In The Modern Gas Range

Simplicity and soundness of principle insure the result aimed at—the greatest efficiency at the least consumption of energy. Every detail of construction is considered carefully. For instance in the range pictured the valves are made of a slow wearing alloy in such a manner that looseness is automatically taken up by a spring underneath the lever. The slow moving carrier gas is in the mixer insure perfect control of the gas and air combination.

Continuing the details this dainty, moderate size stove is equipped with every other essential feature to secure economical and efficient service—double ovens, four burners, besides the shimmering burner, a glass door in the oven and look at enamel trim, especially the splashers.
