## BARRINGTON REVIEW

ESTABLISHED 1885

M. T. WILLEY, Editor and Publisher  
LESLIE B. PADDOCK, Managing Editor

Published every Thursday afternoon at Barrington, Illinois, and accepted as second-class mail. All copy intended for publication must be received at least two weeks in advance to insure publication in that week's issue.

Carries the opinions of candidates and all sections of organizations or society and church, sales and parties, giving for personal and general advertising.

All communications should be addressed to the

BARRINGTON REVIEW

PHONE NO. 1 BARRINGTON, ILL.

AN OPPORTUNITY FOR VOTERS

The people of Barrington, and some adjoining territory, will have the opportunity to vote, next Tuesday, for the establishment of a Barrington park district.

The proposal, which originated with the Barrington Lions Club, has the endorsement of all other civic organizations, and of public-spirited men and women generally. It has been fairly presented through the press and by means of letters addressed to the voters. It is worthy of the earnest consideration of every voter.

Aside from the fact that acceptance of the proposal to form a park district will result in a five-cent annual dollar gift to the people of Barrington, from the Barrington Lions Club—which is not to be lightly cast aside—the effect on the present and future development of this community should be carefully taken into account.

It is a well-recognized principle of city government that a system of parks and playgrounds is essential to the public welfare. This need has not, perhaps, been strongly felt in Barrington up to the present time. But as the community grows, as the surrounding countryside becomes transformed into settled park estates, it will become increasingly apparent that it is necessary to set aside certain tracts for development in the interest of the general public.

The country, village of yesterday is the city of tomorrow. In Barrington's case that is no exaggeration. Let us not regard the park proposal as just another expense. Let us look upon it in its true light—an investment in health, and happiness, and community progress, which will benefit every man, woman, and child, and the latter most of all.

## A FEW LEADERS' CONTROL

Minimizing the importance of the re-apportionment of membership in the national House of Representatives, Senator Thomas of Oklahoma declares that it really does not matter how many members there are, as four 'five men run things anyway.'

This is doubtless true. So far as legislation is concerned, the average Congressman has very little influence and all the brave speeches made on the floor change few votes, if any. The leaders decide what legislation is to be passed, and if they find they cannot command enough votes to put a measure through, they just sidetrack it and await a more favorable time.

Hundreds of bills are introduced which their proposers well know have not the slightest chance of enactment, but these gestures sometimes impress folks back home, and when they fail there is always a plausible alibi ready.

Every Congressman performs much useful work in Washington for his constituents, however, in looking after matters before the various executive departments and bureaus. Most of them are able to get a new post office building or an appropriation of some kind for their districts occasionally, which adds to their prestige.

But so far as influencing general legislation is concerned, a very few members run the machine. The rest might as well stay at home.

## ALL ARE WRITERS NOW

It is the simplest thing, in the world, to win fame as a writer nowadays—provided you won fame in some other way first. The newspapers and magazines bristle with celebrities, and it is beginning to be a pleasure to look at the famous folks and go to meetings of the great page, to the graduation of professional writers.

But there's a catch in it. In most cases the famous folks do not write the articles which they are supposed to write. They merely give a regular writer an outline of

what they want to say, and he does the rest. When the work is finished the celebrity gives it his OK, and it is published as his own.

Of course there are many prominent men and women who actually write the articles and books which bear their names, but in the case of stage people, politicians and other sport champions, politicians and even business men, the actual writing is usually done by a professional, known as a "ghost writer."

Literary efforts by proxy appear to be quite remunerative, however, particularly if they run to testimonials endorsing cigarette and the like.

## PROHIBITION STRIKE

It would take an inspired prophet, indeed, to predict what shall be the outcome of the strike over prohibition, which appears to be more violent than ever. Both wets and drys claim that their respective sides are making headway, and both can point to facts which seem to justify their contentions—provided each side selects the particular facts at which it points.

Intimations from Washington are to the effect that President Hoover may have difficulty in selecting his commission on law enforcement, as he doubtless desires on law point, fair-minded men, whose standing will insure the confidence of the country.

But where can high-class men be found who can justly be said to be impartial in this matter? Practically every thoughtful person in the United States has made up his mind concerning prohibition one way or the other by this time. Those who believe prohibition can ultimately be enforced in a reasonable degree will stick to prohibition. Those who believe that it is already a failure will be disposed to favor its continuance, although they realize the difficulty of making any material change in the Federal law.

## FARM RELIEF PLANS

More clouds appear on the farm relief horizon, according to observers of the situation in Washington, who see the possibilities of a clash between Congress and the executive branch of the government over the forthcoming bill.

It is generally thought that any law which may be passed will provide for some kind of a farmers' board to administer the act. Secretary of Agriculture Hyde agrees with this plan, but wants the board to be a part of his department. Farm leaders in Congress want the board to be an independent establishment not subject to executive control.

The farm leaders propose advisory councils of farmers for each kind of crop, stabilizing corporations, and what not. Of course there must be a large force of experts, inspectors, clerks and employees of many kinds. With a proposed appropriation of \$300,000,000 to handle, there must be plenty of new government jobs.

It may not be too cynical to suggest that only those who get on the payroll will get very much real relief in the long run.

## PICTURES AND RED TAPE

News pictures of the recent Foch funeral in Paris got entangled with government red tape. Young Foch was delayed about 12 hours in reaching newsmen and readers, much to the consternation of those who spent a lot of money to get them here.

The ship bearing the pictures arrived in the evening after custom hours, so the reporters who were told to be on hand to receive them were told that there would be nothing doing until the next morning at 8 o'clock.

The officials for a time argued over the right of hiding behind government regulations in order to avoid giving service to the public.

But that is characteristic of government, more or less generally. Regulations, no matter how foolish, must be slavishly followed. If red tape conflicts with common sense, then common sense must stand aside.

## PRINTING THE NEWS

When we have a disagreeable story and when we have no use for it, we often get a troublesome problem. In case of a person who is unsatisfactory to a public trust it is not difficult to decide, because the public interest, as well as the public's right to know the news, demands that it be printed.

But there's a catch in it. In most cases the famous folks do not write the articles which they are supposed to write. They merely give a regular writer an outline of

what they want to say, and he does the rest. When the work is finished the celebrity gives it his OK, and it is published as his own.

Of course there are many prominent men and women who actually write the articles and books which bear their names, but in the case of stage people, politicians and other sport champions, politicians and even business men, the actual writing is usually done by a professional, known as a "ghost writer."

## The TOWN DOCTOR ::

(The Doctor of Town)

SAVS

SELLING A TOWN IS LIKE SELLING ANYTHING ELSE

If you are a THINKING resident of the place where you live you desire that the TOWN DOCTOR be published.

Before you get ready to print it, however, and before you sell it to others to share in the profit, you must be sure that it is a certain amount of study and analysis necessary.

It is necessary to know what is good business, what is bad business, what is not good business.

The first question to be answered is, "Is there a market?" demand for it.

The demand for good, live, wide-awake communities greatly exceeds the demand for bad, dead, listless communities.

The second question is, "Is there a market?" day people are asking.

The third question is, "Is there a market?" day people are asking.

The fourth question is, "Is there a market?" day people are asking.

The fifth question is, "Is there a market?" day people are asking.

The sixth question is, "Is there a market?" day people are asking.

The seventh question is, "Is there a market?" day people are asking.

The eighth question is, "Is there a market?" day people are asking.

The ninth question is, "Is there a market?" day people are asking.

The tenth question is, "Is there a market?" day people are asking.

The eleventh question is, "Is there a market?" day people are asking.
