More Entertainment

The Parent-Teacher association is going to give a play called "The Cuckoo's Nest." It will be different from anything we have had in that those taking part will be "cuckoo persons." Nevertheless they are very perfectly respectable company and can assure you of a very good time. By the way, the actors and actresses come from New Virginia.

New Well Being

About 90 to 100 gallons of water a minute is being pumped from Lake Zurich's new well. Ray Hinkle of Barrington, who drilled the well, says over 100 gallons per minute could be easily pumped with a better drill. This shows there is a good water supply for Lake Zurich for some time to come.

Are you taking advantage of the Sunday morning services where you are interested in the Word and built up in the things eternal and are you also taking temporal and material things?

Power Farming Is a Profitable Investment

Nearly two hundred thousand farmers bought tractors last year. This emphatic endorsement of Power Farming shows that it has proved its worth as a sound economic power investment. Power on the farm protects your capital in land, your present investment in labor, and pays a larger dividend out of them.

If your farm is power-equipped you will have an added advantage this year. You will grow larger and better crops at lower cost. You will make a profit regardless of the market price because your decreased cost will have widened the margin of profit.

The Sanison Model "M" is just the tractor you need for this purpose. You can depend upon it to do your work right. It is a tractor with carefully distributed weight and pulling power, ideally suited to the average farmer's power requirements.

It is an economical power unit that is easy to operate and use the year round, not only for drawbar but for belt work as well. In tilling, planting, harvesting and threshing of your crops the Sanison will deliver unflinching power at the time you need it most.
