Making Progress With Plans for Community Chest

The Community Chest being sponsored by the Chamber of Commerce received added impetus Monday night when the board of village trustees, after a long session commencing the movement and gave C. H. Paxton, president of the Chamber of Commerce, the further assurance that an ordinance would be passed to provide a successful solicitation of funds in the village, and that the ordinance would be vigorously enforced.

One man who expressed his interest in the Community Chest was...

St. Adams of the Auto Auto Sales Co. will be the directing hand in the collection of local money...

Newton O. Plager, V. D. Hawley, and others will be in charge of the collection of the money...

The directors have and team captain over the two meetings during the past week and will meet again...

Zion Indorses L. W. Doolittle for Lake Sheriff

Lawrence Doolittle, candidate for sheriff in Lake county, has received the endorsement of Wilbur Glen Volz of Zion, according to word from Volz's place this morning. This means about 2,000 votes and puts Mr. Doolittle distinctly in the running, if he was not there before.

Although there are four candidates in the field for the office, it has been all along considered that the race was between Mr. Doolittle, Lester Tiffney, and T. J. Stahl. Ken posited observers say that the race is now narrowed down to Doolittle and Tiffney. The Zion endorsement is going to give the former a big boost. Tiffney, present deputy sheriff, has a strong organization behind him, and friends and helpers in every part of the county are confidently canvassing their precincts in his behalf.

Lake interested in Stratton. Lake county voters, when they go to the polls next Tuesday, will take particular interest in the candidacy of William J. Stratton for state treasurer.

Mr. Stratton lives, up Ingelbush, near Fox Lake, in Lake county. For years he served as supervisor from his township, giving up the office when in time expired this spring, because his time required too much of his time.

He was appointed chief game warden of the state by Gov. Len Small. For years he served as supervisor from his township, giving up the office when in time expired this spring, because his time required too much of his time.

He has been heavily endorsed by practically every important business man of Lake county who knows him, including State's Attorney A. V. Smith and prominent officials, merchants and bankers of the county seat.

Lake county is one of the important counties of the state, and if the writer's memory serves him correctly this will be the county's first opportunity to place one of its native sons in an important state elective office. For that reason Lake county Republicans will probably cast an almost unanimous vote for William J. Stratton for state treasurer.

To avoid the monotony of gray houses, concrete is now colored better than it has been.

OLDEST NURSERY IS CLOSING OUT

The first nursery established in the Chicago territory is having a closing out sale. Peter F. Peterson, after years of study in the largest nurseries of Sweden, Germany and Belgium, came to Chicago in 1856 and started a nursery of his own on what is now Peterson Avenue just west of Lincoln Avenue. This pioneer nursery has long been known as Peterson Nursery, and since the death of his founder has been conducted by his son, William A. Peterson.

Now the subdivider has come along and bought the land which for two generations has been furnishing the trees, shrubs and flowers for the beautiful homes in and around Chicago. Many of the wonderful trees planted in the parks of Chicago and lining the boulevards came from this nursery. The nursery will "close its doors" and quit after the spring season is over.

It has been announced by the school board at Kalamazoo, Mich., that women teachers who marry will be automatically terminated their contracts.

Lake estimates place the number of women and girls earning their own living in the United States at \$9,000,000.

If you want to buy something use "Business Notes."

MEDINA CENTER OF MOHAMMEDANISM

"Second Best City in World" to Faithful.

Washington.—Medina, Arabia, "the best city in the world" to the millions of Mohammedan recently fled to the forces of the Grand caliph of the fanatical Wahab of central Arabia. The town is the subject of the following bulletins from the Washington (D. C.) headquarters of the National Geographic Society.

"Medina and Mecca, the two holy cities of Islam, have been under a peace, first for 20 years, and first in the religious countries of the world, and world over for 13 centuries," says the bulletin. "The fact that the city of Mecca was planted in Mecca, but made to grow until transplanted to Mecca, mirrors the physical differences between the two towns. While Mecca is set down in a gorge which is almost a desert, and while its inhabitant, even since the place has been known, have made their livelihood as merchants (and caravan riders), Mecca, situated in an oasis and has always had some agricultural life. The valuable groves produce 200 varieties of dates, some famous throughout the Near East."

"**Plague Media.**"

"Although a town had long existed on the site of the present Medina it was small, and the legend of al-Muhammad 'nabi' of Mecca almost as long as the legend of the Arabian made at Lake Umayy. This moving city of Mohammed, and his little group of Meccan followers is of such importance to Muslims that it is made their year center, and on this calendar is based. This was in 622 A. D., the Christian system."

"From the year to the year the Mohammed lived in Medina until he died. He was buried in the city, and his grave is the center of the Kaaba, the shrine of the Muslims. During these ten years, the city was comforted from the Medina, the expeditions of the militant followers against Meccan and other Arabian cities, beginning the spread of Mohammedanism by the sword, a practice that was to remain the way of much of the world. From Medina, Mecca was captured, and because of Mecca has been the object of hostile pilgrimages for ages, the city was made the spiritual center of Mohammedanism, and the old pagan shrine was dedicated to Allah."

"Medina remained the temporal capital and Mohammed continued to live there and preach in the Medina mosque. He died in the year 10 in the house of one of his wives, and the mosque and was buried beneath the floor where he died."

"The mosque is not an important structure. Only in its main gateway there are great columns of decoration. In the courtyard, beside the grave of Mohammed, is that of his father, his father-in-law and his immediate successor as caliph. Nearly also is the grave of Omar, the second caliph after Mohammed; and at a little distance is the resting place of Pauline, the prophet's favorite daughter. The burial plot of the three caliphs is surrounded by a high fence of iron and brass network so closely woven that the screams of pilgrims who flee by catch only glimpses of the interior. Only mosque officials and great dignitaries ever enter the sacred precincts."

—Non-Moslem Bureau.

"Medina, the Mecca, is forgotten ground to non-Muslims, and before the Great War it was actually less known to the outside world than the spiritual center of Islam itself. Captured by the British of a desert Turkish army and photographs of the city and the surrounding country furnished the first authentic information since the capture of a sketch by Burnell 70 years before."

"Medina preserves its inviolability in spite of the fact that it is the residence of a more or less modern highway. This, the famous 'Hijrah Railway' from Damascus into the Hejaz, was built by the Turks between 1900 and 1910, largely with contributions from the faithful. Practical Western diplomats, however, saw no special value in the line, and their judgment proved to be correct during the Great War. Because of the road, Turkey was able to hold Mecca against the Arab rebellious until 1919."

"Before the war Medina, the Mecca, profited greatly from pilgrims from all parts of the Muslim world. While a visit to Mecca was practically compulsory, the trip to Medina was voluntary, but gave additional merit. A driving factor in the question

Mohammedan that 'no prayer offered in the Mosque of the Prophet is worth a thousand elsewhere'."

"Many thousands of pilgrims from Arabia, Syria, and Asia Minor, bound for Mecca, passed through Medina because of the railway, and many more came from Africa because the city is especially holy to its natives. In addition, many of the pilgrims who went directly to Mecca made the additional stop at Medina, the second holy city, and Mecca's profit there were often the more wealthy travelers. Hundreds of pilgrims remained in Medina each year and its power population was increased."

"The war greatly injured Medina. Three-fourths of the population during the days of al-Muhammad, 9,000, many houses were pulled down so that they could be used for hospitals, and fields, and lands were made into the city for the same purpose."

WILL FIGHT BAN ON CORN SUGAR

Bill to Solve Crop Surplus in Congress.

Washington.—Legislation that they have the backing of more than a million farmers and business men of the corn belt, Iowa congressmen have introduced a bill to solve the corn surplus problem by removing restrictions on the sale of corn sugar made from the pure food act. In this way they hope to build up a new market which will absorb millions of bushels of corn each year and eventually take over the entire surplus there.

There are no restrictions now on the manufacture of corn sugar, but under the pure food act, all products in which alcohol is used to make it are specially branded and labeled to show corn sugar and not beer or other liquor was used.

This restriction, it is asserted, has proved a great handicap to the marketing of corn sugar, as the enforced labeling is required to carry with it the stigma of inferiority."

In order to remove this restriction a bill has been introduced in the senate by Senator Cummins (Rep., Iowa) and in the house by Representative Cole (Rep., Iowa). The bill provides for amending the pure food law so that corn sugar products will be labeled in the list of articles that are not deemed inferior if not specially labeled.

To the farmers of Iowa and Illinois, who have been forced to accept low prices for corn, largely because of the surplus, increased manufacture of corn sugar would offer a new market for large quantities of corn. Already thousands of bushels have been sent in mid-western congressmen and to the Department of Agriculture urging the immediate passage of legislation which will remove the present restrictions on the sale of corn sugar products.

"If the restrictions are removed and corn sugar can be marketed in large quantities, it means that the job of 'Business Notes' bring results."

SANITARIUM PIGS MADE UNIVERSAL WINTER GAINS

Urbana, April 7.—"Sanitation" pigs which last year were carried over to be fattened on new corn have made at the end of a half year had made a definite gain, 12.2 per cent pig. This usually good gains during the past winter, according to reports received from the College of Agriculture, University of Illinois from farmers in the Urbana following this plan. One of these farmers, Charles Snyder, Vernalis, reports that the sanitation pigs which he fattened in this year gained an average of 231 pounds each, of practically two pounds a head daily, when fed for 113 days during the past fall and early winter.

"This is an unusually rapid gain for so long a feeding period," E. T. Reinhold, livestock extension specialist of the college, who has charge of the swine sanitation demonstration in the state, pointed out. "A year ago, with high rates the old way, Snyder lost about one-third of his pigs during the summer from worms and other diseases. Then they were raised were not thirty. His experience this past winter, therefore, is just another example of how the sanitation system beats the profit from the hog business. Other reports from different parts of the state show the same kind of information."

Snyder last year followed the swine sanitation system which the college advocates in every detail, except that he did not feed his pigs any more the previous year. In his report he said, "My experience with

Good News in the Advertisements

Crysler's Under-standing of Men Helps Success

So much has been written about the ability of Walter P. Chrysler to do the seemingly impossible in a mechanical or shop way that it is apt to overlook another very significant and important fact; namely, that his understanding of men is the key to his success as an engineer, as a manufacturer, as a businessman, and as a leader in the automobile industry.

Among his first steps in this direction was the appointment of a superior man for every job, to whom was given the task of establishing any and all policies deemed necessary to the welfare, contentment and profitable employment of Chrysler's workmen, thereby insuring that the slogan, "A working force as good as the car," is the words of Mr. Chrysler.

One of the first tangible moves toward the attainment of this goal was the creation of a wage classification based significantly enough, not upon fractional hours or arbitrary theories of supply and demand but upon the cost of living. Naturally there were a number of differences involved, dependent upon the experience and skill of the individual workman, but lack of everything, tempering all decisions that were made, was that fundamental regard for a wage that would permit every workman to support himself and his family adequately and hold his own among his associates, friends and acquaintances.

Welfare work, as such, is unknown to Chrysler, for the thinking workmen for a wage that would permit every workman to support himself and his family adequately and hold his own among his associates, friends and acquaintances.

Most recent of all features, designed to contribute to the happiness and peace of mind of the workman, is a newly written \$12,000,000 group life insurance policy. Under the terms of this policy each employee who desires to avail himself of the privilege, may subscribe for life insurance, receive a dividend, and without physical examination.

Last, but not least, such features as sanitation, safety and personal comfort are carefully observed throughout the entire plant. Adequate light and ventilation are provided, as well as every modern device for the reduction of bodily strains, accidents, etc.

Eight women and one man, who are said to have aided in the construction of Chrysler's plant in 1918, have been provisioned by the Russian Soviet government.

INDIAN TRIBE HONORS AUTO MANUFACTURER

To express their deep gratitude on behalf of the American Indians for the signal honor of naming and inaugurating a motor car after one of their most illustrious leaders, Chief Pontiac, the Algonquin Indian nation capitulated the suggestion of A. R. Glazey's recent visit to the Pacific coast to make him a chief of their federation.

Mr. Glazey was not only adopted into the tribes composing this federation but also made a chief and given the name "Chief Pontiac." He is the second white man ever to be honored by these Indians.

When the plan was first presented by the Indians, it was suggested that the ceremonies could be performed in the city park of Los Angeles. But the Indians would have none of it, stating that the whole ceremony would be one of profound secrecy and chose a secluded spot in Mohave canyon.

NEW PONTIAC SIX

ENJOYS LARGE SALES

Pontiac, Mich., April 8.—The big sales strike made by the Oakland Motor Car Company were vividly revealed this week when total production figures for March showed that more cars were built during this one month than during the first three months of last year.

A record-breaking total of 12,035 Oakland Six and Pontiac Six cars was manufactured and shipped out. Another factory record was smashed on March 21 when 716 cars were shipped to dealers, the greatest one day shipment in the history of the company.

These achievements were made possible, in great measure, by the large sales of the new Pontiac Six which was introduced the first of the year as a companion car to the Oakland Six. More than 10,000 Pontiacs were produced and sold during the first three months of this year. Pontiac Sixes are now being built at the rate of 210 a day.

Most recent of all features, designed to contribute to the happiness and peace of mind of the workman, is a newly written \$12,000,000 group life insurance policy. Under the terms of this policy each employee who desires to avail himself of the privilege, may subscribe for life insurance, receive a dividend, and without physical examination.

Last, but not least, such features as sanitation, safety and personal comfort are carefully observed throughout the entire plant. Adequate light and ventilation are provided, as well as every modern device for the reduction of bodily strains, accidents, etc.

Eight women and one man, who are said to have aided in the construction of Chrysler's plant in 1918, have been provisioned by the Russian Soviet government.

LAKE COUNTY TO VOTE ON \$750,000 BOND ISSUE TO BUILD HARD ROADS

Lake county voters will be asked to approve a bond issue of \$750,000 for the purpose of building hard roads in the county at the general primaries to be held next Tuesday. The proposition will be printed on a separate ballot and will read as follows:

"That county bonds for road purposes be issued by Lake county to the amount of \$750,000 and an additional annual tax of 15 cents on each \$100 of assessed valuation of taxable property be levied for each of the years 1926 to 1946, both years inclusive, for the purpose of paying the principal of and interest upon said bonds, and additional annual tax of 15 cents to be in excess of the tax of 75 cents per \$100 assessed valuation authorized by Section 8 of Article IX of the constitution and in addition to and in excess of the statutory limit of all other county taxes authorized to be assessed and levied for any purpose?"

PALATINE ACREAGE IS BOUGHT FOR \$102,000

Benjamin J. C. Johnson of Chicago and Edward W. Wilson of Palatine, have purchased fifty acres in Palatine for \$102,000 from Annie L. Dean for immediate subdivision. The tract lies on both sides of Northwest highway within the limits of Palatine. Palatine Ridge will be sold by Humberg & Weber of Palatine and Benjamin J. C. Johnson.

If you want to buy something—use "Business Notices."

Walnut Grove Subdivision Taxes Purchase of the lot in the Walnut Grove subdivision in the Village of Hightstown, Lake county, who have not received a memorandum of the amount of taxes for the year 1925 from the county treasurer of Washington will be able to get this information if they will call at the office of Miles T. Lamy, 1 N. Oak street, Barrington. Frank Truett.

THE man with foresight carries an umbrella on a cloudy day—he doesn't get caught. The same man buys insurance for his loved ones. Their style is ahead of the "fellow"—there's no need for him to get caught with re-upped styles of a past season.

By Bostonians—they lead the sporting style parade.

Eight women and one man, who are said to have aided in the construction of Chrysler's plant in 1918, have been provisioned by the Russian Soviet government.

FORD CHANGES NAME OF RIVER ROUGE PLANT

Pontiac, Mich., April 8.—At the direction of Edsel B. Ford, president of the Ford Motor Company, the name of the River Rouge Plant of the Company has been changed to the Fordson Plant.

This plant, probably the largest industrial center in the world, is located along the River Rouge and has borne the name of the river ever since it was established about two years ago. Recently the town of Springwells near Detroit, in which it is located, voted to change its name to Fordson and the decision to rename the plant comes appropriately at this time.

At the Fordson plant, the company manufactures the Fordson Tractor, operates its own blast furnace, power plant, motor assembly plant, body plant, saw mill, coke oven, steel plant and rolling mill, cement plant, paper mill, steel plant, and a glass factory. The plant has an area of 1100 acres, 12.1 miles of roadways and 85 miles of railroad track. Approximately 65,000 men are employed there.

"Business Notices" bring results.

Support President Coolidge by Voting for

SENATOR WILLIAM B. MCKINLEY

At the Republican Primaries,
April 13th, 1926

Throughout his career, Senator McKinley has been loyal to the best interests of the Republican Party. He has attained a position in governmental circles at Washington which it would require another man many years to reach and he is therefore better able to serve the people of Illinois to their greater advantage. Senator McKinley's superior legislative record of 14 years in the House of Representatives and 5 years in the Senate has been characterized by a fair, consistent, constructive attitude toward questions of labor, agriculture, public service, national defense, finance and foreign relations. He is an out-standing leader and is recognized as one of the most loyal supporters of President Coolidge, who is personally interested in his being returned to the Senate. Despite the scurrilous attacks made upon him, SENATOR MCKINLEY WILL BE RE-NOMINATED AND RE-ELECTED.

Be With the Winner

PROPOSED FOREST EXPERIMENT STATION TO AID FARM WOODLOTS

The proposed Federal forest experiment station for the Central States, for which Senator McKinley's new bill would appropriate \$80,000, is unique among such stations already operated by the Department of Agriculture in at least one respect. The eight forest experiment stations already installed, four in the East and four in the West, are equipped to study the problems of the extensive timberlands in the great forest region of the country.

The proposed station for Illinois will study forest problems in one of the greatest timber-producing regions, which at present imports over 90 per cent of its timber requirements from other regions. The three largest timber consumers of the Central States—Ohio, Indiana, and Illinois—together required over 5% billion board feet of lumber in 1924, more than one-fourth of the country's total lumber consumption. At the same time, according to Forest Service statistics, these three States produced less than one-fifth of this amount, or about 250 million feet of lumber, which is about one-eighth of the country's total production. This inequality between consumption and production is in part responsible for the high cost of lumber to the consumer, as it is figured that the annual freight bill on lumber is \$70,000,000. This illustrates the premier's demand for maximum production of high-grade lumber in these states, wherever and in what amounts that is not needed for agriculture.

Another unique feature of the proposed forest experiment station's work is that, instead of studying vast areas of virgin timber, and serving the needs of large timber holdings, its studies will be concentrated on farm woodlots which average about 15 acres to the farm. About 80 per cent of the timber grown in the Central States region comes from farm woodlots.

The aim of forest research in these states will be to enable the farmer to make the most of his woodlot. What that may mean is indicated in some of the lumber price variations heretofore. Where relatively poor grade hickory has brought but \$10 a thousand board feet, superior quality has brought as much as \$40. Records show that whereas poor ash may sell for only \$32, high-quality material sells for \$46.

A forest experiment station will be able to give to woodlot owners information regarding soils, the best locations for woodlots, methods of planting young trees, protection of timber, choosing the best species to

grow, the best age at which to cut, the control of tree diseases and insect attacks, the best cutting methods to benefit the most crop of timber, and many other matters which only a careful study of local forest conditions can provide. In this way it will be as effective as the agricultural experiment stations are in the production of other agricultural products.

In all other timber-growing regions it has again and again been

proved that timber growing that is not based on the knowledge gained from forest research in the very region is wasteful, and even liable to result in a loss rather than a profit. Scientific timber growing, like scientific farming, can yield comfortable profits, where hit-or-miss methods fail. Timber as a farm crop is becoming more and more popular, and the new forest experiment station should accordingly mean much to the property of the great farming com-

munities that are intended to benefit from its establishment.

Miss Lydia Hutchinson, an expert dog driver, was one of the judges of the recent international dog races held at Ashton, Ida.

Illinois State women include 8 aviators, 27 inventors, 41 technical engineers, 137 architects and 2 forest rangers.

If you want to buy something—use "Business Notices."

Republicans of Illinois!

In 1920 you rejected membership in Woodrow Wilson's League of Nations by a vote of 1,420,480 to 534,355.

In 1926 Senator William B. McKinley repudiated your verdict, joined 35 Democratic Senators, and voted you into the Supreme Court of this League, hypocritically called the world court.

To get out of the League's court and keep out of the League

⊗ Vote for Frank L. Smith

Loyal Republican, fighting for Republican success as precinct committeeman for thirty-two years, state committeeman for twenty years, state chairman in three great and successful campaigns.

Loyal to American Ideals, the faith of Washington and the verdict of Illinois Republicans, who stands for immediate withdrawal from the League of Nations World court.

Loyal to Illinois farmers and pledged to work for their immediate relief and continued protection.

Loyal to Illinois interests by demanding increased Panama canal tolls, and completion of the Lakes to Gulf and Lakes to Atlantic waterways.

Loyal to continued tax-reduction, government economy and business administration.

Loyal to labor, and to the rank and file of the public—business man, banker, farmer—

For United States Senator

To get recognition for Illinois as a great Republican state; Service in the Senate, like he has given as chairman of the Illinois Commerce Commission, which is saving the people \$19,000,000 a year—over \$70,000,000 since Smith became chairman.

OLD NEWSPAPER SAVED
The newspaper that "scaped the wreck" by being the first to print the Declaration of Independence in full has been revived, after a suspension of several years. It is the Virginia Gazette of Williamsburg, established in 1736, the first newspaper ever published south of the Potomac river.
Its revival is due to a resolution of the National Editorial Association calling for the restoration of the old paper. Local interest recently resurrected the paper and it is now edited by students of the Journalism school at the College of William and Mary.
While devoted in part to local and general news of the week, the new Gazette makes a specialty of publishing old historic items with a letter from Thomas Jefferson, telling of his proposal of marriage to Rebecca Burr, of an interesting sample. Jefferson wrote:
"I had dreamed up in my own mind such thoughts as occurred to me in my moving language as I knew how. But good God! When I had an opportunity of venting them a few broken sentences uttered in the presence of the great man, with pauses of uncommon length, were the only visible marks of my strange confusion." But Jefferson found a devoted wife in Mrs. Martha Jefferson, a handsome widow of 23, whom he married in 1772.
In securing the restoration of the Virginia Gazette, the National Editorial Association has performed a truly patriotic service.

ALL COMMUNICATIONS SHOULD BE ADDRESSED TO THE BARRINGTON REVIEW, P.O. BOX 100, BARRINGTON, ILL.

A VOTE FOR MCKINLEY IS A VOTE FOR PRESIDENT COOLIDGE

The issues of this campaign for United States Senator are clearly defined. There can be no doubt in the minds of all good citizens who have the country's welfare at heart. Senator William B. McKinley stands on his record as a tried and true Republican public official. He has obeyed the mandates of his party. He has worked to uphold the hand of President Coolidge in enacting into law the policies of the Republican party.
If you believe in President Coolidge and his administration you will cast your ballot for Senator McKinley. If you approve his efforts to conduct the national government in an economical, business-like manner you will vote for Senator McKinley.
If you favor President Coolidge's plan to further reduce taxation you will support Senator McKinley.

If you approve President Coolidge's plan to bring about world peace and continued business prosperity you will vote for Senator McKinley, who is pledged to support all of these important measures.
Frank L. Smith has conducted a campaign of misrepresentation in his efforts to obtain the high office of United States Senator.
He has publicly repudiated the policies of President Coolidge and the Republican party. If elected he says he will vote with Senators Borah, La Follette, Reid, Shipstead and the other members of the group of obstructionists in Washington who work day and night to embarrass our President in obtaining direct legislation for the benefit of the people.
In Chicago his friend and political adviser is Big Bill Thompson.
The duty of regular Republican men and women in this campaign is to vote for Senator McKinley.

There is no mistaking the real issues. A vote for Senator McKinley is an endorsement of President Coolidge and the policies of the Republican party.

STRIKING AT THE ROOT OF GOVERNMENT
It was never the intention of the founders of our government to have it go into business competition with its private citizens. Every time it enters the field of business it does a lasting damage to large numbers of its own people and adds a double burden on the taxpayers who must make up the tax revenue which government-owned enterprises are exempt from paying.
The greatest sufferers from government competition at present are the small publishers and printers who, cannot compete with the tax-free government owned printing plant which prints and sells return-addressed stamped envelopes, delivers them at the expense of all the taxpayers, and falls back upon the taxpayers to make up the postal deficit which they help to create. There is much agitation to discontinue this abuse but at the same time we see the country flooded with political propaganda to launch the government into other branches of industry. All such proposals are contrary to the true spirit of our constitution.
The fundamental point the American people must consider is not so much whether they want public ownership of some particular industry, but whether or not they want to change our entire form of government, the cardinal principle of which is a recognition of the right to private property and the development of private enterprise under government protection for a system which does not recognize the right to private property and which would have the government step in and take over the various business enterprises which heretofore private citizens have had a right to operate.

Card of thanks, resolutions of condolence and all notices of entertainments and church socials and parties given for pecuniary benefit must be paid for in advance.

Bible Thoughts for the Week
Remember, O Greater in the days of youth, while the wild days come not, nor the year of manhood, what thou shalt say; I have no pleasure in thee, O Jerusalem, that sayest, I am safe, because I am fortified, and keep The commandments of man.—Isaiah 31:1-5.

Monday.
We will provide—Take no thought of tomorrow, what thou wilt eat, or what thou wilt drink, or whether thou wilt be clothed, and all these things shall be added unto you.—Matt. 6:25-34.

Tuesday.
Finally, brethren, whatever things are true, whatever things are just, whatever things are honest, whatever things are of good report; if there be any praise, think on these things.—Col. 3:12.

Wednesday.
Prayer answered—I sought the Lord, and he heard me, and delivered me from all my fears. This poor man cried, and the Lord heard his cry, and saved him out of all his troubles.—Ps. 34:1-6.

Thursday.
A sure Doxology—Trust in the Lord and do good; so shalt thou dwell in the land, and verily thou shalt be feared.—Ps. 37:3-5.

Friday.
Trust and Waver Not—Trust in the Lord all the time; and lean not unto thine own strength.—Ps. 125:1-5.

Saturday.
He that Trusteth in his own heart is a fool.—Prov. 28:26.

Local Church Announcements

St. Ann's Catholic Church.
Mass, next Sunday morning. Sunday school after the morning service.

D. F. O'HARA, pastor.

"SIDE LIGHTS"

A little knowledge of biology tells us that a man's sperm cells are produced at the rate of 1,400 when he is toward a ripe age. These cells are produced for the purpose of fertilization. The author of the article states that the rate of production was not a fact, but a mammal, which there is no customs duty.

John Burpee of Atlanta is a man who has been known by the record of his work, but says he is not a great success. He has found it interesting, however, to be a success in three days. From this we can see that a man's success is not a fact, but a mammal, which there is no customs duty.

Commenting on the fact that a man's success is not a fact, but a mammal, which there is no customs duty, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Because the chopped beef is a fact, but a mammal, which there is no customs duty, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Before being elected diplomat at the Michigan State Fair, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Rev. Ira Landis, national secretary of the National Y. M. C. A., states that a man's success is not a fact, but a mammal, which there is no customs duty.

"Inmate of Isals is the City of the Future," the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Adherence of a super sect to the doctrine of the resurrection of the dead, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

The theme will be: "Our duty to the world," the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Interdenominational and Senior League, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Devolutions hour at 6:45 p. m., the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

Y. M. C. A., 7:30 p. m., the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

The Florida Journal—Coolidge, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

People's Transcript—Frank Smith, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

People's Transcript—Frank Smith, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

People's Transcript—Frank Smith, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

People's Transcript—Frank Smith, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.

People's Transcript—Frank Smith, the author states that a man's success is not a fact, but a mammal, which there is no customs duty.
