electrical wiring, ceiling and brick laying. The project, as approved, called for remodeling of school offices, installation of a separate boiler room and converting of the boiler room into a classroom and mechanical drawing and manufacturing shop. A payroll of \$12,000 was granted on condition that the school district number 4 would furnish necessary materials, cost about \$5000. The original contract stated that work must be completed by May 31.

LAKE ZURICH REVIEW

Former Treasurer Fox River Grove Sues for Salary

H. F. Kotaska, former village treasurer of Fox River Grove, filed suit against the village of Fox River Grove in circuit court at Woodstock Saturday for the amount of \$1500 which he alleged was due him in back salary, smaller amounts than were due him having been paid certain specified months according to his claim. A bill to recover the amount was filed by his attorney, D. R. Joylin, Jr.

The bill recites that Mr. Kotaska was appointed village treasurer July 1, 1932 for the year ending April 30, 1933 and was re-appointed each year, including May 1, 1933 to April 30, 1934. It further adds that in an ordinance passed by the board in 1932, the treasurer's salary "shall be two per cent of all moneys by him paid out during his term of office."

The bill further sets forth that during the year May 1, 1929 to April 30, 1930, Mr. Kotaska paid out in excess of \$100 and received \$32; from May 1, 1930 to April 30, 1931 he paid out \$19,611.06 and should have received \$212.22; from May 1, 1931 to April 30, 1932 he paid out \$17,534.43 and should have received \$150.84; and from May 1, 1932 to April 30, 1933 he paid out \$12,419.24 and should have received \$252 but was paid \$12; from May 1, 1933 to April 30, 1934 he paid out \$7,150.43 and should have received \$143, but was paid \$224. The bill is returnable the first Monday in August.

Level of Lake Michigan Nine Inches Lower Than Last Year; Expect Rise

The level of Lake Michigan went up 11 feet in June over May, but the rise is only half of the usual rise for the period. The monthly United States lake level survey shows that Lake Michigan is nine inches below June a year ago; and 1.9 feet below the average June level of the last 10 years and 43 feet below the extreme low stage of June 1926. A slight rise is anticipated during July.

Lake Superior, which is 2.2 feet above the low stage of June 1926, and nine inches above the average June stage of the last 10 years.

15 Pound Sturgeon Caught Off Break- water at Waukegan

Landing a 15-pound sturgeon measuring 38 inches, Claude Russell of Waukegan gave spectators along the breakwater a real thrill Saturday.

Russell and a friend, Roy Wilson, were fishing for perch with large sized perch hooks when Russell felt a fierce tug on his line. Realizing that it was a fish he could not haul in quickly without breaking his light line, Russell played the fish at best he could and finally tired it out, landing it with the help of Wilson.

It is the first time in a long while that a sturgeon of such proportions has been caught by anyone still fishing in the local harbor, in fact such an instance could not be recalled by oldtimers who saw the fish.

Sturgeons are fairly common to the Great Lakes but are seldom caught except by harpooning, and that practice is now against the law. Several years ago it used to be considered sport to go harpooning sturgeon in a launch, the fish sometimes running as high as 10 to 15 feet in length.

Largest Pearl

The world's largest pearl, which was once the property of Marie Antoinette of France, is in Delhi. It came from the collection of Henry Philip Hope, the possessor of the famous Hope diamond, which brought tragedy to all its owners. How the pearl reached Delhi is not known. The pearl is two inches long, four and a half inches in circumference and weighs three ounces. It is surrounded by the royal crown of France in red enamel and gold, set with fine diamonds. —Pearson's Weekly.

"Stingaree" and E. Carroll's Latest Vanities Coming

Last Showing of "House of Rothschild" on Screen Here Friday

"The House of Rothschild" with George Arliss starred, finished its three-day run at the Catlow theatre tonight.

A new type of "un-sung hero" came to the screen Saturday night in the Spencer Tracy-Jack Oakie film "Looking for Trouble." This is a story about "trouble makers" — the emergency men of the telephone company, whose job it is to clear the wires in times of danger and catastrophe. "A Giant Killer," a new Mickey Mouse cartoon, Pathe news and comedy will round out a show that will delight movie fans of all tastes.

The most beautiful girls in the world, "tuneful melodies," a part of popular performers, a trio of comedians, a murder mystery and Duke Ellington and his orchestra all wrapped up in a single package labeled "Vanities." "Vanities" — the emergency men of the telephone company, whose job it is to clear the wires in times of danger and catastrophe. "A Giant Killer," a new Mickey Mouse cartoon, Pathe news and comedy will round out a show that will delight movie fans of all tastes.

Such popular actors as Victor McLaglen, Jack Oakie, Spencer Tracy, Michael Charles B. Middleton, Hal Patrick and others contribute their share to the mystery and entertainment of "Vanities." The opening night of Carroll's "Vanities" in New York City was an unknown, mysterious woman from a house and then one of the principals of the show is introduced as the stage during a number. A still symphony cartoon in technical color titled "The Night Before Christmas." Little Jack Little in hand act, news and comedy singing will precede the showing of the feature.

"Registered Nurse" will be the feature next week Tuesday. Its opening act lists such names as Bob Daniels, Lyle Talbot, John Halliday, Minna Gombell, Sidney Toler and Irene Franklin. The story picture, the teleplay, is a comedy encountered by a nurse in a metropolitan hospital. The cartoon, "Lax Bones," Melrotone scene and comedy selections of added interest for this bill.

Bearing the endorsement of the joint reviewing committee of seven representatives of women's clubs, "Stingaree" comes to the local theatre Wednesday and Thursday nights of next week. Their "comic" shows with the words "a brilliant romance, lively comedy, charming singing, photography of the highest calibre and deft direction. Family."

Against the backgrounds of Australia as it was in the hectic days of the "Stingaree" drama with an unusually violent love scene between a fabled dashing bandit and Hilda Bourville, who works as a servant in the home of rich relatives, the "Stingaree" discovers the first valiant when he enters the Clarkson home to rob it. He falls in love with her kidnaper and becomes her sponsor for an operatic career.

Beck Shows Gain in Sales for 10 Day Period

Beck marked up a gain in retail deliveries during the first 10 days of June as compared with the previous 10-day period and showed a more than a 30 per cent increase over the corresponding period a year ago, according to figures released today by W. F. Hufstader, general sales manager of the Buick Motor company.

Reversing the usual trend for this period, Buick dealers in the United States delivered 2125 cars in the first 10 days of June as compared with 1579 in the last 10 days of May and 1579 in the first 10 days of June last year, Mr. Hufstader said.

Rice Most Important

According to a professor at the University of California, rice is the most important food crop in the world, as it feeds the basic diet for over a billion of millions. It is also the only cultivated plant in the world that is grown in the tropics.

Rice production in the United States is small compared with that of other cereals, but still it is eighth in the list of cultivated crops in 1924.

Large One-Cent Pieces

The last large one-cent pieces were made in 1857, and in that year the first small ones were minted. The large one-cent pieces were generally made in diameter, but still 10 some years they were 1-16, 2-32 and 3-64.

"Gas heat taught us something about living"

Anton Kohout, 1425 S. 59th Court, Cicero, tells why he and his family are enthusiastic about Gas Heat

"I used to think," says Mr. Kohout, "that if you owned a home you had to clean up after soot and dirt, tramp up and down stairs early in the morning, late at night, to fix the furnace. But with gas heat we've changed our ideas."

No soot, no dirt, no furnace muss

More than 20,000 families in the Chicago land area know that gas heat has brought pleasures and comforts to their homes never possible with their old heating systems. As Mr. Kohout says, "The house stays clean. The furnace never needs attention. Gas heat is clean heat. No soot, no dirt, no furnace muss. And no trouble, because a little thermostat on the wall regulates the temperature of your house."

Now—when you order your next winter's fuel supply, get the facts about gas heat. Remember, it costs you nothing for equipment to try gas heat. You try it for one month, two months, or a year before you decide. While you are trying it you pay only \$3 a month rental during the heating months in the average home. This change is included with the bill for the gas you use. If at any time within the year you decide you don't like gas heat we'll remove it and replace your former heating equipment in good workmanlike condition.

Order gas heat now

It will pay you to order gas heat now. Think of it. A clean basement all summer long. And next winter no coal shoveling, hauling ashes, getting up at daybreak to fix the fire.

Phone today for free estimate and full details of our startling offer.

With gas heat there is no dust, no soot, no dirt. Mr. Kohout, pointing to his furnace, says, "The house stays clean."

YOU INVEST NOTHING To Try Gas Heat

Gas heat can be installed without your investing one cent for equipment. We'll install it at our expense—remove it at our expense, if you don't like it. Accept this startling offer. Phone or write TODAY.

This lady has good reason to be satisfied with her day's shopping. In the new Leonard, The Complete Refrigerator, she found all the features she was looking for—and more. She didn't have to "skimp" on shelf room to get a beautiful cabinet. Or sacrifice style for convenience. Or accept less than the best, to meet a price.

Pictured here are only a few

of many unusual Leonard features—designed to save steps, time, work, breakage, spoilage and waste. Simple, modern lines—beautiful to look at. Snowy finishes, hard as flint, non-fading, easy to keep clean. A planned interior, with a surprising amount of shelf room.

Center of Earth Liquid
The central portion of the earth is believed to be liquid, in the sense that it will transmit longitudinal earthquake waves, as any elastic liquid will, but will not transmit transverse earthquake waves, as it would do if it were solid. The pressure computed on the assumption of liquid density somewhat in excess of the actual density of the earth, but all reasonable assumptions give a pressure of over 40,000,000 pounds per square inch.

[LOWEST PRICE IN BUICK HISTORY]

New Low Price Unequaled for the Quality It Buys

First of all, the newest Buick is built to be a Buick through and through. Then, it is given a price—lowest in Buick history and unequalled today for the quality it buys—which puts its value beyond comparison. Big, beautiful, modern, it is upholstered in fabrics of exclusive smart design. Unmatched in performance by any other balanced car, its dependability is attested by Buick records of 30 years. For it has every famous Buick feature. Thousands have waited for such a car at such a price. They are buying now. They are getting deliveries now.

Carfield Was Ridiculed
At Williams College, James A. Carfield was thrown into a locker of polished students who looked somewhat contemptuously upon the rough western carpenter and stammerer who had placed himself in the midst. He was the target for their belittling remarks and their much needed treatment in refusing to associate with the Ohio farmer. Young Carfield bore all this with a patience that helped him through the political battles later in life.

The route of the Barrington-Wauconda-Via road, planned 15 years ago, a forerunner of route 54, was described as follows in the Barrington Review of September 4, 1919: "The road leading to the White school, then west to Haller's corner, then west to a northwesterly direction to Peterson's corner and from there to Wauconda and 1 1/2 miles to the Wauconda road, then west under the railroad." The route was described as follows in the Barrington Review of September 4, 1919: "The road leading to the White school, then west to Haller's corner, then west to a northwesterly direction to Peterson's corner and from there to Wauconda and 1 1/2 miles to the Wauconda road, then west under the railroad." NRA RETARDED RECOVERY

"Instead of a democracy America has during the past year become a bureaucracy," said Senator Thomas D. Schall, of Minnesota, today.

"Please note," he continued, "that the NRA and its alphabetical cousin, the AAA, went into effect in July 1933. The first industrial code, cotton textile, was approved by the president July 9. Please remember July as the starting point from which to measure the economic effect of the NRA and its crackdown brigadier. Yet from July to December, the first six months of the NRA, only one industrial country on the globe had a set-back in industrial production, and that was the United States. And from July to December the industrial production of the United States dropped 25 per cent, the heaviest decline for that period of the year in the entire history of the depression, which began in 1929. On the other hand, in the same July-December period of 1932, the last year of the original depression, there was an industrial recovery of 12 per cent. The low point of the depression was in July 1932. Recovery then began. There was therefore during the fall of 1932 and the early winter of 1933 no longer 'an emergency' such as to justify a dictatorship by the suspension of the laws and constitution of the United States."

AN ACHIEVEMENT IN SAFETY

Charles M. Hayes, president of the Chicago Motor club, has sent a letter to Governor Horner, congratulating him on the latter's instructions to proceed with the construction of grade crossing separations. Mr. Hayes' letter follows:

"With 1500 deaths at railroad grade crossing occurring annually in the United States, and with 152 deaths occurring in this fashion in Illinois last year, your action in authorizing the Illinois commerce commission and the state division of highways to proceed immediately with the program for greater protection at railroad grade crossing is to be highly commended.

"Only too few persons know that during the past year, Illinois has taken the lead in separating grades at highway and railroad intersections."

The present program involves approximately 300 grade separations in most of the counties of the state. These grade separations will result in material reduction of serious and fatal accidents over a period of time.

\$350 PER CAPITA DEBT

Every man, woman and child in the country has been run into debt \$350 by the various government agencies, national, state, and local.

The total indebtedness of all government units in the country is about \$45,000,000,000. If this debt were to be paid off tomorrow by a capital levy on every person in the country, every child and adult would have to pay \$350.

Of course, the debt will not be paid off in a day, and it won't be paid off by a flat horizontal tax on every person. Years will be required to pay even a considerable part of it, and the money will come out of incomes and out of business in accordance with the tax systems now in effect or later enacted.

AN EMPHATIC "NO"

The answer of the leading insurance companies to President Roosevelt's question: "Are you better off than you were last year?" is an emphatic "No."

A federal district court decision that the government can abrogate a contract or change its terms, the passage of the Lempe-Frazier law, which the president admits to give a dishonest ten per cent of the farmers a chance to repudiate their mortgages, and other radical trends in Washington have resulted in the insurance companies refusing to take a lot of new business. They can find no place to invest the money safely.

These insurance companies have 65,000,000 policy holders and 100,000,000 beneficiaries named in the policies. The welfare of all of these is jeopardized.

EDITORIAL SHORTS

The hardest money to get hold of is easy money.

Americanism: Senate millionaires investigating fellow-citizens who are trying to get that way.

WHAT'S GOING ON IN WASHINGTON

No sooner is Senator William E. Borah, of Idaho, nominated by a segment of the press gallery as "the best orator in the senate than he takes steps to live up to the title. He is marshalling the entire battery of his oratorical powers to campaign against the NRA, which he thinks takes business away from the little fellow and makes a monopolizer of the big, and against some of the plans of the AAA, which he believes will harm American agriculture. The mind of the Roosevelt administration, that is its political intuition and foresight recognizes now that as the autumn elections approach there must be an evidence of a plan that comports with American tradition, that Senator Borah's type of attack cannot be dismissed as was that of Clarence Darrow or Dr. Wirt. The truth of the matter is that much of the criticism of the administration has sunk in. It is not human of course, to go around admitting error. There is always a desire to appear consistent or to give the impression of invulnerability.

When the economy act of March, 1933, cut salaries of federal employees 15 per cent, it meant a saving of \$135,000 a year to the treasury. Five per cent of the cut was restored last Feb. 1 by the act of congress, another 5 per cent July 1. Remaining was the final 5 per cent, with the president having power to restore it to federal workmen when the cost of living had returned to the level of June 30, 1928. Under an executive order of July 6, which the president had left sealed before he left on his vacation the other five per cent cut will last another six weeks at least, because the cost of living still is 20.2 per cent below the 1928 figure. This ruling saves Uncle Sam \$22,000,000 during the last half of the year.

National planning on a grand scale is contemplated in the executive order issued by President Roosevelt on July 3 creating the national resources board, which is charged with studying and planning for the better utilization of the land, water, and other national resources of the country. The plan is to bring together millions of farm families now attempting unsuccessfully to wrest a living from worn-out, eroded soil. The proposed solution: for the land, a return to forest or to use as grazing areas; for the families, removal to better land, where their efforts will bring a better living and more certain economic security. In announcing the executive order, Mr. McFarlane, assistant secretary to the board, stated that there is imperative need of saving those lands of the country now being turned rapidly into virtual deserts through wind and water erosion and the relocation of those trying to obtain a living from the rapidly deteriorating soil. Those lands include flat prairie land of the west, where drought and wind combine to carry away the remaining fertile topsoil, and hill land which, after being cleared, has been cut into gullies as the rain has washed away rich surface land. The program will also consider the effect of the better balancing of agricultural production.

Business has been consulted. Labor has been consulted. And General Johnson, who has had exceptional opportunities to examine at close range all the criticism of the NRA, has said: "I listen to a lecture about telling the truth and then I come home and have to listen to another. Makes me sick. As if everybody told the truth but me." "Who do you know that doesn't tell the truth? Say what's on your mind." "Why Ma, you couldn't get along for a day if you told the truth as you want me to do. Doctor Mullins told Aunt Katie that she would be all right in a day or so when he knew she was going to die. Aunt Helen told Mrs. Bitt that her hat was the 'Cats' when she knew it was awful. Old man Cooley sold his car to a man for a good one and he knew the rear end was no good. Uncle Clark—

"That's enough of such talk, John Thomas. The minute any of these people slipped off the truth standard you lost respect for them. You stick to the truth no matter what anybody says and you will be better off. Every time you tell a lie somebody knows you're caught in the web."

"I'm not afraid. What do I care?" "You cared so much that you told a lie about nothing at all." Right then John Thomas looked as though a new idea had come to him. If a good example follows the precept there is a fair chance of his getting acquainted with truth all over again.

July-Three Sundays in Year
According to the Gregorian calendar, every year has 52 days of the one on which it begins. Generally, the year contains 53 Sundays every five or six years. This will occur again in 1939, 1944, 1950, 1956 and 1962. According to the United States calendar, which begins on a Monday, there have been 53 Sundays in the year 1901, 1907, 1918, 1929, 1935, 1946, 1957, 1968, 1979, 1990, 2001, 2012, 2023, 2034, 2045, Lake Zurich Nine Defeated 18 to 4 By Palatine Team

Lake Zurich Pirates took a heavy drubbing from Palatine Sunday afternoon when they lost to the team of 18 to 4. Confusion within the ranks was reported to be the cause of the defeat, now players having been substituted for several regulars. The usual players are scheduled to turn out for the next game, to be held at the home diamond, Lake Zurich, next Sunday afternoon. Arlington Heights' nine will be the opponents.

Merchants Softball Team Wins From Elgin 11-2

Gieske Holds Visitors to Four Hits; Locals Get 12

By pounding out twelve hits to score eleven runs, the Barrington Merchants' Softball team took a one sided game from the Elgin team of Elgin last Friday night.

The heavy hitting of Clinge, Emmy Altenburg, and Bill Graben-pitching, coupled with the air light pitching of Eddie Gieske accounted largely for the victory. Two home runs knocked out by Emmy Altenburg made the Elgin pitchers feel quite uncomfortable.

This game gave the local fans their first opportunity to view the Merchants in action at home, and it looks as though the team will have plenty to show before the season ends. The managers are hoping to book a fast stepping colored team from Waukegan who play under the name of "Maggie's Pals."

Woman May Be President
There was nothing in the Constitution which prohibited a woman from becoming President because of her sex, even before the adoption of the Nineteenth amendment.

Origin of Knives and Forks
The knives we use at our meals are the successors of the dagger and hunting knife which the men of long centuries ago found so handy for cutting his food, and the blade of which was a duplicate of our straight-pointed carving knife. In those days the fingers were used as forks and it was only in Tudor times, when the enormous ruffes worn then made it difficult to reach the mouth with the fingers, that it became necessary to discover a substitute in the crude parent of the modern fork.

Mrs. Vernon Schroeder will be in charge of the young people's work and finances at headquarters in the village hall.

The "touch of human kindness"

is a phrase often used to describe the particular quality of welfare work done by Volunteers of America. The organization was founded 40 years ago by General and Mrs. Maud Ballington Booth and maintains many posts in the state.

President Roosevelt wrote General and Mrs. Booth: "As a member of your national advisory board and as an individual, I rejoice with you in the accomplishments of the Volunteers of America."

There will be sold in residential as well as business districts for whatever anyone is willing to give to the cause, it was reported.

Livingstone, the Missionary
David Livingstone, a missionary, was ordained and first went to Africa as a missionary in 1841, at the age of twenty-eight. The trip which cost him his life was made at the request of the Royal Geographical Society. He was seeking the source of the Nile. He died in the village of Tshitambo, May 1, 1873. His body was taken to England, where it rests in Westminster abbey.

The Face and Personality
The face is the first thing we look at when we meet a stranger. Justly or unjustly, we use the face as an index to character, writes an authority in the Cosmopolitan. It is only the psychologist or the plastic surgeon who knows the extent to which a facial defect can force upon the individual a personality not his own.

Ask State for Stop and Go Sign at Northwest Highway, Hough Street

will be a combination of highways 59 and 63-A. In addition to the highway traffic, there is considerable local traffic along both routes, especially on North Hough street which connects the village with the territory north of here and is the principal outlet from Jewel park. During the summer time, the traffic on the Northwest highway is increased by vehicle travel to and from the North Side park and swimming pool.

Largest Underground City
The largest underground "city" in the world is the Witwatersrand gold mine, near Johannesburg, South Africa, which has more than 4,000 miles of subterranean shafts, streets and avenues, and employs, under normal conditions, about 100,000 workers.

Organs on Wrong Side
Medical history records more than 200 cases of reversed body construction in which from one to nearly all of the vital organs—such as the heart, liver, and stomach—were on the wrong side. The condition did not interfere with the health of the individual.

Two Churches in Yard
In a churchyard in Wiltshire, England, are two churches, one having been built by a former vicar's sister because her brother objected to her being late to church.

Cartwright, Labrador
The town of Cartwright, Labrador, is named for Major Cartwright, an Englishman who owned trading stations in southern Labrador at the close of the Seventeenth century. At most the only occupation of the people in this part of the world is fishing, and the population is too small to be recorded.

White Elephants
There are albino among the phantoms as among white animals. In these the coloring matter in the skin is deficient, but the result is not a pure white.

Inquest in Death at Beverly Lake Postponed a Week

Man Who Died While Swimming Not a Victim of Drowning

An inquest into the death of Peter Ligman who died while swimming in Beverly lake on Hingham road near the southwest corner of Barrington township Tuesday was held at 203 S. Cook street Wednesday but was continued until July 25 after reports indicated that an examination of heart and lungs gave no sign of death having been caused by drowning or heart trouble. Vital organs have been sent away for laboratory tests it was reported.

Mr. Ligman and two companions, Alexander Hannah and Walter Parks, all from Chicago, had moved to Beverly lake. Ligman and Parks had taken a boat and rowed out about 300 feet on Beverly lake, when Mr. Ligman, who was wearing only a few clothes and wearing only his underwear plunged from the boat and started to swim to shore. After he had swum about 200 feet, he called for help. His friends thought he was joking since he was in shallow water about three feet deep. They went to look and brought him to shore. Efforts of Klein and Pundak fishermen and a first aid squad from the Public Service company of Northern Illinois failed to revive him and the body was brought to 203 S. Cook street, Barrington.

Mr. Ligman was 35 years old, a World War veteran, and former proprietor of a tavern in Chicago. He lived at 840 N. Holt street, Chicago. His widow and one child survive him.

Local Residents Respond Generously to Plea for Flowers for Sick and Poor

Following a plea to local residents for donations to hospitals and settlement districts, many bouquets were brought to the Northwestern station early Wednesday morning according to members of the Countryside Garden club and Barrington Garden club who are cooperating with the Chicago plant, flower, and fruit guild to make every Wednesday Barrington flower day for city unfortunates. Miss Elizabeth Howland and Mrs. Lester Higgins are in charge of arrangements. Each local club provides several bouquets every Wednesday morning and all gifts of flowers are boxed and ready for distribution when they leave Barrington. Early gifts of flowers are appreciated, it was reported, since all must be sent in on the 5 to 6 a. m. train. "Even small bouquets bring great joy," the speaker added.

Dr. C. A. Parker, Father of Mrs. K. K. Lillian, Dies

Dr. Charles Aubrey Parker, father of Mrs. K. K. Lillian, of this village, died at his home in Chicago Monday evening after a prolonged illness. He was 61 years old and had been a member of the faculty of Rush Medical college.

Collect \$56.51 to Aid Volunteers of America Saturday

A total of \$56.51 was contributed to the Volunteers of America by local residents as a result of "red heart tag day" Saturday, Mrs. Vernon Schroeder, chairman of the drive in Barrington, reported. Of the sixteen young people who are assisted with collections, the following received prizes for having taken in the largest amount: Newton Plagge, first prize for having secured \$11.14; Ruth Brandt and Marjorie Nelson, second, with \$10.00; Harold Jorgenson, third, for collecting \$7.97; Vernon Anderson, fourth. The other workers were made happy with movie passes.

All contributions to Volunteers of America are used to aid destitute mothers with children in care of the organization. It was reported. Local sponsors of the drive were Mayor Elden Gieske, Mrs. Herman Schwem, Mrs. Reuben Plagge, Rev. Hermann Koenig, Rev. Philip Beucher, Rev. H. L. Eagle.
