Crop Losses and Acreage Increase Noted by Census

1935 Government Report for Agriculture Released for Illinois

An increase of over 12,000 acres of corn was shown in Lake county between 1929 and 1934 in preliminary figures from the 1935 census released by Director James H. Austin, bureau of census, department of commerce.

Similarly, in the same period 1929-34, 192 more farms under cultivation than previously. Figures for 1935 show 1758 farms with 1569 in 1934. The value of farms in Lake county is \$28,869,120 with a farm acreage value of \$16,422 or \$131.10 per acre.

The drought of 1934 seriously reduced most crop yields. Despite the 1935 in corn acreage, only 25,123 bushels of corn were harvested from 165,604 bushels in 1934.

Similarly, wheat production dropped from 19,644 bushels in 1934 to 14,646 and oats from almost a million bushels in 1934 to 822,224 in 1935. The crop showed a drop from over 2,000 bushels to over 2,300 bushels in 1934 than in 1935, but the crop was seriously affected by the dry season. The total production of 21,093 tons was less than one-half the 1934 crop.

Wheat and pigs showed the greatest decreases due to corn fallow and the national farm program. Hogs dropped from 9447 in 1934 to 6503 in 1935. Sheep and lambs remained steady with a total of 4923 in 1934. Cattle showed the best increase. Shipping headstock total 26,148 head in 1934 against 22,326 in 1935. Dairy cattle numbered 18,209 in 1934 and 18,929 in 1935. Horses and mules showed a slight decrease with 4843 in 1934 and 4916 in 1935.

All selected crops harvested in 1935 showed heavy decreases due to prolonged dry spell. Detailed statistics released for the state show increases in acreage under production in 1934 with smaller harvests of crops. Major increases were noted in wheat and corn in the number of acres produced, and a continued gain in horses and mules.

The estimated average value of farms in the state is figured at \$146 with an average acre value of \$48.67.

Local Relatives Attend Golden Wedding Party at Palatine Tuesday

Mr. and Mrs. Fred Wickersheim of Palatine, parent of Mrs. E. W. W. of Barrington, celebrated their golden wedding anniversary at their home in Palatine Tuesday. They have been residents of Lake county for 50 years.

Those who attended the celebration from Barrington were Mr. and Mrs. Oet, daughters Adeline and Sylvia, and Miss Wickersheim.

Bank Will Not Be Open on Lincoln's Birthday, Wednesday, February 12

The First National Bank of Barrington will not be open Wednesday because that day is a holiday. Although it is the celebration of Abraham Lincoln's birthday the local schools will be in session. The post office will remain open as will all stores.

A holiday will be granted to the public school students on February 21 to celebrate both Lincoln's and Washington's birthdays. Washington's birthday falls on Saturday, Feb. 22, and the school vacation is held over till the Friday before that in order not to disrupt class routine.

Attends Convention

William W. Behringer of Acme Home Service has returned from a convention in Chicago, where officials of the Kelvinton corporation, headed by H. W. Barrill, vice president, and of the Gemitt company, Inc., distributor for the Chicago trading area, conducted all day sessions at which more than 400 dealers, their sales and service forces witnessed a previewing of the new line. Shipments of the new refrigerators and other units are being made from the factory at a rapid rate, and the first of the 1936 models are due to reach here some time this week, it was announced by Mr. Behringer.

Visiting in Florida

Ed Gieske, associate proprietor of the Barrington Laundry, and Emmett Altunberg left by motor car for Florida last Wednesday. They expect to visit Miami and stay at other cities enroute. Mr. Gieske will go on to Cuba for a week or more, returning to Barrington late in February. Mr. Altunberg did not announce his plans for the trip.

Action of Mars' Polar Caps

Because the polar caps of Mars expand and recede like our own, Astronomers believe that Mars enjoys seasons similar to our own. The seasons are longer, for the years on Mars are 687 days long. Certain areas on the planet change color regularly from yellow to green and back again, just as the change in the color of the foliage here in fall and spring would appear from Mars.

Library News

So much has been written about Abraham Lincoln that most of us are quite familiar with the circumstances of his life. However, if you have not read the novels in which he appears as one of the principal characters written by Honoré White Morrow you have missed something most interesting as well as informative.

These novels are based on fact and the source material of the author is authentic. The trilogy includes "Forever Free," "With Malice Toward None" and "The Last Full Measure."

Despite the extremely cold weather, circulation in the Barrington public library in January showed an increase of 175 books over last month, and an increase of 244 books over the same month last year. This increase may, at least in part, be attributed to the fact that the library is now open four days a week, Friday being the new day.

Total circulation this month was 2065 books. Added to this, 160 books were circulated to the rural schools. The largest daily circulation was 208 books.

Ask Employment Office Here for Sewer Project

Continued from page 1. The supply of men from Barrington has been exhausted, other laborers from Lake and Cook counties will be hired. The contractors naturally reserve the right or privilege to bring in their own men or crews of organization. They may start work in two or three weeks, depending on weather conditions.

Due to insistence of PWA officials and the fact that contractors would not bid unless a union wage scale were effective, sewer work has been placed on a union scale. If the men who desire work have no union cards or permit cards, they may be well for them to obtain them before or possibly before they register because this might improve their chances to obtain a job on the project. It has been indicated that men getting union cards or permit cards refrain from paying any dues until after they are absolutely certain that they have obtained jobs and are certain of being able to keep them for some time.

The following hourly wage and payroll setup is in the specifications incorporated in the sewer contracts: carpenters \$1.51 1/4, brick masons \$1.50, plasterers \$1.50, iron workers \$1.42 1/2, laborers \$1.50, roofers \$1.37 1/2, painters \$1.33 1/2, plumbers \$1.37 1/2, steam fitters \$1.37 1/2, electricians \$1.50, glaziers \$1.37 1/2, truck drivers \$1.50, sheet metal workers \$1.50, crane operators \$1.50, oilers \$1.00, pipe layers \$1.10, laborers \$1.00, time keepers and clerical work \$1.00, watchmen \$1.00, water boys \$1.00. Judging from the fact that the contractors operate on a union basis and from the bid item figures, it is assumed that common labor will be paid the union scale, of about 97 1/2c instead of 50c an hour. Watchmen and water boys need not be union men.

Working hours are limited by PWA rule to 130 hours per month and a maximum of 8 hours a day. Men who came to work in working for the contractor, face discharge from the job, it is understood. Men who are now working on WPA jobs, cannot be prevented from registering for PWA work, but if they are discharged from PWA work if they are hired for same, it will probably take them considerable time to get back on WPA work. There are now three WPA projects in the village, two operated by the village and one by the public school. The village board of trustees is anxious that local men get preference over outside men on the sewer work.
