**Odor Description System** 

about 1750, in eastern Ohlo, They fought the British or Americans unit 1755, then variously Joined the Cherokee or Creek or withdrew to Indiana and even Missouri, Portions of the tribe lived for a time in Texas and Kansas, and they are now gathered in Oklahoma, though in several districts.

Has Never Been Provided
Man has an important sease—the
sense of smell—but not one word to
describe any of the sensations which
says the New York Herald Tribune.
Be can describe his reaction to the
sensation, but there are no words
for describing the vast array of
odors of which we become conscious, declared Dr. Ernest C.
the state of the sensation of the
sensation, but here are not selected
appleasant, unpleasant, nanuscating,
repulsive, etc. are purely relative,
are subjective and dependent upon
one's experience and convey pothing of the original sensation, to
scription is required that is independent of a person's experience
and background and that will cresate the same impression in the
mind of the receiver as in that of
the describer," booton Crocker says,
"Smelling and taxting are very." "Sweating" of Glass
Glass is not porous to any appreciable extent and the "sweat"
does not come from the Inside of
the glass, vessel or pipe. The water vapor contained in the air conwith the cooler pipe and the contact
with the cooler pipe and the contact
with the cooler pipe and the contact
with the cooler pipe and walls tend to sweat more in warm
weather is explained by the fact
that warm air can absorb much
more moisture than cold air. When
the air is cooled by contact with
cold water pipes, it cannot retain
all the moisture held in suspension,
and some is deposited.

the describer," Doctor Crocker asys.

"Smilling and tasting are remode alities, and in share eremode alities, and in share eremode alities, and in share eremode alities of an electric termode alities of a share etermode alities of a share emode and Chaucer and English Language
Lounsbury says of Chaucer's ingrage could exist until a literature
had been ereated which would be
admired and studied by all who
could read, and taken as a model
by all who could write. It was only
a man of genius that could lift up
one of these dialects into a preemigive to the scattered forces existing
in any one of them the unity and
vigor of life. This was the work
that Chaucer did."

Relative Humidity

Billions Have Lived and Died The number of persons who have lived and died on the earth since the dawn of recorded history, some 6,000 years ago, is approximately 40,000,000,000, or only 20 for every individual in the world today, writes D. E. Moore, Jennette, Pa, in Collier's weakly.

Formation of Natural Glass
Natural glass is a phenomeno
well known to science, Aa a rule
it is caused by the fusion of lightning and sand. Examples found in
the Arabian and other deserts are
the variety, known as tektical
cours in meteoric craters, and has
long been familiar an "obsidian,"
the various anames given to em
stones cut from it. Name Popular in Naples as cab horse and not food, When as cab horse and not food, When as visitor to Italy lips his each driver the fellow smiles brightly and says. For Macaroni? "This Italian nich-name for a cab horse came to America early, notes a writter in the Chicago Duily News, for when Yan-kee Doodly rede to town he adorned his horse's hat "and catled him macaroni."

"Macaroni" Is Cab Hors

Name Popular in Naples

his borse's hat "and called him meacroni."

Hallan steeds are decked out with brilliantly colored significial flowers, resettes and colored ribflowers, resettes and colored ribflowers a carrieria appearance. The crowning effect, however,
is a long pheasant feather caught
at the top of the horse's bridde.

To obtain the American version
of meacroni in Naples one calls for
pasts. "This famous food has almost as many shapes as there are
their favorite ways of preparing it.
At Bologna it is ribbon shaped, in
Rome it comes in strips. That of
Sielly is the most intricate of all,
skillfully rolled around hifting
needles to make it a tiny spiral. Relative Humidity
Humidity has to do with the
dampness of the air. Absolute hamidity is defined as the actual quantity of moisture present in a given
quantity of air, and it may be expressed as a certain humber of
grains per cubic feet or of grams
per cubic meter. The relative humidity, expressed in per cent, is
the ratio of the actual amount of
water vanor present in the air. the ratio of the actual amount of water vapor present in the atmosphere to the quantity which confidence to the quantity which confidence to the quantity which confidence the relative hundrifty at any time is to measure the drying power of the air with a wet and dry thermometer. The wet thermometer as it is not covered with muslin that is kept damp. The difference has its belt covered with muslin that is kept damp. The difference term, referred to of the thermometers, referred to of the thermometers, referred to the thermometers are the second to the thermometers and the thermometers are the second to the second
