LAKE ZURICH REVIEW

Survey Started to Reveal Beer License Evaders

Lake County Receipts Fall \$1000 Short of Anticipated Amount

Beer license receipts for Lake county are not coming in as fast as anticipated. The total is \$1000 short of the anticipated total, according to a report by Miss Florence Efinger, chief licensing clerk.

Revenue collected from the county bar tax since May 13 when the first accounting was made to the county board of supervisors, reached \$795 up to Wednesday, according to Miss Efinger, who made preparations to turn the money over to County Treasurer Jay B. Morris.

The June 13 total showed that \$1,970 had been paid in. The total to date is \$3,765.

The accounting committee of the county has started their second survey of the county yesterday to locate places operating without a license. These will be forced to pay a fine of \$100 if they are unlicensed, members of the committee said. The drive is expected to clean up the larger parts of the places operating without license and swell the county revenue.

The first cleanup work will be done through Sheriff Lester T. Tiffey who will send signals to check each place in the county in order to force 100 per cent payment.

Thunderstorms

Two South African scientists claim to have discovered evidence that thunderstorms give off rays of great power and force. They caught these rays in a Geiger Muller counter, the same instrument now widely used to count or register cosmic rays. While they do not know definitely what kind of rays they caught, they believe these to have been generated by lightning. They suggest that the rays may be migratory electric currents or particles of electricity. About 400,000 feet of storm rays were registered only 20 to 30 miles from the storm. Directly under the storm there were rays—fallen.

Tennessee's Own Lake

Rid Foot Lake in Tennessee is the only one of 412 in that state to be fed by a single stream of great importance to that region in 1881, which disposed other similar basins. It is a large shallow lake, 12 miles long and 3 miles in maximum width, situated between the Ohio and Lake Michigan. In the north western section of the state, and discharges through the Red Foot River into Ohio river, a tributary of the Mississippi.

Song

Junior high school in closed only a few weeks ago, much to the chagrin of his mother, asked him what he had learned that day. One evening when asked the usual question, he answered: "I've learned a song about a fox today."

"A song about a fox?" queried his mother. "Can you sing it for me?" "Do, re, mi, fa, so, la, ti, do," sang Junior 75.

New Zealand Had No Animals New Zealand had no animals in the world when they did not have medical records until they were imported there by man from other countries. It was inhabited by large numbers of snakes, lizards, frogs, lizards, and one species of frog, but the only mammals that are truly native of New Zealand are two species of bats.

Gold for Amber

Amber, one of the wonders of the earth—scientists because of its dependence of electricity through friction is found largely along the shores of the Black sea, although it is also found in the Baltic and the Caspian seas, and also found along the shores of Maryland, New Jersey and Massachusetts. It is found clinging to seaweed which is brought up from the bottom. Ships, divers, dredges which toss the seaweed to the shore where women and children pick it over in search for the amber which has a relatively high value.

Day of Teachers

Teachers should teach their students about all, how to open the windows of their minds, so that when they leave school or college they are ready to learn from life.

Lake County Averages 24 Cents Per Voter in Recent Elections

Twenty-four cents per voter is the cost to Lake county taxpayers to elect three circuit judges and to decide in favor of prohibition amendment proposed according to a summary of bills reported by the county board of supervisors last week.

Of the total bill of \$434,533, the greatest sum went to 420 election officials, which is the rate per voter per person, shows a total of \$95,550 per person.

The cost of ballots ranged over \$1,000 and such items as polling booths, printing of notices, etc., brought the total up to \$1,000 per voter per election.

The post in Winona county, in analyzing bills passed there, was 20 cents per voter or six cents higher than the cost per voter in Lake county.

First White Person Born in Lake County Dies; Lived 95 Years

William Whigham of Elkhornville, the first white child born in Lake county, passed away at the home of his daughter, Mrs. John J. Kehoe, 212 North Kehoe Avenue, Chicago, aged 95 years. Funeral services were held Friday morning at the Half Day Congregational Church. Burial was in Green cemetery, Half Day, after services close on August 1.

Entertainments

The Lake Zurich Community Women's club will give a craft party at their hall on June 26. The hall will be ready Thursday afternoon. The ladies will be entertained by the local departmental members of the committee said. The drive is expected to clean up the larger parts of the places operating without license and swell the county revenue.

The first cleanup work will be done through Sheriff Lester T. Tiffey who will send signals to check each place in the county in order to force 100 per cent payment.

Lotteries Were O.K'd by Government, States

A New York woman who had the time and money has gathered several hundred lottery tickets which had been officially sanctioned by the government state or city in this country at some time in its history. It has been presented to the historical society of that city. The collection included advertisements and other references to this method of raising money for various public purposes.

There are tickets in the collection from the United States, Canada, Mexico, Cuba, New York city lottery in 1700 for enlarging city hall, and tickets for a Washington monument in Baltimore in 1816 with engraved portraits of George Washington.

Special interest are Delaware lottery tickets of 1772 signed by Lord Sterling, major general in the Revolutionary war; the Hon. William Pitt, British lottery signed by Sir John Rennie of Edinburgh in 1765; a Pensilvani lottery ticket, dated 1769, signed and John Hancock. In 1800 the state of Delaware sponsored a lottery with \$578,557 offered in prizes. The Louisiana State lottery company was incorporated in 1868 and was perhaps the largest business in the United States.

TAKING NATION INTO BANKRUPTCY

One of the main troubles of the country at present is that legislators have been too busy in applying the term "bigger and better" to budgets.

What should be done is to make them smaller and better. Since 1929 individual and corporate incomes have been undergoing a strenuous shrinking process. The national income as a whole has fallen at an unprecedented rate. Values of all kinds have, if necessary, been scaled down. Inflated values are reaching a normal level. We have approached a virtual mortgage-mutatorium.

All of this is in the interest of future stability. It has at last been realized that the inflated values of a few years ago were too good to be true. That is, it has been realized by everyone except those who make the tax rates.

The cost of government has constantly risen. States, municipalities and counties, especially, have added new activities by the dozen. They have incurred millions of dollars of new indebtedness—on which interest must be paid. A striking illustration of this is found in a recent statement by the governor of a Pacific Coast commonwealth—he observed that if every activity of the state were eliminated there would still be enough income to meet expenses.

Higher taxes now may mean national bankruptcy. Lower taxes will certainly mean quickened recovery. The time for talk has passed. There must be action.

GIVE KIDS A BREAK

School's out! Thousands of children all over the country are pouring forth from the classrooms to spend their days out of doors during the summer months. It's time for motorists to be more alert than ever—unless they are many of these children will be injured or even killed as they traverse the streets and highways to fields and playgrounds.

The schools have done a fine job training youngsters to watch out for themselves. In consequence, when the statistics of adult and child pedestrian accidents are compared, the children are shown to be better. They are more safety conscious.

In spite of this good work 3,400 boys and girls between the ages of five and fourteen were killed last year and 55,551 were injured, according to the National Bureau of Casualty and Surety Underwriters.

Drivers give these youngsters the right of way; drive slowly and cautiously through residential districts; and watch out for the child who darts out from behind a parked car. Every daylight hour should be a safety hour now that school is out. Help to reduce child fatalities, and give the kids a break!

HANDICAP TO LEGITIMATE BUSINESS

After nine years of experience with government-owned butcher shops, fish stores, sawmills, copper, tin and arsenic mines, cattle ranches, smelting enterprises and produce agencies, the state of Queensland, Australia, has retired from the field of private business after terrific losses.

Every move to put the city, state or federal government into business cuts the taxable assets of the country on the one hand, while increasing the tax bill on the other. As tax-exempt projects increase, business opportunities for the private citizen are destroyed—also his taxable income.

BUILDING UP TURN

Factors at play now justify the belief that a heavy upturn in building work will occur before long. During the past two months building and remodeling work have been moving steadily upward, the material makers and distributors have noticed a better than seasonal gain in orders.

Building upturn would be felt in every industry—lumber, steel, transport, metal, paint and varnish, electric, glass, etc.—and would provide a vast amount of new employment, with a consequent jump in buying power. Also important would be its favorable effect on security values.

Advertising which lets people know that you have what they want is the most important ingredient in success. It is like an electric light bulb that tells what the big power plant is doing—Arthur Brisbane.

If the printing of the Congressional Record were abolished and the newspapers quit sending reporters to the capitol, how long would it be before congress would quit talking?

One thing that will greatly help solve the troubles of the country is for everyone to make things go well in his home town.

We're not getting "back to normalcy"—we're moving forward to sanity.

"Let the people know the truth and the country is safe." Abraham Lincoln.

Health Director Reports on Automobile Accidents

The 136 deaths ascribed to automobile accidents in Illinois during April give the highest mortality rate that year to date. The number of deaths, according to statistics made public here by Dr. Frank J. Jirkis, state health director, was also the highest month of the year in which fatalities, charted against automobiles exceeded those in the corresponding months of 1932.

Up to April the death rate from automobile accidents was running fully 20 per cent below that in the corresponding period of 1932. In April it was the highest. For the first four months of the year there were 523 deaths due to automobile accidents against 587 in 1932. Up to May 31 there had been registered 118,326 fewer motor vehicles this year than last, a decline of about 9 per cent.

Supreme Court Judge to Be Candidate for Governor

Rep. J. H. Streeper of Alton made the official announcement today that he would be a candidate for the republican nomination for governor in 1936. Judge Brown is the jurist who successfully defended the last requiring federal legislation to pass a minimum wage of \$1000 a month to keep their franchises alive in Illinois, the tax being upon a sliding scale, going as high as \$1000 a month.

He will be the first to admit that he has not been able to keep his franchise alive in Illinois, the tax being upon a sliding scale, going as high as \$1000 a month.

Gather for World
Fair Visitors**

The St. Anne, Methodists, and St. Paulans of the Barrington Church Softball team were the third team to come through their first scheduled games with a clean slate. The games were played Monday evening.

The St. Anne team, as a result of a split in the ranks, suffered setbacks in their opening games. Members of other teams asked for the constant winning Salens aggregation to be divided into two teams to make competition more even.

St. Anne defeated Illinois H. 5 to 7 and Mundelein team defeated the Bapists.

Games scheduled for next Monday evening are Salens I versus Bapists on the west diamond, Salens II versus St. Paul on the middle diamond and St. Anne and Mundelein on the east diamond.

It is the hope of the league to have the common American League against such rivals as Lannie Walker, Chuck Klein, Pie Traynor and Bill Terry on the National League side of the field.

While the stars seek the king of his position, are you ready to uphold the American spirit? Come to the fair and let the stars show you how the game has known will be matching

**93 Per Cent of State
Banks Deposits Available**

Edward J. Barrett, state auditor, received commendation this week from both republicans and democratic members of the legislature for his action in voluntarily offering to accept a reduction of \$122,000 in the appropriation for his office for the next two years. Barrett said that he believed that only 80 banks, closed by the depression, still remain closed and that the per cent of the deposits in state banks in Illinois have been made available to the depositors.

**V. Y. Dallman Appointed
to U. S. Board at Capitol**

Editor V. Y. Dallman of the Illinois State Journal of Springfield was appointed to the United States board of mediation at Washington. Mr. Dallman refused the appointment because he does not care to leave Springfield. It is now thought he will be appointed internal revenue collector for the central district to succeed O. G.
