Undecorated initials, either script or blocked, are the smart marking for handkerchiefs. Among the daintiest of these are the fine white licens finished with a tiny edge of Armenian lace. The Longfellow type of initial surrounded by an elaborate decoration also is used, but chiefly on the a-jour hemmed handkerchiefs among which are found many carrying ordental initial designa. One corner designs, showing a pattern starting close to the decorated edge and running toward the handkerchief's center, are liked and women who go in for variety in small accessories are taking to the one-side embroidered mouchoft. The Balkan war is proving to be a very explacive affair to Germany. The Balkan allies have not only demonished Turkey in Europe, but by demonstrating the existence of a formidable milliary power on the southers border of Germany's ally, Austria-Hungary, they have compelled the German general staff to add 180,000 call upon the people to contribute \$250,000,000 for national defense, and to increase the yearly expenditure on account of the army by \$55,000,000, It is notable that the greater part of this money for defense is to be expended on the Russian and not on the French frontiers of Germany, x fact which disproves the theory that Franco-German rivalry is responsible for the extense milliary preparations of the empire.
