, Frank Robertson, died of a tubercular affection at the home of his father. The approaching death of the gentleman had been fully realized by his family and friends, but the closing of the life of so popular a young man has saddened the community in which he was raised.

Early in June this summer Mr. and Mrs. Robertson and their two daughters returned from Denver, Colorado, where they had resided for five years, as it was known that Mr. Robertson was in a precarious condition. The joy of reaching home, a journey he longed to accomplish, assisted in prolonging his life until Sunday, July 14th, when his many hours of suffering were over.

Mr. Robertson died a beautiful death, patient, thoughtful of others, noble in his plans for those he loved, resigned and at peace. He was one of the exemplary young men of the town who had grown to manhood here and had the respect and admiration of the people for his abilities, his kindly, dignified and pleasant disposition. A quiet man of studious habits; one who from babyhood had not been strong, but a man who never complained of illness nor allowed ill health to overcome his ambitions. We bow our heads in reverence to the higher will of God who took him, while we feel the sorrow occasioned by the death of so commendable a young husband and father.

Both him and M. T. Lamey, both of these offices he resigned.

Besides his wife, children, and parents, those whom he leaves are one brother, Albert Robertson, cashier of the Barrington Bank, and three sisters, Mrs. George Lyle of Buffalo, New York, Mrs. A. J. Redmond of Oak Park and Mrs. A. J. Leonard of Elgin.

The funeral took place Thursday afternoon at half past one o'clock at John Robertson's home where a gathering of relatives and friends filled the spacious house and porches. The local Masonic order had charge of the service and Rev. W. H. Tuttle of Kingston, Illinois, former pastor of the Methodist church here was present to assist. A gentleman's quartette sang. A delegation of Masons from Palatine and Elgin joined the Barrington Masons in conducting their rites at the house and grave. There were thirty in the line of march preceding the casket to Evergreen Cemetery. Those Masons chosen to lay their brother in his last resting place were Messrs. G. Otis, F. O. Wilmarth, G. Page, of Barrington, G. D. Stroker of Wauconda, and W. H. Brockway of Palatine and W. H. Seely of Elgin.

## CUBA TOWNSHIP

Mrs. Edison Harnden and son, Arthur were in Chicago Tuesday.

Fred Wendl and family visited at Charles Helm's, Palatine, Sunday.

The Misses Annabel and Lillian Welch are visiting relatives in St. Charles, Illinois.

Mrs. Frank Cady returned home from Elgin early in the week where she visited a daughter.

Mr. and Mrs. Ballschmied of Dundee visited their sister, Mrs. William Libbie, over Sunday.

Mrs. Fred Wienecke and child of Dundee visited a part of the week at her father's, T. B. Peckham.

Raymond Blodke is living at his brother's, Fred Blodke, in Barrington, and working each day in Chicago.

A daughter was born to Mr. and Mrs. Harry Kischner, June 3rd, whose arrival was not reported until this week.

A ball game was played on the Hollister farm Sunday between the Hollisters and the Tuppels. Hollisters won by a score of 27 to 3.

A party of about twenty Chicago people made Herman Tuppel's their quarters a part of the week while they fished in the lakes and river.

A marriage license was issued this week in Lake County to Robert Riedel, Chicago aged 42, and Miss Bertha Langenhein, Langenhein, aged 32.

Miss Alma Hawk of Barrington is spending a vacation at her father's, August Hawk. She also visited in Libertyville, Diamond Lake and Chicago.

Henry Tuppel lost a good work horse Monday night. The animal was not ill and the cause of death unknown. It was found dead in the stall next morning.

William Libbie recovered ten of the twenty-four ducks reported in the REVIEW last week stolen. It is not known when they were brought back but some time early Thursday morning.

William Libbie recovered ten of the twenty-four ducks reported in the REVIEW last week stolen. It is not known when they were brought back but some time early Thursday morning.

Miss Helen Stottum of Chicago is visiting Miss Myrtle Leonard. Miss Stottum is the daughter of the head carpenter in charge of the building on the Manson farm, formerly the Fellows farm.

Miss Anna Lageschulte of Barrington is visiting at her brother Frank's and last Saturday night the young people to the number of twenty-five surprised her with a party which all enjoyed until late hour.

A family party met at E. Hardin's Friday with relatives from Barrington and Cuba present. Members of Mr. Harnden's family will attend the camp meeting of the Free Methodist church at Glen Ellyn, Illinois, next week.

Camping parties from Chicago are numerous on the river near Fred Klein's. Wednesday an enormous young boy was nearly drowned. He attempted to swim across the river and midway was exhausted. Friends in a boat reached him just in time.

Died in Waukegan, Saturday, June 13th, at the Me Allister hospital, Mrs. Francis Dye. Mrs. Dye was formerly Miss Francis Sampson and will be remembered by older citizens, a girl born and raised just north of Langenhein near the present Riley farm.

She was a woman nearly seventy years of age and is survived by only son and her mother, Mrs. Sampson. H. C. Stuart and Charles. All report reached him just in time.

The following took advantage of

## Maud Muller and Her Maw

Maud Muller on a winter's night  
Sat reading by the lamp's dull light;  
She had a book upon her knee  
O'er which she studied carefully.  
She read of bargains to be had  
Then told her mother and her dad  
There were pretty pictures in the book  
And now and then her "maw" would look;  
And Maud would call her "paw" and say:  
"We kin get those things if we send away.  
Now maw she needs some shoes and a gown,  
Of course we kin get them here in town,  
But they aint so nice the people say  
As that we kin get from far away.  
Then, this book says, an' I guess it's true,  
That merchants here they just rob you."  
Now Maudie's "paw" had sold stock,  
And had ninety dollars in his sock.  
So Maud she wrote and sent away  
For gown, and shoes and bonnet gay.  
Two weeks later by fast freight,  
The goods came "collect," \$2.98.  
When Maudie's "maw" tried on that dress,  
Her heart was surely in distress;  
It fit her like a gunny sack.  
And sagged and wrinkled in the back.  
The shoes they were a size too small—  
She couldn't get them on at all;  
And Maudie's hat? It was a fright,  
And Maud she shed some tears that night.  
Next day she drove into the town,  
Called at the store of Merchant Brown,  
And bought a dress and shoes for "maw,"  
And an over coat for her dear "paw."  
And after viewing this and that,  
She got herself a pretty hat.  
At home that night around the fire,  
The Muller family filled with ire,  
Looked at the book that caused their woe,  
And soon it made the fire to glow;  
And Maud, she said: "No more'll I pen  
An order to the mail order men."

—PRICE CURRENT.

Waukegan at the home of her brother Edwar, Morris Hall.

A Sunday school convention for the township of Cuba will be held at Flint creek school, Sunday, July 28th, with Mr. and Mrs. F. D. Everett of Highland Park and other speakers present. The meeting will probably have a morning and afternoon session. Mr. Everett is president of the Lake County Sunday School association.

## PALATINE

Miss Alta Bennett is visiting in Palatine.

Mrs. Clapp of Chicago spent Sunday at Wm. Nason's.

W. G. Heilber and family have moved to Ravenswood.

Miss Selma Torgler attended a party at Barrington Saturday evening.

Will Filbert of New York spent Sunday with his mother, here.

Misses Cora Jahnke and Marie Ernst spent Sunday with Miss Elvira Arps.

Miss Lucile Paddock of Arlington Heights called on friends here Saturday.

Mr. A. G. Smith and family returned Monday from their visit at LaSalle, Illinois.

Mrs. Christie of Ravenswood spent Monday with her sister, Mrs. M. R. Reynolds.

Mrs. George Johnson and daughter spent a few days recently with C. D. Taylor and family.

Mrs. Will and daughter Pearl left Saturday for their home in Louisville, Kentucky, after a two week's visit here.

Mrs. Margaret Young is spending the summer with her parents. She has completed her course at the De Kalb Normal.

Mr. and Mrs. George Arps and Mrs. Faustman of Milwaukee, Mr. and Mrs. A. H. Arps, Mr. and Mrs. Alfred Hale and Sherman Arps of Cary were guests of G. H. Arps and family Sunday.

Mrs. Elvira Arps is erroneously called the editor of the BARRINGTON REVIEW. She is the Palatine local correspondent and authorized to receive subscriptions. The editor is Miles T. Lamey, Barrington.

The following took advantage of the Editors' Excursion to Niagara Falls. Messrs. O. H. Devos, W. G. Ost, H. Schoppe, F. H. Wildhagen, John Stade, Arthur Knigge, Alex Wilson, H. C. Stuart and Charles. All report reached him just in time.

Why We Were Late.

The delay in mailing the REVIEW

last week was not caused at this office.

The tax list printed on the inside of

the paper was mis-typed at a Chicago

publishing house the paper was with

similar orders from many papers with

time for publication here.

## The Green Bug's Ravages.

This seems to be "green-bug" year and the appearance of this little pest has been the subject for many a written article. Some sections of Lake County are over-run with the bug and its territory is spreading. As yet, the south-western part of the county has not been officially visited but its advent may be expected.

The July number of the Review of Reviews magazine speaks of the condition as "a year of delayed harvests," stating that the bug began its ravages in northern Texas as early as March which was a month of exceptionally high temperature in that section, and rapidly worked its way into Oklahoma. It reached Kansas in April, and caused damage to the growing crops in the southern part of the state. The entomological department of Kansas University made a vigorous fight against the bug, with the assistance of millers, grain dealers and commercial organizations, importing over 12,000 boxes of parasite enemies of the bug and distributing them over seventy counties.

This scientific warfare was aided by unfavorable weather in May, and the progress of the bug was checked, but not until thousands of acres of winter wheat had been destroyed in the southern part of the winter wheat area, in Texas, Oklahoma and Kansas. Early in June the bug compelled many farmers in south-western Colorado to plow under their wheat and start over.

The "green bug" is an importation. It was first reported in 1852 in Italy. Its first appearance in the United States was in 1884 in Maryland, where it inflicted only slight damage because of its lack of numbers. In 1890 it appeared in Indiana and devasted the oat fields in several counties, and in the same year it infested the Southern wheat fields. In 1901 the bug appeared in Texas, but created no anxiety there, but the peculiar climatic conditions of last winter in the southwest were favorable to the insect, which immediately renewed its activity.

## Albert C. F. Moldenhauer.

A. C. F. Moldenhauer of Long Grove died Sunday morning, July 13th at 2 o'clock after a three days illness. He was the father of Mrs. W. C. Meyer of Grove avenue, Mrs. Fred Mietzger of Liberty street and Mrs. Wm. Lageschulte who lives north west of town. He was seized with a sudden attack of pleurisy, inflammation. Thursday and a blood vessel burst near his heart. On Saturday he improved and his death on Sunday was unexpected.

Westmont, ex-champion pacer of the world was recently chorformed here because of his advanced age of thirty-one years. The horse was one of the handsomest pacers ever sent over a course, a rich chestnut in color and in the early 80's was sold for \$50,000 after winning an eventful race in Kalamazoo Michigan, making the track record of 2:13.

Wednesday afternoon, July 17th, Miss Blanche Shirling, only daughter of Mr. and Mrs. J. H. Shirling, was married to Louis Reiss at her father's home four o'clock with the Rev. G. S. Young officiating. The bride wore a gown of white silk and white silk and was accompanied by Mrs. L. Olson of Evanston, a maid of honor. The bridal couple left for a two week's trip and will live in Palatine after August 1st. Miss Shirling was raised in Palatine and has always been a social leader and is a musician well known. Mr. Reiss is the employe of the telephone company here and is a man respected and liked.

## Ssoo Note Claim.

The Waukegan Daily Sun published

the following cutting yesterday. The Waukegan Gazette published a two column article on the suit. Mr. Pomeroy is the first to take action in the McIntosh misup of affairs, but a large number of people have claims against him. The Pomeroy papers are an open attack on Mr. and Mrs. C. M. McIntosh's dealings.

Fred P. Pomeroy of Barrington has filed a paper in a suit to set aside a conveyance against Melvin C. and Ada E. McIntosh of the same village. It appears that McIntosh sold Pomeroy \$10,000 against one Richard Malings. The note was numbered 7 and was claimed, it is said, to be secured by a trust deed on real estate. Pomeroy says he discovered that the note was not covered by the realty deed and that Malings had nothing to do with the note. He says that McIntosh recently made a real estate deal under cover of his wife's name and therefore asks an injunction against the sale of this land and the right to get it at to satisfy the Malings note.

An ordinance was passed granting the Northwestern Gas Light & Coke Co. the right to extend its mains along the frontage along certain streets not covered by the original grant.

An ordinance was presented by the Chicago Telephone Company. Said ordinance was laid over to investigate more fully the proposition of placing the wires under ground.

Meeting adjourned.

## L. H. BENNETT, CLERK.

## New Corporations.

New Illinois corporations licensed at Springfield is the Bruce Ice and Stone Company, Chicago, capital \$10,000; deal in ice, fuel and building material.

Incorporator, Eben S. Bruce, Frederick J. Joslin and Louis Dulsky.

Eben S. Bruce is the Mr. Bruce well-known here, formerly owner of an ice house at Lake Zurich.

Another corporation is the Trall-

Miller Drug company, Oak Park, capital \$5,000; mercantile, incorporators, Richard H. Trall, Charles P. Miller and Percy O. Castle. Mr. Castle was raised here and is a brother of Miss Eva Castle of Grove avenue.

McKee & Son, Inc., Chicago, capital

\$10,000; deal in lumber, hardware, etc.

Incorporator, John McKee.

Another corporation is the Trall-

Miller Drug company, Oak Park, capital

\$5,000; mercantile, incorporators,

Richard H. Trall, Charles P. Miller

and Percy O. Castle. Mr. Castle was

raised here and is a brother of Miss

Eva Castle of Grove avenue.

M. T. LAMM, Ed. and Pub.  
BARRINGTON, ILLINOIS

A ten-dollar bill in the contribution box is passing strange.

You will find out eventually that you will eventually be found out.

It is always easy by agreeing with her to make a woman change her mind.

The horse will always be necessary if only to haul automobiles to the repair shop.

Cranberry growers have organized a trust. It will be a sort of feeder for the turkey trust.

A nice, comfortable sort of wife to have is one who doesn't want to buy your ties for you.

Why should anybody commit suicide when it is so easy to meet the foot that rocks the boat?

A Washington scientific sharp now says that it is healthful to eat green fruit. All boys know that.

Kaiser Wilhelm will be glad to get the Carnegie Library. It will be a good place to store ammunition in.

Chef Wiley means well, but he really ought to have learned that the anti-pea jocks antedate his administration.

Thread has increased in price, but man has grown used to using shingle nails and paper fasteners instead of having buttons sewn on.

John Jacob Astor, of the Automobile Club of America, is a moving spirit in the organization of the American Highway Improvement association, which is not being effected.

Few Yale graduates get married before they are nearly 30. By that time they discover that they cannot make the world over, so they are content to settle down and enjoy themselves.

You should keep your best friends like your cash, says the Baltimore American, which leads the Chicago Record-Herald to ask: Can one have best friends in addition to one's cash?

The Japanese are reported to be increasing their stationery imports, showing that they have gained more than an inch during the latest generation. Heavens! In addition to the other things they are doing are the Japs going to become giants?

The family of the Decatur county, Illinois, farmer, in expressing the protective association is worthy of being followed elsewhere. It has been pretty clearly demonstrated by investigators that the quail is worth a good deal more as a crop protector than as an article of food.

British Ambassador Bruce is not one of those who believe the great republic a failure. He has traveled about a bit among our people and has studied our institutions with "pains-taking care, and he says: "The American people have shown ability for self-government greater than any people on earth." And that is the opinion of an expert in governments, it may be taken as an exceptionally significant tribute.

Beggars in Persia ride on donkeys and often make long journeys. How they manage to obtain these useful animals, or even to exist themselves, is beyond European comprehension. The donkey, however, is a useful animal, and will journey as far as Mebed or Mecca, when he returns with the proud title of "Hadji." Useful as the donkey is to his mendicant master, the latter often treats him in a most brutal fashion. When the unfortunate animal needs encouragement a piece of chain is a frequent substitute for a whip.

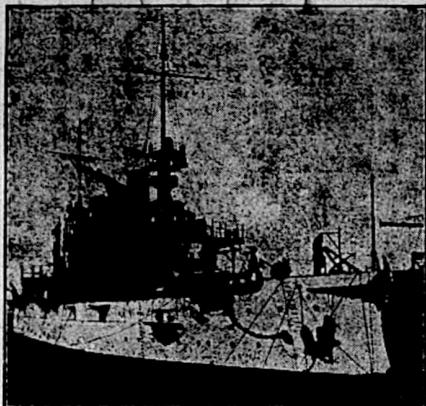

Judge Uriah M. Rose, of Arkansas, one of the American delegates to The Hague conference, is regarded as one of the most scholarly lawyers in America. His writings, speeches and public orations, dealing with the subject of jurisprudence in general, but particularly in the field of international law, have won him a high place. He has, however, made himself a man most eminently fitted to uphold American dignity and interests at the conference. He is a Kentuckian by birth, and for the past quarter of a century he has been in the foremost rank of the Arkansas bar.

Enforcement of the imperial decree against the use of opium has begun in China. All opium dens in Peking have been closed, and the viceroy of the province of Pechili has ordered all the local magistrates to establish hospitals for the reception of poor persons, who will be maintained free of charge and treated for the cure of the opium habit. The decree was issued on the 21st instant, last November, by the emperor. In other provinces the results are not so satisfactory, but there has been a perceptible decrease in the use of the drug.

Don Carlos, King of Portugal, is said to be gentle, amiable, kind-hearted and benevolent. He is a man of exceedingly broad-minded and liberal ideas on the subjects of government and of religion. And is happy in his domestic relations.

Mr. Moody's "preamble," "Why, before it won't be long till we'll have to be threaten' even the Chinese dacian!" It certainly won't if John keeps on getting ready to enforce his human rights to "dacian" treatment. And that is all he asks.

## U. S. BATTLESHIP GEORGIA.

Eight Men Were Killed and Thirteen Badly Injured by a Powder Explosion on This Vessel Monday.

## EIGHT DIE IN TERRIBLE BLAST ON A BATTLESHIP

### SHOCKING ACCIDENT OCCURS ON THE GEORGIA IN CAPE COD BAY—THIRTEEN BADLY INJURED—TWO BAGS OF POWDER EXPLODE.

Boston.—With six of her officers and crew dead and seven others dying, following from terrible burns received in an explosion of powder in the after superimposed turret, the battleship Georgia steamed slowly up Boston harbor from the target practice grounds in Cape Cod bay Monday, and landed the dead and injured men at the Charlestown navy yard. Two of the injured died in the hospital.

With the arrival of the Georgia there has been known the details of the most terrible naval catastrophe that has ever taken place along the coast of New England.

The accident occurred shortly before noon, while the Georgia's crew were at target practice off Barnstable Point in Cape Cod bay. In some manner, as yet unexplained, two bags of powder became ignited and in the terrific flash that followed the entire turret crew, consisting of three officers and 18 men, were enveloped in fire and received horrible burns, one officer and six men dying before the ship reached port.

Men Maddened with Pain. Before the other men in the turret could understand what caused the loader's cry of warning there was a blinding flash as the burning powder exploded. Officers, sailors and gases filled the little compartment in which more than a score of men were confined. As the powder was not confined there was no report, nor did the vessel suffer any injury, but every nook and cranny of the turret was filled with flame.

The loader, who was, of course, nearest the powder, was terribly burned as was every other man in the turret with the exception of Elch and Hansell, who were thrown to the hatchway to the top of the turret, while others crept along the turret floor, begging piteously for assistance.

#### Two Leap Into Sea.

Lieut. Goodrich and Seaman Maleck became crazed, staggered up from the hatchway to the top of the turret and then these two heroes leaped into the sea, in a despairing effort to choose a death by drowning in preference to death by slow fire.

When the smoke of the burning powder had cleared away the shipmates of the unfortunate men rushed to their assistance and tenderly the suffering sailors were lifted out of the fire and sent to the ship's hospital, where their burns were dressed by the surgeons.

Blinded by the smoke and fumes, choked by the acid, penetrating gaseous fumes, and maddened with pain, the men screamed in agony. Some staggered blindly up the ladder to the hatchway in the top of the turret, while others crept along the turret floor, begging piteously for assistance.

#### Another Witness Accused.

Boise, Idaho.—Another warrant was issued yesterday against a witness who has testified for the defense in the case of the state of Idaho against William D. Haywood, was issued Monday evening. C. W. Aller, formerly a telegraph operator, and ticket agent at the Florence and Cripple Creek railroad at Cripple Creek, Col., is charged with the offense by the prosecuting attorney of Adm. Justice.

Eleven witnesses in rebuttal were examined Monday. The explosion at the residence of Fred Bradley in San Francisco was again under consideration, the state undertaking to show that the effect of illuminating gas could not have been that described in the depositions taken for the defense in San Francisco.

The surgical staff of the Georgia was soon reinforced by the surgeons of the other vessels in the fleet, who had been informed of the accident and summoned to the scene.

A wireless message telling the brief detail of the accident was sent to the government wireless station on the highlands of Cape Cod and thence overland to the navy department at Washington.

#### Floating Spark Blamed.

Immediately upon learning the details of the accident Capt. Henry McDrea, commander of the Georgia, gave orders for an investigating board to examine into the causes of the accident.

Until this board makes its report the real cause of the explosion will be in doubt.

Two theories are entertained.

One belief is that a spark from the discharge of the gun floated back into the turret through a gun port and set fire to the powder case. Another theory is that the spark that caused the trouble came from the smokestacks of the ship and floated through the gun ports.

#### Two Theories are Entertained.

The explosion occurred in the after superimposed turret, where the men, under command of Lieut. Casper Goodrich, son of Rear Admiral Charles Goodrich, commanding of the New York navy yard, and Midshipman Faulkner Goldthwaite and John T. Cruse, were operating the eight-inch guns.

Two cases, as the big 100-pound gunpowder bags were filled, had just been sent through the main hoist and were in the arms of the loader. The loader stood at the breach of one of the eight-inch guns.

Two theories are entertained.

One belief is that a spark from the discharge of the gun floated back into the turret through a gun port and set fire to the powder case. Another theory is that the spark that caused the trouble came from the smokestacks of the ship and floated through the gun ports.

#### Two Theories are Entertained.

Oran, Algeria.—First blow to Sunday with such violence aboard the British steamer Canada, lying in the harbor, that a destroyer towed her out into the roadstead and torpedoed her as the only means of saving her.

#### High Prices for Cattle.

South Omaha, Neb.—For the first time since 1902 livestock on the local market Monday reached seven dollars per 100. This was for corn-fed cattle.

## REBUTTAL IS BEGUN

### EVIDENCE TO SHOW WITNESSES FOR HAYWOOD HAVE LIED.

#### ONE OF THEM ARRESTED

Dr. L. L. McGee is Accused of Perjury—Confession of William Dewey Supports That of Orchard.

Boise, Idaho.—The trial of W. D. Haywood for the murder of former Gov. Steuneman entered its tenth week Monday and the end is in sight. The defense, however, is still presenting its relay of evidence.

Evidence has been introduced in support of the charge brought by the state of Idaho that a conspiracy existed among high officials of the Western Federation of Miners to intimidate all persons who ran counter to the purposes of union labor with a view to establishing members of organized labor as the leaders of the situation thus commanding a political and industrial reorganization which, having its initiative in the west, should spread with irresistible force throughout every section of the country. Evidence has been introduced to show that in pursuance of this conspiracy, 18 men were murdered.

Defense Shows Counter Plot.

In defense of the man immediately concerned and of the officers of the Western Federation of Miners who are charged with participating in the plot for murder as a means to the desired ends, evidence has been introduced to show that another and counter-conspiracy existed among employers of labor in the west, looking to the annihilation of the Western Federation of Miners in particular, because the federation represented the cause of organized labor.

Some of the witnesses of the shooting said that Malle had fired in the air.

It is believed that the man who participated in the recent seaman's strike and that his mind had been unhinged by fancied grievances. It is believed also that he aided in the revolutionary agitation of the General Federation of Labor and the anti-militarists. There is no reason to suspect a plot, as Malle arrived here from Ronan only Saturday night.

Haywood Witness Arrested.

The rebuttal for the state so far is being directed against the witnesses produced by the defense to discredit Orchard. At the end of the first day of rebuttal a warrant was issued for Dr. L. L. McGee, who swore that he was born in North Idaho at a time when Orchard was employed by the president, and others of the Western Federation, to murder the price.

Witnesses of the commission of the offense have produced witnesses to contradict the testimony of the self-confessed murderer and other witnesses to show that if he murdered, he murdered because he was employed by detectives in the employ of the owners of mines and wealthy citizens of Colorado to commit crimes that might be laid to the door of the Western Federation.

# The CASTLE OF LIES

BY ARTHUR HENRY VESSEY

CONTINUED FROM "CLAWSON & COOPERAGE"

CHAPTER VII.—Continued.

So far as it lay in my power, I would perform my self-imposed task in a direct and businesslike method. As to this method, a dozen extravagant courses of action occurred to me at once. Of the dozen I selected two as possible.

"Every English gentleman comes of a race of warriors," the mysterious woman of the reading room said to me. "Miss Brett, being an Englishwoman, had the blood of soldiers in her veins. The physical courage of the battlefield, then, must appeal to her. If, for instance, I should enlist in the Foreign Legion, there was the Legion of Honor to be won. The little ribbon would tell its eloquent story.

But Willoughby's life had been lost amid the dreams of the Orient. I had looked long and earnestly where the sun touched the mountains, top with a rosy light out of the morning mists. The mountains seemed to beckon, to wait for me.

I had shuddered. I still shuddered, as I thought of their awful gloom and loneliness. And yet they seemed to beckon—to wait for me. I had been helpless and weak. They had conquered me. Well, I must return to conquer them. Their very inaccessibility need not appal me. Man's glory is to subdue the vast forces of nature—to make them his own.

I thought of the Hospice of St. Bernard. There, for centuries men had even laid down their lives to save the perishing. Well, why should I not be one of the little band for the time being? Why should I not become a member of the order? A few months of arduous training, and I should be ready for the battle.

If I went to the monastery and told the good father superior of the sacred vow I had made, would he laugh at me for a madman, or would he understand and help me to fulfill it?

I began the day, therefore, vaguely hopeful. I no longer permitted myself to be troubled at the whispers of servants and guests. I even counted the voices of the fiddlers. I paid my two francs admission to the aux aux, and listened with real enjoyment to its excellent orchestra.

My coat was lightly brushed. There was a faint but exquisite perfume. I glanced, as did a dozen others, at the woman who was passing.

The small, but superbly poised figure, gowned with marvelous simplicity, passed by me a fraction of a second. It was my consciousness of the reading room again, and she had murmured a good morning. A dozen had noted the greeting and envied me.

I did not return it. She continued her way daintily, punishing me for my rudeness by smiling across at me mockingly as she seated herself at my right. There was something of a childish, almost fairy malice in the illusive smile.

The intermission came. All the world moved back their chairs, and made their way through glazed doors at the rear, whence an electric bell rang persistently. The motley crowd of officers, tourists, and such of the society of Lucerne as was at the kursaal passed through the glazed doors to play the *petits chevaux*—a rather harmless form of dissipation, a gambling to permit one to lose, but not to lose for real.

I mingled with the crowd about the green-haute table on which the little metal horses were whirling around an imaginary race course. A croupier changed a 50-franc note for me. I tossed a coin on one of the numbers; and lost. I staked another coin, this time against the field. Again I lost. I staked all my five-franc pieces to two.

While I weighed them thoughtfully in my palm, my arm was touched lightly. It was my adventures of the reading room once more. She lifted her eyebrows in whimsical coquetry at my ill luck.

"Even these little horses, you see, madam, know that I am asking them to win for us, we shall win."

"My friend," she smiled, vivaciously, "they are simply frightened at your bold face. They are sensitive, these horses. But if you come, we shall see. Allons, we will be present; a little shining frang on number 27. Now, if my brave horses only know that it is I who am asking them to win for us, we shall win."

"Non riez va plus," croaked an official in a dingy dress suit and crumpled shirt bosom. He spun the mechanism briskly between two bones of his hands, and the little horses, in blue, green, and red sped swiftly around the course. Presently they struggled one behind the other, and came to a pause. The croupier stretched out his hand, and drew in out two shining francs with the other whinnings of the game.

I turned to her sternly. "You see?"

"I cried in thin dimes."

"Pouf! What a face, monsieur. It is the jockeys who are sulky. I have forgotten to blow them a kiss. Quick, a five-franc piece, the maxi-

mium on the field. This time we shall certainly win."

Three times in succession we won—now at even odds, now with the odds in our favor. But again the electric bell rang. She shrugged her shoulders, and made a sound of regret.

"Ah! At the hour of our triumph the voice of art clamored."

He returned to the concert room.

"It is not strange," she murmured after a pause in the music, "that one longs so much for what is just beyond one's reach, while other fruit, as sweet, may be plucked for the asking!"

The boldness of the metaphor startled and repelled me.

"I've speak in riddles, madam," I said, coldly. Frankly, I had not planned her exactly as that sort of a woman.

"Riddles!" She lifted her eyebrows, hesitating. "I mean Mr. Had- don, that I should be so glad if we might be friends."

I was unconvinced. "You are too good," I said, ironically. "Your interest in mankind embrace all the world!"

"But you have been unfortunate," she said, softly. "Are you angry that I should be sorry for you?"

"I am perplexed, at least."

"If you are only perplexed, I shall

hands clasped, her eyes sparkling. She leaned directly toward me; her bright eyes seemed to burn.

"One of the other maidens was Vice," she cried in a hollow, lugubrious voice. "My dear gentleman, you are too delicious. Monsieur, I should be furious with you! You are telling me quite brutally that your cold Englishwoman—she is Virtue; and I, the very wicked one—I am naughty Vice." And again she laughed deliciously.

"Tell me now, if you are applying the moral!" I protested sharply.

"Then if it is applied not correctly, let us have the true application," she demanded.

"That must follow the explanation of your extraordinary interest in me."

"Hush!" She leaned back critically. "I say it is because you are handsome!"

"Not if you are honest," I chuckled. "Or?"

"Why not say brave?" I demanded, bitterly.

"Or that you remind me of a dear friend?"

"Say of your late lamented grandmother."

"Or," she gasped, "that it is because you can use me to me?"

"Or, that it is better!" I asserted, shortly. "I am of use to you, then—and how?"

The boldness of the metaphor startled and repelled me.

"I've speak in riddles, madam," I said, coldly. Frankly, I had not planned her exactly as that sort of a woman.

"Riddles!" She lifted her eyebrows, hesitating. "I mean Mr. Had- don, that I should be so glad if we might be friends."

I was unconvinced. "You are too good," I said, ironically. "Your interest in mankind embrace all the world!"

"For me!" cried my companion eagerly.

The boy nodded, but before he could hand the telegram to her, I had seized it myself. I made a gesture, signifying that I asked her consent to read the name addressed on the en-

"Perhaps," she said, heavily, scarcely listening.

There was suddenly an expression, quite unnoticed, distorted her features. Her pupils dilated in her fierce excitement.

She studied my face critically, coldly deliberate. There was something portentous, almost ominous, in this cool stare. It disconcerted me; it made me already regret my proffer of friendship.

She smiled; but the smile was *malice*.

"Yes, I believe it. Fate has sent you to me. And you—are you willing to follow where Fate leads?"

"Why not?" I demanded with more curiosity than sincerity, I confess.

"Ah, you are courageous enough for that! Monsieur, you are bold indeed."

"Surely not so bold as you, madam, in asking consent of a man who has been disengaged for cowardice."

"I am not so bold as you, madam," she said, smiling.

"It is true that I fulfill the requirements so admirably," I returned cynically. "But you will find it difficult to convince me that my extraordinary courage and devotion to a good cause make my services invaluable. Why should you choose me from a score of men to help you?"

"You are right. Above all things we must be frank with each other."

"You are right. You will bear from me what you will hear from me."

I bowed over the hand she had handed gently toward me. I was embarked on an adventure. Where would it lead me?

## CHAPTER VIII.

Prince Ferdinand and His Ambitions.

He returned to the hotel soberly enough. I had told my little allusion lightly. Now I asked myself if I should not apply it seriously to myself. Only this morning I had mapped out for myself a clear path to be followed. And already was I on a street beckoning? Already was I enchanted?

I was intensely irritated that I should have allowed myself to be influenced by Sophie de Varner. I had told my little allusion lightly. Now I asked myself if I should not apply it seriously to myself. Only this morning I had mapped out for myself a clear path to be followed. And already was I on a street beckoning? Already was I enchanted?

I was intensely irritated that I should have allowed myself to be influenced by Sophie de Varner.

For the past hour I had been playing dangerously near the fire. It had not burned me, but could I honestly say that it had not warmed, incited, allured? Very well, I must be careful not to compromise myself in the future.

Two women had met me at the parting of the ways.

One of them had set me a task, holding herself proudly aloof, promising nothing. If this task were accomplished, the reward was to be the dead itself.

And now another woman had come—radiant, glittering, a subtle perfume, lulling the senses. Her wild beauty, her charm, had been frankly displayed to enthrall me. She had promised a definite adventure. As to the reward it seemed to me too brazenly obvious.

I flicked the ash angrily from my cigarette. And was I really saving myself? And I was not fool enough to be blind to the fact that the situation was not without its danger.

My shoulder was tapped. I was seated in the vestibule of my hotel. I looked up, startled. A well-groomed man in the early thirties towered over me, an American I saw at once. The round, jocund face was vaguely familiar.

"Yes," exclaimed a burly voice, "it is really old Haddon."

I grasped the hand he held toward me with emotion. Hero was a friend, an American, and I needed a friend, badly just now.

I had not seen Haddon since we were at college together. We had never been intimate, but the big-hearted Haddon Locke had been a character among his classmates.

At first he heeded to his cordial greeting. I was afraid he had not heard my story. But presently he plunged out into the episode that had made me notorious for a day. Then I knew he had come to stand by me.

"It is a brutal lie, of course," he stormed indignantly, "but even if it were true—" He clapped my shoulder.

"It is true—at least in a measure."

He was exclaims with cheerful skepticism. A beautiful woman is always dangerous, but a beautiful woman in trouble is doubly so. The friendship she had highly begged of me a moment ago, I was tempted to offer seriously now.

She became frightfully pale; she swayed in her seat. It was not grief so much as utter despair that prostrated her.

"Dead?" She repeated the word in French, more than once in a daze.

"Dead, but it is incredible."

The seconds passed. I did not speak; I regarded her with concern.

A beautiful woman is always dangerous, but a beautiful woman in trouble is doubly so. The friendship she had highly begged of me a moment ago, I was tempted to offer seriously now.

"Unless you insist, I prefer not to."

"I am not a coward," he said.

# THE REVIEW

Entered as Second-Class Matter.

W. T. LAMEY, Editor and Publisher.

FRIDAY, JULY 19, 1907.

## Wet And Dry.

With a telephone in your home you may have "blue" weather and enjoy the peace and pleasure of a contented life. When tired or discouraged you may sit down and talk to a distant friend or relative without effort. Regardless of your finances, we have a rate for your purpose. Chicago Telephone Company.

"Book" comes from Anglo-Saxon "boc," or book, since early Teutonic tribes used the bark of that tree for writing material.

## A Memorable Day.

One of the days we remember with pleasure, as well as with pride, to our health, is the one on which we became acquainted with Dr. King's New Life Pills, the painless purifiers that headache and biliousness, and keep the bowels right. 25¢ at Barrington Pharmacy.

## To Young People.

Insist upon having a telephone in your home. Your parents may not realize its values. You do. Don't let them rest until they order. Your happiness is at stake. Insist! Five cents per day. - Chicago Telephone Company.

"You have no sense of humor," he complained. "You can't take a joke." "I took one when I got you," she bitterly replied. -Chicago Record-Herald.

## The Charming Woman

Is not necessarily one of perfect form and features. Many a plain woman who could not serve as an artist's model, possesses those rare qualities that all the world admires: neatness, clear eyes, clean smooth skin and that sprightliness of step and action, that acomps a good health. A physically weak woman is never attractive, not even to herself. Electric Blowers restore weak women give strong voices, bright eyes, smooth, velvety skin, beautiful complexion. Guaranteed by Barrington Pharmacy. 50¢.

## Notice.

Notice is hereby given that all thistles on the farms of Cuba township must be cut. HERMAN HACKEIN. Thistle Commissioner.

The first practical horseless carriage made its appearance on the Paris boulevards in 1886 and was owned and driven by Count Albert de Dion.

## Long Live the King!

Is the popular cry throughout European countries; while in America, the cry of the present day is "Long live Dr. King's New Discovery, King of Throat and Lung Remedies!" of which Mrs. Julia Ryder Paine, Truro, Mass., says: "I never fail to give immediate relief and to quickly cure a cough or cold." Mrs. Paine's opinion is shared by a majority of the inhabitants of this country. New Discovery cures weak lungs and sore throats after all other remedies have failed; and for coughs and colds it's the only cure. Guaranteed by Barrington Pharmacy. 5¢ and \$1.00. Trial bottle free.

## Home Sunshine.

Your home will be brightened by a telephone. It gives you power to talk to friends, relatives and business houses. Get a telephone even if you have no other modern conveniences in your home. Five cents per day. Chicago Telephone Company.

## Are you Old-Fashioned?

Get a telephone and be up-to-date. Other people use it. Even Chinese laundrymen realize its value. Are you as wise? Five cents per day. Chicago Telephone Company.

The faster a man travels the sooner he will get there, and the faster he lives the sooner he will get there too. Exchange.

## Women's Right.

Every housewife has a right to demand a telephone in her home. It eases the drudgery of housework, it lessens the loneliness of a long, dreary day. It is a constant guardian and protector. Not a luxury for we have a rate for any purpose. Chicago Telephone Company.

## A Wonderful Happening

Port Byron, N.Y., has witnessed one of the most remarkable cases of healing ever recorded. Amos F. King, of that place says: "Buckley's Arnica Salve cured a sore on my leg with which I had suffered over 30 years. I am now eighty-five." Guaranteed to care all sores, by Barrington Pharmacy 50¢.

# WHY THE WIND BLOWS

## A Study of the Circulation of the World's Atmosphere.

## FORCES THAT MOVE THE AIR.

Contrasts in Temperature, High and Low Pressure and a Law of Nature Called the Deflecting Force of the Earth's Rotation.

It is a matter of common observation that when the window of a warm room is open on a still winter night the air moves out of the room.

When the air moves out of the room, the warmer air is forced out of the window, thus completing a general atmospheric circulation on a miniature scale. These currents of air, which might properly be called wind, would not occur if the air within doors was not warmer and consequently lighter than the air outside.

The range in temperature between the equator and the north pole amounts in winter to considerably more than 100 degrees F., and in summer the contrast is also great. Moreover, in summer the continents are warmer than the oceans, but in winter the reverse is true. Three examples will serve to illustrate the atmospheric contrast effect on the parts of the world.

At the equator the temperature averages about 80 degrees throughout the year. Consequently the lower air flows in from regions of high pressure on each side, forming what are known as the trades. These winds cover nearly one-half of the earth's surface and blow with much steadiness the year round.

The monsoons, or "seasons," winds of the tropics and the Indian ocean are the most interesting of these. In summer the cooler ocean air moves to the land, while the warmer air over the continents tries to a considerable height and then flows out to sea, forming a systematic circulation between ocean and continent. In winter the ocean is warmer than the continent, and the winds reverse their direction.

The "land and sea breezes" occur much regularly near large bodies of water in some parts of the world.

The ocean is cooler than the land during the day and warmer at night, causing on a small scale a daily interchange of air similar to that caused by the monsoons.

A clear knowledge of the term "air pressure" is very helpful in studying the causes of wind. As a general rule pressure makes the atmosphere offer greater air resistance, hindering it to move than weight, amounting to no less than 2,117 pounds upon every square foot of the earth's surface at sea level—but, unlike a stone, the atmosphere is elastic to a high degree and also presses in all other directions.

On account of this elasticity of the air, certain forces which arise from differences in temperature and the earth's rotation cause it to become dense or heated in some regions and稀薄 in others regions.

It is the effort of the atmosphere to overcome these pressure differences and resume a state of equal density.

The column of mercury in a barometer tube is always just balancing a column of air of the same diameter, reading from the barometer to the top of the atmosphere. If the air density is greater than the air standard in the tube, and to express this condition we use the term "high pressure" but if the air is rare the mercury will stand low in the tube, and we then use the term "low pressure."

Over the United States, Canada and other parts of the world the pressure is ascertained each day at numerous stations, and the pressure readings expressed in inches of mercury, are telegraphed to a central point and there charted on a map. The exact regions where the pressure is high or low may then be seen at a glance. It has been learned from such observations that these areas are constantly moving eastward at an average rate of about 900 miles per day.

Technically the low pressure areas are called "depressions" and the high pressure areas "anticyclones." They are frequently 1,000 or more miles in diameter. The little storms of great destructive force, so often called cyclones, really tornadoes.

The higher the pressure in any particular region relative to some other region the greater will be the velocity of the wind. The wind blows much faster in winter than in summer, because the greater contrasts of temperature cause more decided differences in pressure.

Observations demonstrate, however, that the wind never blows in straight lines, because all bodies of air when in motion are acted upon by a law of nature called the "deflecting force of the earth's rotation." This force turns all wind to the right of its course in the northern hemisphere and to the left in the southern.

Thus if a wind in our hemisphere starts north it is soon turned slowly toward the northeast, or if it starts west it will soon turn toward the northwest. When it is remembered that at the equator the earth is rotating at the enormous velocity of 1,035 miles an hour, one will not wonder that such a deflecting force could exist. All areas of high and low pressure therefore receive masses of air, and a little thought will show that they must turn in opposite directions. In the northern hemisphere the low areas, or "lows" as they are designated on the weather map, always rotate in a direction contrary to that of the hands of a watch—YOUTH'S Companion.

## THE CRAFTY WOLF.

Stories of His Man-Eating Feats Said

He Was Unique.

A skeptical person calling himself St. Croix has been trying to find out whether wolves and bears are maligned by the popular stories of their man-eating ways and writes his conclusions for Recreation.

First he tried running down the stories told in newspaper dispatches, but in his effort he turned to the Indians. The savages gray-haired, having whistled and summoned him. Had they ever known of an Indian being killed by one? No, but Mingan was very crafty and very much to be dreaded.

Quite so. But, once for all, had he ever to their knowledge killed a man? No, but they had heard—So it went—thus completing a general atmospheric circulation on a miniature scale.

These currents of air, which might properly be called wind, would not occur if the air within doors was not warmer and consequently lighter than the air outside.

The range in temperature between the equator and the north pole amounts in winter to considerably more than 100 degrees F., and in summer the contrast is also great. Moreover, in summer the continents are warmer than the oceans, but in winter the reverse is true. Three examples will serve to illustrate the atmospheric contrast effect on the parts of the world.

At the equator the temperature averages about 80 degrees throughout the year. Consequently the lower air flows in from regions of high pressure on each side, forming what are known as the trades. These winds cover nearly one-half of the earth's surface and blow with much steadiness the year round.

The monsoons, or "seasons," winds of the tropics and the Indian ocean are the most interesting of these. In summer the cooler ocean air moves to the land, while the warmer air over the continents tries to a considerable height and then flows out to sea, forming a systematic circulation between ocean and continent. In winter the ocean is warmer than the continent, and the winds reverse their direction.

The "land and sea breezes" occur much regularly near large bodies of water in some parts of the world.

The ocean is cooler than the land during the day and warmer at night, causing on a small scale a daily interchange of air similar to that caused by the monsoons.

A clear knowledge of the term "air pressure" is very helpful in studying the causes of wind. As a general rule pressure makes the atmosphere offer greater air resistance, hindering it to move than weight, amounting to no less than 2,117 pounds upon every square foot of the earth's surface at sea level—but, unlike a stone, the atmosphere is elastic to a high degree and also presses in all other directions.

On account of this elasticity of the air, certain forces which arise from differences in temperature and the earth's rotation cause it to become dense or heated in some regions and稀薄 in others regions.

It is the effort of the atmosphere to overcome these pressure differences and resume a state of equal density.

The column of mercury in a barometer tube is always just balancing a column of air of the same diameter, reading from the barometer to the top of the atmosphere. If the air density is greater than the air standard in the tube, and to express this condition we use the term "high pressure" but if the air is rare the mercury will stand low in the tube, and we then use the term "low pressure."

Over the United States, Canada and other parts of the world the pressure is ascertained each day at numerous stations, and the pressure readings expressed in inches of mercury, are telegraphed to a central point and there charted on a map. The exact regions where the pressure is high or low may then be seen at a glance. It has been learned from such observations that these areas are constantly moving eastward at an average rate of about 900 miles per day.

Technically the low pressure areas are called "depressions" and the high pressure areas "anticyclones." They are frequently 1,000 or more miles in diameter. The little storms of great destructive force, so often called cyclones, really tornadoes.

The higher the pressure in any particular region relative to some other region the greater will be the velocity of the wind. The wind blows much faster in winter than in summer, because the greater contrasts of temperature cause more decided differences in pressure.

Observations demonstrate, however, that the wind never blows in straight lines, because all bodies of air when in motion are acted upon by a law of nature called the "deflecting force of the earth's rotation." This force turns all wind to the right of its course in the northern hemisphere and to the left in the southern.

All areas of high and low pressure therefore receive masses of air, and a little thought will show that they must turn in opposite directions. In the northern hemisphere the low areas, or "lows" as they are designated on the weather map, always rotate in a direction contrary to that of the hands of a watch—YOUTH'S Companion.

## C. F. HALL CO.

Manufacturers of

Woolen Goods.

Our special July sales are now in full

swing. In addition to the many small lots to be closed out from our own stock, we offer many new goods which we have been able to buy up this season.

## Turkish Bath Towels.

All kinds of Bath Towels, sold to us

direct from a southern factory at

regular prices. Any size of un-

bleached Towels for 28¢ per lb.

Single Towels, large and heavy 6, 7, 8,

10, 12¢.

## Summer Waist Sale.

Over 200 Ladies' fine White Lawn

Waists, worth from \$1.00 to \$1.75.

These close-out garments are from 2

large manufacturing concerns.

The season is so far advanced that we

have placed all the waists in one

immense lot, at the common price,

..... 25¢.

## Bargains in Our Ladies' Department.

.....

Silk Coats, Cloaks, Jackets, etc., at

greatly reduced prices, every

garment in the stock is reduced in

price. Early buyers will find some

big values in our 1, length Silk

Coats, ..... \$5.00-\$7.50-\$25.

White Lawn Dresses, 2 pieces, waist

and skirt, lace or embroidery trim-

med to match. These now on sale,

..... \$1.25, \$1.50, \$2.00, \$2.50.

Wrappers, light and dark colors,

special values, ..... 75¢.

Summer Dress Skirts, cool, lightweight

wool in light or dark colors,

sample garments, \$1.00-\$1.75-\$2.50,

..... \$2.50.

American Beauty Corsets, \$1.00 values

for ..... 60¢.

Fancy Lawn Dressing Sashes, light

and cool ..... 35¢, 40¢.

Ladies' Black Silk Dress Skirts, full

cut plaided skirts, in newest styles

for ..... \$1.50-\$1.75-\$2.00.

Sale of Girls' all wool Box Coats \$1.25

..... \$1.00-\$1.50-\$2.00.

Men's Suits.

Suit bargains for all. Good material,

best makes at bargain prices. Suits

bought during our July sales are

such as will be remembered.

## TRADE \$10 AND SHOW ROUND TRIP TICKET AND WE REFUND YOUR CAR FARE. Dinner Tickets or Horse Tickets if you drive.

Football in Shakespeare's Time.

Did William Shakespeare ever look on at a game of football or join in one? asks the Herald of Bradford-on-Avon. J. E. Vincent, the author of a book on Berkshire highways and byways, found at North Moreton in the records of the 15th century a record of a football match between two schools.

There is a record of a football match in 1555, and football must have been long played then. In later days Charles II. dismissed football as "a master for lambs" and making a play of players thereto."

One Way to Trap a Bear.

The ways of trapping bear are numerous, but there is one old fashioned way that amuses many. It is the system of getting a molasses barrel and driving spikes around through the outside on the open end with the points of the spikes protruding. A bear will force his head into the barrel in the center of the circular row of spikes and eat all the molasses he can find, but when he comes to pull his head out the points of the spikes catch in the fur and skin of the neck and head and he cannot get rid of it. The bear prevents his seeing. He is helpless and soon gets rattled as soon as the situation dawns upon him.—Duluth News-Tribune.

transform dingy, cracked and marred furniture, doors and woodwork, into rich, attractive and useful articles. Made in ten beautiful colors. Easily applied.

## THE MOON'S VOLCANOES.

Causes of the Gigantic Craters and

Great Picturesque Explosions.

It is evident to any one who glances upward at the moon that its volcanoes are on an immensely larger scale than those which stud our globe. One explanation, now abandoned, is that the force of gravitation being there only, caused the earth to spread out rapidly, so that the explosion would be generally on a far larger scale.

Professor Pickering quotes the theory only to refute it in some comparisons which he made between the great volcanic region of Hawaii and one of the smaller craters of the moon.

The facts seem to him to be that the larger craters on the moon came into existence when the thin, solid crust above them was still soft and pliable.

He believes that the great lava flows formed by the lava bursting through the crust and so relieving the pressure. Later, after this relief had been found and the crust had thickened, the interior region by cooling shrank away from the solid shell which was now too large and, being insufficiently supported, gave way, permitting the great lava streams which preceded it to flow over the surface.

These enormous outflows of lava dissolved the solid shell which they came into contact with it much as they do in the present day in Hawaii. Did the moon begin much smaller than the earth? It is possible that the moon may have been larger at the time of its formation.

These eruptions might not have occurred until the moon had grown to a size which would have given greater mobility.

He believes that the lava streams were greater, and our original theories were destroyed by the outflow of the earlier article rocks which completely submerged and dissolved them.

—London Post.

## IF WATER NEVER FROZE.

There Would Be Several Startling

Changes in the World.

The whole economy of nature would undergo a startling change if water never froze. The world's climates would be revolutionized. The icebound polar seas would cease to exercise their chilling influences, and consequently the currents of the ocean might either cease to or be turned aside in different directions.

Then the great gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold, as it is in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power would be increased.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coast of Newfoundland and Iceland would result in a great increase of the value of the world's fisheries.

There would be a marked increase in the economy of nature. This, if water never froze, would cease to exist. The loss of soil and the disappearance of rocks by the frost and many other now vital effects would be lost. In short, the absence of ice would be on the one hand an incalculable disaster, on the other hand a great boon.

—London Globe.

The name of the first man who skated is buried in oblivion. Skating, however, is very ancient. It is mentioned by the Danish historian, Saxo Grammaticus, in 1134. William Fitz Stephen speaks of it in London in 1190. Figures of skates appear in Olus Magnus' history, printed in 1533.

## Barrington Local Happenings Told in Short Paragraphs

Charles Theis has gone to Denver on a six weeks visit.

Mrs. Charlotte Ward of St. Charles is visiting her sister, Mrs. Ann Donelan. Buy your paints, oils, varnishes, brushes, etc., at LAMONT & COMPANY.

Mrs. William Howarth is in Denver for a month's visit in May. FOR RENT—on Station-street, 7 room house. City water. H. J. Holtzman.

On account of the Desplaines camp meeting there will be no service in the M. E. Church for the next two weeks.

WANTED—A girl for general house work. Apply in person to Mrs. Arthur Welch, Lake street.

Best Standard Binder Twine, 100 per pound at Grebe's Hardware, get your order in before we are all sold out.

Last evening about sixty friends of Miss Lizzie Steiners gave her a birthday surprise party. Games and refreshments were in order until a late hour.

A lawn party was given at the A. H. Boeckner home last Friday night by Misses Louise Boeckner and Myrtle Plagge in honor of their friend, Miss Lillian Reetke of Chicago, sister of Mrs. Henry Miller of Walnut street. The young people numbered twenty-four. They spent the evening playing games, singing and making all the noise they pleased. The evening was a fine one for a lawn affair.

Call at Grebe's and examine their combination Range. It will burn wood, coal and gas, one spye, will do your cooking and baking all the year around.

John Rockow will hold a sale of household goods, Saturday morning, July 26th, at nine o'clock at his home on Williams street, in the former creamery building.

A real estate deal was recorded this week in Lake County as follows: A. W. Meyer and wife to T. J. Dickey, lot 1, block 2, Applebee's addition, Barrington, W. D., \$550.

Mrs. L. H. Bennett entertained Mr. and Mrs. V. E. Lindsey and son Harold from Thursday to last Sunday. They are from Bell Telephone, Iowa, and Mrs. Bennett and Mrs. Lindsey are sisters.

People from Barrington and Elgin were noticed driving and motoring across country the middle of the week to the three days racing meet at the Libertyville Trotting Association's track.

The company of H. J. Legeschutte and George Hager are raising, enlarging and improving the barn on their Williams street property. They will use it as a ware house for lumber, such and doors.

The ball game Saturday resulted in defeat of the Y. M. C. A. team. The Oak club of Chicago won by a score of 4 to 2. Saturday the Y. M. C. A. and the Barrington Base Ball club will play on Sunday.

If you wish to take advantage of the twenty-cent a mile rate now given on all railroads, buy a ticket before taking your train, otherwise the conductor is required to collect three cents a mile for each fare, as is announced on placards in all depots.

Twenty-two couple attended the Saturday night dance in the village hall given by Martin and Foreman. The dance was a nice party though small. Two dances at Lake Zurich attracted some away from here.

Leo Brinker who lives west of town was surprised by a party of twenty boys and girls Monday night. Grace Palmer and Laura Brummeck planned the surprise and all had a good time with games and supper.

Have you painted your gasoline cans bright red? Of merchants and housewives? The law is in effect July first demands this to ensure safety. Red cans for gasoline and no other oil in red cans. Laney & Co. sell red paint.

The annual racket made by the Episoclo choir boys of Chicago who pass through here yearly to camp in Bang's lake was heard Tuesday morning in the down town streets. Before they and their baggage were packed in vehicles, the business district was full of wiggling, yelling boys.

Barrington will be favored with another Chautauqua this summer. E. W. Chaff will be here and other talent better than last year. From August 6th to 11th inclusive will be a week of entertainment and music and temperance. A larger tent than that of last year will be placed on Holley field on Lake street.

Philippe's annual will be held Saturday evening at the corner of Main and Lake streets.

# IT PROVES IT'S WORTH

## The HOLSMAN Automobile

PERFECT in CONSTRUCTION, CHEAP in PRICE and COST of OPERATING. When you see the HOLSMAN machine it will make you its friend at once for these reasons:

1. Solid tires, admitting of no punctures.
2. Air cooled. No water to contend with, or broken jackets which occur in frosty weather.
3. No live axles.
4. No transmission gears.
5. No drive gears.
6. No speed gears, in fact, not any gears to contend with. No clutches. The machine rides as easy as the best made carriage and is controlled by two simple hand levers. Is started, guided, stopped, speeded, reversed and fully controlled by these two simple levers.

Should you have a breakdown, repairs are quickly secured. However, the chances of a breakdown are slim in a Holman.

Write me for catalog and descriptive matter.

J. W. Burkitt, Arlington Heights, Ill.

N. B. I'll be pleased to give you a spin in my car and show you the advantages of a Holman. It won't cost you anything. I also have the agency for the Rotary Sewing Machine, the best thing in this line on the market. Let the ladies come in my place and let me show them.

## NEW INSURANCE LAWS

Legislation Effective July 1, Under  
Which State Department  
is Working.

### PROTECTION FOR THE INSURED

Uniform Policies Assured Under  
Standard Provisions Act—  
Other Protective  
Measures

Springfield, Ill., July 16.—With the coming of the new legislative year in Illinois a number of statutes designed to bring about improvement in the conduct of insurance business in the state have gone into effect. These statutes represent what has been accomplished in the way of reformation since the unearthing of the insurance scandals in the east, and, taken in connection with the legislation of the previous two years and improvements in the state department of insurance, give to Illinois policy holders a degree of protection such as is enjoyed in no other state.

When Governor Denison came into office he took up personally the study of the insurance question, and he has devoted much time, in conjunction with the officers of the department and men interested in the business, to devising means for securing better protection to the insured, endeavoring their rights and protecting both the public and the insurance companies from the manipulation of dishonest and indecent management. When it is recalled that the new legislation, which has gone into effect since the beginning of the present state administration:

Requiring large reserves to be maintained by casualty companies for the protection of their policy holders.

Permitting employers to organize mutual companies for the purpose of insuring themselves against liability as employers.

Enlarging the territory within which insurance companies may do business and increasing the facilities for obtaining this class of economical insurance.

Enlarging the powers of county mutual life insurance companies and putting these companies upon a firmer business basis.

Requiring life insurance companies of other states to maintain a deposit of securities for their policy holders.

Requiring of life insurance companies the maintenance of a reserve on their policies for the security of their policy holders upon a basis such as will restrict extravagant expenditures in acquiring new business.

Authorizing the insurance superintendent to call for additional information from insurance companies and to give their transactions greater publicity.

Prohibiting misrepresentation by means of advertisements, of the terms, benefits or advantages of policies.

Regulating the investments of the funds of life insurance companies for the purpose of securing the maximum return.

Requiring that salaries paid officers and employees of insurance companies be passed upon and that action be taken by such expenditures be assumed by the directors of the companies.

Regulating the provisions which may be contained in policies of life insurance issued in Illinois.

#### Uniformity of Policies.

The last named law is the first attempt to regulate the provisions of insurance policies undertaken by the lawmakers of Illinois. The bill was drawn in consequence of recommendations made to the assembly in Governor's Denison's message to that body and is one of the most effective measures for the protection of the general public yet devised in insurance legislation.

Until the present time there has been no attempt to regulate the provisions to be contained in policies of life insurance sold in Illinois, and every sort of policy has been sold. Because the general public is unfamiliar with the insurance business, it has been an easy matter to insert in contracts terms which are unfavorable to the insured, and where the purchasers of the policies have no knowledge of the law, it has been imposed upon them.

The new law prescribes that certain minimum non-forfeiture provisions be inserted in all policies of life insurance sold in Illinois, by either domestic or foreign corporations. Some provisions which have been heretofore inserted in policies have been prohibited absolutely because it has been found that they operate against the insured. The result will be safer insurance for the policy holder and increased confidence in policies issued in Illinois. While it will operate against such companies as desire to avoid the terms of their contracts, it will materially aid in the business of the reputable and fair insurance men.

#### Most Account to Policy Holders.

Since the First Investigation New York has secured a number of laws, and its new bills have been pointed to as models in this respect, but Illinois without the hush and scandal attending the proceedings in New York

has secured even better regulations for the protection of policyholders.

One highly important feature of the Illinois law is the safeguard thrown around the dividends on participating policies. Most of the agitation in the life insurance business in this country has been caused by the abuses of the deferred dividend system, the practice of most of the companies being to give the insured no statement of the dividend paid, thus enabling the dividend fund to be squandered in payment of expenses and securing new business. The new statute provides for an accounting with each def. red. dividend policy, so that the insured will at all times know the amount credited to his policy.

The companies are also required to report the aggregate of the dividend fund, the additions made to it and all disbursements from the fund. This report must be made to the insurance department and the office will be enabled to keep close tabs on what the insurance companies are doing with the insurance trust funds. With this check upon their affairs there will be less disposition to extravagance and waste.

While the legislature has been busy with the problems worked out by the new statutes, the insurance department has not been idle. Upon its enforcement of the laws will depend their efficacy, for it is the only cohesive agency in the state capable of making the laws effective. It has established a bureau of investigation and has made a number of arrests, and its members are well qualified to detect and expose the schemes and swindles operating under the false name of insurance companies.

With the enactment of the new legislation the department has had a wonderful growth in effectiveness. This is the natural result of the support given the department by the governor and the general assembly, and the careful consideration given its needs. At the same time the activity, intelligence and fairness with which the department has been conducted is generally recognized as being a prime factor in its success.

#### Work of Department.

The department has annually licensed 40,000 agents of companies authorized to do business in Illinois. It has annual statements from over 600 companies to examine, file and report upon, and the examination of the companies requires continuous work in which exceptional care, training and thoroughness are required. The department's examination has assumed a high standing and its examinations are recognized as authority.

The thoroughness of the examinations made is illustrated by the fact that there are no recent failures among companies doing business in Illinois except those caused by the California earthquake and fire, which department's supervision was powerless to prevent. The department's offices among assessment companies and fraternal societies which are not under strict state supervision and which the law affords no adequate means of preventing.

The department has taken the firm stand that it will go the utmost length permitted by law in protecting the people of Illinois from companies that give insurance but do not furnish protection. Proceedings were recently had against the Marquette Mutual Life of Chicago, an assessment life insurance company, and a receiver was appointed for it. This incident illustrates the policy of the department, even in instances where the law is not sufficiently strong to make its supervision complete.

#### Rule of Underground Insurance.

Underground insurance, a system of writing policies employed by companies which are not authorized to do business in Illinois, is the bane of the insurance department. It is difficult to keep a check on the operations of the agents who do this class of unauthorized business, but within the past few years they have been rendered practically incapable of harm. Repeated prosecutions and publicity is rapidly ridding Illinois of unreliable insurance.

The records of the auditor and treasurer show that the insurance department collects in fees and taxes over \$400,000 annually. This money is promptly paid over to the state and full accounts of all receipts and expenditures, available to the public, are prepared and filed. The department also issues a comprehensive report for general distribution and the information of the public in this regard is abundant. Its affairs are conducted in business-like manner and it holds high rank among insurance men.

A feature of the Illinois department which commends itself to those familiar with insurance is its policy of dealing with insurance problems from a judicial standpoint. While it has a reputation for strictness and severity, it is rigorous with policyholders. It has drawn up no division of underwriters, companies of other states. During all the excitement attending the New York insurance scandals the Illinois department did not lose its head, nor was it carried away with the hysterical demand for repressive legislation and radical regulation. Some states went so far as to prohibit the sale of insurance to Illinois, while others nullified wholesome laws for regulating insurance by substituting for them unreasonable and unconstitutional enactments. The Illinois legislature was guided in its work by the recommendations of the governor and the insurance department, and nothing of this sort occurred here.

#### Most Account to Policy Holders.

Since the First Investigation New York has secured a number of laws, and its new bills have been pointed to as models in this respect, but Illinois without the hush and scandal attending the proceedings in New York

## New Stock Dress Goods

We bought some special values in spring and summer dress goods. Pretty Organdies, Lawns, White Goods and Linens that range in price from 10c per yd. upward. We also picked up some good values in figured dress goods at prices of 30c per yd. up.
