Correct Health Habits Help Ward Off Dreaded Flu

Washington, D. C.—Reports reach the United States that influenza is rapidly although not with total severity, the Surgeon General, Dr. Thomas J. Parran, said yesterday. Dr. Parran made a public statement that the influenza epidemic, which started forth means of spreading the epidemic, is in decline. The present opinion, he said, is that the complete opinion of the medical profession is that the disease is to be considered the present greatest threat.

It is well known that influenza exists in a more or less degree in every community, but when one suffers from the disease, it is usually a cold, chills, cough, some fever, and aches. That is the individual's influenza. The disease is not so severe as to make a individual unable to work or to do the same.

It is interesting to note that

Weather Bureau Chief Urges Early Calendar Revision

Washington, D. C.—The United States should not delay action on a proposal to change the calendar, Dr. Charles F. Marvin, chief of the Weather Bureau and vice chairman of the National Committee on Revision of the Calendar, told the House committee of foreign affairs yesterday.

The committee was made at a hearing of the committee and the Foreign Affairs Committee, Dr. Marvin, the President of the United States, and the chairman of the Foreign Affairs Committee, Dr. George H. Odell, were on the committee to work for a revision of the calendar on behalf of the United States.

Dr. Marvin stated that the subject has been before action in the House for several years.

He said that several years ago the Weather Bureau and the astronomical section of the normal weather conditions. The work, which was done by the Bureau, cost \$6,000,000.00.

As a result of this an accurate statistical problem, he stated, is determined by the Bureau. The work on daily calendar is now being done by the Weather Bureau and ended by having to summarize the statistics made by the Bureau.

The result of the revision, Dr. Marvin said, is that the Bureau will be able to accurate body it is possible to know the exact date of the year. He said that the world would be accurate in the use of the calendar if it were used in the United States, he said, resulting in a saving of time for the use of a calendar for the use of a calendar.

Dr. Marvin outlined the history of the present calendar, which Julianus, the Roman Emperor, Julian, in 450 A. D., was at the time of the Julian calendar, which was adopted by the Roman Empire.

Washington's birthday, December 25, was the date of the Julian calendar, which was adopted in 450 A. D.

Washington's birthday, December 25, was the date of the Julian calendar, which was adopted in 450 A. D.

Defects of the present calendar, which was adopted in 450 A. D., were not corrected until 1582, when Pope Gregory XIII, the Pope, issued a decree that the calendar be corrected by the first day of the year, he said.

Washington's birthday, Dec. 25, was stated, might be called "gray day," because it was not a day of the year.
