## Prairie View Stock Raiser Is Suing Irene Castle McLaughlin for \$10,000

William Schneider, Prairie View stock raiser, is plaintiff in a civil suit against Irene Castle McLaughlin of Lake Forest, former famous dancer and movie star. The case now being tried in court at Waukegan grew out of a suit against Schneider which was brought by the former dancer. Mr. Schneider is suing Mrs. McLaughlin for \$10,000, which amount he attempted to prove in court Tuesday is due him. First, he explained that his several appearances in courts in Cook county where he eventually was dismissed, cost him \$12,000. Mrs. McLaughlin has signed complaints charging him with disorderly conduct, cruelty to animals and maintaining a nuisance. He was fined \$10 on one complaint by Justice of the Peace William Ward of Des Plaines, but appealed to Judge John Pryzanski of Chicago, before whom he was found not guilty. Schneider denied that he had been dead during the play, and that he had been buried or burned those that died. He admitted on cross examination that he had been ejected from the woman from his farm on one occasion. The appearance of the once famous

### VOTE FOR EDWIN WIEMUTH

FOR TOWN CLERK TOWN OF CUBA LAKE COUNTY, ILL.

4 Years of Clerical Experience

**ELECTION**

Tuesday, April 4, 1933

### To the Voting Public of Cuba Township, Lake County:

Upon the numerous requests of my friends and after a thorough study of the situation, I have decided to be a candidate in the April 4th election for the office of ASSESSOR in Cuba Township of Lake County.

It is obvious that the tax situation is of paramount importance to everyone at the present time and I am intensely interested in the problem. I am of the opinion that drastic changes must and will be made before business, either great or small can recover sufficiently to enable business concerns to employ people at wages that will promote prosperity.

I have lived in Barrington all my life and have been a resident of Lake County for the past ten years. I feel that my education and practical business experience qualify me for the office which I seek and I aim to devote to the work all the time necessary for efficient performance of duty.

I earnestly solicit the support of those who have confidence in my ability to serve them in this capacity.

**HAROLD F. GREBE**

# Hundreds of MEN are helping wash these clothes...

IN THE OLD DAYS women washed alone. Every week they spent arduous hours bent over a washboard, scrubbing dirt loose from grimy clothes... twisting out rinse water with arms that ached.

But modern wash-days are different. Home laundries are now equipped with electric washing machines that hum as they work. A switch is snapped—and clothes are quickly swished clean in hot sudsy water that hands hardly have to touch. Another switch starts a motor-driven wringer to turning. Washing isn't a day-long ordeal any more. It's easy to have everything out blowing on the line in two short hours.

## SPECIAL DURING MARCH

We're featuring two outstanding washing machine values this month—the new Conlon and the new Thor. Both have firm-but-gentle agitator action, modern swinging wringers, easy-to-clean enamel tubs and many other features of washers priced much higher. Either the Thor or the Conlon is specially priced during March at only \$49.50 \$25.00 down and \$4.20 a month—cash, only

AT PUBLIC SERVICE STORES AND OTHER LOCAL DEALERS

"Behind the scenes" of this modern home laundry is an interesting picture. Actually, hundreds of men are helping with the washing. A complicated system of service is operating. Conveyors are feeding tons of crushed coal into boilers. Powerful turbines are roaring. Miles of copper wire, deep underground and high overhead, are alive with electricity. Turn a switch any time, day or night, and this electricity goes instantly to work for you.

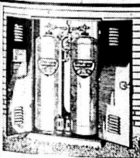

In the average home in northern Illinois it costs just a fraction over a cent to run a washing machine for an hour. And electricity speeds through other once-tedious chores just as economically—sweeps carpets for less than a penny an hour—irons clothes for less than a nickel an hour. It toasts bread, bakes waffles, heats chilly corners, brings bright cheerful light to every room for a trifling sum.

In spite of the great variety of uses to which it is put in every home, the cost of this electric service is only a small portion of your family budget. Have you ever tried to figure where else you can get more comfort and convenience?

## AGAINST WAR

Eight thousand World war veterans of all nations except Germany and America, who engaged in the war met in an anti-war demonstration at Geneva Sunday. These veterans, blind, crippled or otherwise partially or wholly disabled represent the true feeling against international conflict which is held by the vast majority of middle class people throughout the world.

These veterans can do more to prevent future wars than five times their number of persons who have not had direct experience in war. We believe that peace will eventually triumph. "As long as there are peoples, nations, and human emotions there will be wars" is not part of our own belief. The history of civilization dating back 6000 years is in a large degree a record of military triumphs. However, civilization is progressing. The next 6000 years and even the next 100 years need not be patterned after the last six thousand. Following is a report published by the New York Times and Chicago Tribune of the veterans' demonstration at Geneva:

Geneva, March 19.—Eight thousand veterans of all battle fields of Europe, many blind, crippled or gassed, met here today in an anti-war demonstration that moved spectators to tears. Representing 8,000,000 men who were trying to kill each other fifteen years ago, and speaking for 8,500,000 comrades who had killed each other, they came "to save our children and civilization" from the danger of "the return to barbarism," they saw lowering.

The enforced absence of the German delegates emphasized that danger. It was the first time the two greatest international veterans' organizations had held a joint meeting. They are known by their initials as GI and P and represent every major national veterans' association in the world.

The veterans in resolutions demanded real disarmament, an abolition of private profit in munitions making, and an end in glorification of war and "poisoning" of the minds of children.

The American Legion did not participate in today's manifestation. It was authoritative, but privately explained that the American Legion refused to accept the majority resolution only because of the clause demanding the suppression of private profit in the arms business.

## A CHALLENGE

Present unrest and disturbed conditions have brought us face to face with the problems of our own progress.

We have advanced far in science and invention, most of all in the manufacture of machines. We find that we have advanced beyond the mentality and ability of the average person to properly use to best advantage that which we have made.

We are met by a challenge. Are we going to be controlled and dominated by the inventions of genius and swept off our balance by material advancement, or are we going to use these things for the betterment of man's condition?

I have no doubt of our ability to control our inventions and harness our material advancement to the best advantage—but we must go back to the foundation of successful living so that our social life may develop along with our scientific advancement.

We must cease to some extent, the worship of the god of pleasure, and curb our money-mad dispositions. Love must rule in the home for that fundamental institution to maintain its proper position. Honest dealings between all peoples must be the basis of trade and fellowship to restore confidence now lacking. Collapse follows greed and selfishness. All the virtues of clean living must be honored to prevent degeneration.

We are learning anew these things, I believe, but we have lapsed in our regard for them because of too much material prosperity. Our inventions and scientific progress for a time almost overwhelmed us, but with the exercise of common sense we can keep in balance our social, spiritual and economic factors.—Reville, Port Gibson, Miss.

## GEORGE WASHINGTON'S TRAVELS

ONE OF THE MOST UNFORTUNATE INCIDENTS OF THE REVOLUTION WAS THAT OF BENEDICT ARNOLD, HEAD OF SAGADO AND QUEBEC. AFTER BEING WOUNDED AT SAGADO, HE WAS GIVEN THE COMMAND AT PHILADELPHIA, WHERE HE MADE THE ACCORDANCE OF GEORGE ARNOLD IN COMMAND AT WEST POINT ON THE HUDSON, AND THERE IN AN EYE, ARNOLD PLANNED TO TURN THIS IMPORTANT STRONGHOLD OVER TO THE BRITISH.

## Wandering From This to That

Homey Every Cooperation  
Within a few days the sales tax enacted by the general assembly will become a law.

The patriotic and devoted spirit which has made it possible for the people of the United States to meet and deal with each crisis that has arisen in their history is still alive and dominant. Governor Henry Horner has urged: "They have shown their willingness to do all in their power to insure the success of the measures which have been proposed by state and nation to remedy the conditions from which they have suffered. As a result of this patriotic unanimity better things are already in sight for all of us throughout the nation."

"There in Illinois the same cooperation of all citizens will bring about the same results. In our state the will of the majority of the legislature of all parties joined. With this measure a law, the way out of our dilemma is clear.

"With the full patriotic support of the people of this state, the beneficial results will be obtained. The machinery for this is now being planned by the state department of finance, which is charged with the duty of collecting the tax, and with authority to prescribe rules and regulations governing its operation.

"This is no small task, and perhaps two or three weeks will be required before the machinery for its collection will be ready to operate. It is necessary to guarantee the smooth functioning of this new measure, and therefore it is necessary that those who pay the tax as possible."

Stretching the Life Span  
The capacity of a human being for long life has increased very little if at all since the beginning of historic times. As far back as authentic records go men have lived well into the third century.

On the other hand, there has been a tremendous increase in the number of people who reach the fifty. More people survive to experience the old age which was once the privilege of a few. This is the world's history. Because of this the average length of human life has increased to a marked degree during recent decades.

Between 1900 and 1929 the average life of 10 in the United States increased about 6 years. That figure sounds rather small. Apply it to a population group no larger than Illinois, however, and the increased length of human life is reflected more in the number of people who are expressed in nothing less than astronomical figures.

Each year upwards of 10,000 new babies arrive in Illinois. The average life expectancy of these children is only 6 years greater than was that of their parents at birth. Thus an average of well over a half a million years of human life is added to each generation in Illinois.

REVIEWPOINTS  
The editor of The Review has authorized me to make a correction on an article in last week's issue of his paper. In the issue he said that the anti-communist speaker denied my information. I asked him if it was himself that denied or if someone else said and told him that so. The editor replied that he had not seen or talked to Mr. Bradley, but that three persons present had given him the information. I replied, why don't you print your paper that way? Give the people just what happened.

So the editor suggested I use the opinion column to make the correction about that article. Mr. Bradley, the speaker, asserted that on account of the threat and other amusements on Sunday evening the churches of the North Shore district cannot get an audience unless they had this kind of parrot or red meetings. I think that is just what I said originally. People do not like to be misled by high powered orators who are war men, we are called pro-Germans, slanders and other names. There is no danger of war very soon. Our present form of government is practically scientific and that seems to be quite satisfactory to the nation. The president's last move in closing all the banks is nothing but socialism; and that quick move of our executive is one of the greatest that could have been made in this critical moment. Once more let me ask you to be able to distinguish facts from propaganda in listening to any oratory of publication.

WARD FLOCK.

## Direct Primary Law

The early system of direct election of county officers was the Crawford county system used in Wisconsin in the 1800s. Minnesota adopted the direct primary for Hennepin county in 1860, but Wisconsin was the first state to adopt this method for all nonjudicial in 1885.

**Overreach Themselves**  
"Some men," said Uncle Eben, "beats to get so much fun out of selling hard luck stories that it doesn't seem like it was done 'em any favor to help 'em along in life."—Washington Star.
