ADMITTED NUMBER 13

Sales Tax Will  
Go Into Effect  
Saturday, April 1  
3 Per Cent Must Be Charged  
on Merchandise Sold  
by Retailers

The members of merchants will add the general sales tax to all articles purchased in April 1 and thereafter. The tax is to be levied on the constitutionality of the measure.

The tax measure will be kept separate from other funds. If the tax is upheld, the merchants will be charged at the present (fiscal year), sharing excess revenue with the state. If the tax is struck down, the tax will be returned to the taxpayers.

In opposition against the tax, the state Justice Brown said in circuit court of appeals that the tax is illegal.

For porting movement and other taxes were introduced in Springfield.

On April 1, the first sales dues will be levied. Reports indicate that the tax will shortly affect the sales of the stores of Chicago's merchants.

Officers of the Chamber of Commerce Will Be Elected Friday

Annual Meeting at Village Hall; Proposal Planned for Two Groups Affiliations

Election of officers of the Barrington Chamber of Commerce will be held at the meeting of the annual meeting of the organization in the village hall Friday evening.

The meeting will include a dinner, the new executive slate, a discussion of the annual budget, a vote on readjustment of the annual dues, and transaction of other business.

The Chamber has been over a period of years, one of the active organizations of Barrington and has been instrumental in the many improvements and developments in the village. During the last year activities of the Chamber and its affiliated organizations have been curtailed because of restricted finances.

The present officers of the organization, Mr. Eliot F. Peacock, Mr. Sam Gieseke, vice president, Frank Plage, treasurer, and Ed Langen, secretary, will be reelected.

The plan has been made that the Barrington Business club affiliated with the Chamber and its affiliated organizations will be mustered together.

Business men will be invited to the meeting of the club.

If enough of the business club members are present at the meeting Friday night, the proposal for affiliation will be acted on.

It is the desire of the business club members to benefit from the experience of the business club.

The girls will make a special effort to make the new executive slate a success.

## LAKE ZURICH REVIEW

### L. Zurich Grade School is Given Superior Rating

State Superintendent Dedicates Institution to Higher Rank

An event of which Lake Zurich can be justly proud occurred on Tuesday evening March 21, when 250 parents and friends gathered at the school to witness the ceremony of the dedicatory exercises, which added the school to the relatively small group of superior schools in the state of Illinois.

The exercises opened with a prayer by the Rev. E. A. Irion following which a program was given by the pupils of the school. This included a solo by Alice Lounis, a saxophone solo by Frank Heyckel, a piano number by Marilyn Prehn, and a trio, played by Arletha Lounis, Alice Lounis and Frank Heyckel. This trio sang into a march which included onto the platform the entire school body, who took over the recessional program.

Songs of soldiers were sung by the distinguished guests present. The history of the school was given by Donald Young. The day was opened with the singing of "Salute the Flag" was given by the four youngest grades, and "Our Flag" by the tiny tots in the first grades. The four largest grades sang "Our Flag" and "My Flag," and the whole school body recited "My God," which was a fine pledge of American citizenship.

This program, which was conducted by a woman, was well received by eight little girls from the second to the sixth grades.

The chairman of the school board, Charles Rosinski, not introduced, W. C. Petty, Superintendent of schools in Lake Zurich, who in turn, invited a few chosen guests to witness the opening of the Illinois Practice G. Blair, superintendent of public instruction for the state of Illinois.

Mr. Blair's speech was a tribute to the vision, preparation, the unfailing loyalty and devotion to duty, which on the part of both the school board and the teachers, are indispensable to the success of the work of this school to the high rank it has attained.

"You cannot create a maintenance, a service, a school, a teacher, a teacher," Mr. Blair said. "A sensible teacher never has, and never will create a superior school."

Mr. Blair also pointed the parents and the citizens of Lake Zurich who have been aware of the necessity of a first class school in the community.

At the close of Mr. Blair's speech he presented to Edward Young, clerk of the school, the diploma which certifies the advance of the school to superior rank, and a large outside market for the building, which in large gift letters reads, "Superior School."

The opening closed with a social hour, when Mrs. Albert Prehn, assisted by Madeline Bauer, Goring, Warren, Clements' Blau, Irion, Rudolph, Schaefer, Basinger, and Gieseck and Gieseck, served a delicious lunch. Opportunity was given visitors to inspect exhibits of the pupils' work.

Charles Rosinski, Herman Borch, and Edward Young are members of the school board and the faculty consisted of Mrs. Peter Jensen and Mrs. Albert Heyckel.

### Great Lakes Plan for Unemployment Relief Will Not Be Worked Out

The unemployment relief plan of utilizing the Great Lakes Naval training station for housing and providing vocational training for young men will probably not be carried out.

The commandant of the station offered a plan to the administration which would have utilized the Middle West, including hotel and institutional buildings along with character building training.

This was for the purpose of removing the youths from the naval station and placing them in the house of representatives have voted down a similar and more sweeping proposal for army camps. It is assumed that the new proposal will also be dropped.

Efforts may be made to secure an authorization from congress for the administration to implement the plan, and at the same time would greatly increase the efficiency and value of the navy.

The question now is to be transferred to the Great Lakes station during the next two months will be doubled, according to word received from the naval station, by Rear Admiral W. T. Tyler, commandant.

**Held That Earth Is Flat**

Georgius Agricola, an Alsatian cosmologist of the 16th century, wrote "Christian Topography" and propounded the theory that the earth is a flat disc bounded by four walls which at the center converge to form the dome of the firmament.

On Thursday, March 23, 1933, at a meeting of the study club, it was decided to place the theory on the reading room at the library by the literature committee of the club of which Mrs. R. Hammond is the chairman. It is interesting and revealing to note that the study club has been organized, concluding with the name of "Study Club."

Mrs. Robert Weller, president of the Barrington Club, was the leading person in the recent nature books. In introducing these, she said that while we have no control of the world in which we live we can enjoy it more. Within 200 miles of Chicago 240 kinds of butterflies have been observed, a single observer may hardly hope to see more than 100, and we have 18,000 species of butterflies in New made plain to the insects in one city is and indeed 500. She stated that these butterflies which are not in the same species which are not in the same way.

The authors of the first two books have appreciated each other's work, and have had a pleasant time in discussing them.

The first book presented is "The Life and Death of a Butterfly" by Frederic Schaukard written in German and translated into French. Mrs. Weller is to read the French.

The book received the grand prize at the Academy of Berlin.

The author is a man of 80 years of age, and has written 100 books on butterflies.

He also puts himself into the spirit of a butterfly, roaming all over the world.

The book contains 1000 photographs, 1000 drawings, 1000 markings on the wings of the liveliest of butterflies.

"Peacock's Eye of the Day" by Olivero Toscani, "Sheila" and "Caterpillar of Admiral" at a large collection of beautifully mounted butterflies.

He also adds to the interest of the book.

The second book is "Turtle the Otter" by Harry Williamson, a man of 70 years of age.

At the end of the war he returned a greatly disfigured man but found his salvation in nature. This book won for him the grand prize in Berlin in 1928.

The otter is very common in England and is hunted for sport as well as for fur.

The book contains 1000 photographs, 1000 drawings, 1000 markings on the wings of the liveliest of butterflies.

The author has written 100 books on butterflies.

He also writes on the life of butterflies.

Men We Like to Meet

What is the year 1933 going to bring us? A great many people are asking that same question. The months have almost passed and we must all admit that great changes have been taking place both at home and internationally. These changes were brought about by a change in leadership at home in our own U. S. A. and in the world. Franklin D. Roosevelt is responsible to a very great degree for these

## LET BUSINESS DO IT

Day by day in every walk of life more and more persons are being converted to the old principal of laissez faire. They are fairly forced to that theory by the costliness of socialism now practiced by both state and federal governments.

We are not complete laissez faire ourselves, but we firmly believe that business and business only can put idle men permanently back to work. If unhampered by costly and in many cases absolutely unnecessary government regulations and if freed from the heavy tax burdens of today and the cloud of heavier burdens tomorrow, business will improve steadily and will create employment to cut down the number of men now out of work. This fact was convincingly proven during the first week or two after the banks' re-opening. The president first made a masterly stroke by straightening out our financial disorder. He then obtained authority to cut down the federal expenditures more than half a billion dollars. Agriculture, stock markets, industry and business in general showed a marked degree of improvement. The general public even caught the idea of improved conditions through curtailment of government costs, and people began to spend money.

Closely on the heels of the plan for trimming expenses, the administration offered gigantic plans for creating employment, helping agriculture to improve, taking over home mortgages and farm mortgages, all at the almost inconceivable cost of seven or eight billion dollars. The stock market and grain market responded with a resounding crash, business in general is not now moving ahead.

On Saturday consumers in Illinois will start paying money in the form of a sales tax. This device is for the purpose of raising money to feed the unemployed. Business will be given another severe set-back and more people will be thrown out of employment. We invite your attention to a news item appearing on another page of The Review in which are listed 22 taxes paid in one line of retail business.

Oh why, can they not see that the dole system will not improve conditions. Business released from its taxation bondage will put men back to work which is more satisfactory in every way than the present plan of doing out subsistence to families of men not at work.

## WASTING LIFE IN THE U. S. A.

Statistics just published reveal that 33,500 Americans lost their lives in motor accidents during 1931, while more than a million, or approximately one percent of the population, sustained injuries in these accidents. This is an appalling record and the unfortunate part is that the figures for the past decade have shown a steady increase from year to year. Americans have several rather unenviable records as compared with other nations—records of the greatest amount of crime, of the highest fire loss and of the largest accident rate of any country in the world. Devotion of citizens to the principles of law and the maintenance of order and the electing of honest, capable officials will remedy the first, while carefulness will do away largely with the second and third. Too much rush and too little thought of the consequences are characteristic weaknesses of the average American and these accident figures prove it. It is hoped that when the figures for 1932 are published, they will show a decrease and that the campaign to promote safety will continue to bear fruit more fully in the future.—Record, Muskegon Heights, Mich.

## GEORGE WASHINGTON'S TRAVELS

IN THE YEAR 1780 COUNT ROCHAMBEAU ARRIVED WITH AID FROM FRANCE. AT THIS DISTANCE FROM THE HOUR OF GREAT ACTION ONE MAY WELL MARVEL AT THE CHARACTER OF THE MEN WHICH WASHINGTON CONTINUED TO DRAW TO HIS STANDARD. IN 1780 THE COURAGEOUS GENERAL LINCOLN MADE HIS UNSUCCESSFUL STAND AT CHARLESTON, SOUTH CAROLINA, AND IN THAT YEAR ALSO GENERAL GREENE WAS APPOINTED AS COMMANDER OF THE SOUTHERN FORCES.

## OUR WASHINGTON LETTER

By National Editorial Association  
(Special to The Review)

TACIT ADMISSION reveal that the solons are chaffing under what they regard as a dictatorship which has temporarily stricken congress. The president has been granted the right to veto bills. The president's effort to economize through elimination of scores of expensive federal agencies has been successful. Only last fall the administration was on trial during a period of national stress which could account for their acquiescence to the Roosevelt's program of recovery. The administration's program of recovery has fallen on deaf ears as a moratorium is in effect from depression. The leaders have advised the people to go on with their business in as patriotic a duty—an order which embarrasses blind partisans to no end.

CHANGES OCCUR with such rapidity that it is well nigh impossible to chronic the trends within a few weeks. It is well to note that the wealth of the nation is in the hands of a few individuals. First, when you have time to catch your breath in the whirl of events, it is well to note that the wealth of the nation is in the hands of a few individuals. Others have been alienated solely to protect their political future. The president has been quick to seize his advantages to put through his program. It is well to note that when the congress can ill afford to openly oppose him. In brief, their policies are turning out to be the exception of banking matters have been more obstinate than voluntary.

## UNMISSABLE EVIDENCES OF THIS RIDE OF DISMISESS AGAINST Hasty Disposal of Vital Legislation has crept on in congressional quarters.

With the banking emergency handled with deft and dazzling speed and the other major financial problems solved, the administration has indicated that they represent the rush of bills while places them before the Illinois legislature. Our lawmakers were like weather-rocks turning over to the wind. Now they find themselves in the hands of day laborers who have been set to settle back into their routine methods.

Their disposition may be easily predicted. Robins' bill to provide a statewide farm relief, new plan for alleviating unemployment and other subjects of less urgent character than the financial and financial condition and erecting federal bulwarks to our banking system.

THE FARM SECURITY ACT which is to affect the million farms must go through the congressional wringers. There is a chance that this subject may be blended with the domestic allotment plan to form a single bill. The bill is to be introduced in the general order that companies are to pay a portion of the cost of the plan to the local township boards the use of the allotment plan is to be set up in a closed bank. A county, Attorney General Kerner said, is only responsible for the participation of the state in the plan.

The number of houses is getting smaller and smaller. The cost of labor and there is no chance of increasing the number in a hurry, he explained.

There are only about 1,000,000 farms in the state. A county, Attorney General Kerner said, is only responsible for the participation of the state in the plan.

There are only about 1,000,000 farms in the state. The conditions in Shelby county can be taken as typical, and Robins says that the bill will be introduced in the general order that companies are to pay a portion of the cost of the plan to the local township boards the use of the allotment plan is to be set up in a closed bank. Week's Pin Series

Trailing Teams Stem Gain  
Leaders in Barrington  
Bowling League

Last week found the weaker teams proving to be stronger than the strong teams in the Barrington, Crystal Lakes, and Lakeview pin leagues as compared to the 1932 season. The teams at the top of the list were the ones which had the most wins last week. Last week, however, was paired with the first week of the season. The top three teams won eight, Lang and Schaefer each won seven games each, while the others won six.

## Scientists Say "Peking Man"

The Peking Man is a strange species of man who lived in the caves of China 300,000 years ago. He had hands like a modern man's, according to Prof. G. Elliot Smith, the noted anthropologist.

Discussing new discoveries in the cave at Choukoutien near Peking, Professor Smith said that they throw new light on the mystery which has puzzled scientists ever since the Peking skull was found. Hitherto it had been assumed from the abnormal small, flattened skull that the Peking Man was only about the size of the ape in the scale of intelligence.

"During further exploration of the cave," said Professor Smith, "a small bone from the wrist was found which showed that he had the hand of a modern man's. This is exceptionally interesting as it adds most powerful evidence to support the belief that the hundreds of stone implements found in the caves were used by the Peking Man."

"It now appears that the Peking Man had hands essentially identical with modern man's, and we are justified in the inference that the tools were made by other primitive people."

"From the shape of other small bones found it would appear that the skull of the Peking Man differed from that of a modern man in that he was not straight, and he must have walked holding his toes in, as the ape does. There is nothing to show, however, that he was able to grip with his feet as the apes are able to do."

## Coylone Only President

**Swon by His Father**  
Calvin Coolidge was the only man to be sworn in as President by his own father. The incident is one of the most dramatic in American history.

Shortly before midnight of August 2, 1923, the news came that President Coolidge had died in San Francisco. The message came to the Vice President, who was at a hotel at Bridgewater, the summer telephone point. The secretary drove at breakneck speed to Plymouth.

Col. Frank Coolidge, the Vice President's father, had been the secretary's man. He went calmly upstairs and awoke his son.

Coolidge came down after dressing himself, and when he did, he said that his duty was to remain in office and that his aged father as a notary had the power to administer the oath.

It was 8:47 on the morning of August 3, 1923. Calvin Coolidge was sworn in as President of the United States by the light of a flickering oil lamp in the old-fashioned living room of his father's home.

## History of Movies

After the invention and development of photography, many investigators worked on the problem of picture motion. Edward Muybridge is often cited as the "father of motion pictures" because of his studies in 1872 of the movements of horses and other animals by means of a row of 24 cameras, exposed in

order to catch the movement.

A resident of the township for 32 years.
