LAKE ZURICH REVIEW

Dr. Bradley Will Speak at Farmers' Institute Sept. 28

Full Program Planned for Two Day Event at Lake Zurich

The Lake Zurich grammar school will be held at Lake Zurich September 28 and 29. Dr. Preston Bradley of the Princeton Church of Chicago, as the principal speaker, Dr. Bradley will address the crowd.

Mr. and Mrs. Otto Giese were in Chicago Monday.

Henry Steel and C. Krueckenberg attended a Lutheran festival in Addison Saturday.

Mr. and Mrs. Otto Giese and family visited with Mr. and Mrs. C. R. Rabinson Sunday.

Miss Gloria was a week-end guest of Mr. and Mrs. C. W. Williamson.

Rev. and Mrs. E. A. Irvin and son returned from a vacation spent with relatives in Indiana.

Mr. Charles Wenzel had a guest Monday, his brother Morris Bowers and four friends from N. Y.

Mr. Leo Smith attended a picnic.

Miss Mary Anne, wife of home of Mrs. Ethel Atkins in Elgin.

Mr. William Tousé and Mrs. Rose Grimes attended a luncheon followed by five hundred Wednesday at the home of Mrs. Littleton Krause of Mundelein.

The usual display of goods exhibits as authorized by Mr. Petty, county superintendent of schools, who is in charge of the school system, the plans are already underway for the distribution of Rosenthal products, etc.

Two features coming in the household goods department will be a contest of made-over goods and a contest of old fashioned goods. Each exhibitor may enter one exhibit of each type if she so desires. All women and girls in the community are encouraged to enter.

In the feature clothing contest there will be three classes of entries, a first, a second and a third.

An exhibitor may enter more than one kind under each class but only one jar of each kind. The jars will not be weighed.

The first two entries in each

exhibit will be awarded three

door prizes.

The first two entries in each

exhibit will be awarded three

BARRINGTON REVIEW

ESTABLISHED 1885

LESTER W. MCCLURE, Editor and Publisher

WALTER R. WINTERBINGHAM, Business Director and Foreman

ILLINOIS PRESS ASSOCIATION

Published every Thursday afternoon at Barrington, Illinois, and entered as Second-class mail at the Barrington post office under Act of March 8, 1873.

All communications should be addressed to BARRINGTON REVIEW 100 E. Main, Barrington, Illinois. Cards of thanks, resolutions of sympathy, sympathy messages, and all notices of entertainments or society and church news and pictures for general benefit will be charged for.

TELEPHONE, BARRINGTON NO. 1

NOT REALLY A SALES TAX

We are asked recently why we have made an about face within the last six months on our advocacy of a state sales tax as means of raising revenue for support of government. We were reminded that we had pleaded, editorially, for a sales tax to replace personal property taxes and lower real estate taxes.

We did express our viewpoint that a sales tax can be the fairest and most equitable of all taxes and that it should be adopted for the purpose of relieving owners and renters of tax burdened property. We still adhere to that viewpoint.

We have objected to the Illinois 2 per cent occupational tax now in effect and insist that it is just as inequitable if not more so than real estate taxes. It is popularly called a sales tax but is technically known as an occupational tax whereas, it is in reality neither a pure sales tax nor a pure occupational tax.

The tax is placed upon the retail trade of Illinois and in that sense it is an occupational tax. To be a fair occupational tax it should be placed upon all occupations: retail, wholesale, manufacturing, professional, agricultural, mining, etc. It should be a tax on net business and not on gross business. These principles are accepted indisputably wherever occupational taxes are in effect—except in Illinois.

Wholesalers, manufacturers, farmers, lawyers, doctors and many others escape the direct burden of the state occupational tax. Even some retailers, those who sell only services and tangible personal property, escape the tax. The burden of direct responsibility falls heavily upon that small part of the state's population, the persons engaged in selling tangible personal property at retail.

The tax is supposed to be passed on to the consumer and in that respect only resembles a sales tax. The attorney general issued an interpretation in which he explained that merchants may include the amount of the tax in the cost of doing business and add it into the prices of the commodities they sell. In this respect the sales tax is supposed to be passed on to the general consuming public; but unfortunately this cannot be done equitably. The many merchants who sell low-priced articles find themselves between the devil and the deep blue sea. For example, the public refuses to pay one-cent taxes on five-cent articles on the grounds that this amounts to a 20 per cent tax and not a two per cent tax. Consequently, the merchants cannot collect on the low-priced articles, even though they have to pay taxes on the sale of these articles. Part of the general consuming public refuses to pay taxes on articles of long standing varying prices and nationally advertised prices. In order to avoid arguments with these customers, a few of the merchants fail to insist on payment of the tax, thus setting up unfair competition against other merchants who do insist on tax payment. A small percentage of retail trade selling commodities of widely varying prices take advantage of a chance to profit from the tax law. This falls unfairly on the general public.

The above are a few of the reasons why we do not favor the Illinois law. We do believe that a real sales tax, charged against the wholesaler or even original producer—and of course passed on through the retail outlets to the consuming public—would be popular and comparatively fair substitute for the excess in property taxes.

The Illinois "occupational tax" is not a sales tax. It is a ghastly imitation of an income tax levied on a small percentage of the gross incomes in the state regardless of whether those gross incomes include net incomes or heart breaking deficits.

THE SPIRIT OF A TOWN

The quality and character of communities vary with the type of citizenship who make them up. Some towns are without much semblance of ordinary decency, the buildings and homes within them for the most part being shoddy and run-down, while the men and women who are seen sitting or walking about, (mostly just sitting), are about as agitated and speedy in their paroxysms as a glacier moving over a mountain area.

There are many such towns in the world—nearly all of them with rapidly decreasing populations. They have "gone to seed," and decays will pass before many of them reap a better crop.

Then there are other communities who reveal to the world varying degrees of progress and improvement, whose populations are correspondingly more animated, whose buildings and homes tell the cock-eyed world that: "Here, folks, is a place where life may be lived to its fullest. Come and live with us, enjoy yourselves, rear your families, and otherwise be of good cheer and enduring peace."

After all, it's the SPIRIT and the COOPERATION of a group of human beings who constitute what we call communities that determine the quality and the character of them. What people THINK, what they HOPE and YEARN for, what they are willing to SACRIFICE for are generally reflected in the physical property within their corporate limits. And these qualities are also reflected in the speedier and more progressive permutations of people who can out-walk any glacier that ever thawed its way over the landscape.—Eccentric Birmingham, Mich.

With expenditures reduced 25 per cent and revenue almost doubled over a year ago, the government still is faced with a practically insolvent condition, of which is due to the present recovery program. Treasury Department reports on the financial condition of the government for September reveal that in a little more than two months of the present fiscal year a deficit of \$231,721,771 was incurred. During the same period expenditures of emergency agencies have aggregated \$218,198,582.

Two Northern Hawks

Both the broad-winged and rough-

legged hawks are northern birds and

nest at all times in the northern

Canada, while the former

storks pretty closely to the Up-

per peninsula.

Oldest Part of Globe

The oldest people are

said to be among the oldest inhabi-

tants of what geologists call

the oldest part of this globe.

Largest Sewer in 1858

The largest drainage project

in the United States in 1858 was the

improvement of the land that is

now Central Park in New York City.

Progress

From This to That

Epidemic Encephalitis

Appearing early in August and

spreading gradually until approximately

300 cases were incurred by the last

of the month, an outbreak of epidemic

encephalitis has been reported

in Illinois.

Considerable public concern about

the situation has manifested itself

in Illinois while local health

officials have been alert to the

danger and have taken every rea-

sonable precaution to discourage

the spread of the disease.

Funeral services were held at the

Wauconda cemetery. He leaves to

mourn the widow, Mrs. Gilbert, one

son, Milo, three daughters, Mrs. Harry

Pepper, Mrs. Harry Bowers, and

Mr. Pepper, and mother, William

Gilbert of North Crystal Lake and one

grandson, William.

Wauconda

Tyler Gilbert died early

morning at his home north of town

at the age of 63 years. He had been

in poor health with kidney trouble

for some time, and was stricken

with paralysis from which he never

regained consciousness.

Reserves' Showing Brightens Grid Outlook

Broncho Football Team Improving for McHenry Game

Local Boys Hope to Start Season With Victory

Sept. 23.

There are only one or two games remaining before the football season is over Saturday, and the campaign is running strong for the team to reach a high point in the feature Armistice Day. At something more than 100 pounds, the reserves of an improving hard drill squad, Clark and Anderson through are the best. When their tackles low they will put up a real fight. In a number of afternoons a couple of first-half games, held the reserves repeated threats. This is encouraging, and some day will be available, will be a decided asset.

It is working hard enough squad which is mostly of freshmen and expects to put a winning record for the year. The members are fairly green but the hope of the brights and the backs keeps them to prove that the results of the year was well worth the effort. Kuhlman cracked his little finger. He expects to be back in a few days for the McHenry game.

The game is being played Friday for either the first or second place. It is an informal setmatch with coaches on the field. The faults of their charges are to be exposed. It is to observe the marks and under fire and also to point out the prospects of the coming season.

Bears Will Play Parkside Next Sunday at Elgin

Meets in Deciding Contest of 3 Games Series Between the Teams

The game scheduled for last Sunday between the Bears and Gilberts Greyhounds was called off because of rain. Next Sunday the Bears will play the Greyhounds in the deciding game of a three-game series. The Bears won the first game on June 4 by a 14-13 margin, the Parkside won the second on Sept. 3, 8 to 7 in a close contest.

This final game will be played at Lake Park in Elgin.

Mrs. Kainz celebrated her tenth birthday anniversary with a party of eight girl-friends.

Mrs. Mary Lengelhouse spent Thursday with Mr. and Mrs. Frank Lengelhouse.

Mr. and Mrs. Bernard Zelot and children Helen and Bernard Jr. were visited at the home of Mrs. Charlotte Zelot.

Miss Loraine and Eleanor Thorow returned to their home at Grant hospital after a four weeks' visit with their parents, Mr. and Mrs. John Thorow.

Misses Lincoln and girl-friend of South Wash. are guests of the former's uncle and aunt, Mr. and Mrs. Frank Lengelhouse.

Mr. and Mrs. August Krause and family, Carl and Mrs. Conrad Krause and Myrtle Kirby were dinner guests of Mr. and Mrs. John Thorow.

Mr. and Mrs. W. M. Titterton and daughter Charlotte of North Chicago are visiting Mrs. Charlotte McGraw.

Mr. and Mrs. John Jansen and daughter Anita and June are visiting in Chicago.

The Miser's Program

Mr. and Mrs. Peter Anton of Elgin, so called because he lives miserably for the sake of saving and increasing his hoard.

Dr. Fanning Will Coach Semi-Pro Football Team

A semi-pro football team is being organized at Arlington Heights by Dr. W. A. Fanning, local dentist. The team will consist mostly of school boys, although a few talented players may be brought in from nearby towns. Dr. Fanning will also act as coach for the team. Two or three Barrington men may be among those from out of town to play with the team.

Thunderstorms

The weather bureau says that as a general rule electrical storms decrease in number as one goes to the more northern localities, although they are more common in the southern border of the United States.

However, in the Far West, particularly along the Pacific coast and over the lower levels further inland there are comparatively few electrical storms and they are of comparatively mild nature.

Camel Has Rivals

Though the camel has long been noted for its ability to go without water for extended periods of time it is not comparable in endurance with the horse and mule. Moreover the camel can only go without water twice as long as a desert-bred horse.

Hard to Distinguish Hawks

It is difficult for the novice to distinguish between the various hawks as they sell overhand. Some are looking for rodents, frogs and other ground inhabiting creatures, while others, like the sharp-shinned sparrow and Cooper's hawk, show remarkable speed on the wing and waste little time when they are after food.

Police Not Entitled to Reward, Gen. Kerner Rules

Atmos. Gen. Kerner has just handed down his opinions involving questions of 18.

Salaries of city elected commissioners may be reduced during their terms in office, General Kerner has informed Robert C. B. state's attorney of his opinion.

In a second opinion he held that police officers are not entitled to a reward for the arrest of a man who acts as a public pestilential. According to the ruling, police men are not entitled to a reward for doing their duty.

In a third opinion, George Murray, state's attorney of Clinton county, Georgia, held that

that county boards have no authority to fix the salaries of either the state's clerk, clerk and other necessary expenses in their offices.

Lieberman, chief highway engineer, General Kerner held that salaries of county superintendents of highways can be paid from the general highway funds of the county.

In a second opinion he held that police officers are not entitled to a reward for the arrest of a man who acts as a public pestilential. According to the ruling, police men are not entitled to a reward for doing their duty.

In a third opinion, George Murray, state's attorney of Clinton county, Georgia, held that

"Whichever you do, son," said Uncle Ebenezer, "don't be a blub." A blub is a man that thinks he can swim without learnin' how, insists on going over his depth, says Uncle Ebenezer, and ain't never heard from me."

BARRINGTON REVIEW, BARRINGTON ILLINOIS, THURSDAY, SEPTEMBER 14, 1933

Canada Gets Most Water From Niagara Supply

Niagara falls is not controlled by Canada. However, a treaty was signed by the United States and Canada in 1909 for the regulation of the amount of water which may be diverted for industrial purposes. The maximum is 20,000 cubic feet per second. The American side of Niagara falls, per capita, is 36,000 cubic feet per second, and on the Canadian side, 11,000. This was done in order to preserve the natural beauty of the falls and to maintain lake levels. The difference in these allotted amounts is due to the manner in which the water is withdrawn.

As the late William H. Taft (in 1909) said, "I have come to a decision on the matter." With respect to the Canadian side, the water is drawn from the river in such a way as not to affect the natural beauty of the falls, and the point from which it is drawn is considerably below the level of the water at the point where the waters separate from the Niagara River. The amount of water going over the Horseshoe falls is several times that going over the American falls, it was agreed the diminution of the Horseshoe falls would be imperceptible.

Planetary Is Theater That Reveals Astronomy

It is only within the last seventy years or so that paper has been made from wood pulp used by eastern women to darken their eyes. How it came to be used to darken women's eyes is not known.

Women's eyes are not

blackened by the use of

in other words, the water becomes a stage where the tremendous drama of the heavens, with an stellar cast, is presented.
