MORE FARMERS AND MORE FOOD

For many years now the young men have been leaving the farms and crowding into the cities. The result is that the cities are congested and the farms are idle for lack of men.

We are compelled to feed not only our own people, but the allied nations fighting Germany as well; and the men to raise the food are not on the farms.

The allies are suffering for food, and we are facing a tremendous shortage even for our own consumption. Does this prospect look inviting to you? Are you doing your part to relieve this condition?

Back to the farm—it needs you.

GOVERNMENT SHOULD TAKE ACTION

The cost of living is becoming intolerable. Upon even the triflingest excuse prices of food-stuffs are raised, and if no excuse exists they are boosted on general principles. Millions of people are dependent upon their daily labor and it almost impossible to keep soul and body together. In many cases the result of cases their vitality is slipping away from pure lack of sufficient nourishment. Yet in the very face of this the insatiable food speculators and profit-grabbers are turning the screws tighter every day.

There appears to be but one way in which this sickness of the blood of humanity can be stopped, and that is for the government to take prompt action and fix a maximum price at which every article of food is to be sold, and in fixing the maximum the price should be first scheduled down to zero.

The fact that a scarcity in foodstuffs exists should not be accepted, as an excuse for allowing prices to remain at their present outrageous figures. And the same action should be taken with reference to every article of necessity that we use.

WHAT CAN THE WOMEN DO?

What can the women of the nation do to help win the war? She can do many things. The principal thing, however, however, is to reduce the cost of her own table by increasing the production of garden foods at

home. Every penny's worth of food she raises reduces just that much that can be devoted to feeding some other person who has no place for a garden.

In addition to feeding the people of our own country, we must supply food for the people of England, France, Russia and Italy, in which countries so many people are fighting that they can not produce enough food to keep their people from starvation.

With the head of the family in this town conducting his business affairs the wife and young sons and daughters can do much in the garden, and in this event it will be a signal honor for them to do so. When you see a woman planting and weeding and caring for her garden you will know that there is a woman who has principle as well as pluck, and one who places the welfare of her country above the soiling of men.

We are compelled to feed not only our own people, but the allied nations fighting Germany as well; and the men to raise the food are not on the farms.

The allies are suffering for food, and we are facing a tremendous shortage even for our own consumption. Does this prospect look inviting to you? Are you doing your part to relieve this condition?

Back to the farm—it needs you.

A WORD TO THE SMOKER

The morality involved in the habit of smoking, so far as we are concerned, is nobody's business except the smoker's or perhaps that of his wife or children. The habit of smoking of his cigar or cigarette, or in his pipe, is of decided benefit to the entire community. And, further, the right to limit the places where smoking shall be enjoyed becomes a matter in which jeopardizes life and property.

As to the right to smoke no question is raised, but what the smoker does with the flame at the end of the match that lights his "weed," his cigar or cigarette, or in his pipe, is of decided benefit to the entire community. And, further, the right to limit the places where smoking shall be enjoyed becomes a matter in which jeopardizes life and property.

Many fires occur monthly in hotels and lodging houses, as also in private dwellings, from smoking in bed. In addition, fires are constantly breaking out through the carelessness of smokers in discarding "no smoking" signs containing highly inflammable material or stored or carelessly allowed to remain in, mills, factories, barns, garages, etc., especially to the point of the barns and garages.

Through the carelessness of smokers with matches, cigar and cigarette stems and pipes, there were 1,590 fires last year in Illinois, with a loss of over \$70,000.

History tells us that the month of April has always been a great fighting month. It has always been an eventful one for the United States, and not the least in this year of grace.

A wise man has said: "Yesterday is dead; forget it. Tomorrow does not exist; don't worry. Today is here, use it."
