Zonolite
It pours into place from paper bags. One bag of Zonolite will fill four cubic feet of solid space.

In Summer Golden Zonolite in your attic reflects and turns back the radiant heat of the sun. Its myriads of tiny air cells entrap and prevent the passage of conducted attic heat to your living rooms below. In Winter it prevents heat from your living rooms below from escaping through the attic and roof.

Ford - FOR ECONOMY

"The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made"

AND ITS UP-KEEP COST IS THE LOWEST

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For, the fact is, it's way down the list.

The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor.

Check up and you will find that the difference between 17 and 19 miles a gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car:

More value for every dollar you pay.
Lower cost for repairs and service.
Long life. Slow depreciation.
Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.
