

Lloyd Douglas' Novel Brought to Catlow Screen

"Magnificent Obsession" Is Billed Sunday-Monday With Leading Cast

Probably everyone in the world at one time or another, has toyed with the idea of what they would do with a million dollars. It's a fascinating subject with as many answers as there are people.

This intriguing idea is developed in 20th Century's sophisticated comedy, "The Man Who Broke the Bank at Monte Carlo," starring Ronald Colman, tonight at the Catlow theatre.

With Joan Bennett in the feminine lead, the picture moves at a fast and furious pace from Paris to Monte Carlo, to Switzerland, back to Paris and then to Monte Carlo again.

Colman enacts the role of a displaced Russian prince who runs off hundreds of francs (up ten million). He promptly divides half of the sum among fellow exiles who have contributed to the cause. He then returns to Paris in the pursuit of romance, represented by Miss Bennett.

With the scene of Gene Raymond's new RKO Radio's "Seven Keys to Baldpate" tall in a lonesome inn among the Swiss Alps, studio art directors had their hands full in making a realistic setting for the picture.

One of the largest stages in Hollywood was used for the set, a snow-covered area of woodland with a full-sized reproduction of the two-story "Baldpate" Inn placed in the center.

Meanwhile the art directors were supervising the erection of the "inn" itself, a rambling structure nearly 120 feet long, with its huge living room and winding corridors.

The film is one of the interesting offerings of recent months from the standpoint of its background and true-to-life settings. Marguerite Goddard, the feminine lead opposite featured Gene Raymond, with outstanding playing in the other roles, coming Friday, Feb. 28, at the Catlow theatre.

Four unsolved murders prove unusually knotty problems for Edward Arnold, cast as the "ace" detective in University ward and thrilling drama of murders during and after a gay Long Island party in "Unwitnessed." "Remember Last Night" at the Catlow theatre Sunday.

The film, in which are featured such players as Clarence Cummings, Sully Edgars, Robert Young, Robert Armstrong and Reginald Denry was produced by Carl Laemmle, Jr.

"Magnificent Obsession," which starts at the Catlow theatre Sunday is based on Lloyd C. Douglas' novel of the same name. The book has been in press 40 times in the United States, and has had a large sale in Canada and the British Empire, as well as in France. The story has been reproduced on photographic records for the blind, so widespread is its appeal.

Contrary to the usual way in which "best sellers" rise, the story, "Magnificent Obsession" did not reach that vantage point until 18 months after publication. For three years the story has remained in the upper brackets of public demand.

Irene Dunne, Robert Taylor, Charles Butterworth, Betty Furness, Sara Hadden, Ralph Morgan and Henry Armetta portray the leading roles.

Where Cicada Plants Eggs

The female cicada lays her eggs in slits which she makes in the twigs of trees. These eggs hatch in about six weeks and the young nymphs drop to the ground. They bury themselves in the earth. They live by sucking the juices from the roots of the trees. It is the male cicada which is heard singing in the trees in mid-summer.

Library News

Are you interested in the relation of the government to private enterprise? Then read "Government in Business" by Stuart Chase. You may or may not agree with him but you will be interested in what he has to say.

In his book, Chase seeks to show that at least since the latter half of the 19th century, the role of government in business has been constantly expanding, both in Europe and America, and in recent years, has reached an accelerated pace.

The author holds that it expanded because it had to; because private enterprise has been either unable or unwilling to do what had to be done. He believes that further expansion of government ownership and control is inevitable. He is heartily in favor of it and outlines the techniques by which it ought to proceed.

IT WORKED FOR ME

Women should take only liquid laxatives

MORE people could feel fine, be fit and regular, if they would only follow the rule of doctors and hospitals in relieving constipation.

Never take any laxative that is harsh in action. Or one, the dose of which can't be exactly measured. Doctors know the danger if this rule is violated. They use a liquid laxative and keep reducing the dose until the bowels need no help at all.

Reduced dosage is the secret of aiding Nature in restoring regularity. You must use a little less laxative each time, and that's why it should be a liquid like Syrup Pepsin.

Ask your druggist for a bottle of Dr. Caldwell's Syrup Pepsin, and if it doesn't give you a little relief, it isn't a joy and comfort in the way it overcomes any sluggishness or biliousness, your money back.

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for relief of headaches, or the pains of rheumatism, neuralgia or neuralgia, ask your doctor what he thinks about it — in comparison with Genuine Bayer Aspirin.

We say this because, were the discovery of Bayer Aspirin, not so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the kidneys, and the fact that Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember, Bayer Aspirin is rated among the finest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

You can get real Bayer Aspirin at any drug store — simply by never being led by the name of "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

"Buick's the Buy"

OL-HUSHED to a sigh of silence under Buick's style-tapered bonnet, a great-powered valve-in-head engine waits to unleash a torrent of action at your command.

There's thrill in it — and triumph over time and distance. But most important — there's eyewink obedience.

Teamed up with this ablest of driving forces is the newest and most highly perfected system of hydraulic brakes.

The quickest of stops is velvet smooth under their self-energizing action. On the wettest of streets there will be no slewing, no swerves, for they are automatically self-equalizing.

Their action has the smoothness of a closing hand, increasing its grasp steadily to the maximum. Their steel-tendon grip would halt a heavy truck, but it takes only a touch of a daintily-shod toe to put them into action.

We call them "tiptoe hydraulics," and how apt the name is you'll never know until you drive a Buick and sample for yourself their softness and their velvet command.

The first few times you sit behind a Buick wheel, you may find yourself traveling faster than you think. No car is more buoyantly smooth in its power-flow, more deceptively effortless in its swift flight.

But no car is more surely under control at all times — quicker, smoother, easier in its stopping. If you must drive with an eye on the passing minutes, do so in a Buick which matches engine eagerness with tiptoe braking sureness, offsets highspot go-ability with dependable stop-ability.

\$765 to \$1915 are the list prices of the new Buicks of Flint, Mich., subject to change without notice. Standard and special accessories groups all modals at extra cost. All Buick prices include safety glass throughout as standard equipment.

STRAIGHT AS A STRING

Every stop is a straight-line stop with Buick's "tiptoe" hydraulic brakes. All four wheels are always equalized; the only adjustment is an occasional tightening when brake bands wear. For emergency stops and for parking purposes, the hand brake conveniently at the left under the dash, operates the two rear brakes mechanically.
