SELECT YOUR SEED CORN EARLY IN FALL

By PROF. LEONARD HEGNAUER, University of illinois.

In planning for next years erop it should be picked, since the ripening period depends somewhat upon the date of planting, weather conditions also that work about being at mount of the very instance. If good remains the done early this fail if it is to be at all. If it is neglected now it to be at all. If it is neglected now it can never be done afterwards. There were instance. If good remains a second of the period depends somewhat upon the date of planting, weather has a second of the plants as the period of the plants are the period of the plants as the period of the plants as the period. The is the only way recommended. This is the only way recommended. This is the only way recommended. This is the only way recommended of the plants as the period of the plants as the period. It is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is well to bear in mind that each it is a period of the plants as the province of the plants as that yield at expendent upon it.

In selecting seed, choose early manufactured which are just as important, but seed, on the market of the vice of the corn grows. Anything which will help to increase the yield should on the market of the vice of the corn grows. Anything which will help to increase the yield should on the market of the vice of the corn grows. Anything which will help to increase the yield should on the market of the vice of the corn grows. Anything which will help to increase the yield should

SELECTING TREES FOR THE ORCHARD

By ASST, PROF. A. W. NOLAN.

College of Agriculture, University of illinois.

The commerical orchardata seldom plant more than four dw varieties of fruit trees, best adapted to their location and markets, but the farmer requires many varieties to supply the deplands for fruit throughout the year. Early summer, late summer, early fall belief to the summer, and the summer of the s

will also guide in the selection of varieties.

A few of the standard varieties of ruit for family orchards of Illinois may be mentioned as follows:
Apples-Summer varieties: Red Astrachan, Yellow Transparent. Early Harrest, Duchees, Red June. Pall varieties: Wealthy, Maiden's Blush, Fall varieties: Mone Beauty, Ben Daris, Wine Sap, Guno, Salome, York Imperial, Willow, Stayman.
Fraches.—Early Richmond. Montmocratic Maiden and Morello, Tyrking. By Bouss, English Morello, Tyrking.
