#### NO ECONOMY FOR SUBURBS

Professor Merriam of Chicago university in an address Protesspr Metram of Chicago university in an address before the LaGrange Civic clib, outlined a plan of his own that involves a state of Chicago and environs with the pos-sible inclusion of a portion of the state of Indiana in the me-tropolitan district. He opposes the Griffenhagen plan as being too drastic and declares that no action should be taken without the propositions being submitted to a vote of the

without the propositions being submitted to a vote of the people.

When asked to show where the proposed plan would work out economy to the taxpayers of the country towns, Professor Merriam wai unable to give any satisfactory answer. Nor have any of the proponents of metropolitan district plans been able toshow the economy, although all declare that is the prime motive of their efforts.

Speaking of representation, Professor Merriam, in his LaGrange activess commented on the fact that the country towns of Cook county were entitled to far greater representation in the general assembly at Springfield than they are now enjoying. He understood there were but four representatives in the general assembly from Cook county towns and thought there should be at least twelve according to the population of this area which is 605,000. It is a fact that the representation the Cook county suburbs now enjoy in Springfield is two state senators, Huebsch of Brookfield and Barbour of Evanston, and four members of the lower house, Ickes, Foster, McGrath, from the seventh district and representative Slater of Evanston from the sixth district.

#### NON-PARTISAN

NON-PARTISAN

Another of the pieces of legislation that is being viewed with considerable disfavor among suburbanites is the group of bills which propose to hold the township elections and the village elections in November instead of in April as was done this year. Most of the representatives of the country towns are in favor of the non-partisan lines that have aligned friends in vilage and township politics regardless of country, state and national party lines.

They point out that the changing of the date to the general election in November will inject party politics into all the township and village offices with the result that the non-partisan character of these governments will be effected.

It is not thought that sufficient of the members of the general assenbly can be corraled to vote for this bill but the association feels that every piece of legislation should be scrutinized and the members of the general assembly representing this instrict should be informed of the views of the

senting this district should be informed of the views of the association on these measures

#### DOLE, BUT UNPAID TEACHERS

DOLE, BUT UNPAID TEACHERS

The 13,600 Chicago school teachers, unpaid since last June, have taken a lesson from the foreign element in Cook county, which is getting most of the emergency relief funds at the rate of \$7,000,000 a month. The favorite threat of the corporation counsel when he appeared in Springfield for relief legislation was that the unemployed would riot and the state would have to maintain the national guard in Chicago unless funds were forthcoming.

Now the teachers are parading and calling on people at the most inopportune times. They chased Acting Mayor Corput of Grant Park when he wanted to make a speech at a flag raising, it was reported. They marched through the bank of Melyin A. Traylor, who is claimed to be the overlord of the democratic machine in Illinois.

bank of Melyin A. Traylor, who is claimed to be the over-lord of the democratic machine in Illinois.

It would take many volumes to set forth the reason given for no paying the teachers, but the fact remains that Chicago has found nearly \$75,000,000 in cash for the dole while the working teachers have been ignored. Other city employes—the political payrollers—are only two months be-hind in ordina their wages. hind in getting their wages.

Men must expect to work and sacrifice for their work if ey are to accumulate enough of this world's goods to live with any degree of comfort.
