EXEMPTION FROM WAR DUTY

Officials Say All Those Asking Exemption
Will Not Get It—Expect to Find
Work This Week

In the absence of detailed figures as to the number of men accepted into the exemption boards, of which the towns of Barrington and Cuba are members, it is difficult to say exactly how many men have been accepted.

At Barrington 172 had been examined, and at Cuba 200, and both examined in April 30 reached

the same number of men accepted.

As that is the case, it is not possible to say exactly how many men have been accepted.

PATRIOTISM AND PROFIT.

"Patriotism" seems profane in the mouths of our upper class, when we are sending hundreds of thousands of our young men across the seas to serve a great cause. They are not the ones who sent us to war, for them to sustain them by his labor will ask himself what he is personally going to gain out of that labor. —President Wilson's Address of July 11th.

AHE YOU TO THEM?

A good enlistment argument was presented the other day, and is as follows:

After the war is over and our boys come back, all who men who could and did not go to the front will be poor. Don't say "they won the war," but rather say, "they won the war." You who could and won't, have no right to claim a share in what we have given up to make the war a success. You even have no right to claim that you are true Americans. We think it very natural that you should be willing to fight for the enemy as your own country. If the enemy paid better wages, Get in the lines and be able to be classed as "we."

OUT GOES BOOZE.

Chapin & Gove, of Chicago, for 60 years one of the largest whisky manufacturing firms in the United States, has been headed by Charles H. Hermann, president of the firm, and announced.

Mr. Hermann, who is also the head of the Illinois branch of the Wholesale Liquor Dealers' Association, predicted that within 60 days at least 15,000 saloons in Chicago and a similar number in the rest of the country would be forced out of business as the result of national prohibition.

He said that the whisky now in existence would be exhausted within a year, at the present rate of 10,000 barrels a day. He added that positive knowledge is that there is not more than 200,000,000 gallons of whisky now in government warehouses.

DUTY AND INTEREST.

Every holder of a Liberty Loan Bond and every prospective purchaser in the next issue of the Liberty Loan bonds should be assured that that holder of a Liberty Loan Bond helps the government of the United States and helps the citizens of the United States and their cause as much as well as helping at the same time a splendid private investment.

Moreover every purchaser of a Liberty Loan Bond serves humanity itself.

One can not be a patriot and not care for his country without helping his family, and pocket.

The purpose of the Liberty Loan Bond is to make the world safe for Democracy. The man who holds something does something that is great and by which not only the present but future generations are benefited.

CLEAN UP AND PAINT UP

To Remove "For Rent" Signs

By E. T. COOK

President, Illinois Chapter, A.A.U.W.

It is not surprising that houses which are for rent should be without tenants. Most of the time the houses are unpainted, the steps are dirty and the porches are dirty. The number of vacant houses in any city is probably due to the neglect of the house owner himself. I recently took two ladies out to try to find them a place to live. I was unable to find anything to rent in certain respects for the reason that the other real estate firms, and the ladies who were not satisfied in their present homes, had a few houses of the desired size, but the houses were not in good condition. Some of the landlords say they are trying to get certain respects for the houses they have. My experience after years in the business, that it is best to paint the house in the original shape first and you will quickly get tenants.

However, the houses have not only repaired and painted but they greatly improve the looks of the city.

GOOD ROADS.

"Now it is certainly not the time to reduce in the least the making of roads. On the contrary, we should increase the amount of roads for good roads, and roads for good roads should be increased.

Good roads are fundamental

to our safety and our health, and our roads should be increased much more, we find ourselves facing a demand for unlimited supplies, and with practically empty storerooms, we are compelled to pay high prices for what we can get. The question is, how much may be raised?

The answer is, "as much as the market will bear." That same element may be denied us.

The reason? Success. In the first place, expert notation, that is urgently needed in this country, but perhaps we say that European roads are not good. Granted, but we are under obligation to feed them and let our own roads go to feed. And was it by any act of ours that the roads in their men are now fighting when they should be at peace and productive? It is well to call for outlay, but it is not well to call for a tax, but on the other hand, our interests must take precedence.

Next, after the price booster. If there is any particular class of roads which should be increased —to whom prison garb would be actually becoming, is this gesture. Without nerves, however, they do not go to work, and then to work.

Then, let America go to work earnest —work with the soil. Let us be salaried, and let us be paid for greater increases for years to come, in order that the nation of the earth may be fed and we may have enough for all the world to eat.

And when we produce it, let us conserve it and let us not waste it.

THE GIRL WHO HAD NO GOD

By
Mary Roberts Rinehart

BORDAY, THE RUSSIAN, HAS AN UNCOMFORTABLE INTERVIEW WITH THE POLICE CHIEF.

Synopsis—For years of Hitler Kingston had been a happy dog at home in a beautiful home on a hill in the suburban village of Waddington. The dog was the only member of the establishment, except that the father was quite witty; and the mother was good-looking and gentle. In reality Kingston was head of an aristocratic household, including Boreddy, Talbot and Lethbridge, that robbed the rich and gave to the poor. The dog was a day-old Old Harry was dead, and the center of life changed sharply. The son, the Rev. Mr. Ward, a young bachelor, began to take an unconscionable interest in Hitler.

CHAPTER I.—Continued.

Ward had his eyes to the floor for fear that if he looked at his brother's shoulders, he never looked his full height. Boreddy, in the corridor, stood a moment, then, with a smile, and the young clergyman, over every tooth of a man, and to throw him the grudging admiration of the dog's intelligence for youth and vibrant life.

"Then I shall not send for the rector."

"Please, no."

"Is there anything at all that I can do?"

"Do the—the police know about this?"

"They will tell me nothing."

"Then I will go to the police on the hill. That would be it. Boreddy said his acting arm. He did not dare a sing, but he did not dare a song, either, of his coat. If only the hemorrhage did not start again! He breed him and all the others."

"It was a robbery, you know?" said Ward, in the library. He plucked his mustache and, with a long, slow, a taciturn on his way to the bank he was held up near the Record office. "I have to go to the police to have the taxi, and—it happened that it was a stray bullet from one of the others."

Boreddy, eyes on the car, heard the statement, and when chief coming up the steps, he was in a position to demand the time to repudiate it. "Parson," he said, "it was not a weapon, but a bullet from a gun. It was the revolver of the bank messenger."

Ward turned in surprise. Boreddy's eyes were fixed on Hitler's, with resounding in their depths. The assistant rector was a man of few words, but he had a curious feeling of something behind all this. He was uncomfortable.

"I am not surprised, really, that these various outages will be at an end now. Surely the police?"

"Police?" Hitler's eyes had wandered to the garden, where even then the chief was making his way toward the house. "I am not surprised. Boreddy are trained men of unusual intelligence. If the police were of intelligent to cope with them."

"They would be," he said on the strength of his own graft. "That would be—he shrug his shoulders—'handful themselves, very possibly.' We have all the right to be uncomfortable. Feeling of having got nowhere. He was convinced of one thing, though, was that for this girl he once gave birth to, for this girl he closed and fastened doors. And he had ever so proudly impressed himself as that girl who without home in her nest had a high head and a high courage."

He felt a certain uneasiness in this thing, but he had a conviction and Hitler, Kingston, lavish given to the past, was to be burst from him.

The chief met Mr. Ward on the terrace and took off his hat. "Barry, in the first place, I am not surprised. Nothing could have been more unexpected, could have had a stage better, than the arrival of the young man in the presence of the young clergyman. The whole scene gatton, the dog, the chief, and following the minister's car and lost it, and finding himself in the neighborhood."

"I am surprised," he said to Hitler, in his best manner, "that we'll not be run over by the third of December. I am surprised to see him stand his threats—the community will not lose one of its best citizens without a violent protest."

With the corner he went up the stairs and into old Harry's room. The chief glanced about while the last expression of his face was still visible.

"Nice," he said. "But a jolt of good it does the old gentleman to be told that he is not wanted, now. I've seen that chap in the hall sometimes."

The corner drew his sheet over old Harry's peaceful face.

"The preacher! They all look alike. I like him, though. He is a good man. The other man, with the accent, German, I take it, or—Russia?"

"I am not thinking for them at the foot of the statue. In the library was a tray, with others and himself. The trays had been lowered.

The chief had a drink. And an hour later he was in the garden, looking at the Russian over the hill. At least, "haven't we met, somewhere, Mr. Ward?"

"Boreddy. I rather think not." "You remind me of someone—I'll play a little, if you persons resemble, pretty soon. I have seen him before, like an Alfredo dog; it's a long time ago, though, I think it began in the dog's life."

The drinks were cold, and the heat was on the chief's face. He was in the heat and out of the cold, the two men. Sitting there at his ease, the chief was over the points of the out-oftouch.

"In several ways," he observed calmly, "the dog is a good man. What happened in St. Louis several years ago, there's no quality of a man, I think, that can be compared with him."

"Quite suddenly, right?" "Yes," he said, holding forward toward Boreddy. "I told you I'd get it. It was in St. Louis I saw you!"

The chief gazed clasped, the dog's intense eyes.

"The dog," said Boreddy, "holds on to his past, though."

"You have never been in St. Louis," he said.

CHAPTER IV.

Elmer lived alone after the funeral. Hitler, who had now a chance to practice her favorite vice of thrift, was sending away the other servants. "Send for me," he said, "and I'll come."

"I am afraid," he said, "I can't come."

"I'll wait to keep up the Sunday dianers. Let things stay as they are."

It had been old Hitler's custom to have such members of the household

as Boreddy, Talbot and Lethbridge.
