HOPE IN A FREE PRESS

HOPE IN A FREE PRESS

Freedori of the press is ever an alive and active topic. Every day, in every community stands the man or woman who would juxuzle the press, who would censor what the press has \$6 say. But when it comes to finding the proper press not do the censoring, even the advocates of censorship run amuck. Censorship of the press, of the church, of school books, of the man at the curbstone, is absolutely the right thing to do? The only trouble we find in carrying out this right is to find the right man to do the censoring.

If you fer 'agin' religion, you don't want the preacher to be the bosor. If you try to live a life of abstinence and want othors to live that way, too, you don't want to let the wets do tipe censoring. The believer in war does not want the pacifist o censor and the pacifist argues that war propagands should be censored.

The frikers of the American constitution saw with what difficties the nation would be confronted in years to come whet hey wrote in plain language that "Congress shall make no like respecting an establishment of religion, or prohibiting the free exercise thereof: or abridging the freedom of speech; of the press, This phase of the constitution, like all other phases, has been violated many times. Warsalways brigs about censorship of the press, because those fighting by war in upholstered offices, are anxious to fight it their owners.

As a pople, let us always cry for a free press. The right is dised but much less so than would be a censored press. Me'i's freedom goes hand-in-hand with freedom of the press, "Censor the press and you peopardize your own liberty.—Ut.-Advocate, Juleburg, Colo.

THE MORGAN INQUIRY

The sorate investigation of the firm of J. P. Morgan & Company Speals astonishing facts and conditions. Acting a banker jau priceiser for large industries Morgan apparently handles industrial and public stocks and bonds and

ently handles industrial and public stocks and bonds and sells then be his preferred customers at prices far below those paid for. Dese same securities by the public who patronize the stock fixchanges.

Cruder illustrated, the method is about the same as though your friend the merchant, would sell you a suit of clothes fee; \$20, even though the same suit was in the window display marked \$35, which would be the amount the regular prechaser would pay.

It is affered by the senators, and that belief seems to be shared by the public, that when Morgan & Company invited the inpost promihent men in the nation to buy a definite amount of gertain securities at almost half their market value and whend fosse men made their purchases they placed

and when those men made their purchases they placed themselve, under obligations to the big bankers. Under Such conditions Secretary of Treasury Woodin and some renators and judges appear in an unfavorable light.

BUILDING ON THE SOUND

BUILDING ON THE SOUND

The indency of government in this country is to take money from those who have saved and loaned and divide it among hose who have spent and borrowed. From whence is the meiger to come that is to stimulate business recovery and put is back on the road to normalcy? Not from the government, because the government has no money except that whice it takes from the people who have the government. And the people who are to furnish the money for government relief, the people who are to buy the things which are to keep the mills running and turn idleness into employment, are shose who are classified as "poor savers."

It will take skillful maneuvering to weather the storm. What is sedded is wise planning, that takes into consideration the isan who still has a job, and the business which is still runnings. We must build from that which is still sound, which is still functioning. And we cannot do that by destroying it the jugh additional tax burdens either national, state, or local. Greenfield Argus.

THE PRESENT GENERATION

Today there is more sentiment and brotherly feeling manifest, in the world than for many generations.

More are living on the same level. Until the present there we're thousands, who because they had not experienced it, could not sympathize with those neighbors in financial

distress Suffering and privation bring people closer together. A certain prinerosity of heart comes to the surface where before mass never knew it existed.—News Van Nuys, Calif.

"The use of land is the best form of unemployment in-nce.".—Henry Ford.

No man's so ignorant but may teach us something.

What we need is an automobile that is afraid of trains.

Hoffesty is put to a hard test in hard times.

Some men are known by their deeds, others by their
