PASSED WRONG SALES TAX BILL

In establishing its speed record of 30 hours, the general assembly in its 4th special session went so fast that it amended the wrong law in its effort to extend the state occupational tax beyond June 30, 1935. About \$50,000 was appropriated to pay for the 4th special seasion, but indications are that its work will have to be done over again at the regular session mext month. The title of the bill passed follows:
"A bill for an act to argend Sections 2 and 3 of 'An act

in relation to a tax upon persons engaged in the business of selling tangible property at retail, the disposition thereof and making certain appropriations in connection therewith,' approved March 22, 1933."

Both the house and senate journals show that the above Both the house and senate journals snow that the above was the title of the only bills considered at the session for the purpose of extending the sales tax. Each day the title appeared in the journals and each succeeding day the record of the previous day was approved.

Page 938 of the session laws, 58th general assembly,

1933, shows that the title of the bill passed at the 4th special session was the title of the old 3 per cent sales tax, app March 22, 1933, and later declared unconstitutional by a unanimous vote of the Illinois supreme court.

Consequently the present occupational tax law will ex

FOR SAFER HIGHWAYS

Why would it not be a feasible project to insert red glass reflectors on all concrete abutments to bridges on our high-ways? Many curve signs are now equipped with them and they can be seen at night from a quarter to half a mile away. Equip abutments and other dangerous projections along highways with red reflectors and night accidents will be cut down considerably. There probably is not a single man who has driven at hight who has not had his heart jump up into his mouth, when just after passing a pair of bright headlights, he suddenly sees a concrete abutement on his right he has just barely missed. Some drivers have not missed themand are now six feet under sod. Outline abutments, fences, etc., and night driving will be made much safer.—Register, Brookings, S. D.

THE BUSINESS FIGHT

It's not the size of the dog in the fight; it's the size of the fight in the dog.

Ever see a little dog clean up on a big one? Just be-cause he had a little more of the same spunk and aggressive-ness—a little more fight in him?

Many a little business has licked a bigger, older compe-titor just because it had a little more of the same spunk and aggressiveness—a little more plain, low-down fight.—News, Van Nuys, California.

"I like the way that you looked at Nick Brandon in court this after-noon. No young man has looked at him that way since I can remember. That's why I telephoned Bridger: because I liked the way you looked at Brandon and because I'm about worn out trying to crack a hard nut. That's why I'm here.

"Maybe, from what Bridger told me, and from what I'w seem of you, you might maybe, perhaps, like to take a crack at this not. The fact is the about the caster's at its great and the truth is that maybe, perhaps, possibly I might do a right fair Job of begging you to come and help me!"

Elliott did not speak, but witched liber me. I have been to a sketch me. Alle paused for a moment, and the new for a sketch map, Alle paused for a moment, and then continued:

"Come over by the window. Now, here's the lay-out,"—spreading the map on the all. "Here's the rall-road, main-tine. This is Hoot Owl siding with our mill. It's a long, narrow strip, you see; seventy-sin to not the form of the mill. Our rallroad goes up through the chopping, so, we've an old coffee-pot of twenty-ton rod engine and freight cars, all more or less ready for Junk. Here's the camp now and we're cutting on the second forty north. Got Chirty-odd lands there that pass for men. Man named fuller's mill wright and a fellow named Huppert's boss at camp, Harrington's gone-driven out—and we're in the soup!"

He paused and looked at Elliott, whose keen eyes were studying the details of the mip.

"It's a haywire worth, the condition of the last cull place, there's not week. The mill itself is a grand old rula but saws, after a fashlon. The lumber in the bank to meet interest and pay-roll and there's no boss more and the payed outdoors. If so, why's it in this jam?"

Able Armingse lifted a hand in gesture and whispered sharply one word:

"Brandout down the map, replaced the file a temple where he is the hand to me out."
