George Skinner Kicked in Face by Horse; Suffers Broken Nose

George Skinner, eighteen year old son of Mr. Fred Skinner of Barrington, was severely injured Friday morning when he was kicked in the face by a horse. His nose was fractured, one tooth broken out, and he suffered a bad laceration of the lower lip.

The young man was brought to a local doctor's office where it was necessary to take several stitches in dressing the wounds. He was then taken to his home but the pain was so great that he was removed to the Barrington General Hospital for further care. He was held over for the night and is reported to be getting along nicely.

The accident occurred while he was working around the horse in the stable. It is reported that the horse became frightened by a sudden noise and kicked with subsequent injuries to the young man.

Special Services Planned for Scout Anniversary Week

Court of Honor and District Mobilization on Scout Calendar

With the announcement that Barrington's three boy scout troops, 10, 21, and 29 have won the coveted presidential stamper for their work in 1933, Barrington scouts are making enthusiastic plans for the court of honor which will be a highlight in their observance of national scout anniversary week, Feb. 8 to 14 inclusive.

The court of honor will be held Tuesday, Feb. 13 and will include the scout rededication ceremony in addition to the presentation of the stamper. These were planned by President Roosevelt to 20 of the 30 units in the Northwest suburban council.

All Barrington scouts, cubs, and boys have 12 years of interest in scouting have been invited to celebrate national scout anniversary week at a national scout mobilization day, Feb. 13, with other scouts of this area at attending a huge gathering to be held at the Park Ridge Convention Center.

They will assemble at 9:45 a. m., bringing their lunches since an all-day affair is planned. After mobilization they will march to the Park Ridge Convention Center to take part in a national program for all scouts of the U.S., including a parade, games, and other activities.

Barrington scouts will observe the day by holding a service at 11 a. m. at the local high school. The service will be in uniform. The hour, and other details of the event will be announced in The Review next week.

School Band, Orchestra and Glee Clubs to Give Musical Program Feb. 10

A musical evening will be celebrated at Barrington high school on Friday, Feb. 10 when the high school band and orchestra make their first appearance of the season.

The concert, which will be open to the public, will include a variety of musical numbers, including a variety of musical numbers, including a variety of musical numbers.

Receiver of First State Bank Asks Loan From R.F.C.

20 Per Cent Dividend to Depositors Probable If Loan Is Granted

An application for a \$50,000 loan from the reconstruction finance corporation has been made by W. L. O'Connell, receiver of the First State Bank of Barrington, according to unvaried information received here.

Mr. O'Connell, whose office is in Des Plaines, could not be reached Thursday afternoon, but it was reported at his Des Plaines office that an application for a loan had been made. The last complete financial statement issued from the receiver's office was of September 29, 1933.

At that time nearly all bills payable and all redemptions had been issued. A more aggressive policy of collecting stockholders' liabilities has been indicated by money sent out to bring suit went out to some of the stockholders.

Recall Captain Coggin's "Ramblin'," First Auto in Barrington—1906

Looking at the new 1934 streamlined automobile, Barrington residents smile as they recall the first automobile seen on the streets of this village, a Ramblin', owned by C. J. Coggin, a local resident.

C. Kuhlman Suffers Broken Collar Bone in Freak Accident

Charles Kuhlman of Highland Park, brother of Herman Kuhlman of this village, suffered a broken right collar bone following a peculiar accident in his garage last week.

Mr. Kuhlman, who is 28 years old, is reported to be recovering from the accident nicely although still sore from bruises and the pain of the broken bone.

Mr. and Mrs. Kuhlman of this village, their son LaVern, and Frederick Wendt spent Friday at Highland Park with the injured man. "Fortunately," Mr. Kuhlman is slender," they reported. The doctors said he would have been crushed to death if he had been a fat man.

New State Liquor Bills Passed by House and Senate

Provides Local Option and Local Commission; \$50 Fee for Retailers

A new state law governing manufacture, distribution and retail sale of alcoholic content beverages and intoxicating liquors, not differing greatly from the old law which was in effect prior to adoption of national prohibition will be in force in Illinois by the end of the year or soon as Governor Henry Horner signs the measure.

This act will affect each local community in that it provides for local option, a local commission to control licenses, and extends the right to issue wholesale licenses to counties outside of Chicago, village, cities, or townships may vote on the subject. In order to bring up a local vote, a petition for the same must be signed by at least 25 per cent of the qualified voters in the proposed territory.

Provisional licenses, which are valid for one year, will be issued regardless of outcome, the situation will remain as decided by the voters for the next 12 months while the permanent law is being passed.

Local commissions will include the president of village boards and other officers. The local commissions will have the right to issue licenses, revoke licenses for violations, and local commissions in dry territory can also issue licenses. Wholesalers subject to the approval of the state commission. If a village votes dry, the local commission and the state commission will issue licenses for the sale of liquor or beverage at wholesale in certain stated quantities, in the original package, and not be consumed on the premises where purchased.

Bars will be prohibited except as licensed for children or for the sale of "saloon" will be prohibited in signs or advertisements. Taverns can be converted by curtains, blinds, etc.

Retailers state license fees will be fixed at \$50 each.

Programs for Children

Two special programs of patriotic instruction for children will be presented at Field Museum of Natural History on Lincoln's and Washington's birthdays. The programs are in charge of the James Nelson and Anne Louise Raymond Foundation.

The Abraham Lincoln program, to be given Monday, Feb. 12, will feature motion pictures entitled "Abraham Lincoln" and "Washington and the Revolution." The Washington program, Feb. 22, will consist of the film, "Washington and His Times."

Two films will be shown in the James Lincoln theatre of the museum. One film is a 12 m. and one at 11 m. No tickets are necessary. The programs are free of charge and are open to all.

Children are invited to form to bring children to the museum for these entertainments.

Temperature Drops Below Zero as Ice Wave Strikes Here

The icy wave that gripped Barrington and the vicinity early Sunday morning after a month of unusually mild weather created a rushing blast for gasoline stations and garages. Many cars needing oil and others requiring tuning, according to reports.

PLYMOUTH'S HERE TRY THE 1934 Little

DON'T ask us how it was done! But one of the biggest, safest, most luxurious automobiles you'll see this year, it is in the lowest priced group!

It's on our showroom floor right now. It has a lot of things you'd not expect in a low price car. Especially its performance—we call it The 1934 Plymouth ride.

We want everybody in town to arrange to take

this ride. To learn what Individual Front Wheel Springing, plus Patented Floating Power Engine Mountings means to comfort and riding smoothness! And this Plymouth has plenty more to talk about... 77 horsepower, hydraulic brakes, safety-steel body, rigid-X-frame and valve seat inserts. Come in—arrange for a ride. It's an experience you will be glad to know about.

Sen-Worret-Ankh Tomb Finally Yields Secrets

According to an expedition to Egypt from the New York Metropolitan Museum, archeological treasures were gathered from the tomb of Sen-Worret-Ankh, chief of the priests of Ptah of Memphis, who

lived in the tomb of his immortality and turned all his engineering skill to a futile effort to prevent the robbery of his tomb. Sen-Worret-Ankh, whose tomb

was in the desert near Lisht, was chief of the Artisans of the Two Houses, Dean of the College of Scribes and Royal Sculptor and builder, according to the designations in 200 columns of hieroglyphs decorating the walls of his tomb.

The priests, to safeguard his grave from vandals, devised a means of grooving the enormous stone slabs of his tomb so that they would slide into place easily but would resist all upward prying force. He hid his exact place of burial. But all these precautions, according to the leader of the museum's expedition, were in vain.

In the entryway of the tomb they found a fragment stone, life-sized, of Sen-Worret-Ankh himself. It had been a seated figure wearing a broad wig and the short kilt, apron, customary for cult statues of his period. Only the part from the waist up was found. The two hands had been knocked off and the torso was gone, but "the modeling of the torso is admirable." In the doorway they found the garzole of a lion, described as "a really superb sample of animal sculpture."

Wood Trees Largest, Bacteria Smallest Bits The largest living things are the giant redwood trees. The smallest are bacteria. Both are plants. Bacteria are plants consisting of only a single cell; while the redwood trees consist of countless millions of cells, as shown in a writer in the

of the knowledge as I do of the order (Judge Dady's) of the board of review to reconsider the valuation of the Public Service Company (generating plant at Waukegan) pending in the Supreme Court. The letter to Mr. Mason

The Ouija Board Study of the phenomena of the Ouija board has led to the conclusion that its movement is due to unconscious muscular action. The first step toward a scientific explanation was made by Professor Partridge, who invented an instrument which would register the unconscious muscular action of any person placing his hands upon it. This showed that all persons exerted more or less a powerful push or pull action, but quite unconsciously. Professor Partridge proved further that this action is not only present and operative in all normal individuals, but corresponds generally with the expectations of the sitter who has his hands upon the table.

Shark Speedy Swimmer The amazing speed of which a shark is capable, estimated by natives of various countries at 35 to 40 miles an hour for short intervals, makes it a formidable antagonist among underwater denizens. Perhaps, in view of these facts, it is not strange that sharks were among the very first fishes to be found on this earth.

True Enough "To throw confetti," said Bill Ho, the sage of Chinatown, "is a waste of paper. Yet there are times when there is vastly more paper wasted by being written upon."

Fourteenth Century Manuscripts Four manuscripts of the Fourteenth century, unearthed from the tombs of a Cistercian monastery in Italy, have been presented to the San Francisco university.

Goat Farm Pays Its Way

A woman of Polish birth, who reached this country as an immigrant after the war, appears to have found the solution of her economic problem by developing, on a farm a few miles outside of Boston, one of the largest goat ranches in New York state. She started only six years ago with a herd of twenty. She turned them to a profit principally by using their milk for making Swiss cheese as it is made in Switzerland.

Psychology

A perfect example of "a state of mind" is found on Russell Island in the South Pacific. When a man is arrested for a crime, even when it is murder, the police merely attach a handcuff to one of his wrists and set him free until his trial. Wearing a handcuff, they have been taught to believe, presents a man from running away—Collier's Weekly.

Young Grizzly Bear Laid

The young of a grizzly bear at birth may weigh less than a pound, although the mother tips the scales at 500 to 1,000 times as much.

In Old Menus of Pirates

Of immeasurable wealth are the many prizes—caskets of precious jewels, chests of gold ingots, bags of pieces of eight, doubloons, ducats and pearls—awaiting the treasure-seekers lured by grimy, tattered charts and records of known authentic origin. In the tropical waters of the coast of Haiti—old haunts of pirates, thieves, wreckers and villains—many a ship, but there are proportionate dangers to be faced in these waters, dangers such as sudden hurricanes, yellow fever, barracudas, giant squid and the dreaded tiger sharks.

Births

Mr. and Mrs. C. Becker of Elm township are the parents of a daughter, Joan Patricia, born January 24.

Mr. and Mrs. Fred Poppe of Prairie View are the parents of a daughter, Marilyn Frances, born January 28 at the Barrington General hospital.

Mr. and Mrs. Charles Koskack of Chicago are the parents of a daughter, Virginia Marilyn, born January 28. The Koskacks are former residents of Barrington.

Less Corn, More Income
Adds to Net Farm Income

Illinois farms operating along the lines suggested by the Farm Bureau adjustment program are likely to have larger net incomes this year than those that continue to maintain a higher percentage of corn acreage, says the extension service of the Illinois Department of Agriculture, which has charge of the educational phase of agricultural adjustment administration in this state.

This program is designed from study of farm management records kept by co-operators in the farm bureau management service, and summarized by M. L. K. 126-11, of the department of agricultural economics of the college.

"Corn belt farms operated with a 20 per cent reduced corn acreage, replaced with legumes, have produced a little more net income than those that have maintained a higher percentage of corn acreage," says the study.

The legumes were used for hay and pasture, with some cut for feed and a little plowed under to improve soil.

As a general rule, those years of variable for four without remainder are leap years. The next leap year is in the case of years ending a century; only those divisible by 400 are leap years. Thus 1900 and 2100 were not leap years, but 2000 will be a leap year.

Tropics Pitcher Plant

In Good Insect Catcher

In the tropics grows a strange plant which is known as the pitcher plant, though botanists call it Sarracenia. It grows in marshy forests, and has lance-shaped leaves, but these are not ordinary leaves, for at the end each leaf is extended into a coiled tendril which stretches out and curls round the insect.

Inside the pitcher is a pool of sticky liquid. The insect is attracted to the liquid and falls in. The pitcher is coated with wax, so that it will hold water. There is a corrugated margin at the top, and round this a honey-like substance is produced which acts as a bait to insects.

When rain falls some of it finds its way into the pitcher, and then when the insects alight to eat the honey they slip on the wax and fall into the pitcher. They try to crawl out, but again which point downward prevent them, and sooner or later they are drowned. The water contains ferments provided by digestive glands, and this enables the plants to absorb nutrients from the insects.—Montreal Herald.

Adoption Notice

Public notice is hereby given that the undersigned Administrators of the Estate of Hannah Kampfer, deceased, have died upon Tuesday, the 2nd day of April A.D. 1934, in the return day for the hearing of the claim against the above named Estate. All persons having claims against said Estate are hereby notified to present them to the undersigned Administrators at the Court of Lake County, Illinois, on said date at having said claim for the purpose of having said claim admitted.

Emma Patterson, Amanda Effick, Waukegan, Ill., January 22, 1934. Charles, Williams, Long & McCarthy Attorneys

Nearly All Merchants

Add Tax "On Outside"

Thousands of food and meat merchants in Chicago and throughout the state began last week to add the 2 per cent occupational tax as a separate item of merchandise cost according to a statement released by Joseph Spina, chairman of the mercantile division of the Illinois chamber of commerce, the organization which has, since the inception of the tax, urged that it be kept out of the cost of food and meat merchants, who are adding the tax to the cost of a part of merchandise.

"Our belt farms operated with a 20 per cent reduced corn acreage, replaced with legumes, have produced a little more net income than those that have maintained a higher percentage of corn acreage," says the study.

The legumes were used for hay and pasture, with some cut for feed and a little plowed under to improve soil.

Chambers' Colors

It has been said that no one knows the natural color of the chamelion, for one specimen may appear in half-a-dozen different dresses in as many days. If we place it on a green background, it soon becomes a similar green; remove it to a dark brown, and before many hours have passed it will correspond with its new surroundings. Many experiments have been made to determine how many dresses this quick-changing artist can put on, but it usually baffles observers, for after many months of study, and when one thinks a record has been obtained of its wardrobe, it suddenly appears in an entirely new costume.

If different colored light is focused on to each side of the chamelion, each side will take on that particular color, while in the dark it takes on a cream color.

Napoleon's Lucky Star

Everyone knows about Napoleon's belief in his lucky star, and how he communicated that sure faith to his armies and also to his enemies. He once actually said: "It is a great proof of the weakness of the human intellect that people should imagine they can resist me." It was, of course, one of the great factors in his career. His own brilliant strategy and genius and the fact that his enemies did not contribute more to the victories of Napoleon than did the steadfast faith he generally held in his lucky star which could not fail.

Discovered Appendicitis

The cause of appendicitis was discovered by two American doctors less than 50 years ago.

Glass Bottomed Buckets

Used to Locate Sponges

Just as in other tropical islands where natives live of the land with edible fruits, herbs and vegetable growing profusely, a fair part of the Bahamas' natives manage to live on what the sea contains—but not on fish.

Essentially coral islands, the Bahamas are noted for the sponges which they produce. For years the sponging industry involved as many as 600 vessels and 2,000 men and women. Natives found they could live profitably by "dishing" for sponges, chiefly around Andros Island.

The fleet of boats usually is accompanied by flocks of small birds from which the natives do the sponging. Glass bottomed buckets are responsible for much of the success, for with them the natives are enabled to look through the clear water along the reefs and spot the sponge growth. Without them the dazzling sun and the water's ripples impair the vision. The buckets are not used for catching the sponges. Long, spiked hooks were used to break the sponge growth from the bars and lift it into the dory.

Then it is cleaned and dried and taken to Nassau where the sponge exchange and packing houses are located. Natives give their lives to sponging as a profession just as in modern capitals men study law and medicine.

Metaphors

Metaphors is the transportation of letters or sounds in a word. When the transportation of letters or sounds of two words, it is popularly known as Spoonerism, of which a well-known example is "Krippinggore their lites take."

Plant Life of the Ocean

Plant life in the ocean is much thicker near the surface. Usually the greatest number of diatoms are right at the surface, where the light is strongest. The top 600 feet of the water contains practically all the plant life of the ocean, and the next 600 feet below that contains all the rest.
