It Isn't The Town It's You

A. Doves of the Harrison News

The following article taken from the Harrison News, Sunday, Feb. 4, 1934, is of interest to the readers of this paper. It is the opinion of the author that it is the fault of the individual rather than the town that is the cause of the trouble.

Let us tell you a little story of what happened down in the little town where I live. It is a town of about 100 people. It is a town of about 100 people. It is a town of about 100 people.

The town is a town of about 100 people. It is a town of about 100 people. It is a town of about 100 people. It is a town of about 100 people. It is a town of about 100 people.

POSSIBILITIES OF OUR SOIL

We want to say to the farmers of this country that no feature of present day education is more potent for good to this country than that now being accomplished by the various agricultural schools and experiment stations and farms.

Twenty years ago the "book farmer" was looked upon as a visionary by a large per cent of our farming population, and is even yet so regarded by some, though happily their number is small.

Now the man who intelligently studies his soil with a view to determining its needs is coming to the front as an authority on matters agricultural. And the reason this is so is because his theories have brought forth fruit in fact.

Nothing is more certain than that this country is woefully behind in farming efficiency. For years our farming experts have been pointing out to us the fact that our lands are not producing a half, not even a third, of the crops that bountiful nature intended they should yield. As one has only to cite the case of Germany to see the full force of this statement. Germany is not as large as the state of Texas, yet Germany to-day is supplying her civil population and her vast armies almost entirely from the products of her own soil.

But Germany and other old world countries have for years practiced intensive farming, a system that is only just beginning to prevail in this country.

Instead of being merely an experiment, intensive farming should be the rule. Nothing more fully demonstrates the truth of this statement than a glance at the results obtained by the many corn clubs of the country. From all directions come reports from these organizations where the enormous yield of 500 bushels and more per acre has been attained. Not only this, but the reports coming from all sections of the country are proof that almost any of our soil is susceptible to just such improvement.

Then there is another important feature to these big corn yields. It has been shown that they can be produced at a substantial profit over and above the cost of improving the land and their production. Careful records have been kept of all expenditures and in almost every in-

stance, the proceeds have much more than paid the cost of bringing the soil to its present state of fertility.

If these results can be obtained from an acre or two or three, why not from ten, or fifty or a hundred acres? If they can be obtained from a patch, why not from a field? Why not from all fields?

The deplorable truth is that too many of our farmers are "necessity" farmers. They ask themselves, "How much do I need?" and then proceed to satisfy that need, and no more. They should rather ask, "How much can I get?" and then get all they can.

It has been estimated that America could feed the world if all her soil were made to produce to its full capacity.

With this capacity, we are only just beginning to discover.

WE HAVE A FEW

The super-sensitive man or woman is a puzzling proposition for a community to handle.

The person of acute sensibility suffers slights where none are intended. He is forever imagining that his friends are not as cordial as they should be.

The sensitive man wears his feelings on his sleeve, as it were, and others are forever being ruffled by the passer-by.

If this extreme sensibility in our neighbor were a fault in the strictest sense of the word, we would know how to deal with him. But it is not such a fault. It is purely the result of self-consciousness and is frequently found in persons of a warm-hearted disposition. They have a cordial liking for their friends and are of an impulsive, ardent temperament. Their feelings find vent in an effusiveness that rarely meets with the response which they think it merits, and disappointment is the result.

The great trouble with the sensitive man is that he has not yet realized that all men are created on the same plane, as himself. He should remember that there are almost as many different natures as there are individuals and each has its own peculiar mannerisms and modes of expression.

A smile is simply the working of a certain set of facial muscles and is just as easy to call up as is a frown. Courtesy and kindness are two of the noblest qualities of humanity and are attained at the smallest price.

Give the super-sensitive person a smile when you meet him. He will feel better and so will you.

The next time you take an unkind thing to your neighbor just stop and ask yourself how you would feel if he were to say the same of you. You will not regret it, and the real of the town will think more of you, for your improved disposition.

Attended Annual Convention

Daniel Gully and Fred Thirumeyer were delegates from the Barrington local who attended the eighth annual convention of the Chicago Daily Clinician, held at Hotel LaSalle, on Tuesday of this week. They report a very interesting meeting which began and closed in harmony. Mr. Gully was elected as a director of the Northwestern Medical Club of Chicago, by "P. T. Holt, acting president, was elected as president and Dr. W. J. Little as secretary, following W. J. Little as secretary.

Please Return Auto Tics

Some time last Saturday the rear wheel and tire of my Ford touring car were taken from the machine in the Union garage, two miles west of Barrington. I will give a very liberal reward for their return in as good condition. Willard Rice, Barrington. 6-1

THE COBBLER

We come late this world named and we go through this world full of sorrow.

We go out of this world, we know not where, but it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

But it is there through these, we'll be through these.

Ford

THE UNIVERSAL CAR

Every factor of a good investment is met in the Ford car for business utility—low first cost, small expense, minimum depreciation. With these merits is all the motor car performance you can buy at any price. In city country Ford service is close at hand—the service that keeps more than 1,750,000 Ford cars in daily use. Touring car \$360, Runabout \$245, Coupelet \$395, Town Car \$595. Sedan \$645—4-6, Detroit. Remember, Ford owners drive their cars all the year. Order. On

ARMY SMALL BUT RESOURCES VAST

Reserve Man Power of United States Greatest of White Nations, Except Russia.

INDUSTRIAL CAPACITY GREAT

With Less Than One-Tenth of World's Population, United States Makes Nearly Half of All Things Produced.

Available organized land forces of the United States today require only 150,000 officers and men, and under up to 150,000 regulars and 140,000 National Guard members, including those still in the federal service, and those under state control.

The exact figure today are known only to the war department at Washington, but recent reports give a close idea of the figures. The report on fighting strength.

In the last report, Secretary of War Luke stated that the actual strength of the regular army on June 30, 1918, was 107,681 officers and men.

In the year ending July 1, last, the United States army was increased to 135,000 officers and men, divided as follows:

Infantry, 81 regiments	61,254
Cavalry, 13 regiments	10,000
Field artillery, 13 regiments	10,000
Artillery, 13 regiments	10,000
Engineers, 13 regiments	10,000
Medical corps, 13 regiments	10,000
Signal corps, 13 regiments	10,000
Transportation, 13 regiments	10,000
Quartermaster, 13 regiments	10,000
Commissary, 13 regiments	10,000
Post office, 13 regiments	10,000
Other, 13 regiments	10,000

Total enlisted strength including National Guard, 1,350,000.

Exceptional difficulties have been found in carrying out this program for increasing the army. In consequence, the considerable industrial activity of the country, retooling has been, since the increase was authorized, the most serious problem.

It is therefore probable that the increase of 150,000 in the strength of the regular army on the side of optimism and 150,000 may be closer the truth.

National Guard.

The strength of the National Guard in federal service on September 1, last, was 143,704 officers and men, divided as follows:

Alabama	4,000
Alaska	1,000
Arizona	1,000
Arkansas	1,000
California	1,000
Colorado	1,000
Connecticut	1,000
Delaware	1,000
District of Columbia	1,000
Florida	1,000
Georgia	1,000
Idaho	1,000
Illinois	1,000
Indiana	1,000
Iowa	1,000
Kansas	1,000
Kentucky	1,000
Louisiana	1,000
Maine	1,000
Massachusetts	1,000
Michigan	1,000
Minnesota	1,000
Mississippi	1,000
Missouri	1,000
Montana	1,000
Nebraska	1,000
New Hampshire	1,000
New Jersey	1,000
New Mexico	1,000
New York	1,000
North Carolina	1,000
North Dakota	1,000
Ohio	1,000
Oklahoma	1,000
Oregon	1,000
Pennsylvania	1,000
Rhode Island	1,000
South Carolina	1,000
South Dakota	1,000
Tennessee	1,000
Texas	1,000
Vermont	1,000
Virginia	1,000
Washington	1,000
West Virginia	1,000
Wisconsin	1,000
Wyoming	1,000

Total, 1,350,000.

Mary Regulars Abroad.

Of the regular army today probably only 50,000 officers and men are in the United States proper and the rest are in the various foreign expeditions, while the other 40,000 are abroad. To show how the United States regular army is distributed the geographical distribution for the year 1918, the last date available, which definite figures have been made available, are given below:

United States and Mexico, 77,038;	
Alaska, 752; Philippines, 17,038;	
China, 1,875; Cuba, 1,000;	
Porto Rico, 7,161; Hawaii, 8,445; Canal Zone, 7,700; miscellaneous, 601. Total, 107,681.	

Vast Unorganized Forces.

While the present organized forces are large, the reserve man power of the United States is more vast than that of any white nation except Russia.

According to the census of 1910

(which when the increase has been made, the reserve militia of the United States, by which is known the only armed force between sixteen and forty years of age, are included) the United States, according to the 1910 census, had 20,530,347 men.

The above total does not include the men of the United States of 16 years of age, and the present population is 122,000,000. The reserve militia of the United States is, therefore, about 16 per cent of the population.

This is probably more than that of any other nation, except Russia and Turkey together have in the field 16 per cent of the population.

Unorganized Industrial Power.

If the unorganized industrial strength of the United States is taken into account, the industrial capacity of the nation is vast.

With less than one-tenth of the world's population, the United States produces all the things produced.

In iron and steel, for instance, we turn out more than Great Britain and Germany, the two next largest producers.

State officers have estimated the present industrial capacity of the United States at 100,000,000 tons of steel per year.

State officers have estimated the present industrial capacity of the United States at 100,000,000 tons of steel per year.

SENATE REJECTS LAW

PASSED BY SENATE OVER PRESIDENT'S VETO BY VOTE OF 62 TO 19.

JAP PROTEST IS IGNORED

It Now Remains a Statute and Amounts to Excluding the Yellow Race From the United States by Its Provisions.

Washington, Va., Feb. 22.—The senate today rejected the Japanese exclusion bill by a vote of 62 to 19.

The bill, which was introduced by Senator McClellan, of Virginia, would have excluded all Japanese from the United States.

The bill, which was introduced by Senator McClellan, of Virginia, would have excluded all Japanese from the United States.

MOTHER LOOK AT YOUR CHILD'S TONGUE

If cross, feverish, constipated, give "California Syrup of Figs."

A laxative today saves a child tomorrow. Children rarely will not take the time from play to empty their bowels, and if they do, they will never, never get slightly stomach sour.

Look at the tongue, mother! If coated, or your child is listless, cross, feverish, or constipated, it is a sign that the bowels are not moving, and that the child is suffering from a "stomach sour."

Give "California Syrup of Figs," a laxative, and the child will be healthy, and the mother will be happy.

THOSE AFFECTED WITH CRAMPS

Suggestions that may save Much Suffering

Marjorie, Pa.—"For twelve years I suffered with terrible cramps. I would have to stay in bed every month. I tried every remedy and was cured by Dr. Williams' Pink Pills for Pale People. I feel like a new woman now."
