Illinoisans on Good-Will Trip Look Over Cuba

By LEWIS COLBY

Illinois, Cuba—Cuba imported from the United States in 1925 not more than 12,000 tons of goods. However, the Cuban government has been so successful in its efforts to increase the trade of the island that it is now importing from the United States more than 100,000 tons of goods.

It is estimated that the United States exports to Cuba more than 100,000 tons of goods annually. This is a record for any one country. The United States exports to Cuba more than 100,000 tons of goods annually. This is a record for any one country.

These figures are not surprising when one considers the fact that the United States exports to Cuba more than 100,000 tons of goods annually. This is a record for any one country.

It is not surprising that the United States exports to Cuba more than 100,000 tons of goods annually. This is a record for any one country.

BARRINGTON REVIEW

TELEPHONE NO. 1 BARRINGTON, ILL.

COOLIDGE SHEARS THE FARMER

After a struggle lasting for years, the farmers of the United States last week took Congress a bill giving them some relief from the conditions under which they live. The bill was promptly vetoed by President Coolidge.

The President objected to the measure on the ground that it classifies the farmer as a class deserving the favor of the great Middle West and South. Everything the President says may be true but it might be pertinent to inquire why the farmer is not entitled to kindly class legislation when laws are constantly enacted in favor of manufacturers, railroads and practically every other special class that makes its money in Washington. The bill provided that five per cent of the people of the United States engaged in occupation are employed on the farms. About thirty per cent are in fact farming. Surely the farmer is one of the groups ought to be saved for the farmer but the President of the United States does not think so and accordingly the farmer finds the cupboard bare.

In the mean time the metropolitan newspapers, with an occasional exception in the west, are praising the President for his "courageous stand" and for his "firmness" and have shown far greater courage in signing the bill.

The truth is that the manufacturer and the wage earner combination, representing less than one-third of the population, is highly organized that it not only controls price but it usually controls elections. Capital and labor have buried the hatchet, the latter getting in wages and the former in the profits of the manufacturer's profits. The tariff act (class legislation) shuts off competition from the manufacturer who divides with his employees. The public who includes the farmer, pays the bill. Spread out over the country in the towns, villages and farms, organization is almost impossible. The manufacturer and his wage earners in the big cities can be handled with the ease of the machines they use. Naturally in time the machine will wake up to this state of affairs and remedy it. The agitation in favor of Frank O. Lowden for the Republican nomination for president is a hopeful sign indicating as it does that the old Republican party will be foolish all the time.

PAVING AT LAST

It is a long time that has no turning even if it is a muddy lane. The action of the village board in preparing the way for the paving of the streets of Barrington and the practical unanimity of the property owners appearing at the public hearing last week agreed to the proposition, means that Barrington is spending its last winter in the mud and that there soon will be a dry road.

The engineers tell a reporter that actual work on the streets should be in progress within two or three months. (Before the winter they next autumn the work through the main arteries of the town should be advanced leaving the summer of 1928 for the ordinary seasons).

The village board decision in regard to the work it has been able to do for the village. The turn-up condition of the streets, due to sewer construction, has delayed paving long beyond the time when the village was caught in a veritable sewer and it is fortunate to emerge at the close of the year. The whole spring and summer and most of the fall have been for the contractors for work that will not be completed by an intervening winter.

With paved streets a certainty Barrington will find that the depression has been of the last year or two and that the way ahead is at once. In fact, local real estate men already sent a boom in values and declare that property owners who are not street paving will find the difference more than they pay within a few weeks.

"SOULLESS CORPORATIONS"

The above phrase, along with its team-mate, "The public be damned," has outlived its usefulness. "The corporation has an interest in encouraging and perpetuating the best there is in human relationships, is evicted by the recent action of the officials of the United Gas Improvement Company, of Philadelphia.

Recently the fact was brought to the attention of the company that an old brown stove dwelling on the lot adjoining the com-

pany's main office building, was the birthplace of that wonderful old hymn, "I Leadeth Me." This hymn was written by Rev. Dr. Gilmore, back in the sixties. It has been sung all over the world, has been translated into every language and is in the hymn books of many denominations.

The United Gas Improvement Company had purchased the lot on which the old house stood, for the purpose of erecting an additional office structure. Realizing that the home of the hymn, "I Leadeth Me" would be torn down, Samuel T. Brown, president of the Board of the U. G. I. Co., authorized the erection on behalf of the company, of a tablet as a permanent mark of the birthplace of the hymn. It is on the Broad Street side of the U. G. I. building, in plain view of all passers-by and reads as follows:

"I Leadeth Me, O blessed thought! O words that surely comforted, taught, and saved. Where's thy, O Whither? I'm still, I've had that leadeth me."

The Leadeth Me, sung throughout the world was written by Rev. Dr. Gilmore, a son of a Governor of New Hampshire, in the early days of the nineteenth century, while preaching in the First Baptist church, Northampton, Mass., in the year 1830. The hymn was first published in the year 1832. The church and Dr. Brown were both instrumental in its preservation and its building is erected.

Improvement Company, in building of the beauty and fame of the hymn, in the remembrance of the fact that it makes this permanent record on the first day of the year 1927.

Corporations may not have souls, but the men who operate the successful ones do, and they are good Christian gentlemen who are constantly being made the United States a better nation.

REDS AND CHILES

There are still some people among who blindly ignore all charges that Soviet Russia is active in Mexico, South America, China, and fondly cling to the belief that all the world were to be ruled by the Red. In the meantime, our international problems would be solved.

These trusting souls ought to read with interest the news which has been coming from Mexico. The United States has been highly organized that it not only controls price but it usually controls elections. Capital and labor have buried the hatchet, the latter getting in wages and the former in the profits of the manufacturer's profits.

The tariff act (class legislation) shuts off competition from the manufacturer who divides with his employees. The public who includes the farmer, pays the bill. Spread out over the country in the towns, villages and farms, organization is almost impossible. The manufacturer and his wage earners in the big cities can be handled with the ease of the machines they use. Naturally in time the machine will wake up to this state of affairs and remedy it.

The agitation in favor of Frank O. Lowden for the Republican nomination for president is a hopeful sign indicating as it does that the old Republican party will be foolish all the time.

Communists, it is said, have invaded the school, have aided in strikes against the government, and founded the Red by the same system of getting control is being worked in Chile that has been used elsewhere.

Friends of the soviet will doubtless raise the cry of fascism against the minister of war. But fascism always follows communism. It is the natural reaction, and the Reds are the natural enemy of the fascists. The Red is the natural enemy of the soviet in the same way as the soviet is followed by the dictator.

The best way of course is that which is now being followed by the United States in having nothing to do with the communists at all.

THE PLAGUE OF LAWS

William P. Helm, Jr., who specializes in government statistics, in an article in the "Chicago Herald-Examiner" and "The Chicago Tribune," declares that the total number of laws theoretically operative in the United States, including city, county, state and national, approximately 10 million, and that the number has come for a new Justinian to junk the whole complicated mess and to substitute a simple code, like that of the Roman lawgiver.

In 1925 no fewer than 13,000 new laws appeared on the statute books of the 48 states. Fifteen typical American cities added 100 laws each. The total number of laws passed in the last year or two is the way ahead is at once. In fact, local real estate men already sent a boom in values and declare that property owners who are not street paving will find the difference more than they pay within a few weeks.

"The growth of bureaucracy can be traced directly to the extension of the state and bureaucracy grows by multiplication of laws. They supplement each other. The more laws, the more bureaucrats to enforce them. The more bureaucrats, the more laws. Increase and extend their power, until we have reached the point where the whole topography system is breaking down and the law becomes a mere formality."

It can be added that practically every new law increases taxes, and one of the best ways to bring about jack taxation is to stop passing new laws.

THE ROBIN

By T. Gilbert Powers

The National Association of Audubon Societies

No bird looks so prominent a place in the minds of the American people as the robin, which is the most common of all our birds. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

It is the only bird of its kind that is found in every part of the United States. It is the only bird of its kind that is found in every part of the United States.

TREES REVEALED

Ann B. Cistone in "Trees at Large"

Symposium for students and teachers

In winter, we are prone to regard the trees as cold, bare and dreary. They are the only trees that are left standing in the winter. They are the only trees that are left standing in the winter.

In winter, we are prone to regard the trees as cold, bare and dreary. They are the only trees that are left standing in the winter. They are the only trees that are left standing in the winter.
