BARRINGTON REVIEW, BARRINGTON, ILLINOIS, THURSDAY, JUNE 15, 1933

plot that provides intriguing material

for the dramatic stage.

The best wave that swept the

country last week had to terror for

guests at The Catlow. Their large

cooling system proved entirely ad-

equated while the thermometer re-

corded 90 degrees and more outside,

the supply of cool, washed air kept

the temperature of the theater down

to a pleasant 75 degrees.

Peterson, Dorothy Wasmann, Grace

Hahnfeldt, Louise Hahnfeldt, Caro-

line Thorpe, Margaret Pauk, Mad-

eline Malcom, Wallace Papadopoulos,

land, Glenn Warner, Fred Romanus,

Paul Nordmeier, Arthur North,

Walter Haste, Carl Reimack, Robert

Jensen, David Beard, Roger Tarnau,

William Rembert, Donald Dearing,

and Oliver Fischer.

M. C. Dearing

was found dead in his bed last

Tuesday morning. Mr. Dearing pre-

viously had been in good health.

He was formerly employed at the

Common Free Co. as a chemist.

His funeral was held last Friday

afternoon at the home with Rev.

Bloomquist officiating. The following

program was given by members of

the class:

Piano solo, "Polonia"—Norman

Schneider.

Class history, written by LaVelle

Couture and Alfred Reegenberg—

read by LaVelle Couture.

Class history, written by Otto Frohne

and Vera Kramberg—read by Otto

Frohne.

Class prophecy, written by Harold

Berman and Judith Carroll—read by

Harold Berman.

The gifts to the class were dis-

tributed by Dorothy Gerhardt and

Arthur Haldeman.

Solo, "Sylvia"—Judith Carroll.

Presentation of class colors to the

junior class—Alfred Reegenberg.

Miss Elva Moss accepted the colors.

An exhibition of the beautiful work

done by the girls and boys was held

in the display room. The dresses

made by the girls were up to date and

very attractive. In the contest, Fran-

cis Cooper won first prize; Eleanor

Kraft, second, and Louise Winter,

third. The furniture display was most

interesting, each piece was an addi-

tion to any home. The boys sure-

ly deserve a great deal of credit for

the work.

The graduation exercises will be

held Friday night at Cutting hall.

35 Graduates From 8th Grade

The eighth grade graduating ex-

ercises of the grade school district

No. 15 were held last Wednesday

night at Cutting hall at the Palatine

Township High school. A play en-

itled, "The Four Shades of Home"

under the direction of Miss Rose

Bellon was enjoyed by all.

The class will be given by Mar-

garet Holland; the class prophecy by

David Beard and the class history by

Caroline Thorpe. Gen. Arps, presi-

dent of the board, presented the di-

plomas to the young people. The

class was a large one this year hav-

ing 35 members. They are as follows:

Kathryn Brown, Irene Gokhacht,

Eleanor Steinbach, Virginia Halper-

son, Helen Decker, Agnes Sullivan

Grace Erickson, Lucille DeLoe, Mar-

garet Holland, Janet Pomeroy, Leon

Players of Senior Class Win Audience With 'Cappy Ricks'

The play, "Cappy Ricks," one of the most popular of the season, was presented by the senior class of the Lake County Normal School, at the Catlow Theatre, Friday night, June 16. The play, which was written by the senior class, was a well trained and well rehearsed production. The cast was made up of the senior class members, and the production was a well trained and well rehearsed production. Lake County Board Asks Merchants to Give Poor Master Un-Refunded Tax

The Lake County supervisors have advanced the suggestion that merchants turn over unrefunded sales tax receipts to their poor masters according to superior H. D. Kelley. The board passed a resolution requesting that Lake county merchants return over money from unrefunded sales tax receipts to the local poor master to that such funds might be used for the relief of needy families.

The state supreme court in May ruled the sales tax, originally introduced as a relief measure, unconstitutional, approximately one month and 10 days after the tax had been in effect. The court at that time requested merchants to return collections upon receipt of sales tax slips.

Many receipts have never been turned in, so there is now the question of giving it over to poor relief will be difficult, at the same time absorbing merchants from the accusation of "profiteering" as a result of the tax measure, the superior said.

Relief Work and Beer Ordinance Objections Aired

Continued from page 1

streets of the village also was discussed. A suggestion was made to investigate possibilities of an adequate parking lot for commuters.

To Bar Heavy Trucks
A petition of property owners living on North avenue, which asked that heavy trucks be prohibited from operating on this street was received by the board. The complaint was that heavy transfer trucks were passing up two state maintained highways to use this street, which is maintained by the village.

A resolution designating the Harris Trust and Savings Bank of Chicago and the First National bank of Barrington as depositories for village funds was approved by the board.

Mrs. Roger D. Hay appeared before the board and asked if the village would prefer any further charges against Mr. Hay should he be paroled. He explained that the action of a parole judge depends largely on whether or not further charges will be filed after paroling. The board informed her that as far as the village itself was concerned it had no further charges to make.

Illinois to Get 18
Million for U. S. Roads
The state of Illinois will receive \$18,000,000 from the United States to be used in the construction of hard roads in the state.

Baby Clinic Meets Tuesday
The regular monthly meeting of the baby clinic will be held Tuesday, June 20 from 2 to 4 p. m. at the high school auditorium. Dr. D. P. Brooke and Mrs. Callahan will be in charge of the clinic.

New England Milder
New England's climate has grown steadily milder almost every year for fifteen years, according to meteorologist in charge of the Boston weather bureau.

Use of aromatic compounds to give a pleasant scent to textiles and other products is a practice gaining favor with manufacturers.

High School Students From 1875-1885 Meet at Annual Get-Together

The seventh annual Simons-Derby-Austin picnic was held Saturday afternoon, June 10 at the home of Mr. and Mrs. A. J. Leonard in Lake Zurich.

Simons, Derby and Austin were the names of the principals of the Barrington high school from 1875 to 1885 and their pupils with their wives and husbands gathered each June at the Leonard home. The 22 members that were present this year spent the afternoon visiting and reading letters from those unable to attend.

The following people from Barrington were present: Mr. and Mrs. A. J. Leonard, Mrs. Jennie Powers, Mrs. Mary Glorke, Mrs. Emma Brockway and Charles Boyce. Mrs. A. J. Leonard, formerly of Barrington was also present.

Memorial Services for
Mabel Grebe Wednesday
Continued from page 1

Naperville, where she was graduated with high standing. She continued religious studies at the University of Chicago, Moody Bible Institute, and the Evangelical Theological seminary at Naperville.

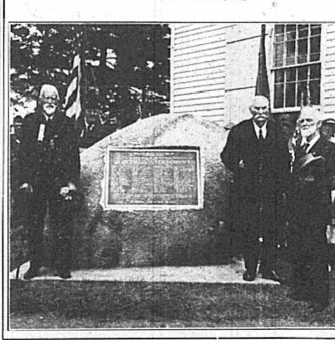

In addition to teaching at vacation bible schools, Miss Grebe taught religious education at Edison Park, Highland Park, Naperville and Barrington. She had been re-appointed teacher of religious education at Barrington and Naperville for the next school term.

Death was caused by diphtheria, following a short illness. Burial took place at Evergreen cemetery.

She is survived by her father, step mother, a sister, three brothers, a grandmother, one niece, three nephews, 10 grandchildren, 20 cousins, a husband of 10 years, her mother and a brother, Charles, preceded her in death.

Her unusual ability to tell Bible stories made her loved by her many pupils; she was a zealous worker, a faithful friend, and an inspiring teacher.

Will Check-Mate Grafting Motor Fuel Tax Collectors

It is reported that recently, inspectors have come to the attention of the motor fuel tax division of the state department of finance, that the state distributors of motor fuel have been retaining more than the law allowed as the cost to them for storing and reselling the gasoline tax.

An effort to curb this practice and bring into the state treasury the maximum amount of gasoline tax paid by the consuming public, the department of finance has placed a number of special auditors in the field with instructions to check the state and inspect and audit the books and records of wholesale gasoline distributors.

It is learned that one of the first localities these auditors will visit is Peoria and vicinity and that among the companies to be immediately investigated are some of the larger ones that operate in that territory.

Farmers Plan to Attend Dairy Day at Century of Progress Saturday

Farmers from throughout Lake county and Northern Cook county are making plans to attend the Century of Progress in Chicago Saturday when "Dairy Day" will be celebrated on the fair.

A visit to the dairy building, a continuous puppet show for children entitled "Why the Cow Jumped Over the Moon," and a ceremonial program in the evening emphasizing the tremendous importance of the dairy industry, will be the high spots of Dairy Day at the 1933 World's fair.

Do Your Part
"It's best to mind yob behavior," said Uncle Eben. "So long as you may have to depend on de laws for yob own protection, it's only fair to do yob best to perfect de laws."

Want Oleomargarine in
All State Institutions
There is considerable talk about the use of oleomargarine in the place of butter in the state charitable and penal institutions. If this is done, it will be a blow to the dairymen of Illinois.

Co-op Creameries Churn
4,000,000 Pounds Butter
Illinois farmers are now converting their own butter fat in three big co-operative plants at the rate of 4,000,000 pounds of butter annually.

Use for Feet
Feet has considerable value as a composting material, as a conditioner or filler for concentrated mineral fertilizers and as an absorbent in places where sewer systems have not been constructed.

Washed Air
A new spray booth minimizes fire and explosion hazards. Pigment, dust and other combustible matter is washed from the air before reaching the exhaust fan.

State to Get Money in Closed Springfield Bank

The state of Illinois will fully recover the money deposited in the Rigley Farmers State bank at Springfield. This will be on the grounds of its being a preferred claim.

Religion Bill Meets
Opposition at Springfield
Representative Frank W. McClure's bill to re-map the state of Illinois in congressional districts, has met with such opposition that it has little chance for passage at this session of the general assembly.

Use for Feet

HOPE IN A FREE PRESS

Freedom of the press is ever an alive and active topic. Every day in every community stands the man or woman who would muzzle the press, who would censor what the press has to say. But when it comes to finding the proper person to do the censoring, even the advocates of censorship run amuck. Censorship of the press, of the church, of school books, of the man at the curbstone, is absolutely the right thing to do. The only trouble we find in carrying out this right is to find the right man to do the censoring.

If you are "agin" religion, you don't want the preacher to be the censor. If you try to live a life of abstinence and want others to live that way, too, you don't want to let the wets do the censoring. The believer in war does not want the pacifist to be the censor. The pacifist argues that war propaganda should be censored.

The makers of the American constitution saw with what difficulties the nation would be confronted in years to come when they wrote in plain language that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press." This phase of the constitution, like all other phases, has been violated many times. Wars have brought about censorship of the press, because those fighting the war in unopposed offices, are anxious to fight it their own way.

As a people, let us always cry for a free press. The right is fought but much less so than would be a censored press. Men's freedom goes hand-in-hand with freedom of the press. Censor the press and you jeopardize your own liberty. — Cent-Advocate, Julesburg, Colo.

THE MORGAN INQUIRY

The Senate investigation of the firm of J. P. Morgan & Company reveals astonishing facts and conditions. Acting as banker and pricefixer for large industries Morgan apparently handles industrial and public stocks and bonds and sells them at his preferred customers at prices far below those paid for these same securities by the public who patronize the stock exchanges.

Crude, illustrated, the method is about the same as though the friend of the merchant, would sell you a suit of clothes for \$20, even though the same suit was in the window display marked \$35, which would be the amount the regular purchaser would pay.

It is believed by the senators, and that belief seems to be shared by the public, that when Morgan & Company invited the most prominent men in the nation to buy a definite amount of certain securities at almost half their market value and when those men made their purchases they placed themselves under obligations to the big bankers.

Under such conditions Secretary of Treasury Woodin and some senators and judges appear in an unfavorable light.

BUILDING ON THE SOUND

The tendency of government in this country is to take money from those who have saved and loaned and divide it among those who have spent and borrowed. From whence is the money to come that is to stimulate business recovery and put a back on the road to normalcy? Not from the government, because the government has no money except that which it takes from the people who make the government. And the people who are to furnish the money for government relief, the people who are to buy the things which are to keep the mills running and turn idle millions into employment, are those who are classified as "poor savers."

It will take skillful maneuvering to weather the storm. What is needed is wise planning, that takes into consideration the man who still has a job, and the business which is still running. We must build from that which is still sound, which is still functioning. And we cannot do that by destroying it through additional tax burdens either national, state, or local. — Greenfield Argus.

THE PRESENT GENERATION

Today there is more sentiment and brotherly feeling manifested in the world than for many generations. More are living on the same level. Until the present there were thousands, who because they had not experienced it, could not sympathize with those neighbors in financial distress.

Suffering and privation bring people closer together. A certain generosity of heart comes to the surface where before they never knew it existed. — News Van Nuys, Calif.

"The use of land is the best form of unemployment insurance." — Henry Ford.

No man is so ignorant but may teach us something.

When it is an automobile that is afraid of trains. Honesty is put to a hard test in hard times.

Some men are known by their deeds, others by their mortgages.

OUR WASHINGTON LETTER

By National Editorial Association
(Special to The Review)

Washington, June 14.—Hot weather here has not lessened the President's "big stick" of patronage in forcing an early adjournment of a rebellious Congress. The protest motions of the legislators have been rebuffed by the humidity. They do not relish the idea of a continued session especially in view of the mounting volume of mail received from constituents—communications of a critical nature which contribute to the ferment of unrest and uncertainty. These factors may eventually spell success for the major part of the President's program. The "die-hard" among those opposed to delegating wide powers to the chief executive admit that their battle for retention of power for the Congress is a branch is quite fair at this time.

The greatest confusion prevails throughout the country as to how the new industrial recovery bill will be interpreted and applied to industries and labor groups. The bill, which was responsible for the house bill at odds as to what will be the outgrowth of this legislation, is known as "the most revolutionary experiment in the annals of the country."

It is expected that the measure was purposely vague to permit the administrators wide latitude in decisions.

The uncertainty at the capital is having a paralyzing effect on all branches of industry. The business leaders are anxious that the government, under the terms of the bill, will have the authority to discard old laws and fast rules of management. The average citizen now indifferent to the bill, will soon find that the effects will mean something to him. The government will have authority to power down of minimum wages and hours of work—measures which figure prominently in every man's life. Until there is some definite action as to the changes which the law will bring to each industrial group, plans for a revival of business will necessarily be held in abeyance and the means temporary stagnation. Secretary of Labor Perkins is charged with being the moving force back of this program. Many business men insist that this is an idealist and that the reform type whose ideas however laudable are impractical. Miss Perkins, at least, is one who believes that she has access to the ear of the President.

The failure of high enforcement officials of the last administration to take action against questionable practices of big bankers will make hard the task of the new administration. The Senate has made it clear that it proposes a searching inquiry into all qualifications and into the business connections of all candidates. As consequence democratic attacks who were putting on pressure for jobs at the department of justice are not so keen for these honors. A man may be thoroughly ethical in his professional career but a belligerent Senate may choose to make mountains out of molehills. The real powerful men that Roosevelt leaders had in mind for berths of importance finally declined all offers rather than endure a Senate committee inquiry.

The Senate's power of confirmation results in unfair public confidence in the nation of otherwise reputable citizens proposed for government posts. There are many senators and representatives who will prefer traveling this summer and fall rather than face a Senate committee inquiry into their state in regard to recent financial and political amendments. They do not want to express an opinion which might backfire at the next election. The group from "dry" states are hopeful that the President will come to their rescue and make a direct appeal to the people on the basis that liquor must be permitted or more taxes imposed. It is an issue fraught with danger for lawbreakers. The dramatic chairman plans to sell the idea of quick repeal on the taxation and not the railroad reorganization plan of President Roosevelt may not escape unscathed in committee. Efforts to expedite consideration of the measure have been side-tracked. The proposal has so many ramifications that the railway brotherhoods apparently have the appearance as they have practically written checks which would prevent any cuts for many years. The railway officials argue that the rail transportation systems will never be successfully operated unless labor groups are willing to effect certain economies.

In passing it may be said that the brotherhoods, working apart from the American Federation of Labor are strongly entrenched here. Their chief counsel, Donald Richter, has grown in power until he is considered a policy adviser to the President. William Green and other labor federation officials do not take kindly to the rising star of Mr. Richter as the two national labor unions do not play ball on major problems. All labor officials realize that this is their day and they must grab everything while riding the crest of the wave.

Has "Temple of Accuracy?"

Close to the famous chestnut o-Bushy Park, near London, is what they tell the traveler is Britain's "temple of accuracy." It is not, contrary to wide belief, an old stone mosque or house of worship but a modern laboratory spread over 50 acres, and in which everything from a thermometer to the Schneider trophy airplane is accurately tested. Its gauges measure a ten-thousandth of an inch. Virtually every mechanical product the British use finds its way to the "temple of accuracy" for a final word of approval.

Wandering From This to That

Horse-Jumping

One of the most thrilling and dangerous events presented at the army show each night in Soldier Field is the horse show jumping competition. Sixteen horses belonging to the regular army and to individual officers have been entered in the competition.

When asked if any special requirement is necessary to make a successful jumper, First Lieutenant G. S. Smith, aide-de-camp to Major General Frank Parker, commanding all troops participating in the army show, said: "The heart of the horse and diligent training are the most essential."

"All of the horses competing have had years of painstaking training by expert trainers," Lieutenant Smith, continued, "and require special care." Lieutenant Smith rode his own horse, "Silver Bird," in taking first place in the opening night's contest with an almost perfect score.

The track over which the jumps are made is known as the "Olympic Course," is one of the most daring, for all hands are four feet or over in height, and the slightest error in judgment on the rider's part or a slip by the horse may mean injury or death. The course consists of eight jumps including the very difficult "In the Hand" and "Double Bar." "Stone Wall" and "Triple Bar."

Boys Planning Trees

Boys of the city and girls are not joining any of the government's emergency conservation camps, but they are working on the reforestation project in their own ways, according to officials of the college of agriculture at the University of Illinois. There are more than 3,000,000 acres of cleared land in Illinois that would produce more if it were reforested. The forest in any other crop according to records of the college's soil survey division.

More than a year ago the extension service of the agricultural college launched a four-acre project, in which boys and girls in different parts of the state are now being enrolled in the plan of this kind. The first of the club was organized at Carbondale, in Jackson county, with 15 members and 80 acres of land.

In addition to the three million acres of cleared land that is better suited to timber than to any other crop, there are nearly more than three million acres of forested area in the state. Most of the forested area is in farm woods, which if properly cared for, is a profitable part of any farm.

Forest Preserve Open

Ernest Whelan, president of the board of forest preserve commissioners, has declared June 15 as the opening day of the summer season in the forest preserve district pools. There are about 100 pools in the preserve. Whelan, of Oak Park and Milwaukee avenues, Cermak, 7000 Ogden avenue, and Green Lake, formerly Chicago, 120th street, east of Terrace avenue.

Each pool is manned with life guards and women attendants. A modernly equipped first aid room is under the supervision of a nurse. The water is chemically chlorinated and is changed constantly. Each bather must take a soap and water shower bath and undergo inspection before entering the waters of the pools.

More than 200,000 persons last year dipped into the drinking water clarity of the forest preserve pools. One of the most pleasing features to women and children is the sand beach-farm, where children can dig and women and men acquire a sun tan.

Farm Information Bureau

An information bureau, for farmers dealing with problems of the farm, is to be maintained throughout a Century Progress at the exhibit of the Illinois State Commission in the agricultural building.

Announcement was made by R. G. Morris, in charge of the exhibit. At least two men, expert in farming, will be continuously on the floor. If a farmer wants to know the best time to cut his hay or the best balance ration for brood sows or hogs being fattened for market, he can get his answer there.

All the work is in charge of the agricultural section of the University of Illinois. It has installed a complete exhibit showing production in Illinois. However, its farm answers will not be limited to Illinois, but will cover the nation. The exhibit is both historical and technical. It shows the best methods of farming from a financial point of view.

New Lion Group

The lions that by Mr. and Mrs. Marshall Field, of New York and Chicago, during their African hunting trip in 1920, are now mounted and have been placed on exhibition to the public at Field Museum of Natural History, it is announced by Stephen C. Simms, director of the museum. Mr. and Mrs. Field, who flew to their hunting grounds in Tanganyika by airplane from Europe, and made notable private collection of big game trophies, presented the lion specimens to the museum as gifts following their return from Africa.

Prices Advance

Illinois farm prices advanced 25 per cent during the month of May 15 and averaged the highest since December, 1921, according to the monthly report of the report of the Illinois and federal departments of agriculture. This price advance was the most rapid for any monthly period since the spring of 1919. Farm prices in Illinois on May 15 were 20 per cent higher than on May 15, 1932, and were 90 per cent of the 1910 to 1914 average prices. Last February and March farmers were getting only 50 per cent as much for products as in the pre-war period.

Institute Opens a a m.

The Art Institute is open to the public every week from 9 a. m. until 5:30 p. m. If attendance at a Century of Progress exhibit of the fine arts warrants, the officials of the museum will open it in the evening. On Sundays it will be open from 9 a. m. until 9 p. m. The museum building will be open to the public every day during the exposition. This does not include admittance to the second floor galleries, in which the paintings are hung, and for which a charge of 25c is made—a charge made necessary because of the cost of assembling these great world masterpieces. However, three-fourth of the World's Fair exhibits are free and this includes A Century of Progress exhibition of etchings, engravings and lithographs on the main floor.

Rheumatic Fever's Victim
A study of rheumatic fever supports a contention that the fever occurs more frequently among persons low in the economic scale than among persons of ample means.

Bears N

Victory Makes Fourth Straight for Barrington

Strong House of David Booked for Twilight Game June 23

The Bears won their fourth straight victory over the Crystal Lake team in the 1933 season. The game was played at Crystal Lake on June 15. The Bears scored five runs in the first inning and held the home team to one run in the bottom of the ninth. The Bears' victory was a result of their strong pitching and batting.

The Bears will play their next game on June 23 at the Crystal Lake stadium. The game is expected to be a close one, as the Bears have not yet won a game in the series.

The Bears' strong performance in the game on June 15 was a result of their strong pitching and batting. The Bears' pitcher, Steve Scholten, pitched a strong game, allowing only one run in the bottom of the ninth.

The Bears' batting team did well in the game, scoring five runs in the first inning. The Bears' manager, Steve Scholten, praised the team's performance and said that they were confident of winning the series.

The Bears' victory over the Crystal Lake team was a significant one, as it was the fourth straight win for the Bears. The Bears are now in a strong position to win the series.
