### SET GREEN SIGNAL FOR AMERICA!

Congressman Samuel B. Pettengill, a leading congres sional authority on transportation affairs, offers an 11-point program for solving the railroad problem. It is a sensible practical and clear-cut approach to this vexing question.

Mr. Pettengill's program includes: Stop governmen competition with private carriers and sell the federal barge line; stop taxing the railroads to aid their competitors; repeal the long-and-short-haul clause of the transportation act, in order to make it possible for the railroads to offer rates as low as those offered by their competitors; stop subsidizing stal shipping; restore to railroad manag ements the right to really manage the properties; give rate-making authority over all forms of transport to one non-political agency next in dignity, independence and importance to the supreme court; let railway management work out fair con-

supreme court; let railway management work out fair consolidation programs, subject to the veto of the Interstate Commerce commission; stop frightening investors with nonsensical talk of repudiation of contracts by solvent roads. Who can object to such common sense relief?

This briefs the main points of the program. It asks nothing for the railroads that is not in public interest, and that is not justified by the most elementray principles of fairness and reeason. And what would it accomplish? To quote Mr. Pettengill directly, "The mere adoption of this old-fashioned program of 'equal rights for all, special privileges to none' in my judgment... would do more than any possible pump-priming, court-packing or government reorganization to rebuild our lost prosperity. If we clear the track for the to rebuild our lost prosperity. If we clear the track for the Iron Horse we set the signal for America."
