

BARRINGTON REVIEW

VOLUME 32, NUMBER 9

BARRINGTON, ILLINOIS, THURSDAY, MARCH 2, 1916

\$1.50 PER YEAR IN ADVANCE

ANNUAL DINNER FOR LOCAL FIRE LADDIES

W. R. C. Serve Tempting Menu on Tuesday Evening of This Week to Men Who Fight the Flames.

ALL BUT TWO MEMBERS PRESENT

Spoken and Games Enjoyed After Dinner—Firemen Have Only One Call This Year to Service.

The village volunteer firemen held their annual dinner Tuesday evening, February 29, in the Woman's Relief Corps hall. There were twenty-five in number, according to a limitation of the village authorities, and all but two of them were present. Henry Delahoff and Gottlieb Miller filled out a long table.

The executive committee of the W. R. C. arranged the menu and the service very satisfactorily, decorating the table with lighted candles in glass candlesticks with green shades and using maple leaves for a touch of beauty.

The menu was:
Roast Beef
Mashed Potatoes
Rolls
Pickles
Salad
Pie
Coffee

After dinner a smoker and games ensued for several hours.

Since the last "ret" three years ago, a year ago their boys there has been only one fire, the Scott building a few weeks ago, and it is hoped they may not be called out again in a long time. They are brave fellows, as are all who volunteer to meet danger for the good of the public. We should not forget their heroism of the past and their willingness of the present to fight the flames for anyone who is threatened.

Their pay is so small that it is not to be considered at all, but the appreciation of their work is the day of all.

Three honorary members from out of town were present: Samuel Sather of Park Ridge, Victor and Sanford Rieke of Woodstock.

The names of the rest of the members follow:
Fire Marshal, Henry T. Schroeder
Assistant Marshal, Irving Landwehr
Henry S. Meier, Charles Hutchinson
H. P. Plazge, Roy Waterman
Ernest Rieke, William Rieke
Walter Homuth, Ben Brombergkamp
August Sempf, Walter K. Kuchel
Charles Schaefer, Charles E. Miller
Frank Schaefer, Herman Kuhlman
Don Pomeroy, Fred Grabenhorst
Herbert Landwehr, Fred Jahnholz, Jr.

At the regular monthly meeting next week four applications for three vacancies in the membership will be considered.

Birthday Party
A party was given Monday evening in honor of Henry Titus of the east Hawthorne farm who had arrived at his fiftieth year this day, February 28. The house was especially trimmed for the party with pink and white crepe paper and pink carnations bouquets. Fourteen young friends were his guests and they had a lively evening. A late luncheon was served which had ice cream and cake for the finale. The names of the girls and boys here are: Jessie Hore, Helma Marz, Katharine Priest, Irene Landwehr, Marion Sott, Helen Meyers and Francis Brockway; Russell Brockway, Howard Stiefenhofer, Dudley Carmichael, Lester Bartholme, Philip Priest, Maurice Waterman and Erling Eranger.

Will Elect Officers Tonight
Barrington lodge, No. 650, I. O. O. F., will nominate and elect officers for the ensuing year at its meeting this evening. This lodge has lately added with the West Side Odd Fellows association of Chicago, composed of twenty progressive lodges. Barrington is represented in the association by Edward Rieke, E. D. Frouly and O. E. Morrison, who has served Barrington lodge as secretary the past two years. He was given positions of the finance and ways and means committees of the association.

A meeting of the association will be held in this village this spring.

Uncollected Letters
The following letters remain at the Barrington postoffice uncalled for week ending February 24, 1916:
Luka Byrnes
William Hill
Mrs. Clara Walker
G. W. Springer, Postmaster.

Real Estate Transfers
J. S. Hays & wife to C. E. Rieke, lot 6, blk 3 "A" Bond, Sub Wisconsin, W. D. \$10.00.
W. A. Granau to W. J. Kamen, undivided W. 34, Sec 19, T. 101 N., R. 10 E., blk "B" Barrington, W. D. \$20.00.

LARGE CROWD AT BAPTIST CHURCH

Mrs. Fred Lines Again Delights Audience With Interesting Address Sunday Evening.

Last Sunday evening a large and notable gathering listened to one of the most worthy, interesting and up-to-date addresses at the Baptist church given by Mrs. Fred Lines. She was at her best in voice and manner and completely captivated her hearers, speaking eloquently for fifty minutes and all wished the night had continued for another hour. Her subject was conditions in Europe today and America's relations to the war amongst other nations.

A male quartette consisting of Messrs. Mattison, Lines, Cameron and Baldeck rendered a selection and sang with a choir to large that it overflowed into the pews of the church. Mrs. John McLeister and Miss Edith Hams sang a duet. The quartette will sing every Sunday from this time on. It was an evening of profit and delight.

PALATINE COUPLE WED LAST WEEK

Bride Is Well Known Here Where She Has Frequently Visited—Will Make Their Home in Palatine.

Miss Elora Arps, daughter of Mr. and Mrs. Gus Arps of Palatine was married Thursday evening, February 24, to Elvin R. Foster at Newwood, Ill., by Rev. W. J. Libberton, pastor of the Barrington Methodist church. Miss Vera Goswiler and Stanley Stewart were their attendants. The bride's people were the only others present.

Mr. and Mrs. Foster are now in southern Illinois visiting Mr. Foster's parents and will later live at Palatine at the Arps home.

Miss Arps has visited frequently here since childhood and has many friends who have admired her fine schooling and ability as a pianist. Mr. Foster is employed at the Dean racing stables and has been in Palatine two years.

Musical Program Friday Night
The primary teachers of the Baptist Sunday school very cordially invite the public to a musical program to be given in the church on Friday evening, March 3, at eight o'clock.

A sister offering will be taken at the close. The following program will be given: A trio consisting of Walter Sears, Messrs. Thoma and Bickelmeier of DesPlaines will give several selections; H. Mattison, W. J. Cameron and A. Lines will give vocal solos; Mr. Thoma a piano solo; Mr. Bickelmeier a clarinet solo; Messrs. Cameron and Mattison a duet; Mrs. Cameron organ selections; readings by local talent and a ten minute address by the pastor, Rev. G. H. Lockhart.

This is the annual concert given by the primary teachers and a crowded church is looked for on the occasion.

Library Notes
On the evening of March 17, a program will be given by the club in the school house for the benefit of the library. A more complete notice will be given next week.

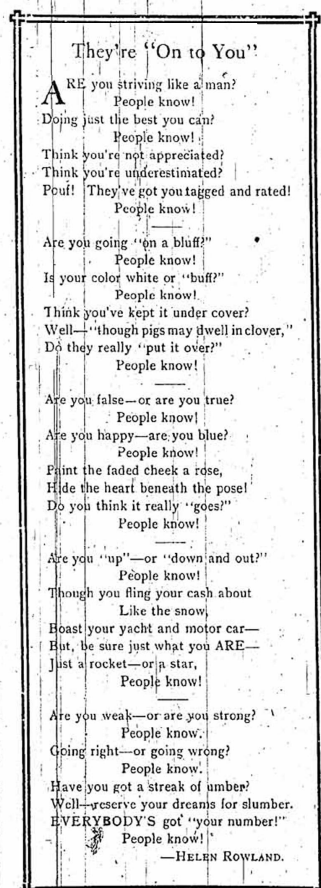

The Chicago Record on Wednesday sent a box of books (the latest juvenile) for the Barrington library and Mrs. Long of Geneva who spoke here a few weeks ago sent a box of fifty books.

Friday, March 17, will be Library Day in the Barrington Woman's club so that donations of books or money are requested. The library now numbers nearly a thousand volumes and one needs only to enter the rooms on Library Day to know that it is appreciated for a great many books are being taken out by the villagers.

Railroad Settles For \$100,000
The Chicago and Northwestern railway last week made a settlement of \$100,000 with Frank B. Reed of Ridgefield, near Woodstock. On November 6, Mr. Reed and his two young sons, Marvin and Russell, were struck by a train at a crossing near their home. The boys were killed. Mr. Reed was in a hospital for weeks and his automobile smashed.

State Bank For Palatine
Charles H. Patton, Palatine banker, and others will open a state bank in the near future and build a modern bank building. The state auditor has issued a charter calling for \$25,000 which is already over-subscribed. Paul Patton, Ralph Peck, Henry Helo, Harry Schoppe and Charles Quindel are interested with Mr. Patton.

Births
A daughter was born on Monday, February 23, to Mr. and Mrs. Elmer Rumpert who live northwest of town. A son was born on Thursday, February 24, to Mr. and Mrs. Edward Kransky of Walnut street. He has been named "Henry A."

PRETTY HOME WEDDING YESTERDAY

Rieke-Homuth Nuptial Event Witnessed by Relatives and Friends—Will Make Home in Woodstock.

Miss Jennie L. Homuth, youngest daughter of Fred Homuth of west Main street, was married Wednesday evening, March 1, to Victor D. Rieke of Woodstock. The ceremony was performed at eight o'clock at the home of the Homuth children near the Elgin, Joliet & Eastern railroad crossing by the Rev. J. Hommer of the Evangelical church of which the bride is a member.

Miss Homuth wore a gown of white silk trimmed in white satin and pink ribbons; only relatives witnessed the marriage. Victor Rieke, Mr. and Mrs. Ernest Rieke, Sanford Rieke, Mr. and Mrs. Mason Coe, Mrs. Sophie Rieke, Mrs. Louise Golden of Chicago, Miss Edna and Walter Homuth, Mr. and Mrs. Alfred Landwehr of McHenry, Mr. and Mrs. Fred Homuth and Mr. and Mrs. Sam Homuth.

At eleven o'clock a lunch was served and at midnight eight of the young people of the party accompanied the bride and groom to the depot to see them off on the 12:32 train for their new home in Woodstock, where Mr. Rieke is presently engaged in business with his brother in the Woodstock Home Oil company.

These two young people have been raised in our village and led exemplary lives in business and socially. Mr. Rieke was employed at the Barrington laundry here for a long time and also by Chicago firm, while Miss Homuth has been for the past eight years bookkeeper at the laundry.

New Meeting Rooms
The Christian Science Society of Barrington has rented two rooms in the second story of the Grunau building for use as reading rooms and church services. Renovations are in progress now; walls and woodwork are being redecorated and the two rooms will be made into one. Later, suitable seats and altar will be installed; it will be several weeks before the society gives up its present accommodations in Old Fellows hall.

YOUNGSTERS AT LEAP YEAR PARTY

Enjoyable Time Had by Girls of Sophomore Class and Their Gentlemen Friends Tuesday Evening.

An excellent time was spent Tuesday evening, February 29, in the mansion of a "Leap Year Party," at the home of Mrs. Herman Schwemm, said lady giving the use of her house for the occasion, through the influence of her niece, Miss Theresa Brandt.

Nine local high school girls of the Sophomore class invited their respective gentlemen friends. The affair was a "Leap Year Party" to the fullest extent, the girls calling for the boys and even taking them back to their respective homes after the doings.

It is even said that one certain young miss went as far as to propose; but whether she was accepted or not we do not know, so we will have to wait and see what "Father Time" does.

Numerous games were played during the evening and prizes were awarded. Miss Alice Rowe, Miss Bulah McLaughlin and Conrad Lipovsky being the winners.

The names of those present were:
Misses Masters
Alice Rowe, Henry Titus
Frances Laney, Harry Hams
Dorothy Nightingale, Eugene Bennett
Bulah McLaughlin, Ray Powers
Grace Melton, Dorey Nightingale
Dorothy Brasel, Jack Abbott (solo)
Ruth Brown, Conrad Lipovsky
Eleanor Garbisch, Harold Kelley
Lucy Robertson, Frank Kraus

A very dainty luncheon was served, consisting of ice cream, cake, fruit and candy. Each couple was served with one plate, making it very interesting, and at the same time a real "Leap Year party."

Dr. Arthur Church returned to his home in Warsaw, Indiana, yesterday after spending several days at the home of A. D. Church. While here Mr. Church was looking after his form interest in Barrington township.

Right now is a good time to advertise the spring goods. The Review is the best medium to use to advantage.

FIFTEENTH WEDDING ANNIVERSARY

Barrington Home Made Pleasant For William Rieke and Wife in Honor of Their Marriage Event.

Mr. and Mrs. William Rieke of Liberty street kept open house Saturday evening, celebrating thirty-six guests with a nice o'clock supper. The party was to mark the fifteenth wedding anniversary of the marriage of Miss Freda Gottschalk and William Rieke which took place at the Methodist parsonage on February 27, 1901. A part of the evening was passed in playing games and presenting the host and hostess with gifts of cut glass, money and other articles. Carnations in red and white decorated the supper tables. Guests from out-of-town were: Mr. and Mrs. Percy Edrick and child from Havana; Miss Anna Shatt from Joliet; and Louis Gottschalk who lives on a farm east of Lake Zurich.

SCARLET FEVER UNDER CONTROL

Palatine School Opened Monday and Other Public Places Will Soon Be Free from Quarantine.

The epidemic of scarlet fever which has been alarming Palatine for the past two weeks is said this morning by President of the Village Board Oims, to be thoroughly under control and all cases about recovered. Dr. Crawford of the State Board of Health has been in Palatine frequently working with the Board of Health there to enforce the quarantine imposed. School opened Monday after two weeks of being closed and it by Sunday no further threatening developments arise and public meetings of all kinds will be allowed.

The rumor current in Barrington this week that Charles Seip had been arrested by the state authorities for breaking quarantine is not true, rather he is said by Mr. Oims to have been very willing to assist in every way to prevent a spread of the disease. His advertisement dances and picture shows were abandoned as soon as ordered closed. There were less than a dozen cases of infection altogether and it is not known where the first child caught the fever. Greater care, a man of about thirty years of age, is sick with smallpox but is isolated from all people and is getting along finely.

Interesting Debate by W. F. M. S.
An annually attractive program will be given at the Methodist church, Tuesday evening, March 7, at eight o'clock. The main feature will be a debate: Resolved, That Every Christian Should be a Tithing Affirmative, Miss Carrie Kinsinger and Mrs. Robert Kinsinger, Mrs. W. J. Cameron and Mrs. W. A. Shearer.

Dr. W. J. Libberton and W. J. Cameron will sing. The choir will give special music. Other numbers and a social hour will contribute to the evening's entertainment. This meeting is open not only to members of the auxiliary, but, to any who wish to attend, a cordial invitation is extended.

Woman's Club Dinner This Evening
The twenty-second annual dinner of the Woman's Thursday club will be served this evening at the home of the club president, Mrs. Sanford Peck on Lake street, where about thirty-eight members and gentlemen guests will be seated. An entertainment of the evening will be Miss Adeline J. Kinsinger of Cocoa, Florida, a young lady reader who has spoken for the club before and who is living at present in Chicago with her grandmother, Mrs. Lizzie Kison, who will also be here this evening. Miss Kinsinger has recently taken two medals for good oratorical work, one of them being awarded by the state of Florida.

Declines Big Offer
Rev. George Lockhart of Elletts, once Baptist minister here, has recently been offered the presidency of an Iowa Baptist college which he will not accept, preferring to remain in his present pastorate, the largest Baptist congregation in Wisconsin. He is a member of the board of trustees of Wayland academy at Beaver Dam and has been asked to represent the Baptist church on the board of control of the half billion dollar Union Religious Center to be established at the state university at Madison.

The finest display of new automobiles ever assembled in this village is seen at the new Lincoln garage which is on 3rd St., Model 75, Overland cars shine in all their attractive beauty; two more car loads are expected the last of the week. This model is priced at \$695; it is a five passenger car with most of the mechanical conveniences of the higher priced cars and is noteworthy for thoroughness of design, material and workmanship.

DOGS CARRY DISEASE OF VARIOUS KINDS

Neglected Animals, Permitted to Run at Large, May Transmit Carriers of Infection to Farm Animals.

HINTS ON HOW TO PREVENT SAME

No Serious Results are Reported Where Dogs are Given Proper Treatment in the Home.

The dog in the country is a useful and pleasant adjunct to the farm. He is properly controlled and cared for, but when neglected may readily become a carrier of disease to stock, in addition to gaining opportunity to kill sheep and destroy gardens and other property. Dog ordinances, as a general rule, have been intended chiefly to curb the dog's power of doing harm by attacking, biting, killing, or running sheep or stock. The part that he plays as a carrier of disease to animals only recently has been recognized.

Of the diseases carried to stock by dogs, the foot-and-mouth disease is probably the of the greatest interest at this time. In this case the dog acts as a mechanical carrier of infection. The dog which runs across an infected farm easily may carry in the dirt on his feet the virus of this most contagious of animal diseases to other farms and thus spread the disease to the neighboring herds. In infected localities it is absolutely essential, therefore, to keep all dogs chained and never to allow them off the farm except on leash. There are, however, many other maladies in the spectrum which the dog takes an active part. Rabies, hydatid, cineroma, "fetus" double-pore tapeworm, roundworm and tapeworm are often conveyed to human beings in this way. It is equally important that the dog be kept clean and tips in transmitting bubonic plague or the deadly spotted fever.

Hydatid disease is caused by the presence in the liver, kidneys, brain, lungs, and other organs of a bladder worm or larva (tapeworm). Bladder worms are often as large as an orange and may be larger. A dog which is allowed to feed on carion or the raw viscera of slaughtered animals may eat all or part of a bladder worm containing numerous tapeworm heads. These tapeworm heads develop into small segmented tapeworms in the intestines of the dog. The tapeworms in turn develop eggs, which are passed out in the excrement of the dog. They are spread broadcast on grass and in drinking water where animals can feed. These worms are often as large as an orange and may be larger. A dog which is allowed to feed on carion or the raw viscera of slaughtered animals may eat all or part of a bladder worm containing numerous tapeworm heads. These tapeworm heads develop into small segmented tapeworms in the intestines of the dog. The tapeworms in turn develop eggs, which are passed out in the excrement of the dog. They are spread broadcast on grass and in drinking water where animals can feed. These worms are often as large as an orange and may be larger. WAITING FOR THE END OF THE WAR

"Then Take Advantage of the Opportunities in Canada."

(Contributed by W. J. White, of the Department of the Interior, Ottawa, Canada.)

I strolled into a bank in one of the cities of the west a short time ago and the bank manager said "after the war, the Canadians should be prepared for a great influx of people. The crops that the western Canadian farmers have produced in 1915, and the wealth that the farmers have had thrust upon them by the high price of grain, will make farm lands valuable and farming remunerative. After the war is over there will be thousands of Canada to emigrate in agriculture and many other industries that will certainly prove profitable. Conditions will be wonderfully good. The advertising that Canada has had during the last year or two by its magnificent contributions of over 2,000 men to fight for the Empire, the wonderful sums it has given to the Red Cross and Patriotic funds, and the showing it made in subscribing over double when only 50 millions of dollars was asked as a war loan, the bravery, courage and hardiness of the soldiers who have fought the battles in Flanders, it is just wonderful, and my enthusiastic banker goes on eloquently. One might have thought he was a subsidized booster for Canada. "But," he said "they won't go until after the war."

"Well, now, Mr. —, why wait until after the war? If all you say are true, and you have said nothing untrue of the wonderful things that Canada today, nothing of the fact that the immense grain crop of Western Canada this year has given to every man, woman and child in this country, over three hundred dollars per head, why wait until after the war? After the war, under such conditions as you have pictured and which are really land values will go up, prices will increase. Advantages should be taken of the low prices at which these agricultural lands can be had today. They have not increased any yet, and excellent farm lands can be had close to railways in old settlements, in excellent communities for from fifteen to thirty dollars per acre. The climate is good and will be no better after the war."

"What about conscription, though? Is there not a danger from conscription, and should I advise any to go there now, would they not have to fight? I see, too, the report that there is a heavy war tax on lands."

I was surprised to learn that these old yarns, stories that I thought had been exploded long ago, were still doing duty in many parts of the United States, and that a gentleman of the wide learning of my friend, was inclined to believe them.

"Conscription," I said, "With Canada contributing 250,000 men voluntarily enlisted, why conscription? There is no conscription in Canada, and neither will there be. It is not needed. In any case no legislation could be passed by the Dominion Parliament which would impose military service upon people who are not citizens of Canada, either by birth or by naturalization. Settlers from the United States could not become naturalized British subjects until they had resided in Canada continuously for three years."

I quoted from official documents.

"In the first few months of the war I clearly stated that there would not be conscription in Canada, I repeat that statement today."

"And then as to taxes," I continued, quoting again from official authority. "All taxes levied by the Federal Government take the indirect form of customs duties and inland revenue duties. It is untrue that farmers are paying direct war taxes levied and no incoming settler need hesitate to come to Canada on this account."

"Official details should convince you that all apprehensions which have been making would be better to settle from the United States hesitate to make a choice while the war lasts are without foundation. With these misunderstandings cleared up, the present war conditions even become an added inducement to settlement in any part of the provinces of western Canada, inasmuch as war prices and boom demands for all manner of farm products afford the farmer a special opportunity to make money."

I was glad of the chance and pleased to have seen that his views had altogether changed.

I could have continued, and told him of the fortunes that had been made in the season of 1915, out of farming, wheat raising, and growing, barley growing, cattle raising, dairying and mixed farming. I could have told him of an Ontario (Canada) syndicate that had a yield of 330 bushels of oats per acre from their farm at Walworth and from 60 acres of wheat they had yielded over 60 bushels per acre. These rich wheat phenomena were rewarded in many portions of western Canada. It was interesting to inform him that the average yield of spring wheat in Saskatchewan was 51.1 bushels per acre; Manitoba, 36.3 bushels; in Alberta, 26.16 bushels, and over the three provinces there was a total average of over 40 bushels per acre.

been harvested has put millions of dollars in the hands of the farmers, and the work of distribution through the regular channels of trade has already begun. Millions of bushels of grain are still in the hands of the farmers, which means that there is a vast store of realizable wealth that will be steadily coming into circulation, benefitting the thousands who are dependent directly on the basic industry of the province for their livelihood.

"The mock prosperity that rested on the insecure foundation of inflated real estate values has passed away, and in its place the corner stone of the country's sound financial future is being built."

"The trust and mortgage companies, the large implement concerns and the wholesale merchants all tell the same story today of marked improvement in their business. The farmers and others are meeting their just dues and paying off debts that in many cases have been long overdue. Collections are better today than they have been since the most prosperous days of our history, and the farmers are being met fairly and promptly."

"Now," I said, "why should they wait until after the war is over?"

And he agreed with me—Advertisement.

THIN PERSONS LIVE LONGEST

An Age Advancement Investigation Shows Danger From Overweight Is Increased.

Recent investigations show that the longest life and best health are not to be found among those of average build at any particular age. On the contrary, it is discovered that in those at the younger age who are slightly overweight, and at the older ages among those who are distinctly underweight, the longest life and best health will be found.

Overweight is above thirty years, a definite disadvantage to health. It means staidness, lack of vigor, sluggishness, indigestion, and lack of the power of adaptability to invading germs, says London News.

Men from twenty to twenty-four can be accepted as healthy and for a long life fifty to sixty pounds above normal. Less excess weight is permissible between twenty-five and fifty and increasingly less as you go up. There are one-third more deaths among men between sixty-five and eighty who are fifty pounds heavier weight than a man should be for a given height. At the ages of thirty-four to forty-five from thirty-five pounds to forty-five pounds heavier weight than a man should be double his risk of death. For anyone above thirty-five who is thirty pounds too obese life insurance companies hereafter will consider poor risks or raise their insurance rates.

PLEASANT FOR THE GUEST

One Can Imagine What She Would Have Liked to Do Dear Little Freddie.

A woman who uses a telephone as a trumpet was late calling on the mother of a very lively young man, age five. It was Freddie's first sight of such a lot of deafness, and naturally he was quite curious about it.

"Mother, I want to talk over the telephone," I want to talk over the telephone," he teased.

"The mother, knowing she would have no peace until his wish was granted, apologized and informed Mrs. G. of his desire.

"Way, certainly, my dear. I shall glad to talk to you," said Mrs. G.

"Think quick, now, what you are going to say," cautioned his mother as she gave him the telephone.

"A right!" chirped Freddie as he put the receiver to his mouth. "Hello, Central, give me Mrs. G.—who is dead and dumb!" yelled Freddie at the top of his voice. — Indianapolis News.

In Place of Goals.

"Conversation classes" are the rage of the moment. At a conversation class, of course, you learn to converse, and the women who attend are desirous of reviving real conversation at the expense of mere talking. The members of the class meet in one another's drawing rooms, sometimes without a teacher or director of conversation, and one of the first things impressed upon the audience is that intelligent listening is as much of an art as brilliant talking. When there is no teacher, little groups of women meet and agree upon certain topics to be discussed, and about which each member informs herself. One woman in the class is appointed to rule out interruptions and irrelevant remarks as they come.

"This is interesting to all the members of the class, and certainly more to be recommended than the gossip to which women are given."

Rapt Appreciation.

"The president seems to be getting close to the common people."

"Sure. And he's using the kind of language they can understand."

"Yes."

"Every time he drops into the vernacular they cheer themselves hoarse."

Neither Leap Year Misses.

COOKING LIMA BEANS

MATTER WORTHY CAREFUL ATTENTION OF HOUSEWIFE.

Food Specialists Suggest Some Methods of Preparing the Dried and Canned Product to the Best Possible Advantage.

Food experts have long been insisting upon the importance of dried beans, peas, cowpeas and similar legumes, and in one form or another such foods are an accepted part of the diet in most families. In order that they may make the diet varied, it is to the housekeeper's advantage to know a number of good ways of serving such foods, and so the home economics experts of the department have made some suggestions based upon their studies of foods and their uses in the home.

Fresh green lima beans when at their best have a delicate, spicy or pungent flavor, which to some palates, at least, suggests curry, a fairly well-known (any grocer can get it) though not very common spice, which is perhaps most familiar in such dishes as "curried lamb" or "curried veal."

Considering the possible use of curry as seasoning for lima beans, and the tests which have been made gave very satisfactory results with dried and canned as well as with fresh beans. When preparing dried lima beans, soak them an hour or two (or even longer, according to dryness, and then add the curry. The dried beans (in the proportion of one-half teaspoonful) to each pound of dried beans) rubbed into a tablespoonful of butter and mixed with a few spoonfuls of hot water. Add salt and pepper to taste and cook slowly until the curry flavor is well distributed throughout the beans.

That the method can also be used with good results in preparing canned lima beans for the table is of interest to housekeepers as well as to the canning club organized as a part of the department work and for whom some special studies of the use of canned vegetables have been undertaken. In this case, as with dried beans, an amount of curry powder should be just sufficient to give a delicate flavor. A quarter of a teaspoonful (level) is sufficient for a quart can of beans.

For variety a little onion may be used, with or without curry. Cut the onion very fine, cook it in a covered steamer with a little butter and a few spoonfuls of water until it is tender, and then add to the beans.

Another good combination is canned lima beans with pimientos or sweet peppers, with or without the addition of the finely-chopped onion, cooked until the pimientos are tender, because of their red color, add to the attractiveness of the dish as well as to the flavor. One-half of a good-sized pepper, cut into small pieces, is sufficient for a quart can of beans. Stir into the beans and cook with them long enough to distribute the flavor through the beans.

Molded Salmon With Celery Salad.

Soak the salmon in milk. Have ready a cake, gelatin mixture, made by dissolving in two cups of water and one-half of boiling water two tablespoonfuls of granulated gelatin which have soaked fifteen minutes in half a cup of cold water. Add one-half cup of lemon juice. When cool, stir in the flaked fish, together with slices of hard-boiled egg, previously seasoned with pepper, salt and onion. Turn into a wet border mold. To serve, unmold on platter and fill center cavity with celery and lettuce dressed with mayonnaise. Decorate edge of platter with small, curling leaves—From the Delicacies.

English Plum Pudding.

One pound suet, one quart rolled cracker crumbs, one pint down, one pound currants, one and one-half pounds raisins, one-half pound citron, one cup sugar, one-half cup molasses. Beat two eggs, pour a little stiff with flour and steam six or seven hours. Sauce for it—One and one-half cups sugar, one tablespoonful butter, one teaspoonful flour. Beat to a foam and pour in boiling water. Flavor to taste.

Ethel's Muffins.

One-half cup graham flour, one-half cup bran, one-half cup rye flour, one-half cup white flour, one-third or one-half cup cornmeal, one-half cup sugar, one teaspoonful salt, one well-sifted teaspoonful baking powder, one-third cup of ground dates. Mix all these ingredients, then add about one and one-half cups of milk, one beaten egg, one tablespoon melted butter. Bake in moderate oven.

Cocoa Doughnuts.

One egg, three-fourths cup sugar, one-half cup sweet milk, one-fourth teaspoonful salt, one-fourth teaspoonful extract cinnamon, two cups flour, two teaspoonfuls baking powder, one-fourth cup cocoa. Add a little more flour if needed.

Cracker Grael.

Two tablespoonfuls cracker crumbs, one cup milk, one-quarter teaspoonful salt, mix crumbs and milk and add in double boiler twenty minutes, add salt and serve.

Jump from Bed in Morning and Drink Hot Water

Tell why everyone should drink hot water each morning before breakfast.

Why is man and woman, half the time, feeling nervous, despondent, worried; some days headachy, dull and unstrung; some days really incapacitated by illness. If we all would practice inside-bathing, what a gratifying change would take place. Instead of thousands of half-sick, anemic-looking souls with pasty, muddy complexions we should see crowds of happy, healthy, rosy-cheeked people everywhere. The reason is that the human system does not rid itself each day of all the waste which it accumulates under the pressure of mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out, else it ferments and forms poisonous poisons which are absorbed into the blood.

Just as necessary as it is to clean the ashes from the furnace each day, before the fire will burn bright and hot, so we must each morning clear a space of real hot water with a teaspoonful of limestone phosphate in it, as a harmless means of washing out the indigestible waste and bowels the indigestible material, waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Millions of people who had their lives ruined by indigestion, biliousness, acid stomach, nervous days and sleepless nights have become real cranks about the morning inside-bath. A glass of real hot water with a teaspoonful of limestone phosphate will not cost much from your drugist or at the store, but is sufficient to demonstrate to anyone, its cleansing, sweetening and refreshing effect upon the system.—Adv.

No Hope for Him.

Paul Visitor—What is this poor man in jail for?

Julius—For wife murder, ma'am.

Paul Visitor—Oh, what a pity! But isn't he sweet, though?

Julius—Yes, ma'am. The judge says he is too sweet to live.

FRECKLES

Now Is the Time to Get Rid of These.

There is no longer the slightest need of fear among your friends as the presence of freckles—those little, annoying, brown spots—has been discovered. Freckles are not due to deep-seated disease, but are the result of a skin condition which can be cured by the use of a certain cream. Freckles are not due to deep-seated disease, but are the result of a skin condition which can be cured by the use of a certain cream.

Don't Make Good.

"Dear Victor Ham has laid waste 'Yip' to its fate."—Louisville Courier-Journal.

Unnecessary.

"Do you tell your wife everything?"

"It isn't necessary. She knows everything."—Detroit Free Press.

Throw Out Cold and Prevent Grip.

When you get a cold, take Dr. Williams' Pink Pills for Pale People. They will cure you of colds, grippe, influenza, and all other ailments of the throat and lungs.

According to Her Cook Book.

Bride—"Wonderful! That pie is burning and I can't take it out for ten minutes yet!"—Life.

CLEANSE THE PORES

Of Your Skin and Make It Fresh and Clear by Using Cuticura. Free Trial.

When suffering from pimples, blackheads, redness or roughness, smear the skin with Cuticura Ointment. Then wash off with Rubbers Soap and hot water. These super-cream emollients do much for the skin because they prevent pore clogging. Free sample each by mail with Book: Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

In every man there is a little of the instinct of a slave; the instinct to obey before power.

The Will Interest Mothers.

Mother—"Wonderful! That pie is burning and I can't take it out for ten minutes yet!"—Life.

After working hard to get money a man has to work twice as hard to keep it.

NEAT CLOGS KIDNEYS THEN YOUR BACK HURTS

Take a Glass of Salts to Flush Kidneys if Bladder Bothers You—Drink Lots of Water.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness, and urinary disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast, and in a few days your kidneys will be clean. This famous salts is made from the acid of grapes and lemon juice, combined with wheat germ, and is used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so that no longer causes irritation, thus ending bladder weakness.

Salts is inexpensive and cannot injure; makes a delightful effervescent uric acid solvent of drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.

Anatomically Speaking.

It was at a social gathering in a mountain settlement of Tennessee, and the schoolteacher was there and wanted to show off her learning to the company. She selected a long, lank, red-necked young fellow for her subject and in full.

"Do you say 'leg' or 'limb'?" she wanted to know.

"Neither, I say 'hank,'" said good old Tennessee—Nashville Banner.

SYRUP OF FIGS FOR A CHILD'S BOWELS

It is cruel to force nauseating, harsh physic into a sick child.

Look back at your childhood days. Remember the "dose" mother insisted on—castor oil, calomel, etc. Have you hated them, how you fought against taking them. With our children it's different. Mothers who cling to the old, obsolete simply don't realize what they do. The children's revolt is well-founded. Their tender little "insides" are injured by them.

If your child's stomach, liver and bowels need cleansing, give only delicious "California Syrup of Figs." Its action is positive, but gentle. Millions of mothers keep this harmless "fruit laxative" handy; they know children love to take it; that it never hurts to clean the liver and bowels and sweeten the stomach, and that a teaspoonful given today saves a sick child tomorrow.

Ask at the store for a 50-cent bottle of "California Syrup of Figs," which has full directions for baby, child or all ages and for grown-ups plainly on each bottle. Adv.

No Murry.

"Where are you going to tell the people just where you stand on this important question?"

"Not till I have to," replied Senator Borah. "I'm going to let everybody express opinions before I do, and then select the one that seems most popular."

The Other Way About.

"Wonder how old Roosevelt came to select such a young wife."

"He didn't," she selected him.

To have what you want is wealth; to do without is power.

ITEMS OF INTEREST TO LOCAL PEOPLE

Happenings of the Week Told in Short Paragraphs—What's Doing in and Near Our Hauling Village.

Irving Krueger and family have moved from the village to a farm three miles south of town.

Mr. and Mrs. Edward Rohmeyer moved Tuesday from Williams street to Barrington township.

The Baptist Missionary society will meet next Monday afternoon at the home of Mrs. Ray Cannon.

Gentlemen's night was enjoyed Monday evening by the young woman's card club at the Volker residence on Main street.

The Royal Neighbors dance on last Friday evening in Village hall was very largely attended and a member reports that \$20 were cleared.

The monthly meeting of the official board of the Methodist church will be held Wednesday evening, March 8, at nine o'clock, immediately following the prayer meeting.

The monthly business meeting and social of the Baptist Young People's society which was planned for this week has been postponed until Saturday evening, March 15.

There will be a dance at the Cuba Country club on Saturday evening, March 4, to which all are invited. Dance tickets, 75 cents and refreshments extra. Peters' orchestra of Crystal Lake will play.

E. L. Orr, formerly of the Hawthorne farms and now a resident of Rock Springs, New York, arrived here last Thursday on business connected with the Hawthorne Farms company and left for home on Monday.

The Woman's club will meet with Mrs. Clara Sears on Saturday evening, March 4, at the residence of Rock Springs, New York, arrived here last Thursday on business connected with the Hawthorne Farms company and left for home on Monday.

Stephen Palmer and family moved the middle of the week from the Hamilton farm, northwest of town, to the Langbein farm near Cuba station. Samuel Neilson of Chicago will take charge of the Hamilton property.

The village board will hold its monthly meeting at Village hall next Monday evening. Arrangements will probably be made at this meeting for the holding of a primary for the nomination of candidates for trustees to be elected this spring.

Charles Thies will move his barber shop from Cook street to the building on South Railroad street now occupied by Edward Thies. The electrical supply stock of Edward Thies will be moved to his home. The change will be made the last of this week.

Walter Cannon is now the sole owner of the Ideal garage on Williams street, having recently purchased from William A. Granau, his partner; the half interest owned by him. Mr. Granau is working at the garage for the present and is not letting the public know his plans for the future.

On Friday evening, March 3, in Oakland hall, Wauconda, a masquerade ball will take place for all people interested. Eighteen prizes are to be offered for different costumes and Peters' orchestra of Crystal Lake is to play. Spectators, 25 cents; dance tickets, 75 cents. Supper extra.

The Home Economics department of the Woman's club gave a most enjoyable Martha Washington party Tuesday evening, February 28, at the home of Mrs. F. T. Seawards. The club will give a play and carnival in the Leonard garage on Friday, March 24.

March arrived "flood-like," so according to tradition will depart "flood-like."

Mr. and Mrs. G. W. Spunner went to Kenosha Monday to inspect the Jeffery automobile factory.

Mr. and Mrs. William Fletcher of Cemetery street went to Chicago Wednesday to spend the day with relatives.

The Woman's Christian Temperance union will meet Monday afternoon, March 2, at the home of Mrs. J. Freeman. Mrs. Suber will speak.

S. J. PALMER, Collector.

Song That Attracted Stella.
Five-year-old Stella was fond of going to Sunday school and she liked especially the singing. "Did they sing a pretty song at Sunday school?" asked grandma of the little girl upon her return home. "Only one," replied the youngster. "It was something about Grandma's ice cream mountains."—Musical America.

Blindness in Old Age.
About half of the blind population are more than sixty years of age. This is probably due to the fact that cataract, glaucoma, etc., are largely diseases of old age.

Duty Thought.
Religion is the best armor in the world; and the worst cloak—Newman.

News of the Week Cut Down for Busy Readers

European War News

Nuri Bey, brother of Enver Pasha, Turkish war minister, was killed in the battle between British South African troops and Turkish tribesmen in western Egypt, according to a report of the fighting received at London.

Germany has addressed a sharp note to Portugal in protest against seizure of German merchant vessels by the Portuguese authorities. This measure is characterized as a violation of Germany's treaty rights and the hope is expressed that Portugal will rescind its action.

The sinking of the hospital ship Marchelaro near San Giovanni di Medua, Albania, is reported in a dispatch to London. The vessel struck a mine. There were numerous victims.

The Pennsylvanian and Oriental liner steamship Maloja, 12,421 tons gross, was sunk in the Straits of Dover by a mine. One hundred and forty persons perished, of whom 117 were LaScares. The steamship Empress of Port William, while attempting to rescue the survivors of the Maloja, struck another mine and sank in less than a half hour. The crew was saved.

Five determined attempts made by French troops to recapture from the Germans Fort de Douaumont, one of the outlying Verdun fortifications, were repulsed with sanguinary losses, according to the official statement issued at Berlin by the German headquarters staff. The number of unwarmed Frenchmen taken prisoners, it was added, totaled 15,000.

Austro-Hungarian troops took full possession of the Albanian port of Durazzo, according to an official announcement made at Vienna. Rome dispatches reported that all Italian troops have been withdrawn from Durazzo.

Four British steamers have been sunk with the loss of thirty lives since a dispatch from London. The Wilson liner Dido was the latest victim.

A Russian dispatch to London from Petrograd says the British liner Empress of India, which was taken by storm by German forces, the important Persian city in the neighborhood of which serious fighting recently has taken place.

A Turkish column was attacked and routed by British forces at Agasha, Egypt, according to an official statement issued at London, which adds that the fleeing Turks are being pursued.

Gen. Alexei Kuropatkin has been appointed commander in chief of the Russian army on the northern front, says a dispatch from Petrograd. General Kuropatkin succeeds General Brusilov.

Sixty-seven men, women and children were killed and 117 wounded during the German air raid on England on January 31, says an official statement issued by the war office at London.

An official statement issued at Vienna says: "The Italian east and southeast of Durazzo have been driven to the isthmus of the Durazzo lakes. Seven hundred Italians were captured."

The German steamer Hochfeld, which was interned at Madeira early in the war, has been released according to a dispatch to London from Puchel.

Thirty-six German and Austrian merchant steamers interned in Portugal, ports since the beginning of the war have been released by the naval authorities as a result of information reaching the government that some of them were being prepared for sale to aid in the preparation of the allies' commerce.

Two persons were killed and twenty-eight injured, seven of them seriously, when the automobile struck a street car at Milwaukee. Driver Elsen and Hans Strander were killed.

John D. Shoop, superintendent of schools of Chicago, was elected president of the department of superintendents of the National Educational Association, which held its annual convention at Detroit, Mich.

The E. L. Du Pont de Nemours Powder company, which has received numerous war orders from the allied governments, earned a total of \$57,540,750 during the year ended December 31, 1916, according to the financial report made public at New York.

Two persons were killed and twenty-eight injured, seven of them seriously, when the automobile struck a street car at Milwaukee. Driver Elsen and Hans Strander were killed.

The robbery of four valuable registered mail packages became known at New York. The packages were stolen from mail pouches. One of the stolen packages contained \$200,000.

Two men are dead as a result of a fire which consumed a construction camp at Cleveland, O.

Mrs. Katherine Vance Harrison, fifteen-year-old bride of Charles Harrison, nephew of United States Senator Charles Culberson of Texas, is alleged to have confessed that she shot and killed W. R. Warren, a hotel proprietor at Fort Worth, Tex., claiming that he had wronged her before her marriage.

Lorain have been sent to the Kansas railroads by Governor Capper of Kansas asking relief for the farmers by plowing more freight cars available for the moving of crops.

An unidentified negro was lynched at Cartersville, Ga., after being taken from jail, where he had been placed on charges of having tried to break into the home of Mrs. A. T. Heath.

Robert N. Walters, chief gunner's mate, and B. M. Dixie were drowned when a towboat was dashed against a pier in Lake Michigan at the United States Navy Training school at North Chicago, Ill.

More than 100 men at the Edison plant plant on strike at Silver Lake, N. J., for five cents more per hour. They were employed in the carbolic department.

Washington

Germany and Austria-Hungary have announced President Wilson's letter to Senator Blaine by a note presented to the state department at Washington by the German ambassador and confirmed by the Austrian-Hungarian ambassador, announcing that their submarines will sink on sight armed merchantmen encountered upon the high seas.

Rear Admiral Austin M. Knight, president of the navy war college, in outlining the steps necessary to make the United States fleet the strongest about by 1925, at Washington, said the entire ship-building facilities of the nation should be immediately set to producing enough vessels to round out the fleet.

The senate at Washington unanimously ratified the Haitian treaty which gives the United States a virtual protectorate over the "black republic." Under the treaty the United States will organize a constabulary in the republic and will administer the finances of the nation.

Germany's interpretation of the assurances previously given to the United States with respect to ships not to be attacked without warning are applicable only to unarmed merchant ships and not to armed broad-gauge vessels. German merchant vessels armed for defense and which may use their armament offensively against German submarines, according to dispatches received at Washington from Berlin.

The senate at Washington confirmed the nomination of Henry Prather Fletcher as ambassador to the government of Mexico.

The United States navy's whole system of government and discipline, from education of officers to questions of ship and gun construction, was sharply criticized before the house naval committee at Washington by Admiral Winslow.

A demand for the immediate release of the 28 passengers who were taken off the American steamship China of the China Mail Steamship line by a British cruiser was made on Great Britain by the state department at Washington.

Frank R. Funk, member of the state public utilities commission of Illinois, and E. H. Wayne of Delaware, Ill., appeared to the interstate commerce commission at Washington to compel eastern railroads to return the cars they have taken from western lines.

Mexican Revolt

Brig. Gen. Felix Diaz, nephew of Porfirio Diaz, has landed a military expedition in Mexico, according to a statement made by a close personal friend of General Diaz at New York. General Diaz is now at the head of a force in the field against General Carranza.

Foreign

Gabriel d'Annunzio has been injured in the right eye in an aeroplane accident and taken to a hospital in Venice, says the Rome correspondent of the Petit Parisien. There is a possibility that the sight of the injured eye may be preserved.

Barefooted and ragged women, many with babies in arms, proceeded from the quarters of the working classes to parliament at Athens, stopping along the way and pleading that the chamber relieve the distress caused by mobilization of the men and unemployment of allowances to their families.

The Norwegian ship Andor, laden with coal and prop, has gone ashore in Dithy bay and is a total wreck. Five lives were lost.

GERMANS TAKE FORT AT VERDUN; 5 ATTACKS FAIL

French Unable to Recapture Douaumont From Kaiser's Troops.

15,000 ARE HELD PRISONERS

Berlin Official Statement Says Champagne and Cote de Talou Have Been Captured.

London, Feb. 29.—The Germans are closing in on Verdun. On three sides of the besieged fortress—north, northeast and east—the "crown" princes are smashing drive hurled back the French with the same irresistible fury which has characterized the advance of the previous six days.

On the three sectors of the front since Saturday approximately a mile and a half, making the total advance in the seven days of the attack seven miles. The German troops are now in the hands of the French.

The outstanding feature of the situation is the admission by Paris that the Germans have captured and progressed beyond Fort Douaumont, which victory was shrouded in considerable doubt by the French official statement of Saturday night. The communiqué on Sunday admits that the Germans hold the fort "only with difficulty."

On the three sectors of the front the situation can be summed up as follows:

1. North of Verdun the Germans captured Champagneville, four and a half miles north of the fortress and a mile from the Meuse, and advanced to the southeast as far as the village of Nave, which lies midway between Champagneville and Fort Douaumont. The Berlin statement also reports the capture of the Cote (Hill) de Talou, in this region, but Paris declares this position has been rendered untenable by either side.

2. Northeast of Verdun the Germans not only held Fort Douaumont against attacks of the French, heavily reinforced, to recapture the position, but drove the French back for a mile and a half to the southeast of the fort and attacked them on the plateau north of the village of Vaux. This attack, according to the Paris communiqué, was repulsed. The French, according to the Paris communiqué, are strongly pressing the Strasbourg regiment which gained a footing at Douaumont and maintained themselves with difficulty.

3. East of Verdun, where Berlin on Saturday announced that the resistance of the French in the Woerth had broken down, the army of General von Deimling, composed of veterans of the Italian campaign, has driven the French back toward the west as far as Maranville and Blanzac, towns only two miles from Fort Douaumont, one of the outer forts at Verdun. This is admitted in the Paris communiqué, which says the Germans repeatedly tried to debouch from Maranville and Blanzac toward Metz, but without success. The German statement says that the extended fortified works of Douaumont, east of Verdun and near Maranville, were taken by storm.

This tremendous crushing movement, covering a semicircular front of 15 miles, brings the Germans to a point where their huge 17-inch guns are within easy range of six of the protecting forts. On the north, the capture of Champagneville and the advance toward Bray, which village is now under bombardment, menaces Fort Belleville, two miles south of Bray.

If the Germans capture the town of Vaux they will mount their guns on the plateau above the village and rain shells down into Fort Vaux, which is only half a mile south of the village of the same name. With Fort Vaux's guns silenced, the next position in the line would be Fort Souville, two miles from Vaux on a direct line with Verdun.

General von Deimling's tremendous victory on the French plain will permit him to mount siege guns on the heights of the Meuse and rain shells upon three more of the ring of forts protecting the city and citadel of Verdun. These are Fort Maranville, which lies on the slope of the Meuse hills just west of Maranville, Fort de Vaux, a mile to the northwest, and Fort Belleville, two miles to the southwest. The forts of Belleville, De Souville, De Vaux, Maranville and De Belleville in themselves form a circle within the main circle.

FOUR BRITISH SHIPS SUNK

Report From London Does Not Make Public Cause of Disasters or Where They Occurred.

London, Feb. 29.—Four British steamers have been sunk with the loss of perhaps thirty lives. The Wilson liner Dido was the latest victim. Advice also came from Port Moresby of the crew of twenty-nine have been landed, but that other members of the crew are missing and unaccounted for.

of forts. If the Germans can succeed in taking them the fall of Verdun would be but a matter of hours.

The only other forts on the east bank of the Meuse are Haudouville and St. Remi, which lie to the south and southwest of Verdun respectively. If the Germans can drive the French back from their field positions south of Blanzac and Maranville, Fort de Douaumont will fall within range of its guns.

Bodies Cover Fields. The terrible intensity of the fighting is indicated by the furious struggle for the hill du Talou, which is now a "no man's land" after repeated assaults by the Germans to capture it.

On Saturday and all through the night the battle raged about the hill, but the Germans were unable to capture it. In the end the trenches were reduced to morasses, in which countless dead and wounded were heaped amid barbed-wire entanglements and debris of earthworks. The hurricane of shell fire had rendered the hill almost impassable for either side.

The German success in capturing Fort Douaumont was perhaps one of the most costly individual victories of the war. Paris describes the capture of the position as a costly victory.

Attack Weakens, Says Paris. The official statement from Paris on Sunday says:

"Between Soissons and Reims we were battered with a destructive fire by the Germans in front of Verdun. I take the liberty of calling your attention to the fact that the resolution of the committee, to a matter of grave concern to the country, which can, I believe, be handled under the rules of the house, only by that committee."

"The report that there are divided councils in congress in regard to the foreign policy of the government is made in industry use of in foreign capitals. I believe that report to be false, but so long as it is anywhere credited it cannot fail to do the greatest harm and expose the country to the most serious risks. I therefore feel justified in asking that your committee will permit me to urge an early vote upon the resolutions with regard to travel on armed merchantmen which have recently been so much talked about, in order that there may be afforded an immediate opportunity for public discussion and action upon them, and that all doubts and conjectures may be swept away and our foreign relations once more cleared of damaging misunderstandings."

"The matter is of so grave importance and lies so clearly within the scope of the executive initiative that I hope that your committee will not think that I am taking unwarranted liberty in making this suggestion. The house of Representatives and I very earnestly commend it to their immediate consideration." Cordially and sincerely yours,

"WOODROW WILSON."

The memorandum of the German government on the subject of armed merchantmen, delivered to Secretary of State Lansing on Monday by Count von Bernstorff, the German ambassador, follows:

"The imperial government reiterates the pledges given on September 1, 1915, and does not intend to consider that these assurances have been modified by subsequent events. The negotiations conducted between the American government and the German government concerning the Lusitania incident never referred to armed merchantmen."

"On the contrary, the note of the American government of January 13 spoke expressly of 'unarmed merchantmen.' Furthermore, the formula agreed upon by both governments on September 1 contained the proviso, 'provided that they do not offer resistance.'"

"The imperial government issued its new orders to the German naval commanders on the day of the secret orders of the British admiralty that the armament of British merchantmen was to be used for the purpose of attack and that the ships are not merely peaceful traders, armed only for defense. British merchantmen have, furthermore, on several occasions attacked German or Austro-Hungarian submarines."

"The imperial government welcomes the intention of the American government to bring about a modus vivendi between the belligerents with regard to the disarmament of merchantmen, but cannot see its way to change or postpone the new orders to the detriment of the German navy. The imperial government can no longer permit its submarines to be subjected to illegal attacks by armed enemy merchantmen."

Explosives Ignite. Woburn, Mass., March 2.—Three huge tons of explosives in process of manufacture exploded here, wrecking the two-story brick and concrete building of the New England Chemical Company. One man is reported missing.

Fire Near New Drednought. Quincy, Mass., March 2.—A quantity of dynamite in the storehouse of the superdreadnought Nevada was lying here caught fire and flames shot up 100 feet above the warehouse. The Nevada, however, was undamaged.

PUT UP TO CONGRESS

PRESIDENT WRITES TO COMMITTEE URGING VOTE ON WARNING RESOLUTION.

WILSON ASKS EARLY ACTION

Chief Executive Either Knows He Can Defeat Measure or Seeks to Put Question in Hands of Lawmakers, Is Belief—Text of German Note.

Washington, March 2.—With Germany at midnight inaugurating her new program of sinking all armed merchant ships without warning, ignoring the desire of the United States for a postponement of the campaign, President Wilson on Tuesday put the matter of American rights at sea up to congress.

In a letter to Representative Fox, ranking member of the house committee in charge of the resolution, the president urged an early vote on the resolution proposing to warn Americans not to sail on armed merchantmen, pointing out that reports of a difference of opinion in congress is being made use of in foreign capitals in a disastrous manner.

The letter is taken to mean either that the president has taken a policy of the house and knows he can beat the resolution or that he has adopted this method of letting congress take the decision of his hands.

The text of President Wilson's letter to Representative Fox, urging early action on the question of Americans traveling on armed merchantmen, follows:

"My Dear Mr. Fox: Inasmuch as I learn that Mr. Henry, the chairman of the committee on the subject, is absent in Texas, I take the liberty of calling your attention, as ranking member of the committee, to a matter of grave concern to the country, which can, I believe, be handled under the rules of the house, only by that committee."

"The report that there are divided councils in congress in regard to the foreign policy of the government is made in industry use of in foreign capitals. I believe that report to be false, but so long as it is anywhere credited it cannot fail to do the greatest harm and expose the country to the most serious risks. I therefore feel justified in asking that your committee will permit me to urge an early vote upon the resolutions with regard to travel on armed merchantmen which have recently been so much talked about, in order that there may be afforded an immediate opportunity for public discussion and action upon them, and that all doubts and conjectures may be swept away and our foreign relations once more cleared of damaging misunderstandings."

"The matter is of so grave importance and lies so clearly within the scope of the executive initiative that I hope that your committee will not think that I am taking unwarranted liberty in making this suggestion. The house of Representatives and I very earnestly commend it to their immediate consideration." Cordially and sincerely yours,

"WOODROW WILSON."

The memorandum of the German government on the subject of armed merchantmen, delivered to Secretary of State Lansing on Monday by Count von Bernstorff, the German ambassador, follows:

"The imperial government reiterates the pledges given on September 1, 1915, and does not intend to consider that these assurances have been modified by subsequent events. The negotiations conducted between the American government and the German government concerning the Lusitania incident never referred to armed merchantmen."

"On the contrary, the note of the American government of January 13 spoke expressly of 'unarmed merchantmen.' Furthermore, the formula agreed upon by both governments on September 1 contained the proviso, 'provided that they do not offer resistance.'"

"The imperial government issued its new orders to the German naval commanders on the day of the secret orders of the British admiralty that the armament of British merchantmen was to be used for the purpose of attack and that the ships are not merely peaceful traders, armed only for defense. British merchantmen have, furthermore, on several occasions attacked German or Austro-Hungarian submarines."

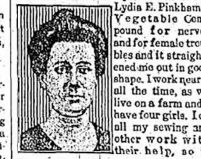

"The imperial government welcomes the intention of the American government to bring about a modus vivendi between the belligerents with regard to the disarmament of merchantmen, but cannot see its way to change or postpone the new orders to the detriment of the German navy. The imperial government can no longer permit its submarines to be subjected to illegal attacks by armed enemy merchantmen."

Explosives Ignite. Woburn, Mass., March 2.—Three huge tons of explosives in process of manufacture exploded here, wrecking the two-story brick and concrete building of the New England Chemical Company. One man is reported missing.

WOMAN HAD NERVOUS TROUBLE

Lydia E. Pinkham's Vegetable Compound Helped Her.

West Danby, N. Y.—"I have had nervous trouble all my life and I took Lydia E. Pinkham's Vegetable Compound for nerves and female troubles and it straightened me out in good shape. I work nearly all the time, as we live on a farm and I have four girls. I do all my sewing and other work with their help, so it shows that I stand it real well. I took the Compound when my ten year old daughter came and it helped me a lot. I have also had my older girl take it and it did her lots of good. I keep it in the house all the time and recommend it to my friends. DEWEY SINGARDA, West Danby, N. Y."

Sleeplessness, nervousness, irritability, headache, dizziness, dragging sensations, all point to female derangements which may be overcome by Lydia E. Pinkham's Vegetable Compound. This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

In Ladings, Evidently, "Do you have hot and cold water in your room?" "No, cold and scalded."

BILIOUS, HEADACHY, SICK "CASCARETS"

Gently cleanse your liver and sluggish bowels while you sleep.

Get a 10-cent box. Sick headache, biliousness, dizziness, constipated tongue, foul taste and food—always trace them to torpid liver; delayed fermenting food in the bowels or, worse, gas in the stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret to-night will surely straighten you out by morning. They work while you sleep—a 10-cent box out your sluggish mass your bowels clear, stomach sweet and your liver and bowels regular for months. Adm.

Two per cent of metallic sodium will harden lead so that it will ring when struck.

Achy Joints Give Warning

A cravily joint often betrays its trouble. It is also a warning that the kidneys are not clearing the poisons out of the blood. Backache, rheumatic pain, sore, itching joints, headache, dizziness and urinary disorders are all effects of weak kidneys. If such a thing is done, there's a dose of more rest and your Dr. Doan's Kidney Pills, the best recommended kidney remedy.

An Iowa Case

Chas. E. Joslin, Independent Contractor, Iowa, says: "I suffered from rheumatism, backache, dizziness and urinary disorders are all effects of weak kidneys. If such a thing is done, there's a dose of more rest and your Dr. Doan's Kidney Pills, the best recommended kidney remedy."

DOAN'S KIDNEY PILLS
FOSTER-McLELLAN CO., BUFFALO, N. Y.

Your Liver Is Clogged Up

That's Why You're Tired—Out of Sorts—Have No Appetite.

CARTER'S LITTLE LIVER PILLS will put your liver in a few days. They do their duty. Cure Constipation, Biliousness, Indigestion and Sick Headache. SMALL PILLS, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

ARBITRATION BOARD MAKES ITS REPORT

Holds Meeting for Month of
March at Springfield.

SUBMIT DATA TO GOVERNOR

Dwells at Length on the Benefits of
Voluntary Arbitration as the Same
Method of Settling All Industrial
Disputes.

Springfield.—The board of arbitration for the state of Illinois held its meeting for the month of March at Springfield Wednesday. Their annual report for the year 1935, which was submitted to the governor, contains not only the report of the board during the year, but deals with the important strikes which occurred in Illinois during that time. The lack of early and amicable arbitration in regard to strikes in the various industries has not acted in all cases where strikes have taken place, but it is pointed out that this is a situation peculiar to Illinois. In other states boards have experienced the same difficulty in their efforts to carry out the mandates of the law. It is this lack of early and amicable arbitration that inspired the board to have incorporated in the law the provision that:

"It shall be the duty of the mayor of every city, and the president of every incorporated town or village, whenever a strike or lockout involving more than twenty-five employees, shall be threatened or has actually occurred within their respective city, incorporated town or village, to immediately communicate the fact to the state board of arbitration, stating the name or names of the employer or employers, and to the employees, and to the board, with such information as he may possess, touching the difference or controversy, and the number of employees involved."

If report had been made to the board, as provided there is reason to believe that many disagreements could have been adjusted without the loss of wages or profits.

Voluntary arbitration should be employed, however, by every industrial organization, and it is this, done, in a great majority of cases it would prove satisfactory to all concerned. The difficulty that is met with in this method, or by conciliation or mediation, is of a much more lasting nature than that gained by striking, with the added advantage of conserving the resources. Arbitration is filled with certainties of a demonstrable and substantial nature, and gives immediate results. It is the safe, sane and modern method of settling industrial disputes, and it was for the practical working out of the principle of collective bargaining that arbitration boards were formed. This method as a means of settling disputes is growing more in favor every day, and when the public begins to fully understand the work of the state board, and how that all proceedings will be conducted with fairness to both sides, its services will be sought with a feeling that an impartial adjustment will result from its efforts. The policy of this state is an expression of the public policy in favor of the principles of arbitration and of industrial peace, and for all concerned to co-operate with the board to that end, would be but the part of good citizenship, which obeys the law to spirit as well as in letter.

The board consists of three members and a secretary. Leo J. Wietzel, Chicago, is the chairman, and Charles D. Freble, 3015 Maple Square, Chicago, is the secretary. The other members are Harry M. Powell, Peoria, and Louis McGovern, Peoria.

Railroads Appeal From Decision

An appeal was taken in the circuit court from the decision of the state public utilities commission ordering the use of stronger regulations by the big railroad companies operating in Illinois. The railroads offered to replace their headlights by ones strong enough to comply with the state law. The commission, however, was of the opinion that the headlights of the state were the Vanderbilt, Chicago, Indiana & Southern, the Cleveland, Cincinnati & St. Louis, the New York Central and the Western, Cincinnati, Chicago & St. Louis.

New Incorporations

Illinois—Barrington Manufacturing Company, Chicago, capital, \$2,500; incorporators, Benjamin J. Samuels, Benjamin Samuels and Edward S. Cline. (Pavia City Coal Co., Chicago, Ill., capital, \$10,000; incorporators, S. E. Hamilton, M. E. Smith, Mrs. Sophia Trippe. Deans Mill Company, Olive Branch, capital, \$5,000; incorporators, Walter W. Wilburn, Frank W. Lafferty, G. S. Callender. George W. Wilburn Company, Chicago; decrease in directors.

State Welfare Work

A report of the Illinois department of factory inspection made to Governor Deneen and just given out for publication, shows that during the last two years in the enforcement of all laws 55,841 more inspections, or an increase of 64 per cent, were made during the preceding two-year period. The figures further state that the number of convictions were nearly doubled, an indication that the inspections were of a more thorough type.

One of the ten laws enforced by this department, the popularly-styled "wash house law," was enacted last year. The ordinance now requires that the inadequately-heated wash rooms containing sanitary washing facilities and lockers in such employments where the workmen become covered with grease, dust and grime. The results obtained by enforcing this law tell a story of real human interest. The workman returned to his home in clean and tidy condition, and insures upon the same conditions among the members of his family.

During an investigation of the large steel mills in Chicago the opinion prevailed among employees that this law was a blessing, the report says. Employers' statements lead the department to estimate that over \$1,500,000 has been expended for washing facilities since the law became effective two years ago.

As better results are obtained by the department, the report points out, additional legislation is brought to every working man, woman and child. The statistics relate that in the enforcement of the "child labor law," the number of inspections exceeded a two-year period by 21,258. So far as figures can show, child labor in Illinois industries is on the decrease.

It is also pointed out that every hundred employees who were children, whereas every hundredth employee is a child. Hundreds of children were given a new freedom when the factory was closed to children under sixteen years of age removed from the grinding tasks on sewing machines.

Women, too, have secured better working conditions by the direct application of the "woman's ten-hour law," it is asserted.

Saves Saving of Big Loss.
Loss in swine from the ravages of hog cholera, amounting to between \$1,000,000 and \$4,000,000, might be done away entirely if farmers and stock raisers would stop shipping infected hogs to market, declared Dr. O. E. Dyson, in discussing his plan for control of the disease.

Cholera, he said, could within a very short time be entirely eradicated by proper sanitary methods and precautions in the way of quarantine.

"It is no longer a question of speculation," he said. "The fact has been demonstrated beyond question of a disease that the disease can be stopped with the right sort of methods."

The cause of the spread of cholera was said by the state veterinarian to be the indiscriminate shipping of infected swine without concern as to where hogs might next be taken off as a result of unusual and thoughtless exposure.

"Many a farmer who finds that there is cholera in his herd, is intent on getting rid of those hogs which have not yet shown symptoms of the disease," said Doctor Dyson. "He puts an apparently well one into his wagon and places them on the market. The result is that the disease is carried by his swine far and wide."

Doctor Dyson stated that commission merchants were fighting his plan to quarantine hogs suspected of cholera because it would lessen their chances of selling large quantities.

"The farmer who knows his herd is exposed, will accept almost any figure for them, and the commission merchant, also, to buy at ridiculous prices, will take the hogs depending on the federal inspection after slaughter to give him at least a reasonable number of 'unaffected' hogs," said Doctor Dyson.

"This is where the commission merchant makes his big ventures and where often he is rewarded by bigger margins of profit."

In Doctor Dyson's plan, all shipments of hogs would be required to make affidavit that their hogs were free from taint or from cholera exposure. Where a clean bill of health could not be given, the car in which the swine were shipped would be placarded "Cholera Hogs" or in some such way, so that the hogs must be unloaded at separate chutes and apart from the sound hogs. They would, he said, be subjected to examination.

The stock breeders, many of them, have for so long lived in the belief that hog cholera is inevitable that it is hard to eradicate. This idea from their minds," said Doctor Dyson. "Some have even gone so far as to say cholera is necessary."

"Serum and sanitation" is my slogan," said Doctor Dyson. "But in addition to this, at present, we must have precautions against the spread of the disease and this will never come until the indiscriminate shipping without regard to the rights of others is stopped."

900 DIE ON LINER

FRENCH AUXILIARY CRUISER LA
PROVENCE LOST IN THE
MEDITERRANEAN.

CAUSE OF DISASTER UNKNOWN

Eight Hundred and Seventy Survivors
Reported Landed at Milo and Malta.
Former Liner Believed to Have
Been Torpedoed.

Paris, March 2.—More than 900 lives are believed to have been lost in the sinking of the French auxiliary cruiser Provence, formerly in service as a transatlantic liner, in the Mediterranean on Saturday.

Eight hundred persons were aboard the cruiser, an official statement for the ministry of marine on Tuesday stated.

Four hundred survivors were landed at Milo, while 250 of the crew have arrived at Malta.

A later official statement from the ministry put the total number probably saved at 870, making the number missing about 900.

Ten boats are now at the scene of the disaster, continuing the search for other survivors, the ministry of marine announced.

Dispatches from Paris, transmitted through London, and also other dispatches, transmitted through London, did not state whether the Provence was sunk by a submarine, by a mine or was the victim of an accident.

Submarines are known to have been operating in the mid-Mediterranean for some time, the British steamer Pantani and a Swedish steamer having been torpedoed in these waters within the last few days.

La Provence was one of the largest and finest of the French line vessels. Her gross tonnage was 15,750. She was built at St. Nazaire in 1906, was 302 feet long, 65 feet beam and 33 feet deep. She was requisitioned by the French government for naval service at the outbreak of the war.

La Provence entered the transatlantic service when the speed rivalry among the British, French and German liners was at its height, and engaged in a number of exciting races, in one of which she defeated the Cunarder Mauretania.

In all probability the Provence was being carried by the French navy to Salsola.

NO ORDERS TO SINK DIVERS

Lord Cecil of England Says Merchantmen Must Not Be Directed to
Attack Submarines.

London, March 2.—On the eve of the date set by Germany for the banning of her new submarine campaign against merchant vessels, Lord Cecil, minister of war trade, issued a statement giving the British view of the status of such merchantmen. This statement, which is in answer to queries whether merchantmen were instructed to take the offensive against submarines, says:

"The British view has always been that defensively armed merchantmen must not fire on submarines or any other vessels, except in self-defense."

"The Germans have twisted a paragraph in a document taken from a transport which they sank into meaning that merchant vessels have been instructed to take the offensive. This is not so."

"The passage in question, which lays down a maximum distance beyond which merchant ships are advised not to fire, must be read in conjunction with another passage which makes it perfectly clear that merchant vessels must not attack unless a submarine is unmistakably hostile in intention."

ITALY MAY FIGHT GERMANY

Decision to Open Hostilities Upon
Reported Reached at Rome.
—Teuton Ships Seized.

London, March 2.—Italy's act of requisitioning thirty-four of the eleven German ships interned in Italian ports, as announced in the house of commons, is interpreted as corroborating a report that the Italian cabinet has decided to declare war on Germany. Dispatches on Tuesday said the decision had been reached in Rome and the declaration of war would follow immediately upon the reopening of the Italian parliament.

13 Miners Killed by Blast

Kenpton, W. Va., March 2.—Thirteen men are dead and fifty-two have been brought safely from mine No. 42 of the Davis Coal and Coke company, near here, where an explosion occurred Tuesday afternoon. The mine, which is a shaft 427 feet deep, was not badly wrecked.

Germans Show More Mines

Copenhagen, March 2.—The Atlantic reports that a large German flotilla is engaged in laying mines south of Falsterbo, but outside of Swedish territory, and that it is under the protection of 20 patrol ships.

Turks Evacuate Trebizond

Petrograd, March 2.—The Turks are hastily evacuating the important Black sea port of Trebizond and neighboring cities before the Russian advance. The withdrawal was made necessary by the approach of Russian forces.

News Brevities of Illinois

Mount Sterling.—Rev. M. H. McCoy, sixty-one years old, died here. He had been a Methodist minister for 25 years; Bloomington.—Mrs. Karena Albers, wife of a farmer of near Delevan, committed suicide by hanging. Her mind was affected by ill health.

Grayville.—F. Frank Saxo and Miss Louella M. Coad were married at the M. E. parsonage by Rev. W. D. Hica ardon.

Ecatuar.—The Illinois Farmers' institute adopted resolutions asking the Interstate Commerce Commission to take steps to relieve the present car shortage.

Batavia.—Gas leaking from a sewer pipe filled the greenhouses of Andrew Anderson at night and ruined plants and flowers to the value of about \$5,000.

Aurora.—Frank Butler, forty, driver of an undertaker's wagon, was buried to death against a tombstone in Mount Olivet cemetery in a runaway and instantly killed.

Orangeburg.—The Nachusa Orphan home, a Lutheran institution, will receive \$10,149 from the estate of the late Andrew Swartz of this city, as trustee's legatee.

Springfield.—Henry Stahl, seventy-three, father of Garland (Jako) Stahl of Chicago; former Boston baseball star, died here in St. John's hospital after a brief illness.

Waukegan.—A message direct from Japan has been heard by the great lakes radio station here, according to a report made by A. J. Well, the wireless operator.

Kewanee.—In a special election here, with men and women voting, the proposition to issue \$70,000 in bonds for water works improvements was carried by a majority of 688, out of a total vote of 1,250.

Macomb.—Members of the McDonough County Postary association, at a meeting here, formulated plans to boost the December show of the association, at which it is expected more than 1,000 birds will be shown.

Quincy.—Mary Orton, eleven, Concord township, is champion speller of Adams county. She won the title, a gold medal and a dictionary, in the county spelling contest, held at Quincy, April 1, 1935.

Danville.—Mrs. Sarah Wilkinson, wife of Frank Wilkinson, custodian of the post office and federal court house here, is dead, after a second hemorrhage of the stomach. She was seventy-one years and a native of Adams county, Indiana.

Prepoot.—As a result of the shooting of four persons, two fatally, by a mentally deranged man recently the county has had to issue an ordinance requiring all persons dealing to purchase revolvers or guns at local establishments to obtain the consent of the chief of police.

Rockford.—This town of 600 has three wireless stations, at which messages, some of them from a great distance, are received each day. At Langdon, where a high school student's wireless apparatus has been utilized in sending commercial messages to Rockford and Duquoin, Ill.

Morris.—A \$50,000 repair was caused here by the explosion of a can of paint in the auto repair and paint establishment of Westcott and Munroe. There were two new Ford cars, a Cadillac, \$50,000 worth International Harvester company's implements and several tons of alfalfa hay and straw in the building.

Bloomington.—Mrs. Mary Petter of Dwight, who is one hundred and two years old, has never attended a moving picture show. She owns a farm near Dwight which her husband purchased from the government in 1915 and which is believed to be the only tract in Illinois which has never changed hands following the federal sale.

Pittsfield.—While all Illinois was being reported that gold had been discovered at Glazebrook farm, near Morris, the gold hunters have pursued the even tenor of their ways. They recalled that the gold discoveries have been made three times in the last eight years at the Glazebrook farm. As yet no one has produced any gold. The gold is found in the black sand along the Illinois river, but never as yet in paying quantities.

Lincoln.—J. E. Bond, a local livestock buyer, has mailed to livestock buyers and shippers throughout Illinois a letter urging that protests by persons who are made to Illinois public utilities commission and Illinois state board of livestock commissioners against a compromise in the rate clearing livestock rates made in four districts. The railroads have been charging \$2.50 for single-deck cars and \$4 for double-deck cars. Livestock dealers protested and a new schedule was made for single-deck and \$2 for double-deck cars was offered. Shippers outside of infected districts protest against paying anything at all for double-deck cars.

Carlinville.—While guarding her infant child from an attack of a vicious bulldog, Mrs. Ned Patchen was bitten by the animal. The dog was shot and she was carried to the hospital.

Lincoln.—The local car and bus lines of Lincoln are getting ready for more business since the street car company of the city has been updated to the state public utilities commission for permission to suspend service. It has been pointed out that the electric line as at present conducted is a losing proposition.

CASTORIA
For Infants and Children.
Mothers Know That
Genuine Castoria
Always
Bears the
Signature
of
Dr. J. C. Williams
In Use For Over Thirty Years
CASTORIA

It may console the self-confessed coward to realize that he is still in a position to admit it.

SUFFERED FOR FOUR YEARS.

Mr. J. M. Sinclair of Olivett, Tenn., writes: "I strained my back, which weakened my kidneys and caused an awful bad backache and inflammation of the bladder. Later I became so much worse that I consulted a doctor, who said that I had Diabetes and that my heart was affected. I suffered for four years in a wretched state and very much depressed. The doctor's medicine didn't help me, so I decided to try Dr. Williams' Pink Pills, and I cannot say enough to express my relief and thankfulness, as they cured me. Diamond Diaper Pills cured me of constipation."

Charles Kidney Pills, 50c. per box at your dealer or Dods Medicine Co., Buffalo, N. Y. Dods Dyspepsia Pills for indigestion have been proved. 50c. per box—Adv.

In states where beauty is taxable no woman ever tries to dodge the assessor.

Not Gray Hair but Tired Hair. Keep your eyes young and you will look young. Buy a box of Dr. Williams' Pink Pills. Chicago, Illinois. Write for request.

Somehow an old man on a motorcycle looks out of place.

**A New Remedy for
Kidney, Bladder and
all Uric Acid Troubles**

Dear Readers: I appeal to those of you who are bothered with kidney and bladder troubles, that you give up the use of harsh acids or alcoholic medicines and in their place take a short treatment of "Anuric." I have taken many of Dr. Pierce's medicine for the past twenty-five years with good results. I suffered with kidney trouble for some years. I recently heard of the newest discovery of Dr. Pierce, namely, his "Anuric" Tablets. After using same I am completely cured of my kidney trouble. A doctor pronounced me a well preserved specimen for my age, all due, I believe, to Dr. Pierce's aid. MRS. MELINDA E. MILLER.

If you suffer from backache, lumbago, rheumatism, get "Anuric" now.

After Grip— Winter Colds— Bad Blood

You are pale, thin, weak—with little vitality. Your liver is sluggish and the bad blood causes your stomach muscles to lose their elasticity and become flabby—then indigestion.

Dr. Pierce's Golden Medical Discovery, purely vegetable and free from alcohol or narcotics, is the great and powerful blood purifier of today. Extracted from American forest herbs and roots. Contains no alcohol. Ingredients printed on wrapper.

Taken as directed it will sweep out impure and poisonous matter throughout the system and eliminate it.

The Wheat Yield Tells the Story

of Western Canada's Rapid Progress
The heavy crops in Western Canada have caused new records to be made in the handling of grains by railroads. For, while the movement of these heavy shipments has been wonderful, the resources of the different roads, despite enlarged equipment and increased facilities, have been taxed as never before, and previous records have thus been broken in all directions.

The largest Canadian wheat shipments through New York ever known are reported for the period up to October 15th of last year. In that time over a quarter million bushels being exported to Montreal, through which point shipments were much larger than in New York.

Yields are high as 60 bushels of wheat per acre are reported from all parts of the country, while yields of 45 bushels per acre are common. Thousands of American farmers have taken part in this wonderful production. Land products are easy to come by in Canada.

There is no war tax to tend and no conscription. Lumber, fruit, vegetables, and other information to Supplement illustration, Ottawa, Canada.

C. J. BROUGHTON, P.O. Box 112, Chicago, Ill. W. F. MILLER, 112 W. Franklin St., Chicago, Ill. Canadian Government Agents.
