THERE'S a washday bargain you

may not fully realize because I

isn't usually price-tagged. It's the electricity you use to run your washing machine. The power that

swishes all the dift out of clothes

in the tub and wrings them out

for the line costs just a fraction

over a penny an hour in the average

northern Illinois home. Less than 3 cents' worth of electricity takes all the hard work out of washday.
