THE ROADS OF 1917

It will be but a short time now until the rigors and storms of winter will be past and the roads of the new year will be before us for solution. One of the most important of these problems will be, "What of our country roads in 1917?"

The year 1916 witnessed the greatest impetus to road building that has ever been known in our history. Government, state, county and municipality all awoke and attacked the problem with vigor and the results in many instances were most gratifying.

There was the past year another element in the solution of the good road problem that heretofore had been lacking—that of community action. In the new year the importance of the opportunities of the good roads advocates had their effect and the people awoke to the live fact that the roads were their roads and that they were individually responsible for their maintenance. And this was just the added force needed to give to the movement an impetus that nothing could stop.

It is this feature of community cooperation that we must be fastidious in our roads to be made what we would have them. Each and every citizen must be fully aroused to his responsibility—not merely to pay his taxes and give his money every day of his life, but to shoulder his full share of responsibility in the solution of this problem in his community. It is a good road.

Many communities have worked up a sentiment that each and every citizen should give a day out of each month to voluntary labor on the roads. This is an auxiliary to all other road-working facilities. And the plan, as carried out in these communities has worked splendid results in the improvement of the highways.

If all communities will organize on this plan, work it up to a maximum of efficiency and keep the enthusiasm at white heat, it will be only a matter of time until they will see the fact that their road problem has been solved.

WHAT NEXT AND WHEN NEXT?

In the months of palaver and dicker with Carranza we are right where we were before it commenced. We are in the position of the dog that has just been kicked and doesn't possess the nerve to bite back.

Carranza has officially and definitely refused.

6 PER CENT. REAL ESTATE FIRST MORTGAGE BONDS are steadily growing in popularity and their advantages
over other classes of bonds and individual mortgages are numerous. First, the value of the security underlying REAL
ESTATE FIRST MORTGAGE BONDS is permanent and is not subject to depreciation. Second, the interest on these bonds is
before making purchases, whereas on the other hand, experience and tedious study is necessary to exactly value the security
of such corporation bonds as Railroad, Public Utilities and Industrials. Furthermore the stability in price of REAL ESTATE
FIRST MORTGAGE BONDS has been demonstrated, they have maintained their par value when other bonds have
thick character, have suffered severe depreciation. Third, the interest on these bonds is paid monthly. Also REAL ESTATE FIRST MORTGAGE
BONDS are issued in most convenient denominations of \$100, \$500 and \$1000 and the interest is paid promptly on the date
of maturity. These moderate sizes enable the investor to buy small amounts of bonds, and, in need of funds, to sell
them at a profit.Our customers have never suffered loss of money nor any delay in the payment of principal or interest on CHICAGO
REAL ESTATE MORTGAGE BONDS bought from us.
