FEED THE BIRDS.

The cold winter days are almost upon us and many of our little feathered friends of the summer days have gone south for the winter, but there are a number that are still here and will remain with us. "It will cheer and inspire one to see these happy, optimistic little fellows flitting about, so matter how cold or blizzardy the day. But remember when the ground is covered with snow and the grain and seeds and insects are no longer available for food the birds will perish unless we come to their aid.

Prepare a feeding place now and remember them every day. Almost any form of a feeding table placed high enough from the ground will answer. Even a place in the yard where food is regularly scattered will bring them. Sometimes this feeding place may be a piazza where the birds may be seen through a window. Hang a piece of net in a tree near the house. This is a most sure place where it can be reached. To many it is a constant delight, day after day, to watch these little visitors come and go. If you have never given yourself this pleasure now is the time to begin.

HOW TO TREAT YOUR TOWN.

Praise it, improve it, talk about it. Trade there and induce others to trade there. Be public spirited. Take a home pride in it. Boost its business men—don't call your best citizens imposters and frauds. Tell of its natural advantages. Support the local institutions that benefit your town. When strangers come to town, use them well. Look ahead of self when all the town is to be considered. Remember, it is your home, and if you cannot be a booster—MOVE.

MAY BE RALEIGH'S SETTLERS

Group of People in North Carolina Hard to Account for in Any Other Way.

There lives in the woods and swamps of Robeson county, North Carolina, a strange group of people, in appearance somewhat resembling Portuguese or mulattoes. Their manners, customs, and personal appearances are unlike those of any other race on the American continent, says the Southern Workman, and intercourse with their neighbors is limited to the extent that occasionally demands. Harking back to 1585, it is recalled that one of the expeditions of colonists sent out from England by Sir Walter Raleigh arrived on Roanoke Island, North Carolina, under the command of Capt. John White. Capt. John White never saw his people after he left them on Roanoke Island and returned to England for supplies. When he returned the little band, it is supposed, had gone to the mainland and been absorbed in an Indian tribe. It is now believed that the descendants of this tribe of Indians are at this time living in Robeson county, where more than thirty families have names similar to those of White's colonists.

He Had Heard It.

It was during the lunch hour and four genial business men were sitting at a table. Outside the air was soft and balmy, and everything in nature was a sweet allurement to buy a railroad ticket and beat it for the woods. "It is in my system," remarked one of the party, reflectively glancing through the open window. "There is nothing so appealing as the call of the wild." "It may strike you that way, old fellow," responded another, with a faint smile. "But right here I beg the privilege of casting a dissenting vote." "You don't know what you are talking about," Jim emphatically declared the first. "Did you ever hear the call of the wild?" "Yes," replied Jim, with something akin to a sigh. "From the head of the snake the other night, when I didn't get home till two o'clock in the morning."

Served His Foot.

H. D. Ely, of Banton, O., suffered from horrible ulcer on his foot for four years. Doctors advised amputation, but he refused and reluctantly tried Bucklen's Arnica Salve as a last resort. He then wrote: "I used your salve and my foot was soon completely cured." Best remedy for burns, cuts, bruises, eczema. Get a bottle today. Only 50c. Recommended by Barrington Pharmacy.—Adv.

News of Comment and Interest to Local Agriculturalists and Milk Producers.

The department of agriculture at Washington has reported the seizure of seventy-five cases of evaporated milk alleged to have been shipped by the Borden Condensed Milk company from its St. Charles plant. The government agents say the cases were found to be short of label weight. The product was released to the consignee under bond of \$200 to obey the law.

Circular No. 115, "How and Why to Test Dairy Cows," and Circular No. 118, "Cows vs. Cows," published by the Illinois Agricultural Experiment station, and written by Prof. W. J. Frazer, have just been translated into the Russian language. The translation and distribution of these circulars have been made by a society in Russia that is trying to improve agricultural conditions among the peasant farmers of Russia.

At the land show, to be held at the Coliseum, Chicago, November 20 to December 7, the University of Illinois will have an extensive exhibit. In corn work it will show the results of special breeding, the components of a bushel of corn, samples of corn, feeds, etc. In forestry work it will be jars containing various substances; corn and value will be shown on charts. Animal husbandry, dairy husbandry and other departments will have instructive and interesting exhibits.

At a special meeting of the board of directors of the Milk Producers' association, held at the Sherman house, Chicago, November 8, a brief prepared by C. A. Sawyer of Elgin for the Northern Illinois Breeders' and Dealers' association, protesting to Governor Dunne against his proposed quarantine regulations regarding dairy cattle, was indorsed. Dairy farmers of northern Illinois, who have seen so much of the hamburger and unreliability of the tuberculin test, have no use for it in any way.—Milk News.

CATHOLIC BAZAR AT CARY.

Continued from first page.

the cause of Barrington, for it will be needed to keep abreast with the already past success of Caryites. For the convenience of Barrington people a train will leave Cary every evening at 10:40 for Chicago, stopping at Barrington and other intermediate points.

The Cary parish has had a wonderful growth. Two years ago Rev. J. M. Longeneck and Rev. Joseph L. Gies were appointed by St. Ann's of Barrington to conduct St. Ann's of Barrington, with Cary, Crystal Lake, Algonquin and Dundee as missions. Before this appointment was made the people of Cary and vicinity attended St. Ann's which has thus become the mother of churches, as edifices are in course of erection, or soon will be, in Algonquin and Dundee.

St. Peter's and St. Paul's, as Cary's church is named, whose corner stones were placed in July of last year, rapidly took form, and was dedicated June 29 of this year, in the presence of a large concourse of people, by Bishop Muldoon. The church proper is of Spanish mission style, situated on one of the most ideal locations in Cary. The beauty of design at once attracts the visitor. The total property valuation is slightly over \$20,000 and consists of a residence and church with a spacious hall beneath for society and entertainment purposes, all of which is beautifully electric lighted and heated throughout with steam. Those who profess to know claim it to be the largest and most beautiful church edifice between Chicago and Woodstock.

One month after dedication the combined parishes were divided and Rev. J. M. Longeneck assumed the pastorate of Crystal Lake, Algonquin and Dundee, while Rev. Joseph L. Gies, formerly assistant, was made pastor of Barrington and Cary, which position he occupies today.

DON'T TRIFLE WITH COUGHS OR COLDS.

Many Have Filled Consumptive Graves Because They Neglected a Cough or Cold.

"You never know how soon a cold will become a serious malady. It may be in the head to-day; in the lungs to-morrow and the next day you may be fighting deadly pneumonia for your life. It's much the same with a cough. Inflamed and cough-worn throat and lungs offer the best chance to consumption germs to begin their murderous work. There's only one way to prevent these deadly diseases getting a hold on you. As soon as a cough or cold attacks you, take Dr. King's New Discovery until you are entirely cured. Sometimes a dose or two will do the business, saving you suffering and a doctor's bill. Thousands of cures like these below prove its wonderful power to cure coughs and colds.

"I feel sure it's a Godsend to humanity," writes Mrs. Elsie Morton, Columbia, Mo., "for I believe I would have consumption to-day, if I had not used this great remedy."

"I take great pleasure in recommending your Dr. King's New Discovery for the benefit of suffering humanity. It's a thoroughly reliable remedy for all coughs, croup and lung troubles. We have used it in our family for fourteen years with the best results. It saved my mother when two doctors gave her up. She had a very severe case of pneumonia and was in bed seven weeks and part of the time 'out of her mind' so that she did not know me. I told father to get me two 50c bottles of Dr. King's New Discovery, which he did, and on taking it she soon began to improve, and four bottles cured her entirely. You may publish this if you wish and I will answer all inquiries, with postage enclosed for reply.

"Yours respectfully, "Wm. Cogger."
