Term Defined Technological unemployment is the displacement of workers by improved machinery.

Steel Nets a Failure Among the odd contraptions used in the World war were the steel nets, made of steel cables 1000 feet long, which England hung in the air, by anchored balloons, to catch the German airplanes that frequently bombed her bigger cities.

Although high hopes were had for the success of these nets, only one plane ran into one of them—and went right through it virtually unharmed.—Collier's Weekly
