ARREST FOR TELEPHONE FRAUD IN NEW YORK CITY

An eastern newspaper published the following news 45 years ago:

"A man about 45 years old, identified as a member of the underworld, has been arrested in New York for attempting to extort money from people by exhibiting a device which he says will enable him to receive calls from any telephone in the city."

"The device, which is believed to be a telephone receiver, is said to consist of a small box which is connected to the telephone wires, so that it will be possible to hear the conversation of the person who is calling."

"The man, identified as a member of the underworld, was arrested in New York for attempting to extort money from people by exhibiting a device which he says will enable him to receive calls from any telephone in the city."

BARRINGTON, N. H.

A NOTABLE FOURTH

Fourth of July this year is a notable anniversary in several respects. It is the 150th anniversary of the adoption of the Declaration of Independence; it is the 100th anniversary of the death of former Presidents Adams and Jefferson, it is the birthday of President Lincoln, who was born July 4, 1809.

Thomas Jefferson, who wrote the Declaration, and John Adams, who made the principal address in his behalf before the Continental Congress, both became Presidents of the United States. That both of them died on July 4, 1826, exactly fifty years after its adoption, furnishes one of the most remarkable coincidences in history.

Another establishment of the government of the United States, and Jefferson were political opponents. Adams was vice-president during Washington's two administrations, and succeeded Washington as President, but was defeated for re-election by Jefferson, who became the third President of the United States.

However, antagonists they have been in politics, after their retirement from public life Adams and Jefferson were close friends and maintained a continuous correspondence for many years. These personal letters are among the most interesting documents of their day. Adams was 90 years of age at his death, while Jefferson was 83.

In view of the circumstances stated, July 4 has a peculiar significance this year, which can not fail to impress every patriotic American.

HOME WORK SWINDLERS

Last week the Postoffice Department issued a fraud order barring from the mail all matter addressed to or coming from several concerns which advertise for persons to address envelopes and mail circulars at home. A sample advertisement of one of

these swindling concerns is as follows:

"Ladies wanting home work, any kind, can write, inclose a stamped envelope, care of Mrs. Anna New York."

Those who replied to such advertisements were usually required to pay certain sums, from 50 cents to \$3, for "directories," "admits," or some similar equipment, before starting to work. Then the conditions under which work was to be done were found to be such that few made any further effort to engage in it.

The swindlers made their money from the small sum sent for the "outfit," and from orders for worthless jewelry, which were sent in the mail in case of employment made sacrifices to send these small amounts, only to suffer disappointment through losing their money and failing to secure the remunerative work which they had been promised.

It is hard to imagine a more contemptible or heartless swindling scheme than this, as it preys even upon the poor and unfortunate who can least afford to lose the money thus fraudulently secured from them.

BUSINESS PROSPERITY IN RECORD OF STEEL

Business men all over the country are taking advantage of the Standard Steel Company, which is now in its 141st year, the highest point in its history. It is cheering business and indicative of the tremendous prosperity of the country.

It is not so long ago, a financial history goes, that three men sent the given away even in the form of subscriptions to the New York Stock Exchange. The men, Wall Street termed it "half for actors" a year for it could be bought around ten and twenty dollars a share. In 1907? However, permitted the Steel Corporation to absorb the Tennessee Coal and Iron and Frankland, unassisted by either buyer, and now they could do what they wanted.

WITTY AND WISE

Caught in some sort of performance by a housemate.

Father's Day didn't make a whole lot of difference to most people.

One way to get up-to-date things is to have your system to keep a record.

Never mind about the man who had passed away.

Stop that laughing, commanded the man who had just come in to break every bone in your body."

"You, sir, will just start again."

"I am not a doctor, but I am a lawyer."

"If you did not stop, I'd want to."

The Bally Dog Club was originally organized for the benefit of the dogs of society, or rather for their owners.

Never mind about the man who had passed away.

People who do not amount to much should be held most about their children, or rather their parents.

New York has now sent more than one million men to the front.
